Doubtless the general public—and even the majority of those connected with the book-binding trade—are unaware that the British Museum Library is well equipped to meet its own requirements in the matter of the binding and repairing of books. The fact is not a very patent one, as the Museum bindery is modestly tucked away behind the main block of buildings, and is accessible only to those "on business." But, though unobtrusive, this bindery is a fairly extensive one, and the need for it will be realised when it is stated that the British Museum Library contains an ever-growing collection of some four million bound volumes (apart from the smaller publications, which bring the total number of items up to about six millions), and that a great many of these require to be bound or repaired when first admitted, whilst the ravages of wear and accident at this much-used library provide a constant additional demand for the application of the binder's art. Once a publication is delivered to the British Museum Library, it is prohibited by rule from leaving the premises thereafter; thus any bindery attention required, either initially or subsequently, has to be provided on the spot. All the newspapers published throughout the country come to the Library regularly, and these are all bound into volumes. A total of somewhere about four hundred volumes of newspapers have to be bound every month, as well as some eight or nine hundred books.

The British Museum Bindery is a private branch of the house of Messrs. Eyre and Spottiswoode, the King's printers, and is under the management of Mr. W. A. Godin,

J.P., by whose courtesy a representative of the *British and Colonial Printer and Stationer* was privileged the other day to look round this little-known establishment.

As sound workmanship is in this case the primary requirement, one is not surprised to find that but little machinery is used, hand work being employed as far as possible throughout. Bookbinding materials are also chosen with an eye mainly to their wearing qualities, everything, from the substantial coverings and boards down to the first quality flax thread and hemp, being chosen for durability.

With regard to covering materials, it is interesting to note that specific experiments and long experience at the Museum Library have resulted in the conviction that for high-quality library bindings there is nothing to beat Cape goat leather, and this, dressed in different ways, is the only leather used. Every piece of leather supplied has to bear a guarantee that it is pure sumach tanned and free from mineral acids and all deleterious substances. Linen buckram and a good quality of cloth are also utilised for less important volumes, but all valuable and well used books are bound in leather. Workmanship, like materials, has to be of the best. Hand sewing, on cords, is the general practice, and the mere "casing-in" of books is rigidly eschewed.

The art of repairing damaged books is, of course, in frequent demand at this bindery, and some of the most highly skilled craftsmen in the trade are employed in the mending of valuable specimens. And very wonderful some of their work is. Examples can be

shown—for instance rare Persian or Arabic manuscript books excavated from far Eastern deserts—which were received at the Library in most pitiful plight, some with a good quarter of their substance eaten away by insects, or otherwise so damaged as to look fit only for the rubbish heap, but which, under the hand of the expert book-surgeon, have patiently, page by page, been made whole again, so as now to give little or no indication of the disaster that had previously befallen them.

Many extremely rare and valuable books are, of course, handled in this bindery, some of them being quite unique and of immense historical interest. One example of an irreplaceable volume now passing through the hands of the Museum binders—its market value runs well into the thousands—is the Log Book of H.M.S. "Victory," covering the period from September 19th, 1805, to January 15th, 1806, "Kept by Thomas Atkinson, Master," and containing brief entries regarding the events of Nelson's last battle, with the record of the death of the famous Admiral. This unique volume, preserved in the original sail-cloth wrapper, is now being enclosed—sail-cloth and all—in a substantial and handsome morocco binding.

That is but one example of numerous treasures of our great national repository which receive the attention of the craftsmen of the British Museum bindery. Surely a noble work is theirs! It is their high office to preserve for the benefit of present and future generations the contents of the most important of all the great libraries of the world.

Notes and News.

The Bookbinder's Docket.

Our note on the bookbinder's docket went without official comment, as we naturally expected it would. Unofficially, however, it has received a fair amount of attention and in at least one quarter has formed the basis for platform surveyance. There is movement in book-binding circles if not at headquarters, and the feeling is growing stronger that there should be no further dallying with a matter which is at the root of much of the price-cutting that is going on. It is sometimes claimed that even if time dockets were agreed to throughout the whole of the binding trade there would not be a great many houses ready to exercise the privilege. In fact this has already been borne out in practice in towns where the use of dockets is allowed. There are non-progressive houses in every town in the country that neither want dockets nor know how to use them. For the moment that is their own affair, many of them regard a low wage as the only means of making bookbinding profitable. It is the houses that prefer to run their business on organised and properly conducted lines that find the lack of the time docket a breaking point in their departmental organisation. And a salient fact worth careful deliberation by Binding Union officials is this: that if they will observe the character of the houses which really do desire to make use of time dockets in the binding room, they will find that they are among the most respected and that they have the welfare of trade unionism more at heart than the great majority of the rule-of-thumb establishments which only look for profits when the auditor comes.

Business Revival Slow.

The bookbinding trade has not properly wakened up yet. Business is a little better, no doubt, but unemployment is still the most disturbing factor in the trade. There are few large contracts about and very little Government work in hand. Banks are issuing the best orders but even there the policy of economy prevails in almost every instance. Practically all stationery clerks are working under set orders to practice strict economy in buying.

The Loose-Leaf Boom.

The bookbinding industry will have to look well to its laurels in coming years. Practically every wholesale stationery house is already handling or is contemplating loose-leaf ledgers and the multitudinous auxiliaries that go in with loose leaf and system equipment. The typewriter and modern methods of duplicating and filing have effectively damped the letter copying book and duplicate book trade. Ring books and patent cases have made inroads into the memo and pocket book trade. Now we have an influx of new styles of ledger mechanisms to combat. There is nothing like a bound book as yet, but as yet the loose-leaf ledger is only in its infancy.

The Board Market.

Strawboards are hardening a little and stocks in the country are at a low ebb. It is difficult to secure small supplies at less than £8 10s. per ton, light weights, unlined, and there is no prospect of any lowering in price for some time to come. Millboards are steady, varying in price from £25 for low

grade foreign boards to £50 per ton for hand-made English blackboards. Wood pulp boards are quoted £20 per ton, carriage forward from port.

Glues and Gold Leaf.

Glues continue to be steady, and to-day's values run from 45s. per cwt. for seconds, bone glues up to 60s. per cwt. for first quality hide glues, and the latter are always worth the extra money for good work. In pastes the keen competition between wet and dry varieties has served a good purpose by forcing prices down. Gold leaf remains firm, and there is not much danger of a tariff lifting the prices up.

Book-Covering Materials.

We are still waiting to hear of a reduction in the price of book cloths and linen buckrams, but so far there seems no sign of the manufacturers giving any concessions. The demand is exceedingly low, as well it might be, and there are not likely to be any commitments on a large scale until the price drops. When the fall comes it will come suddenly and without warning, as is the way with the manufacturers of these commodities. Meantime there is a fairly good demand for low-grade or mixed buckram, which can be secured at about 2s. 5d. per yard. Fabrics have become easier just recently, boxmakers' white calico is quoted 4½d. per yard, bookbinders' common lining calico 5d., and fine pasting calico 5½d. Some grades of patent leather cloths have fallen about 3d. per yard and American leathers have also eased slightly. Duxeen is in good demand and is very highly spoken of by manufacturing stationers.

Marble Papers.

Marble papers are much cheaper judging from recent quotations for hand-marbled papers. Spanish and Storment is offered at 20s. per ream copy, 25s. per ream medium, 27s. 6d. per ream double-cap, and 30s. per ream royal. Nonpareil is quoted 32s. 6d. per ream copy and 50s. per ream double-cap. There is so little difference between to-day's prices for hand-marbled against machine-printed varieties that the latter are almost out of consideration.

Leathers.

Leather prices remain unaltered from our last list and there is no prospect of any material difference. The market is dull and merchants are anxiously trying to stimulate business by offering specially attractive parcels. We note that Russells of Hitchin have commenced to manufacture basils and skivers in addition to parchments and forils for which they have long held an enviable reputation.

Bindery Supplies for Canada.

Drawing attention to the opportunities which the Canadian market could offer to British manufacturers, a correspondent indicates the bookbinding industry as being one section in which the development of British overseas trade could be stimulated if sufficient attention were paid to it. Canadian buyers, however, complain of the difficulty of getting British manufacturers to accept orders, and of greatly delayed deliveries in cases where orders have been accepted. In regard to book cloth it is said that during the war the supply of British book cloth was cut off and Canadian users had to depend on American book cloth, which they found inferior in all respects, as it curled up and no amount of treatment would keep it flat, whereas the English book cover keeps flat and in proper condition all the time. It is now stated that it is impossible to buy this cloth in Toronto, although repeated requests have been made for it. We have no details of the particular case referred to, but it would seem at any rate to indicate that British suppliers might keep a keener eye on Canadian possibilities.

A Bookbinder's Challenge.

It would be interesting to know what response was forthcoming to an American bookbinder's recent claim to be the champion practical binder in the trade. A challenge to any bookbinder in the country to equal or better his record was issued by Mr. G. A. Kowalker, of Boston, who claims the championship of his trade. In five hours, Mr. Kowalker is said to have bound and trimmed 17 volumes of thicknesses ranging from 240 to 750 pages in nine different sizes and varieties of covers. The average was 17½ minutes to the book and included sheepskin, Russia, morocco, cloth and combinations.

Various Bearings of Valuation.

Mr. Frank Colebrook, F.A.I., addressed a meeting of the Derby and Chesterfield Master Printers' Association, at the Jacobean Cafe, Derby, on Monday of last week, and took as his subject the bearings of valuation upon insurance, costing, income tax and local rating. Mr. J. H. Simpson (Messrs. J. W. Simpson and Sons, Ltd.), presided. The company also included Councillor Hudson (Messrs. Bacon and Hudson), Messrs. C. E. Evans and E. Lucas (Messrs. Bemrose's), W. J. White, J. Hill, H. Harpur, B. W. Jennesson, etc.

Mr. Colebrook emphasised several sometimes not quite realised facts, as for instance that an insurance policy was simply a contract of indemnity. If actual insurance equalled the actual loss, he said, the printer was all right. If it exceeded the actual loss, on a total burn-out, the printer found he had simply paid some premium money for nothing. If he had too much insurance in one division, it would not help him in a division in which he had insured enough to meet the actual loss. Regarding the average clause, he thought if it were generally inserted, it would tend to plants being fully insured instead of three-parts insured as now was too often the case, and fire office competition might eventuate in full insurance being obtained for little, if any, more than was paid for the present too general three-parts insurance. But the danger involved in the average clause—that a man might be unconsciously and substantially his own insurer, and the dangers in literal stringent warranties—must be always borne in mind. He thought printers were often really paying for independent valuations without having those valuations, because, in default of the guidance they would furnish, many printers penalised themselves every day in some degree in their costing, and failed to build up a correct plant replacement fund. Further, they were not able to state their case as convincingly as they might before the Income-Tax Surveyor when discussing depreciation. He dealt with the ease with which annual valuation revisions could be made, once values had been carefully recorded; with the liability for customers' property; with the problems of the value of machinery misbought or in excess of needs; with the value of capital over and above what should have sufficed; with the general attitude of fire offices. One's depreciation account could be just as truly, and more pleasantly, called a plant reinstatement account. The capital needed for the difference between the actual fire loss figure and the new prices of the items destroyed could now be provided by insurance. Balance-sheet and probate values were also considered. The attitude of income-tax surveyors regarding plant values when cotton factories had changed hands by sale to strangers, or by transfer from private ownership to limited company ownership was discussed. There seemed a hint for printers derivable from this. Mr. Colebrook finally dealt briefly with the question of the rating of machinery. Printers must consider whether they should not help the private members of Parliament who were trying to get through a short Act giving effect to the majority recommendation of the Royal Commission upon

local taxation, viz., that only such machinery should be rated as was part of the hereditament or was such as could not be detached without injuring the hereditament.

Mr. Evans (Messrs. Bemrose's) said the subject had seemed to portend a rather dull talk, but it was very interestingly and indeed racily and humorously dealt with. He had acquired information on many points. He moved their thanks to Mr. Colebrook, and Mr. Hudson, seconding, said Mr. Colebrook was a born lecturer, and that another time those present would, he felt sure, all come again and would bring others. A number of questions were put and answered.

Important Fusion.

Wiggins, Teape and Alex. Pirie.

The directors of Wiggins, Teape and Co (1919), Ltd., and Alex. Pirie and Sons, Ltd., announce that a provisional agreement has been signed for a fusion of their interests. Shareholders will receive details of the proposals in due course.

Alex. Pirie and Sons carry on the business of papermakers at Stoneywood Works, Bucksburn, Aberdeenshire, and Wiggins, Teape and Co. at Withnell Fold, Lancs, at Dover, at Wooburn Green, Bucks, and at mills near Cullompton, Devon.

Alex. Pirie was established in 1770 and incorporated as a company in 1898. It has interests in France and South Africa. The authorised and issued capital is £1,100,000, and from 1918 to 1920 a dividend of 8 per cent. was paid on the ordinary shares.

Wiggins, Teape dates back to 1761, became a company in 1890, and was re-organised and extended in 1919. The authorised capital is £1,500,000, of which £1,450,000 has been issued and paid up. For the year 1920 the ordinary received 5 per cent.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

UNITED KINGDOM.

A London firm of general agents and shippers desire to get into touch with a United Kingdom firm in a position to supply vignette pouches, shading and general engraving tools, for the printing trade. (Reference No. 324.)

DIVIDENDS AND REPORTS.

INTERNATIONAL LINOTYPE.—International Linotype recommend final dividend of 3 $\frac{1}{2}$ per cent., making 6 per cent., against 6 $\frac{1}{2}$ per cent. previous year.

THE "FINANCIAL NEWS."—For 1921 the profits amounted to £13,436 (against £57,475 for 1920), to which is added £16,842 brought in. Owing to the existing depression of trade and commerce and the uncertainty of the industrial outlook, the directors do not think it opportune to recommend the payment of a dividend on the ordinary shares, and advise that the whole of the available balance of £22,901 remaining after payment of the preference dividends should be carried forward (subject to national taxation). For 1920 the ordinary shares received a dividend of 20 per cent., less tax.

LAMSON PARAGON SUPPLY Co., LTD.—Profits of Lamson Paragon Supply Co. for year ended January 31st were £84,354, plus £19,784 brought in, making £104,139. After providing £10,285 for depreciation, reserve and directors fees, £10,396 for 5 $\frac{1}{2}$ per cent. preference dividend, £15,857 for new 10 per cent. preference dividend, directors propose transfer of £10,000 to investments and loans suspense account, and recommend dividend for year of 10 per cent. on ordinary shares, carrying forward £17,601.

ANGLO-NEWFOUNDLAND DEVELOPMENT Co., LTD.—Profit of Anglo-Newfoundland Development Co. for year ended August 31st, less depreciation, interest charges, etc., was £90,190. Directors have written £20,000 out of profits off cost of issuing £800,000 Guaranteed Second Mortgage Debentures. After providing for sinking fund, and including £195,661 brought in, there remains credit balance of £250,983.

NEW COMPANIES.

O. F. BATES, LTD.—Capital £50,000, in £1 shares; to adopt an agreement with O. F. Bates, and to carry on the business of newspaper proprietors and publishers, printers, stationers, advertising agents, etc. Private company. Subscribers: O. F. Bates and F. J. Broomhead. Registered office: 71, Fleet-street, E.C.

SALISBURY TIMES Co., LTD.—Capital £8,000; to adopt an agreement with the proprietors of the Salisbury Times newspaper for the acquisition of the business carried on by the Salisbury Times Co., and to carry on the business of printers, publishers and circulators of newspapers or other publications, etc. Private company. First directors: H. G. Gregory,

M. F. Batts, H. Lapham, H. C. Moody, and J. C. Hudson. Registered office: Dews-road, Salisbury.

UNIVERSITY PRESS OF LIVERPOOL, LTD.—Capital £5,000; to adopt an agreement between the University Press of Liverpool (in liquidation) of the first part, L. P. Abercrombie of the second part, the University of Liverpool of the third part, Hodder and Stoughton of the fourth part, and the company of the fifth part, to produce, publish and sell and become proprietors and publishers of newspapers, journals, reports, transactions, magazines, books, documents, papers, artistic productions, and other works and printed matters, etc. Private company. Permanent directors: Sir Ernest Hodder-Williams, G.V.O., R. P. Hodder-Williams, C. K. Webster, C. S. Jones, and P. H. G. Boswell.

GUNSTON, GREEN AND SIMPSON, LTD.—Capital £5,000; to adopt an agreement with A. J. D. Gunston, H. M. Green and A. H. Simpson for the acquisition of the business of designers and printers carried on at 61, Wilson-street, E.C., and at Manchester, as "Gunston, Green and Simpson," and to carry on the business of designers, printers and publishers, designers of advertisements, machine, letterpress, copperplate, lithographic, offset and other printers, engravers, artists, etc. Private company. First directors: A. J. D. Gunston, H. M. Green, and A. H. Simpson. Registered office: 61, Wilson-street, E.C.

F. H. CASTLE AND Co., LTD.—Capital £3,000; to acquire the business of printers, publishers and stationers carried on by F. H. Castle and Clara Castle at 131, High-street, Thame, Oxford, as "F. H. Castle." Private company. Permanent directors: J. G. Filleul, F. H. Castle, Clara Castle and A. J. Castle. Registered office: 131, High-street, Thame, Oxon.

ASTON PRESS, LTD.—Capital £2,000; printers, lithographers, bookbinders, rulers, marblers, wholesale or retail stationers and dealers in fancy goods, paper merchants, etc. Private company. First directors: W. H. Lloyd, H. Heath and H. P. L. Biggs. Registered office: 12, Aston Cross, Birmingham.

CHARLES BRADY AND Co., LTD.—Capital £1,500; to acquire the business carried on at 195, Strand, W.C., as the "St. Paul's Printing Co." and to carry on the business of printers, stationers, letterpress printers, lithographers, etc. Private company. First directors: C. P. Brady and W. Y. Moore. Registered office: 195, Strand, W.C.2.

SWANN AND IBBOTT, LTD.—Capital £500; printers, stationers, printers' and stationers' manufacturers, advertisers, bookbinders and general agents, etc. Private company. Life directors: A. J. Ibbott and T. F. Swann. Registered office: Ram yard, Bedford.

PANDEAN, LTD.—Capital £100, in £1 shares; music publishers, etc. Private company. First directors: Mrs. Hatie King-Reavis and T. J. McInerney. Registered office: Prince's-chambers, Coventry-street, W.1.

LAMSON PARAGON (INDIA), LTD.—Capital £20,000; to acquire the business carried on by the Lamson Paragon Supply Co., in India and Ceylon, and to carry on the business of manufacturers of and dealers in check books, check slips, advertising apparatus, shop fixtures, fittings and furniture, pneumatic tubes, etc. Private company. First directors: J. M. Evans and R. Graham. Registered office: 132, Cheapside, E.C.

FOULKES AND EVANS, LTD.—Capital £1,000; to take over the business of Foulkes and Evans, printers and stationers of Liverpool. Private company. First directors: E. D. Kendall and W. T. Kendall. Registered office: 9, Vauxhall-road, Liverpool.

ROSIER, MORGAN AND HIGGS, LTD.—Capital £1,500; booksellers, printers, publishers, bookbinders, stationers, music and fancy goods dealers, etc., and to acquire the business carried on by R. J. Rosier at 1a, Mansel-street, Swansea. Private company. First

directors: R. J. Rosier, D. H. Morgan and D. J. Higgs. Registered office: 1a, Mansel-street, Swansea.

MASONIC RECORD, LTD.—Capital £6,000; to adopt an agreement with H. Davies and to carry on the business of publishers and printers of the Masonic Record, and any other masonic works and periodicals, etc. Private company. First directors: H. Davies, L. Stuart Mills and H. Shaylor. Registered office: Haslett House, Southampton-buildings, E.C.

RAND ADVERTISING AND SALES SERVICE, LTD.—Capital £2,000. Private company. First directors: W. J. Rand and P. Macnamara. Registered office: Barham House, Handel-street, W.C.

W. S. AND M. AUSTIN, LTD.—Capital £2,000; manufacturers of boxes of cardboard, wood, metal, etc. Private company. Subscribers: W. S. Austin, Maude A. Austin and F. J. Stokoe. First directors: W. S. Austin and J. H. Williams.

MACHIN AND KINGSLEY (1922), LTD.—Capital £50,000; to take over the business of paper, cotton, wood and general merchants, manufacturers, importers and exporters, carried on by Machin and Kingsley, Ltd. Private company. Permanent directors: P. J. Machin, A. C. Machin and A. R. Kingsley. Registered office: Hare-court, 62, Aldersgate-street, E.C.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

JOHN WILLIAMSON Co., LTD. (printers, publishers, newspaper proprietors, etc., London).—Mortgage on 42, Gerrard-street, W., dated March 17th, 1922, to secure all moneys due or to become due from company to L.J.C. and M. Bank.

HILL AND AINSWORTH, LTD. (printers, stationers, etc.).—Mortgage dated March 18th, 1922, to secure £1,000, charged on certain land and premises in Stoke-on-Trent. Holders: Stoke-on-Trent Permanent Building Society.

"MID-CUMBERLAND AND NORTH WESTMORLAND HERALD" NEWSPAPER AND PRINTING Co., LTD.—Mortgage dated January 25th, 1922, to secure £2,100, charged on certain buildings and land in King-street, Penrith. Holders: Penrith Building Society.

E. AND F. N. SPON, LTD. (publishers, etc., London).—Particulars of £3,000 debentures, authorised November 15th, 1921; present issue, £1,000; charged on the company's undertaking and property, present and future, including uncalled capital.

DARWEN PAPER MILL Co., LTD.—Satisfaction in full (a) on August 30th, 1920, of mortgage dated July 11th, 1910, securing £20,000, and further advances not exceeding £35,000, and (b) on March 10th, 1922, of mortgage dated December 12th, 1912, securing £20,000 and further advances not exceeding £25,000.

STANDARD CATALOGUE Co., LTD.—Particulars of £50,000 "Engineers' Debentures" authorised February 24th, 1922; present issue £250; charged on company's undertaking and property, present and future, including uncalled capital.

KELLNER - PARTINGTON PAPER PULP Co., LTD.—A trust deed dated March 15th, 1922, to secure £1,500,000 7 $\frac{1}{2}$ per cent. debenture stock, repayable at 102 per cent. Property charged: Lands, mills, factories, works, buildings, forests, water rights and other real property in Norway and Austria, and all other real property belonging to the company wherever situate, together with all buildings, erections, works, plant and machinery thereon and the company's undertaking and property, present and future, including uncalled capital. Trustees: Law Debenture Corporation, Ltd. (The stock was sold by the company at the price of 90 $\frac{1}{2}$ per cent.)

BINDERS TO THE PRINTING TRADE.

PRINTERS who have the facilities for folding, sewing and casing up, can be supplied with cases made in Leather, Rexine, Pluviusin, Imitation Leather, Cloth, or any other material, blocked or embossed in Gold, Imitation Gold, White or Coloured Foil Leaf, ink in any colours.

Our staff consists of more than 300 capable workers, provided with the most up-to-date machinery

We shall be pleased to submit samples for Trade Catalogues, etc.

RED LION PASSAGE, FLEET ST., E.C.4

Daily Telegraph Mills.

Retirement of Mr. John Greig.

After service with the *Daily Telegraph* Paper Mills at Dartford extending over a period of 55 years, Mr. John Greig, the manager, retired at the end of last week. Mr. Greig in 1869 went to Dartford with his father (Mr. George Greig), who took over the management of the concern when it came into the hands of the *Daily Telegraph*. At a subsequent date, Mr. George Greig was succeeded in the management by his son, William, who 22 years ago passed on the control to his brother, Mr. John Greig, who is now retiring.

MR. JOHN GREIG.

Previous to accompanying his father to Dartford, Mr. John Greig had considerable experience in paper mills in various parts of the country, first in Wales and subsequently in Lancashire and Yorkshire. A tall, striking figure of a Scotsman, Mr. John Greig is of a singularly retiring disposition, but nevertheless he has proved himself a very capable paper mill manager. During his management of the *Daily Telegraph* Mills, these have been constantly brought up-to-date and rendered ever more efficient in the manufacture, first of news-print, and afterwards of various classes of printings and bonds.

Since the *Daily Telegraph* undertook the somewhat venturesome experiment of manufacturing paper for its own consumption, extensive developments have taken place. There are five large machines installed at the mills and the whole plant occupies an area of ten acres. Mr. John Greig has himself been responsible for many of the improvements which have been adopted in connection with the manufacture of paper. In conjunction with the engineer, Mr. Alexander Henderson, another robust Scotsman, he was responsible for various useful contrivances, for which patents were obtained. One of them was a spray cutting apparatus, by means of which a web of paper on the top of the wire was cut so as to form a point for leading the paper from the wire cloth to the first press felt. Another patent concerned reeling-up gear, which enabled the reels of paper to be turned round and changed without the expenditure of physical effort, ensuring at the same time hard winding and consequent heavy webs. A recent installation at the mills which has helped towards efficiency has been the equipping of an overhead gangway for the transportation of pulp from the wharf right into the machine-room.

In recent years the mills, as already indicated, have gone far beyond the scope of news-print, and are now manufacturing various classes of paper for the general market. The products now include S.C. printings, cream wove, glazed imitation parchment, tinted banks and cartridges. All are excellent grades of paper, and are meeting with a big demand through the mill agents, Messrs. C. O'Leary Mears and Co., of 26, Wardrobe-chambers, 146, Queen Victoria-street.

Interesting Paper Action.

Question of Continuous Revolving Credit of £50,000 re Printers' Exchange.

An action was heard before Mr. Justice Bailhache in the Commercial Court of the King's Bench Division last week, in which Nordskog and Co., Ltd., paper exporters and merchants, of Christiania, Norway, sued the National Bank, Ltd., Old Broad-street, E.C., to recover damages for an alleged breach of contract by the bank in respect of a letter of credit that was issued in connection with the financing of large shipments of paper by the plaintiffs from Drammen to the United Kingdom and Ireland to the orders of an organisation called The Printers' Exchange in London. It appeared that there were contracts amounting to 5,650 tons of paper and heavy shipments were made, but the plaintiffs said that the defendants eventually cancelled the credit, and the result was plaintiffs had left on their hands quantities of paper which they had had to store and also pay insurance charges upon, and they claimed damages based on the difference between the market price and the original contract price. The plaintiffs said that they were given to understand before they agreed to these heavy commitments to ship paper that the credit would be a continuous revolving credit and they relied on that warranty. The defendants said that they never agreed to open any credit other than one for £50,000, which was in the course of time exhausted, and they denied that they were under any liability to the plaintiffs.

Judgment.

The hearing of the action was concluded on the 29th, ult., when Mr. Justice Bailhache gave judgment.

In an exhaustive review of all the facts and the evidence, his Lordship said it was hard to him to understand how Mr. Nordskog, who had received the original official letter of credit through the proper channels, could have been satisfied with a cable received from the agents in London saying that the branch manager in the Strand had confirmed that this was really a continuous running credit and not merely one for £50,000. In his view, if Mr. Convin, the manager of defendants' Strand branch, gave any assurance at all to the plaintiffs' agent, it related only to the financing of the first two contracts and not the third. Nor could he find that Mr. Convin had any authority to say that this was a continuous credit. He was satisfied it was realised by all concerned that Mr. Convin had no authority to bind the bank. He held the action failed, and gave judgment for defendants with costs.

Papermakers' Technical Library.

Mr. Lewis Evans, the ex-president of the Papermakers' Association, has made another contribution to the technical library which Mr. A. W. Foster, the secretary of the Papermakers' Association, is getting together. His last gift is "Timperley's Encyclopædia of Literary and Typographical Anecdote," published in 1842. The work represents a history of printing and papermaking from the earliest times to the date of publication. The author, who was born about the year 1795, was an old Manchester Grammar School boy and served in the army from 1810 to 1815, when he was discharged in consequence of wounds received at the Battle of Waterloo. He then appears to have started as an engraver and in 1821 was apprenticed as letterpress printer to the proprietor of the *Northampton Mercury*. The "Encyclopædia," which is a very stout volume, is founded on lectures given in 1828 and was published by Henry G. Bone. The book plates of Sir John Evans and Dr. Arthur Evans appear inside the cover.

New Inventions.

Sheet-Feeding Mechanism.

Mr. H. J. Salmon has patented an invention by which sheets are fed to printing and like machines by a reciprocating drum *h* which is mounted in a carriage *i* and moved to and fro over a pile of sheets, the drum being connected to a vacuum pump *l* by a telescopic connection *v* and formed with ports *w* which lift the top sheet and curl it around the drum, the separated sheet being subsequently held to the drum by grippers *6* which are mounted on the drum and hold the sheet on the drum until it is in a position to be seized by forwarding tapes *30*. The pile of sheets is supported on a trolley *b* carried by supports *c* operated by screws *d* geared together and capable of operation by a hand lever *g*, or automatically by a pawl oscillated by the action of an adjustable feeler *15*, carried by shaft of the drum *h*, on a lever *16* controlled by a spring *21* and connected by bevel gears to the pawl-carrying arm. The drum *h* is

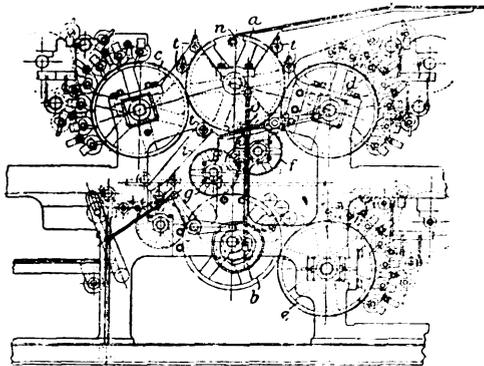

mounted in a carriage *i* reciprocated by crank and lever mechanism *o, p, q, r*, and guided by rollers *j* which move over stepped side frames *k* and prevent twisting movements of the drum. At the commencement of each feed the drum *h* is in the position shown at the right of Fig. 3, the suction ports *w* being open to the inside of the drum, and the grippers *6* open. As the drum moves to the left it rotates counter-clockwise, and after rotating through half a right-angle a freely-mounted valve *x* moves by gravity to cover the ports *w* and cut these off from the vacuum, the gripper *6* being previously closed on the sheet by a stationary groove cam *10* acting on an eccentric disk *11* on the gripper shaft. The valve *x* is limited in its movements by stops *y, z*. As the top sheet is rolled upon the drum *h*, the remaining sheets are held by grippers *23* on a spring-controlled spindle *24* which is rotated by the drum carriage to move the grippers from the pile as the drum carriage returns to the position shown in the right of Fig. 3. The drum is oscillated by a gear *m* and rack *n*. In a modification, two drums as *h* feed sheets alternately from different piles to a common forwarding mechanism, so that the speed is greater than with one pile and one feeding mechanism.

Rotary Printing Machines.

A rotary machine of the kind having an impression cylinder, divided into a number of sectors corresponding to the number of times each sheet is to be printed on, and a transfer drum or drums for transferring the sheet, after it is printed on, from one sector to the next in rear is provided with a second impression cylinder for perfecting the sheets in one or more colours and with a transfer drum for transferring the sheet to the second im-

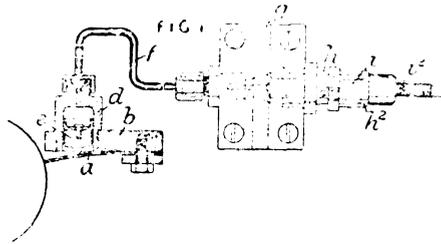

pression cylinder from a transfer drum of the first impression cylinder. As shown in sketch an impression cylinder *a* is formed with two sectors provided with grippers *u, v*, and co-operating respectively with printing cylinders *c, d*. A sheet fed to the grippers *u* and printed by the cylinder *c* may be delivered by a chain *i* printed on one side only, or may be taken by a transfer drum *f* and transferred to the grippers *v* and printed twice on the same side and delivered by the chain *i*. The sheet may

pass from the drum *f* to a second transfer cylinder *g*, and thence to a second impression cylinder *b* co-acting with a printing cylinder *e*. The cylinder *a* may be formed with more than two sectors and be used to print several colours on one side of a sheet. In a modification, the machine is arranged to print more than one impression on one side of a sheet, which is then transferred to a second impression cylinder and has one or more impressions printed on the opposite side. This modification differs from the first in that one or more transfer drum is arranged in conjunction with the cylinder *a*. The printing surfaces may be of any kind, e.g., lithograph or offset. Retaining rolls *t* co-acting with the cylinder *a* to keep the sheet upon it. The patentee is Mr. H. J. Salmon.

Inking Apparatus.

In this invention the duct blade of an inking apparatus is adjusted at various points of its length by fluid pressure means operated from a control station. As shown in Fig. 1, the blade *a* is secured to a support *b*, on which are mounted a number of cylinders *d* containing pistons *e* in contact with the blade. The cylinders are connected by pipes *f* to a hollow support *g*, to which fluid under pressure, which is preferably oil, but may be water, air, gas or ink such as that used in the duct, is

supplied from the tank or pump. When the cylinders *d* and pipes *f* are full of the fluid, communication with the supply is cut off by means of valves formed by the conical ends of cylinders *h* screwed into the support *g*. The cylinders *h* contain plungers *i*, having extensions *i²* screwed through the cylinder covers *h²*, and adapted to receive an operating key, by which the pressure in the cylinders *d* may be adjusted as required. The cylinders *d* may be fitted with pressure releasing valves, and, when ink is employed as the pressure fluid, these valves may communicate with the duct. In a modification, the plungers *i* are replaced by diaphragms, and the pistons *e* are actuated through diaphragms. An indicating plate, which may be the side of the support *g*, is provided at the control station to indicate to which parts of the blade the various cylinders *h* relate. The inventors are Messrs. J. H. Butler and T. E. Phythian.

Printing Ink: Its Manufacture and Uses.

By E. H. McLEOD (Chemist,
Messrs. Ault and Wiborg, London).

It is an axiom of all trades that a workman should be familiar with his tools, and that of printing is no exception. Every printer should know the materials he makes use of, and of all the materials entering into the production of good printing none is of more importance than the ink.

The manufacturing of printing inks, originally carried out by the printers themselves, has gradually become so complicated and so specialised that it became absolutely necessary to separate it from that of printing in order to insure economical large scale production and careful study of the best and cheapest methods of manufacture. The present day methods used are the result of close co-operation between the printers and specialists who have devoted their lives to a study of the requirements of the printing industry. These requirements are so varied and complex that it is difficult to know where to begin to describe them. The most logical division of printing is into the three general classes of letterpress (from raised type), litho (from flat surfaces), and intaglio (from an engraved or etched surface), and the inks made for each of the above processes differ considerably from one another.

Under the above headings come many special requirements, such as inks to withstand hot paraffin wax without bleeding, alcohol proof inks for whisky and chemist labels, soap wrapper inks to withstand alkali, poster inks for outdoor work to withstand the action of sun, rain and weather, tin printing inks to withstand stoving, inks for transparent signs, for rubber to withstand the vulcanisation process, and many other peculiar uses.

In view of the above, it can well be realised that the life of a printing ink maker is not a bed of roses, and that one problem after another duly presents itself to be overcome. With this great diversity of requirements it might be interesting to know that about five hundred different raw materials are used by an up-to-date manufacturer making a general line of inks.

Printing ink consists essentially of a pigment and a vehicle intimately mixed and thoroughly ground to a high degree of fineness. The accompanying diagram shows the various ingredients used. Printing inks are composed of some or all of the following: Pigments, compounds, dyes and vehicles. In the technical sense a pigment is a material insoluble in water or oil, which is suitable by reason of its softness to be used in the manufacture of printing ink. A dye, on the other hand, is a substance which is soluble either in oil or

water. A vehicle is any material which is used as a medium for carrying the pigment from the block or plate to the paper, and generally is an oil or oil varnish, but sometimes consists of water or a water varnish, for example, in the case of water photogravure inks.

The Pigments Used.

Pigments may be divided into two classes, the organic and the inorganic. The organic

Coal tar dyes form the second most important of all classes. The dyes are derived from coal tar by the process of distillation and other chemical processes, and the pigments are made from these dyes by precipitation, generally with metallic salts, such as alum, etc. These colours in general are not so permanent to light as some of the other classes, but there are exceptions, and permanency can be obtained. In general, these colours may

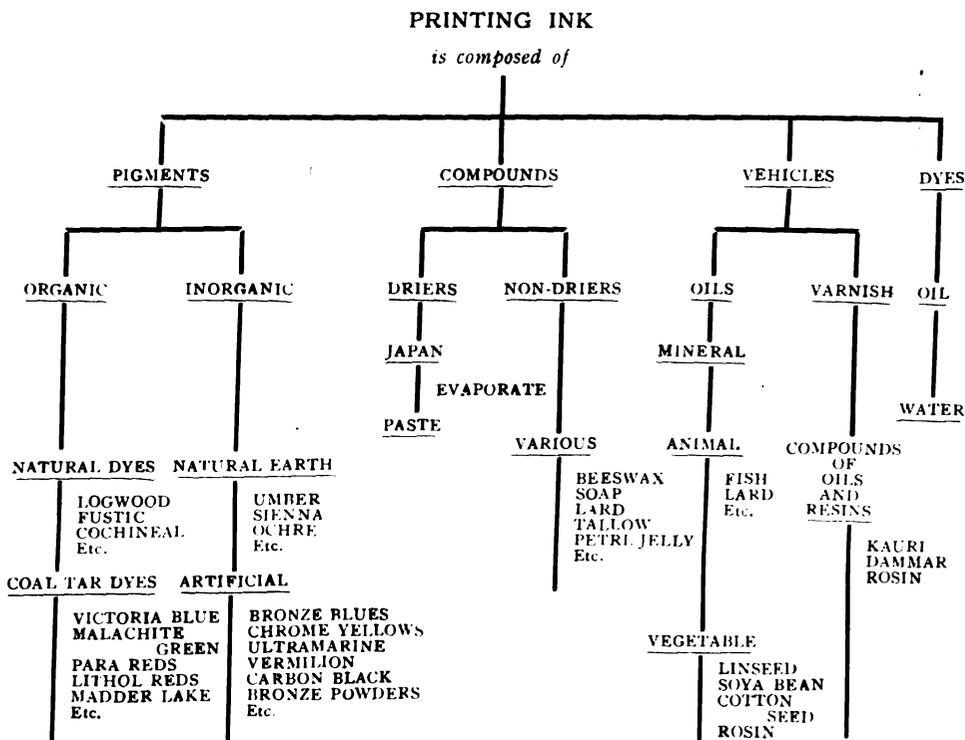

Chart showing the Constituent Parts of Printing Inks.

pigments being compounds of carbon and the inorganic all other pigments. The organic pigments may again be divided into two sub-divisions, those from natural dyes and those from coal tar dyes.

Natural dyes were formerly very widely used but are of practically no importance today, being the least important of the four classes of pigments. They are dull and generally are more expensive for a given strength than any of the other classes.

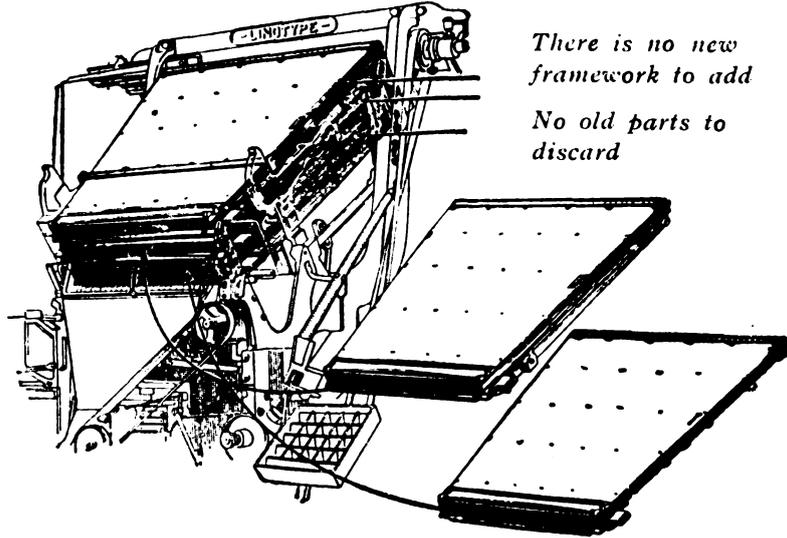

be divided into three classes: Derivatives of benzene, or the single ring; compounds of naphthalene, the double ring; and anthracene, which is the triple ring. Brightness is usually in inverse proportion to permanency, and the brightest colours in this class are generally fugitive.

Natural earth colours rank third in importance. These colours have rather a limited use in the manufacture of printing inks.

The artificial inorganic colours are the

Lecture delivered to St. Bride Printing School students and the Printers' Managers and Overseers' (Parent) Association.

ANY OPERATOR CAN CHANGE A MODERN ONE-MAGAZINE LINOTYPE INTO A TWO OR THREE-MAGAZINE MACHINE IN LESS THAN HALF AN HOUR

There is no new framework to add

No old parts to discard

The Linotype can be purchased with only one magazine if so desired. Two more magazines can be added in your own composing room at any time. This plan enables any printer to own the Linotype he needs. Even when sold with only one magazine,

every machine is built and tested with all three. When you buy a one or two magazine Linotype, you buy a three-magazine machine with part of the equipment removed. Then when you convert it, you simply slip the removed parts back into place.

This is only one of the many advantages you get by adopting the Linotype way

In REELS or REAMS.

most important of all. Three-fourths of all pigments used in printing ink belong to this class.

Bronze blues are mixtures of ferro and ferrocyanides of potassium and iron, and may be divided into three classes: Bronze blue, with a very bronzy overtone; milori blue, not so bronzy and of a greenish undertone; and Prussian blue, which has no bronze, but is quite purple in undertone. All these blues are strong and permanent, acid and sun proof, but not alkali proof. They are sometimes used to tone blacks.

Chrome yellows are very important and are made by precipitation of potassium bichromate with lead acetate. They vary in shade from pale yellow to deep orange. Pale yellow shades contain an excess of lead sulphate, being made in acid solution, whereas the deep orange shades contain an excess of basic lead chromate and are precipitated in alkaline solutions. These colours are all brilliant in tone, dense, opaque, strong and quite permanent. They are not alkali proof, however.

Chrome greens are mixtures precipitated together of bronze blues and chrome yellows. By precipitating together quite a different result is obtained than by simply mixing the two colours made separately.

The above three colours, blues, yellows and greens, are good natural driers when ground into varnish and are quite fast but not alkali proof.

Ultramarine blue is made by heating together china clay, soda, sulphur and charcoal. These ingredients are thoroughly mixed, ground and carefully roasted, but the finished product has a crystalline tendency and works with difficulty. On account of the sulphur, ultramarine should not be used on copper electros.

The same remark applies to vermilion, which is a sulphide of mercury of a brilliant scarlet tone. This pigment occurs sometimes in nature, but is generally made artificially. It is very opaque and very heavy. It is considered permanent to light, but, strange to say, it turns dark with fading instead of lighter. It is expensive to print owing to its heavy specific gravity, which does not allow as many impressions to be obtained per pound as from a normal pigment.

Carbon black is most important of all pigments to the printing ink maker. Among the blacks which consist principally of carbon there are many varieties. Carbon black is the name generally given to gas black made by burning natural gas with insufficient supply of air.

Lamp black is made by burning oil, generally creosote or tar oil, in specially designed burners, with a minimum supply of air. Lamp black is more opaque than carbon black and gives flow to inks whereas gas black makes short buttery inks.

Bone black is made by charring bones and then grinding to the required degree of fineness. It is somewhat crystalline and rather heavy in specific gravity. Its use is confined generally to plate inks, and it has a very deep mass tone but is relatively weak. Vine black is made by charring vines and other vegetable matter, similar to the way bone black is prepared. Acetylene black is made from acetylene gas which is obtained by allowing water to drop on calcium carbide. It is a very expensive black, but is an excellent one. Its expense, however, precludes its use to-day.

What the public calls a black is really a blue black. An iron blue or aniline blue is almost invariably added to black printing inks.

Bronzes are made by pulverising metals such as aluminium, copper, brass and so forth, in stamp mills to the required degree of fineness. They are sometimes dyed with aniline colours, giving greens, violets and other shades of bronzes.

In matching, the choice of colours is very important. For example, to get a bright green, a greenish yellow and a greenish blue must be used; because an orange shade of yellow or a red shade of blue will give a dirty olive green. A good general rule is to pick out colours nearest in shade to the colour one is trying to match. Complementary colours are the best to use to get an attractive design, for when these colours are used a pleasing result to the eye is obtained; for example, red and green are complementary colours and this combination goes well together.

Permanency is a term that is only relative, as there is no such thing as an absolutely permanent colour; even carbon black, which is considered the most permanent pigment in existence, will fade in time; nothing is abso-

lutely permanent. Guarantees of absolute permanency are, therefore, quite useless.

Compounds and Driers.

These are used to counteract adverse conditions in the press-room. They are essential ingredients, but indiscriminate use of unsuitable compounds makes a bad condition worse. On a wet day even the best paper will absorb moisture, thereby affecting the binding property of the glue coating, and inks that print satisfactorily on a dry day will "pick" on a wet day, due to this reason.

Atmospheric conditions are beyond the control of the ink-maker, and he should not be blamed for conditions over which he has no control. Some steps have been taken in America to standardise atmospheric conditions by means of manufactured air. In the Carrier system the air is drawn into the press-room by means of large fans and is passed through sprays of water and heating coils in order to obtain uniform humidity and temperature.

There are three ways of drying an ink: by absorption, oxidation and evaporation. Some inks dry all three ways. Most inks dry two ways. Newspaper ink generally dries in one way only. Newspaper ink dries by absorption, and for this method of drying the paper should be soft and porous. Inks printed on coated, art, or bond paper generally dry by oxidation—absorption of oxygen from the air. This absorption can be hastened by driers, but even the strongest drier will not dry an ink in less than four hours under ideal conditions. Only certain oils and varnishes will oxidise, and it is a waste of drier to put it in those which will not dry by oxidation. Intaglio or rotogravure inks dry by evaporation principally, and the speed of evaporation depends on the temperature and vapour pressure of the solvents.

An increase of temperature hastens all forms of drying. The following figures, taken from our laboratory, may be interesting:—An ink which dried in 24 hours at 60 degs., dried in five hours at 80 degs., and skinned on the press in four hours at 90 degs. Inks may set in a few seconds, but cannot be dried hard by oxidation in less than four hours. Humidity generally retards drying, and damp, cold days are the hardest in which to get quick drying. Certain paper retards drying, due to chemicals contained in it, and extra driers are needed. The porosity of paper also affects the drying due to differences in absorption. Thin films naturally dry better than thick.

There are two kinds of driers, japan driers, which evaporate, and paste driers, which do not. Japan driers are made by dissolving metallic salts of weak acids, such as resinates, acetates, tungstates, etc., in solvents, such as boiled oil and turpentine. Lead, manganese and cobalt are generally used. These salts act as catalysts and are carriers of oxygen, causing it to combine more easily with the oils and varnishes, and changing drying from a question of days to a question of hours only. Paste driers are like japan driers, only more concentrated. They contain no turpentine or other solvents, and are of a short buttery body, especially adapted for litho work.

Non driers are various ingredients added to eliminate trouble, for example, beeswax reduces tack or stickiness, retards drying slightly, and shortens the ink. It can be used in litho work and is the best material to use, but rather expensive. It has a tendency to dull the ink and to make it look grainy, as though it were not ground, but this appearance causes no trouble in running. Soap lubricates an ink, and reduces tack likewise. It has a tendency to shorten the ink and to give a clean and sharp impression. It prevents clogging of the type, and aids distribution, but retards drying slightly. Some soaps are dangerous to use owing to the free alkali contained in them, and care should be exercised to choose the proper soap. Lard, tallow, petroleum jelly and vaseline should be used very cautiously, as they retard drying very much. They also reduce tack quickly.

Printing Ink Vehicles.

These are probably the most important constituents of a printing ink. They may be divided into two divisions—oils and varnishes.

Oils may be divided, according to their source, into three divisions—mineral, animal and vegetable. Mineral oils are obtained from the crude oils from wells, and are two general classes, those of paraffin base and asphaltic base. These are refined into a series of products, ranging from very thin materials, like petrol, to wax from the paraffin base oils, or tar from the asphaltic base oils.

All of these products are used somewhat in printing inks, especially in the cheaper grades. They aid lubrication, but should not be added to inks indiscriminately, as they will not dry by oxidation, only by evaporation and absorption, and are especially dangerous where bond paper or hard-surfaced paper is used. Fish oils are very seldom used, but their future use will probably be more extended as processes are worked out for their de-odourisation. These oils are very hygroscopic, becoming sticky in damp weather. Lard oil and neat's foot oil are occasionally used for inks for duplicating machines, stamp pads, etc., where drying must not take place. They will not oxidise, and are considered non-drying oils, like mineral oils. Linseed oil is the most widely used oil for medium and better grade inks. It is made from flaxseed, which is grown in various parts of the world.

As regards varnishes, in America the grades run from 0000, the thinnest, to No. 8, the heaviest. In England they are called tint, thin, mid, strong, extra strong—double extra strong, being the heaviest. These are made by heating the oil from between 550 to 700 degs. F. During the boiling process the fumes arising from the kettle are sometimes set on fire in order to make burnt varnishes. These are not so greasy, and are somewhat shorter than the boiled varnishes. All linseed varnishes dry excellently by oxidation, and acidity varies from one-half to 10 per cent. The lower the acidity, the better and cleaner the varnishes. Soya bean oil, sometimes used as an adulterant to linseed oil, is not so good a drier as linseed. Cotton seed oil is considered a non-drying oil. Rosin oil has a characteristic odour, will oxidise, but not as readily as linseed, and is used extensively for the cheaper grades of black. China wood oil, sometimes called tung oil, is a very powerful drying oil, more so even than linseed. It is very little used, owing to its high price. Varnishes are made from the oils described above by melting in them resins. The above are added to the oils to give body, tack and gloss.

Dyes for Printing Ink.

The dyes used may be either oil or water soluble. Oil soluble dyes generally bleed in alcohol. They are used in toners for blacks and duplex inks. In this class of inks a mixture of pigment and dye is incorporated in the varnish, the dot carries the pigment, and the oil spreads around it, which gives the two-toned effect, and may be described as an island of one colour in a sea of another. These are very tricky inks, and the paper, temperature and rate of drying all affect the shade. They should dry slowly in order to spread properly, and a good match cannot be determined until 24 hours after printing. Water dyes are very little used in printing ink, but have some application in making copying inks, ruling inks, and sensitive check inks.

It will be seen, therefore, that the physical and chemical properties of an enormous number of materials must be known to the manufacturer of printing inks, who must blend these in the proper proportion to obtain the best results. After the proper choice of raw material has been made, there still remains the proper mixing and grinding. After grinding the proper number of runs through the mill, which vary from two to 20, the ink should be cooled and carefully compared with a standard sample representing the previous lot furnished to printer.

While on the subject of testing, let me say that the best service that a manufacturer of ink can give to the printer is to keep his inks uniform week in and week out, and the most progressive manufacturers to-day carefully control every ounce of raw material entering their plant by tests for its uniformity before it goes into their stock to be made up into ink, and the finished product is carefully tested for colour strength, mass tone, over tone, under tone, and, where possible, drying before it is allowed to leave their plant. This means that a complete set of standard samples must be kept of every raw material used and of every finished ink manufactured, and an elaborate and well-equipped testing department must be maintained. While this adds somewhat to the expense of the business yet it is of vital necessity.

Ink is the most important material in the printed job, no matter how good your paper is, how fine your press work, how good your blocks or transfers are; without appropriate ink your job is a failure. Ink makes or breaks the job, for in a printing job one hundred per cent. is sold by looks and looks only, and it is the ink in a printing job that makes the looks.

The Heavy Duty Automatic Miller Unit

The Iron Man for Service.

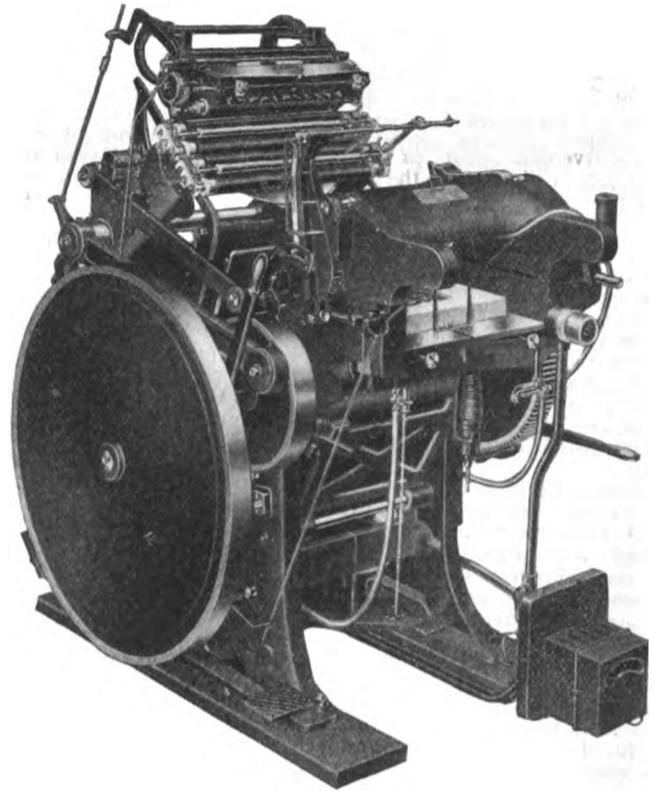

- ☐ Will handle all grades of stock from manifold to 10-sheet board.
- ☐ Output on Millers range from 89 to 300 % over hand feed.
- ☐ Overhead Costs reduced 50 %.
- ☐ Has the greatest sale of any automatic platen in the world.

Printing ink is really a prescription made by the doctor ink maker, who prescribes the formula dependent on the colour strength desirable, character of printing and the press which will use it, the kind of stock it is to be used upon, atmospheric conditions attending the printing process, and then compounded by the apothecary ink maker. An ink maker diagnoses printing ills, prescribes for them, and makes the medicine. He is in essence a personal service merchant rather than a dealer in commodities.

Service First, Price Second.

The foregoing facts were mentioned to you briefly to demonstrate that the ink making business is not and never will be anything else than a personal service business, not one of competitive commodity prices. On a £100 printing job, statistics say the printer spends about £3 for ink. A 25 per cent. reduction, which is a big one, would mean a reduction to the printer of just 15s. on every £100 job, and that reduction does not mean a saving necessarily. Bear in mind, that a saving is only accomplished when the cheaper ink per pound will do what the dearer ink per pound will do. You will find that more expensive ink of the same colour is more concentrated. It has more colour. You need a smaller film to get your impression. In a cheaper ink you need a larger film for the impression, thus using up more ink per impression and increasing the chances of offsetting, delay and many other troubles.

So that when some salesman canvasses with an "I can sell cheaper," he is more likely taking the difference in price out of the ink and inducing you to gamble with a loss of a re-order, and the gamble is not worth the price cut, with ink only three per cent. of the whole job. By creating a competition of price-cutting, you are making the ink maker rack his brain for the cheapest kind of material with the hope of its "getting by." Rather should the printer have him working to produce the best possible ink to make the job the best possible looking. Buying ink is buying quality and personal service of your ink maker and not bucking prices. Ink makers and printers have a common problem to create a demand for ink, which is the result of the creation of a demand for printing, and on the solution of that problem depends the success of both. Beauty is attractive, even in a printing job, and ink is the dominant factor in the beauty of a printing job, for it takes dead type, blank paper, and puts life where there is none before, therefore, give your ink the consideration it deserves.

Type Metal for Egypt.

The Acting British Consul at Cairo reports that the Egyptian Government Press are inviting tenders for the supply of type metal required for the year 1922. The metal required is: (1) 20,000 kilos of monotype to be made of the purest guaranteed metals, and with the following proportions—lead 63, antimony 20, tin 17; to be packed in strong barrels containing 250 kilos; (2) 3,500 kilos of refined soft lead, virgin metal, in pigs of 50 kilos.

Tenders on the proper forms, and accompanied by a provisional deposit of 2 per cent. of the total value of the offer, addressed to the Superintendent, Government Press Bulaq, Cairo, will be received up to noon on May 20th next. Representation by Agent resident in Egypt is essential. The Department of Overseas Trade is prepared to place United Kingdom firms not so represented in touch with merchants who have branch offices in Egypt and may be prepared to handle tenders on behalf of third parties. One copy of the conditions of contract and specification can be seen by United Kingdom firms interested on application to the Department of Overseas Trade (room 47), 35, Old Queen-street, Westminster, London, S.W.1. Further copies are available for loan to firms in the provinces unable to arrange to inspect the documents in London. (Ref. 7788/FE/PN).

An interesting gift of pictures has been made to the Parliamentary Press Gallery by Mr. Sidney Robinson, M.P. The Sidney Robinson Collection, as it is to be named, will be displayed in the library and writing-rooms of the Press Gallery. It comprises several hundred pictures and sketches, including engravings, lithographs, and woodcuts.

Paper and Stationery at Leipzig.

Impressions of the Fair by an English Visitor.

I have been asked to give my impressions of the Leipzig Fair, naturally more from the paper and stationery standpoint than any other. But the Fair was so vast and bewildering that it is somewhat difficult to know where to begin. I myself, being more interested in paper than in any other article, came back with the very decided opinion that the German paper manufacturers, at any rate for the immediate future, will not be wanting orders, and our own manufacturers have little to fear from their competition, their present prices, to say the least of it, not being competitive, and their production being apparently well sold ahead.

No makers confined to flat papers were exhibiting, but I was able to obtain quotations for them through two firms showing every variety of fancy stationery. These, however, offered no advantages over our British mills, as writings, printings, and M.G. lithos could be made in England at a very near figure. Banks and bonds they would not quote for. Furthermore, they would not commit themselves to any date for delivery, which is the most important thing of all.

From what I could see, stationery generally is in a more or less similar condition, with the possible exception of some of the small articles, such as pencils, pens, etc., in regard to which the supply appeared to be immense, and the prices, so far as my limited knowledge of the articles are concerned, very favourable.

From what I could gather, the Fair as a whole has been more or less of a disappointment to the buyers. Frequently I was informed by those in other trades that the very things they were wanting they could not obtain. What impressed me most of all was the vastness of the whole organisation and the variety and extent of the articles shown. It seemed to me that absolutely every conceivable article one could require was being shown by manufacturers; in some cases the same article was shown by what appeared to be hundreds of different firms, and it struck me as representing a very difficult task for buyers to be sure they had placed their orders with the right or actual manufacturers, when there were so many to choose from.

Over and above everything, I formed the opinion that our own British Industries Fair at the White City had been held too soon. At Leipzig there were visitors from every part of the globe, walking along the Fair thoroughfares in one solid mass, almost scrambling to place orders with firms who, I was given to understand, were already very largely oversold. It occurred to me that if our Fair had been arranged to follow on after the Leipzig Fair, instead of preceding it, we could have secured some of the unplaced orders, especially as there are now quite a number of lines which we formerly imported from Germany and which we are now able to manufacture in this country without fear of German competition. When the Board of Trade started our Fairs, we were able to choose our own date; but we are not yet in the position to be able to ignore the proximity of the Leipzig Fair. It may not be very agreeable to many of us to have to appear to play second fiddle to the German Fair; but to my way of thinking it is, at any rate for the next few years, advisable to fix a date subsequent to the Leipzig exhibition. However successful our own Fair has been, it is useless to overlook the fact that our own will not "pull" the world's buyers to anything like the same extent as the long-established Leipzig Fair. The whole world visits the latter, and it is therefore policy on our part, while the buyers are in Germany, to make our best efforts to get them over to London. I am afraid it will be a long time before we can draw anything like the majority of them to London first.

Another impression left on my mind was the fact that the very smallest manufacturer could get his show, as well as the most important and well established firms. If one visits the White City, there is a uniformity about the whole of the stands that appears to shut out the very small man; but at Leipzig, if the man of apparently little consequence has a really good thing to display he soon finds himself established, with immense possibilities for the future, by the aid, on the one hand, of the orders that he can secure from the vast numbers of buyers who see his

productions, and, on the other hand, by the assistance his bank is always ready to give him on the strength of such orders.

The present condition of Germany appears to be this: There are no unemployed, the manufacturers are full up with orders, and the workers set to the task like niggers. I was told that the German workman is putting in better work than before the war, and the unions, objecting to the eight-hour day, are now getting permission to work longer hours. This attitude, to say the least of it, is somewhat of a contrast to the present condition of things in our own country. P.C.L.

Stationers' Social Society.

The Golf Programme.

The golf programme of the Stationers Social Society promises to be an attractive feature of the summer activities. There are already a number of good players in the ranks of the Society, and the fixtures which have been, and will be, arranged should prove an attraction for others who are keen on the game.

Wednesday, May 17th, has been decided upon as the date for the Horsburgh Cup Competition, which is an 18 hole medal round on lowest club handicap. This event last year, when there were 40 entries, proved a great success, which, we have no doubt, will be repeated next May.

In addition, there will also be held a "knock out" competition, which lasts from May to the end of June. Apart from these attractions, the Society hopes to arrange various matches with other sections of the trade. So that there will be ample opportunity for the experts to exhibit their prowess.

Concert at Printers' Almshouses.

The inmates of the Printers' Almshouses at Wood Green had a very pleasant evening on Saturday last, when a concert was given in the Board Room by the Chequers Concert Party. Mr. W. Vandy (chairman of the Almshouse Committee) occupied the chair, and was supported by Mr. Jos. Mortimer O.B.E. (secretary of the Printers' Pension Corporation), Messrs. Geo. Tams and W. A. Perkins (members of the Council), Mr. J. Griffiths (manager, the Cornwall Press), Mr. J. A. Goodall (*Evening News*), Mr. Griffiths, junr. (Iliffe and Sons), and a number of ladies.

Songs, duets, choruses, etc., followed each other in quick succession, the various items giving evident delight to the old people. The members of the party were Misses W. Griffin and L. Parker, and Messrs. L. Chandler (manager), Alf. Maynard, S. Willis and E. Mynott, with Miss F. A. Goodall, A.V.C.M., as accompanist.

During an interval the inmates were provided with refreshments by Messrs. Goodall and Perkins; and a number of gifts from Mr. Goodall were distributed to those having certain numbers on their programmes (which had been distributed indiscriminately).

At the end, Mr. Vandy, in a characteristic speech, proposed a vote of thanks to the party for their excellent entertainment and to Mr. Goodall for bringing them along. Seconded by Mr. Geo. Tams, the motion was heartily adopted. The chairman also was thanked, on the motion of Mr. Perkins, seconded by Mr. Goodall.

Readers' Pensions Dinner.

Lady Hulton has consented to preside at the next annual dinner on behalf of the funds of the Readers' Pensions Committee, which will be held on Saturday, October 21st, in the Venetian Chamber at the Holborn Restaurant.

The object of the committee is to secure pensions for old and disabled printers' readers and the widows of readers. Fourteen pensions have already been established at a cost of over £6,500, and the fifteenth (to be named the James Feldwick Pension, to commemorate the work of that gentleman in various offices) is in course of formation.

Lord Burnham is president of the committee, Mr. W. A. Perkins chairman, Mr. J. Hood treasurer, and Messrs. P. J. Greene and H. M. Gurr hon. secretaries.

SOUTH-WEST London Master Printers' Association

Proceedings at the Annual Meeting.

The annual meeting of the South-West London Master Printers' Association was held on Tuesday, April 4th, at Stanley's Restaurant, Lavender-hill, London, Mr. J. D. Wise, presiding.

Mr. R. Kent, the treasurer, presented the annual statement of accounts. Total receipts amounted to £29 8s. 5d. and the expenditure was £32 5s. 6d. It was pointed out that while the total receipts for 1920-21 were £80 8s. 10d. the year under review showed a falling-off of approximately 36 per cent., while the expenses revealed a decrease of more than 50 per cent. So on the whole the Association was to be congratulated on such a small deficit, taking into consideration the propaganda work and the interesting meetings which have been held.

On the motion of Mr. T. J. Mountain, the statement of accounts was adopted.

Fourth Annual Report.

The secretary (Mr. F. H. Cole), in submitting the committee's fourth annual report for the year 1921-22, said:—

The year under review has been a year of exceptional slackness from the trade point of view, and to many master printers a source of trial; but there are great hopes that with the expected reduced postal charges the craft will again speedily recover its lost ground. The question of reduction of wages is again in the foreground, and it is hoped that the members will show a united front against any resistance of the men's unions. It is certain a reduction is needed, and it cannot be denied, that as a body, we do not wish or want to see wages reduced to pre-war figures, but we must emphasise that the present wages are a source of much concern to us.

During the year we have received much pleasure and benefit from addresses delivered to us, and last month we had great pleasure in recording our appreciation of the very fine work done by Mr. R. A. Austen-Leigh, the late president of our Alliance, during his two years of office.

It is also gratifying to be able to report that our membership during the year has again increased, the number now standing at 101. We would appeal to all members to help the Association to gain strength, not so much by increased membership, as by a ready desire to attend the monthly meetings more often and joining in the discussions, so that by receiving useful hints they may also impart knowledge and experience to others. The average attendance during the year was only 17.52 per cent.

Your Committee have met five times during the year with an average attendance of 11.4 per cent. They have discussed several questions and gone into matters of disputes between members; and we hope that, as no complaints of our judgments have been made, the decisions have proved satisfactory.

Turning from general subjects to the personal and domestic, the Association has had in Mr. J. D. Wise a hard-working and untiring president. He has not missed a single monthly meeting and only one Committee meeting, and that caused by illness. He has been accessible at all times to the members and for the work of the Association; the Committee feel it must have been a year of very real strain and hardship for Mr. Wise. His genial manner has often been as oil upon troubled waters. The Committee also thanks those members who have represented the Association so ably on the various committees of the Alliance.

Your Committee has endeavoured to do its duty without fear or favour, and the list of attendances will show the individual fidelity to office.

Your Committee cannot close their report without expressing the pleasure it has been to them to serve the Association during the past year, and express the hope that a brighter day is beginning to dawn for the craft, the Association and its members. (Applause.)

On the motion of Mr. R. B. Simnett, seconded by Mr. F. E. Tacey, the report was unanimously adopted.

President's Review.

Mr. Wise, before vacating the chair during the election of the president, reviewed the position of the industry during the past year. Pointing out the difference in regard to the wages question now as compared with 12

months ago, he mentioned that in May last year a demand was made for a reduction of 15s. from £5. The cost of living was then 128 per cent. above pre-war, which, on 39s., came to £4 9s. But to-day they had an increased cost of living of 86 per cent., which was 33s. 6d. on 39s., a wage of £3 12s. 6d., which from £4 15s. left a margin of £1 2s. 6d. Then they had to consider the shorter hours and the payment for 12 days (two weeks during the year). The Federation, which had adopted the suggestion of holding a conference, suggested that 18s. 9d. should be set forward as a basis for discussion.

Mr. Wise went on to refer to the suggestion of a scheme by which wages could be belowered as the cost of living fell, but that had been rejected by the unions, who declined to accept a basic wage. He urged that they had to consider this matter very seriously and to advise a settled policy.

Proceeding, Mr. Wise urged that master printers did not want these continual interruptions every few months, and if they were bound to fight let them fight for a sum that would carry them on, at any rate, for a year. He pointed out that the craft did not belong to individuals, but to all who were employed in the industry. He was sure everyone of them desired comfort and happiness and a sufficient wage to enable those who worked for them to live in some degree of comfort, but they could only pay according to what the industry at the moment would permit. Bringing wages down would not alone revive trade, though it would help.

Re-Election of President.

Mr. Wise insisted upon leaving the room while the meeting elected its president for the ensuing year, but his re-election was quite unanimous.

Mr. E. G. Cole, in supporting the nomination of Mr. Wise which had been made by Mr. Spring, said their retiring president was the right man to lead them in the coming year. He had the whole position at his fingers' ends, and as he had been asked by the Federation Costing Committee to address the Annual Congress in Glasgow on "costing" it would be nice that the representative of the South-West Association should visit Glasgow in the office of president. (Hear, hear.)

Mr. Mead seconded the nomination.

Mr. T. J. Mountain, speaking in support, paid a tribute to the sterling work of Mr. Wise, and said the Association was to be congratulated upon being able to secure the services of such a gentleman.

Mr. Wise was accordingly unanimously re-elected and assured the meeting of his best endeavours in the coming year.

On the motion of Mr. Wise, seconded by Mr. Mountain, Mr. E. G. Cole was re-elected vice-president, and Mr. Kent was re-appointed treasurer, following commendation by the president.

The president spoke in high terms of the help he had received from the secretary, although he did not forget what they owed to the previous secretary, Mr. Mold. He accordingly moved the re-election of Mr. F. H. Cole, who had carried out the duties wholeheartedly and with energy and enthusiasm.

Mr. Mountain seconded the nomination, which was cordially carried, and Mr. Cole suitably replied.

The following were elected to the committee: Messrs. R. B. Simnett, E. Trim, J. W. Nicholls, G. W. Young, E. J. Pegg, W. G. Mead, H. Chivers, G. Rangecroft, A. C. Musselwhite and P. Walmsley.

The president mentioned that as the Association was now in the position of having 101 members, it entitled them to another representative on the Council. He acknowledged the work of Mr. Johnson, the organiser, in this connection.

The president, Mr. Young and Mr. R. B. Simnett were accordingly elected the three representatives on the L.M.P.A. Council, with Mr. E. J. Pegg as deputy.

Various amendments to rules of the S.W. Association were then made, and the rules were adopted in their new form.

The wages question was then very fully discussed and a strong resolution was passed for submission to headquarters.

MOTION STUDY.—The annual report of the National Institute of Industrial Psychology, presented at the Society's meeting, stated that in the tin box industry investigations in a factory at Wolverhampton had made it possible to abolish stooping to pick up the fallen lids as they were stamped. The new method saved over an hour per day on a single operation.

Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

Interesting Reminiscences Related at the Monthly Meeting.

The steady progress that is being made by this Association was clearly evidenced by the large attendance at the usual monthly meeting on Tuesday of last week at St. Bride Institute, Bride-lane, E.C.4. The premises and seating accommodation that amply sufficed a few years ago are now often hardly sufficient to afford reasonable comfort. The president (Mr. A. W. Hunt), who presided over the meeting, was supported by the vice-president (Mr. H. Milton). During the evening an interesting paper, briefly reviewing the past history of the Association, prepared by the late secretary (Mr. G. A. Eden—who was absent through indisposition), was read by Mr. A. G. Aves.

The minutes of the previous meeting having been read and confirmed, Mr. Cox (the general secretary) submitted several items of correspondence. These included a letter from a provincial member, who wrote saying he was desirous of returning to London and would be glad to be informed of a vacancy if any members knew of one; from a member out of employment and from Mr. S. M. Bateman (president, P.M. and O.A.), expressing his thanks to the Association for the invitation to attend their annual dinner.

New Members.

The meeting next proceeded to the election of the following new members:—Messrs. S. C. Baker—warehouse—Amalgamated Press, Ltd.; J. E. Regan—warehouse—Williams, Lea and Co., Ltd. The new members' election was greeted with hearty applause, the feelings of the meeting being filicitously voiced by the president.

The consideration of the report by the Association's honorary technical representative, Mr. G. A. Eden, on the progress of the new technical school, which was to have been presented, was deferred.

The secretary then read a letter from Mr. F. C. Peacock, reminding the Association of its usual grant to the Vellum Binders' and Machine Rulers' Pension Society. It was unanimously agreed that the sum of three guineas be granted. Mr. Peacock tendered his sincere thanks to the Association.

Mr. C. W. Atkins then drew the attention of the members to the long list of candidates for the Bookbinders' Cottage Homes, and Mr. A. E. Walters moved that a sum of three guineas be also granted to that Institution. This was seconded by Mr. T. Hunt and carried.

Mr. Aves then read to the meeting Mr. Eden's paper on the history of the Association, which may be summarised as follows:—

Early Days of the Association.

Early in 1904 a few pioneers among overseers in the machine ruling and kindred trades approached the P.M. and O.A. for inclusion within its ranks, but these overtures were refused on the ground that their trades were not covered by the P.M. and O.A. title. Feeling somewhat hurt, they decided to form their own organisation. A circular was addressed to machine rulers, book and vellum binder overseers from the "Four Swans" calling a meeting at the "White Lion," in Thames-street, on Wednesday, September 7th, 1904, at which their present president was made one of the rules committee. The hotel names associated with their early beginnings were symbolical and might easily be used in fable for the stately approach of the "Four White Swans" was rebuked and changed into a roaring "White Lion." Mr. S. J. Wills then joined the small group who were entrusted with the task of formulating rules, one or two meetings for this purpose being held at the "Sugar Loaf" in Little College-street. Their early labours were charged with the sweetness of success, and they were accommodated next at the "Bull and Bell," Ropemaker-street, on the first quarterly night in December, 1904. The rampant progress at that time being made had a clamour in it which stamped all obstacles. A lecture on the advantages of co-operation given by an ex-president of the vellum binders' trade union marked the first real effort. The appointment of Mr. Wills to the trusteeship gave confidence to the members, while Mr. Hunt was raising questions on the inclusion of country members. A concert committee was later formed, and in 1905—with a membership of 32—it is interesting to see it recorded that the officers

pledged themselves to take five tickets at 1s. each in order to secure the success of a concert. At that time Mr. Peacock was also plumping for the idea of the concert as being the best means of extending the membership.

In March, 1905, Messrs. F. J. Ibbott, F. Pearse and the late Mr. W. J. Rumble were elected to membership, the last named gentleman being eventually responsible for some important clauses in their rules as they exist to-day. At that period is mentioned in the minutes of the Association the *British and Colonial Printer and Stationer*, of which copies were purchased giving a report of a concert.

The first annual meeting was held in December, 1905, and was full of business. Among other things discussed was the extension of the scope of the Association, and it was early in 1906 that a resolution for the inclusion of honorary members was carried. In May of that year the meeting place was transferred to the "Ship Tavern," Ivy-lane, and in June of that year a minute states that the candidature of Mr. G. A. Eden was accepted and confirmed.

Much activity was shown during the year, and October brought the late Mr. W. J. Rumble's famous resolution which safeguarded the funds in the event of their falling below £30 after January, 1908, the members in the meantime loyally pledging themselves to make no claim on the funds before that date.

The Association had made steady progress under the presidency of Messrs. F. C. Peacock, J. Walker, J. Dixon and A. J. Daines. He concluded by appealing to the members to let the Association be a real brotherhood, a brotherhood of the kind which brings out the finer qualities, and approaches that ideal of friendship which tends to make life worth while.

Contributions to a discussion relating to the early activities of the Association were made by Messrs. F. J. Ibbott, F. C. Peacock, J. Lee, J. Walker, A. J. Daines and the president.

The secretary was instructed to send a letter of sympathy and the thanks of the meeting to Mr. Eden.

A vote of thanks to the chairman brought the meeting to a close.

Paper Workers' Union.

Darwen Local Secretary Sentenced for Embezzlement.

At the Darwen Police Court on Friday, Gilbert Jones, the local secretary of the National Union of Printing, Bookbinding and Paper Workers, was sentenced to six months hard labour on a charge of embezzling £588 12s. 6d., the monies of the Union.

Mr. A. J. Watson, prosecuting on behalf of the Union, said the accused was appointed in November, 1919, and had been in receipt of a salary of £338 per annum, equal to £6 10s. per week. In the course of his duties he received sums of money, collected by the Union collectors at the various mills, and he had to account for that money. As a matter of fact, the amount collected during January and February of this year was £269 17s. 11½d. Out of that sum the accused had embezzled £134 12s. 11½d., and it was on account of that amount that he proposed to proceed that morning. The charge was confined to two months of January and February.

William Ross, secretary of the Paper Workers' Union, said it was the duty of the accused to receive the money collected by the collectors from the members, and to submit a statement and a balance-sheet to the head office in London.

In the course of the proceedings, prisoner entered a plea of guilty, and in a sworn statement to the Bench, said he could not give them any account of where the money had gone. The only thing he could say was that he got a lot wrong whilst paying out unemployment benefit. At the same time he was running a distress fund for the benefit of members of the branch and ran a football competition in connection with the fund. The work proved too much for him, and he found out that he had been paying out too much in benefits and also paying out money where he should not have paid it.

A DECISION has been given by the Norwegian courts declaring to be ultra vires an order issued a year ago by the Norwegian Government, forbidding the import or export of the literature of the Third International.

A REPRESENTATIVE required by London firm of Paper Agents and Merchants; must have sound connections, buying, selling and executive ability, energy and business enthusiasm; state fullest particulars, which will be treated in strictest confidence.—Box 18742.

GUILLOTINE MACHINE CUTTER wanted, for the Paper Trade.—Reply, with full particulars, stating age, salary required and experience, to "Cutter," care Phillips, Mills and Co., Ltd., Bridge Wharf, Battersea, S.W.11. 13924

Situations Wanted.

BOOKBINDING.—VELLUM GOLD FINISHER (age 26), seeks permanency; used to London house, High-class Account Work, Gold Blocking, etc.; able to take charge.—Box 13877.

BOOK-KEEPER (age 38), married, one child; knowledge Typing, Correspondence, Advertising and Press Work, etc.—D/o, Box 13878.

COMPOSITOR and PLATEN HAND—High-class Catalogue and Colour Work; Half-tones; London district; society.—Box 13928.

ELECTRICAL FITTER, young, desires charge of Motors (all kinds), Lighting, Lifts and other Electrical Gear.—S., 22, Montreal-road, Ilford. 13908

ENGINEER, NEWS PRESSMAN, qualified to take full charge as Manager in all departments; used to high-speed, up-to-date Rotaries, Auto-Plate Machinery, Stereotyping, Matrix and Half-Tone Production; accept position home or abroad; live man; steady; good references.—Box 13910.

LETTERPRESS OVERSEER (32) desires change, present position 5 years (12 hands); Charge Composing, Machine and Warehouse; Estimator, thoroughly practical; C. and G. Certificates.—Box 13930.

MACHINE MINDER (Miehles), Single, Twin or Trip Tandem Machines, well up in best class Work, Black and White and Colour Process, desirous of change; single, and with good references; Cross Feeder knowledge, etc.; society.—Box 13931.

MINDER, well up Half-Tone Colour Process, Cartons, Labels, Com., etc.; Wharves, Two-Revs., Bate's and Summits; home or abroad.—Box 13909.

THE *Gloucester Journal* reached its 200th birthday on April 8th, 1922, and to celebrate the occasion printed a bi-centenary number, double the usual size, with complete history of the newspaper, specially illustrated, also as a unique supplement an exact facsimile reproduction of the first number of the *Journal*, with its peculiar faced types and its old-fashioned phraseology.

ON Saturday and Sunday there were gatherings in Gloucester to commemorate the bi-

MINDER (young) seeks perm.; all classes Cylinder Machines, Half-Tone, Colour, Commercial; wages by agreement.—Sherreard, 25, Durrington-road, London, E.5. 13916

PUBLIC SCHOOL BOY (18), head of his House, seeks OPENING.—Box 13923.

WAREHOUSEMAN-CUTTER seeks situation; 12 years' in charge; sound knowledge of Paper; practical all operations, Commercial and Publications; Estimating; keen and alert; excellent references.—Box 13929.

Agencies.

CHALK-CRAYONS—AGENTS wanted for all parts of the United Kingdom, by Manufacturer of all kinds of School Chalks; must have good connection amongst Jobbers in School Requisites.—Apply to Box 13926.

TRAVELLERS calling on Engineering, Motor, Produce, Corn, Asbestos, and similar firms, to sell SMALL CALICO SAMPLE POST BAGS; cheapest on market; 10 per cent. commission (weekly).—Box 13921.

Machinery for Sale.

FOR SALE.—An ALL-SIZE MARINONI PERFECTING WEB PRESS, to print a sheet 40 by 50 in.; minimum cut 22 in. and by ¼-in. up to a maximum of 40 in.; width of web 40 in.; speed 4,000 to 5,000 per hour; open delivery; in good running condition.

A DRUM-CYLINDER FLAT BED PRESS by Messrs. Hoe and Co.; will print a sheet 40 by 60 in.; pyramidal inking; speed 1,200 per hour; in excellent condition.—Full particulars and prices from Temple Press, Ltd., 7-15, Rosebery-avenue, London, E.C.1. 13919

FOR SALE, "LEADER" MACHINE, to Fold and Gum Large Court Envelopes 5½ by 4½, in perfect condition, scarcely used, erected end of 1920; £500 at works.—Box 18765.

FOR SALE, by financial concern, Several LINO-TYPES with all Accessories; also ROTARY PRESSES. Good opportunity for buyers.—For full particulars, apply Box 13932.

FOR SALE, Quad-Royal WHARFEDALE, by Fieldhouse and Crossfield; geared inkers, balanced flyers; good running order. Also AEROGRAPHING MACHINE, by Aerograph Co., Ltd., and a CROPPER (inside measurement of chase 13 in. by 9 in.), by S. Cropper and Co.—Write, Printing Manager, Electrical Press, Ltd., 13-16, Fisher-street, W.C.1. 13927

Miscellaneous.

LUNCO, "THE INEXPENSIVE TYPE-WRITER PAPER." Six colours and White always stocked. Price 1s. 3d. per quarto ream, boxed. Advertising matter free. Trade only supplied.—Please apply for samples to W. Lunnon and Co., Paper Mills Agents, 59, Carter-lane, London, E.C.4. 13863

PRESS CUTTING AGENCIES in principal British Colonies are invited to communicate to Box 13882.

WANTED, BLOCKS (Odd or Series), Half-Tone, Line, etc.; suitable for small Magazine.—Particulars and price, to Simpson, Large, Ayrshire. 13915

WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe Lane, London, E.C.4.

BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long) in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

centenary of the *Gloucester Journal*, founded by the father of Robert Raikes, of Sunday School fame, on April 9th, 1722. The Mayor (Councillor J. O. Roberts) presided over a banquet at the Bell Hotel on Saturday night, which was attended by leading citizens of all shades of thought. On Sunday morning the Mayor and other representative citizens accompanied the proprietors and staff of the *Journal* to service at St. Mary de Crypt Church, where are buried Robert Raikes and his father.

THURSDAY, APRIL 13, 1922.

Wage Conferences Resumed.

IN accordance with the decision of the Joint Industrial Council, as reported last week, conferences between the Federation of Master Printers and the various trade unions are being resumed. Arrangements were made to meet the Printing and Kindred Trades' Federation and the Lithographers this week, whilst immediately after the holidays conferences are to take place with the Typographical Association, the London Society of Compositors, the Electrotypers and others. The Joint Industrial Council is to meet again on the 26th inst. to consider the position reached.

Wages in British Paper Mills.

NEGOTIATIONS are still proceeding between the Employers' Federation of Papermakers and the representatives of the unions with regard to the proposed revision of the wages agreement, and a further conference was held last week in London to consider the points which have been raised. Although this matter was at first approached in a rather aggressive manner, a more conciliatory tone was adopted when the parties met together round the table. So far, the negotiations have been conducted in a very amicable manner, and there is every reason to hope that an agreement will be reached without any open break. As things are, the work-people stand to lose more than the employers if it should come to a strike or lockout, an eventuality which is neither desired nor anticipated. Trade is not so brisk that manufacturers are anxious to continue to produce paper, as they are doing, at costs which represent either no profit or a direct loss. It also stands to reason that the employees will not go to extreme lengths so long as they are met in a reasonable spirit. In the end, questions of wages and conditions must be a matter of compromise, and it is better that agreement should be reached with as little interference to the industry as possible. It is to be hoped, therefore, that both sides will adopt a really conciliatory attitude, and, to use a familiar phrase, explore every avenue in the hope of reaching a settlement.

The Paper Market.

VARIOUS opinions appear to be held with regard to the condition of the paper market, and it is quite difficult to gauge the true relation of affairs. On the one hand, it is stated that home mills are fairly well occupied, and in some cases this is certainly true. News mills, for instance, are fairly active, according to all accounts. Scottish manufacturers, on the other hand, continue to experience a pretty dull time. In spite of some cheery views held here and there, the selling side of the industry is not generally very optimistic. Many of those engaged in selling paper tell a doleful tale and decline to regard the future in any spirit of hope. According to one authority, people are not able to buy and there is no real trade about. Indeed, a visit to the Provinces quite recently gave the impression that things had even grown worse, and facts and figures are quoted in evidence of this. The fact is that the market, to quote a phrase used this week, is "tricky." There appears to be no confidence anywhere, and in spite of improvements which have been reported from time to time—improvements which have been spasmodic and isolated—dealers are not inclined to anticipate recovery in the market, preferring to wait until actual business presents itself.

Paper Merchants' Position.

AMONG the merchants we find a better spirit but not much satisfaction. There are so many clearancelines about just now that it is difficult to get on with the straight business. Practically every merchant is sending out these special offers and some of the prices are really very finely cut. Of course, in the face of the keen and often absurd competition which the printers have to meet just now, it is essential that paper merchants should strive to meet the need for low-priced material, and it cannot be said that they are shirking the issue. Another reason for so many special offers is the fact that merchants are trying hard to get on to the new level by wiping out all old stocks. There is still an amount of war-time paper about, some of which will never be used unless it finds its way back to the mill as waste stack. It is a striking commentary on the slowness with which we are adjusting our business to post-war conditions that nearly two-and-a-half years after the war the great majority of paper houses find themselves unable to issue sample books.

Railway Rates.

THE decision of the railway managers to postpone considerations of any reduction in transport rates until a later date was not unexpected in view of the crisis in the engineering dispute. Not that the trouble has any real or immediate bearing on the issue so much as that it presented a favourable opportunity for leaving things as they are a little longer. It is held in well-informed circles that any reduced rates that are ultimately announced will apply mainly, and perhaps solely, to coal. We need a much wider application than this if lowered costs of production in other industries are expected to operate. Meantime, a reduction in the price of coal, as a main fundamental of manufacture, could be welcomed as a preliminary contribution; but it will need the united effort of all industrial organisations to force even that concession from the railway authorities.

THE special performance in aid of the Newspaper Press Fund arranged to take place at the Hippodrome on Sunday, April 23rd, has been abandoned. The Lord Chamberlain notified the organisers that he could not allow artistes to appear in fancy costume, and, as it would not be possible to present a satisfactory programme under different conditions, the entertainment, which would have raised several hundreds of pounds for a deserving cause, will not take place. Last year a Sunday performance at the Coliseum brought in nearly £2,000.

VISCOUNT BURNHAM is to preside at Stationers' Hall on the 24th inst., when an entertainment provided by *The Times* Musical and Dramatic Society will be given in aid of the News-vendors' Benevolent and Provident Institution.

VISCOUNT NORTHCLIFFE arrived in London from the South of France on Thursday night.

By a unanimous vote, the Ramsgate Town Council has decided to confer the honorary freedom of the borough on Lord Northcliffe, in recognition of the services he has rendered to the town and the Island of Thanet, and in his country's service.

SIR FREDERICK BECKER has returned to London.

SIR FREDERICK was given a great reception on his visit to Chicoutimi, the Mayor (Mr. Levesque) paying tribute to him as one who had done much to promote the progress of "the Queen City of the North."

A HOCKEY match between the Three Rivers and the Chicoutimi teams for the distinguished visitor, who was the guest of the town, was played and was won by Chicoutimi.

LIEUT.-COL. J. R. TRUSCOTT, president of the London Master Printers' Association, was to be the principal speaker at the annual meeting of West & North-West Master Printers' Association on Tuesday. The meeting will be reported in next week's issue.

MR. A. E. GOODWIN, secretary Federation of Master Printers, proposed the toast of "The Firm" at the jubilee dinner of Messrs. Johnson, Riddle and Co., Ltd., on Monday evening, response being made by Mr. C. A. Bates, managing director.

TANGIBLE recognition of the services rendered for so long by Mr. G. A. Eden to the Printing, Bookbinding and Kindred Trades Overseers' Association was made on Saturday at the eighteenth annual dinner of that association at the Holborn Restaurant. The presentation—which took the form of a gold watch to Mr. Eden and a canteen of stainless cutlery to Mrs. Eden—was made in the presence of a large gathering, which included several representatives of kindred overseers' associations. A full report of the proceedings will appear in next week's issue.

MR. GILBERT A. GODLEY, advertisement manager of the *Daily Mirror* for 14 years, has been elected a director of the *Daily Mirror* Newspapers, Ltd.

MR. H. W. BENNETT, the editor of the *Gloucestershire Echo*, has been elected president of the Three Shires Newspaper Society for the ensuing year.

MR. A. J. RHODES, formerly chief sub-editor of the *Western Daily Mercury*, has been appointed editor of the *Illustrated Western Weekly News*.

MR. W. SLINN, instructor of bookbinding to the Sheffield Technical School of Art, lectured on "The Art of Bookbinding" under the auspices of the Joint Industrial Council on Friday.

MR. WILLIAM PENMAN, one of our paper trade enthusiasts in bowling, has generously presented a cup to the London Scottish Bowling Association. To be known as the "Manson Memorial Cup," it will become the property of any player who wins it three times during the next ten years.

MR. PENMAN, who is an old member of the London Scottish and also of the Belmont B.C., is keenly interested in developing the bowling section of the Stationers' Social Society.

MR. A. ALLAN, who has been associated with Messrs. A. Johnson and Co. (London), Ltd., 3, Gracechurch-street, London, E.C., since July, 1921, has been appointed their paper department manager. Mr. Allan has had an extensive training in the paper trade, both in this country and the East.

WE are glad to learn that Mr. Henry Featherstone returned last week from a voyage along the Mediterranean much improved in health.

MR. J. P. HAWORTH is vacating his position at the Spring Vale Mill of the Darwen Paper Mill Co., Ltd., where for a number of years he has been inside manager.

MR. HAWORTH has been appointed to a similar position at the Star Paper Mill, and will go into residence at an early date at Feniscowles.

MR. WALTER HARTLEY, of Messrs. George Hartley and Son, wholesale stationers and paper bag makers, Providence Works, Stamford-street, Leeds, has recently been appointed organist to Selby Abbey, which is one of the three Chapels Royal. This is considered one of the six highest appointments in England.

Imperial Paper Mills.

Presentation to Mr. Wilfred Wood.

A large gathering of the staff and employees of the Imperial Paper Mills met in the West Mill Salle, on March 29th, for the purpose of making a presentation to Mr. Wilfred Wood, chief foreman of the West Mill, who has been appointed general manager to Messrs. Chadwick and Taylor, Salford.

Mr. W. H. Salmon (engineer-in-chief), speaking on behalf of the staff, said they had met together on what he might call a unique occasion to bid a formal farewell and God speed to their colleague, Mr. Wilfred Wood, who had obtained a better and higher position in the paper world. Mr. Wood had been one of the staff of the Imperial Paper Mills doing very important work for the past 11 years, and all could testify to his trustworthy business integrity. He had been most regular in attention to all his duties, even to a degree which meant, under Mr. Aitken, that he has considerably helped towards the success of the Imperial Paper Mills. Take 11 years out of the life of the Imperial Paper Mills, and they had but a healthy strong baby; Mr. Wood had helped to raise it to strong manhood.

Mr. W. A. Aitken (manager, West Mill), then presented to Mr. Wood a handsome barometer, and also asked him to accept on behalf of Mrs. Wood a silver tea pot and spoons. Performing the very pleasant duty, Mr. Aitken said one little thought which had occurred to him when seeing Mr. Wood pass on his way to work was how many thousands of times he had travelled the same old ground; and now, what must be the thought when he travelled on that same journey for the last time! They were sorry that he was leaving them; but it was very satisfactory to know that he was going a step higher. It spoke well for the mill's success to know that four of the staff had left to take up managers' places. (Hear, hear.) That was a lesson for all the young people around to do their work well, take an interest in it and strive to better themselves. Mr. Aitken hoped that the barometer would always recall to him the pleasant association they had always had together and may it bring him very fair weather. (Applause.) As to Mrs. Wood, the speaker trusted the gift to her, which carried their very best wishes, might always recall happy thoughts of the time she had spent in Gravesend. (Applause.)

The gifts were then duly handed to Mr. Wood, the barometer bearing the following inscription: "Presented to Mr. Wilfred Wood as a token of esteem from the staff and employees of the Imperial Paper Mills, March 31st, 1922."

Mr. Wood, in reply, said that it was very difficult for him to express his feelings as they should be, as his words were very broken and rough and required refining a good deal. Nevertheless he thanked them all very much from the bottom of his heart. It was rather extraordinary that 11 years should see the end of his association with the Imperial. In his first place, where he started as a boy, he spent 11 years. In his next situation with Messrs. Lloyds' he remained 11 years, and now again 11 years at the Imperial. Proceeding, Mr. Wood expressed his own and his wife's thanks for the choice presents which, wherever he went, would bring back memories of the 11 happy years spent at Gravesend.

Continuation Schools.

SIR,—The attack on continuation schools, made by Mr. W. H. Burchell in your issue of March 30th, is so violent, and so overstates the case, that it is difficult to avoid replying to the same in similar manner, but I content myself with putting forward the remark that there are two sides to this question, as there are to all others.

I fear, however, that there is some danger of Mr. Burchell's letter causing a misunderstanding which might damage the prospects of certain other educational work which I feel is essential to the development of the British printing industry.

Here in Leeds, and in other printing trade centres, many progressive employers are looking to another kind of part-time education to solve many of their present and future labour problems. The conditions of modern industry, with its severe specialisation, render it necessary to supplement shop experience by systematic technical instruction, and this can only be given in special trade schools, properly equipped and staffed. There are such facilities in Leeds at the Technical School Printing Department, and similar schools exist elsewhere.

Many of my fellow employers in the Leeds and District Master Printers' Association have come to the conclusion that the only successful way to obtain full value from these facilities is to send the apprentices to part-time day courses, one or two half-days a week in their working hours, for, although at the evening classes much excellent work has been done, yet the drawbacks of evening work greatly lessen the extension of its usefulness.

It may be that those who are clamouring for the abolition of higher instruction during the daytime hold the view that evening classes should be resorted to instead, but, being purely voluntary, they do not attract a sufficiently large proportion of the workers to have their full effect on the progress of the trade. If, however, the apprentices are released for classes in working hours without loss of wages, it is practicable to secure their attendance one or two evenings weekly as part of the scheme.

Whilst in the foregoing remarks I have confined myself to the education of apprentices, it must not be supposed that I overlook another and equally important function of such trade schools. If properly equipped and run on up-to-date lines, they afford opportunities to journeymen, foremen, managers, and even heads of firms, to obtain technical knowledge and new experience of great value in an industry that is always progressing in complexity. In colour-printing particularly there is more than one Leeds firm that has made use of these opportunities with marked results.

I submit the foregoing for the consideration of Mr. Burchell and those who think with him.

Yours, etc.,

E. GEORGE ARNOLD.

Leeds, April 7th, 1922.

Printers' Valuation.

SIR,—You have been good enough to give in your issue of April 6th a report of some remarks which I addressed to the Derby and Chesterfield Master Printers' Association on the subject of plant values and insurance and other related topics. I find that the important little word "not" somehow missed its due place in one sentence, which should have read: "If a printer had too much insurance in one department, it would not help him in a department in which he had *not* insured enough to meet the actual loss." I have italicised the second "not" which was accidentally omitted.

Yours, etc.,

FRANK COLEBROOK.

146, Fleet-street, London, E.C.4.

April 7th, 1922.

TRADE WITH RUSSIA.—Sir P. Lloyd Greame has stated in reply to a question that there is a British Commercial Mission at Moscow, and it is hoped shortly to send a British commercial agent to Petrograd. There is at present no British representative elsewhere in Russia.

DIVIDENDS AND REPORTS.

AMALGAMATED PRESS.—The Amalgamated Press announces dividend at 30 per cent. per annum, less tax, on ordinary shares for half-year, payable May 1st.

NEW COMPANIES.

CHAS. STRAKER AND SONS, LTD.—Capital £5,000, in £1 shares; to adopt an agreement with Chas. Straker and Sons, Ltd. (incorporated in 1892) and the liquidator thereof, and to carry on the business of wholesale and retail printers, bookbinders, stationers, account book manufacturers, paper and bag makers, envelope manufacturers, etc. Private company. First directors: P. Holman and A. S. Watson. Registered office: 4, Bishopsgate-avenue, E.C.3.

J. F. HILL AND CO., LTD.—Capital £1,500 in £1 shares; printers, bookbinders, stationers, advertising agents, publishers, etc., and to adopt an agreement with J. F. Hill for the acquisition of the business carried on by him in Derby and elsewhere. Private company. First directors: J. F. Hill, A. H. Hill and Capt. T. Thornton. Registered office: 6, Cheapside, Derby.

NATIONAL CARDBOARD BOX MANUFACTURING CO., LTD.—Capital £2,000, in £1 shares; to acquire the business of cardboard box manufacturers carried on by Albert and Henry Einbinder at 258 and 258A, Cambridge-road, E., as the "National Cardboard Box Manufacturing Co." Private company. Directors: A. Einbinder and H. Einbinder. Registered office: 258A, Cambridge-road, Cambridge Heath, E.

L. B. MAY, LTD.—Capital £750, in £1 shares; paper cutters, slitters, packers, wrappers, reelers, re-reelers and agents, importers and exporters of paper, paper products and raw materials connected therewith, dealers in wood pulp and wood pulp boards, etc. Private company. Subscribers: L. B. May and F. P. Barnes. Subscribers appoint directors.

E. GOULD AND SON, LTD.—Capital £100 in £1 shares; chemists, publishers, stationers, photographers, oil and colourmen, etc. Private company. Provisional directors: J. S. Stooke-Vaughan and A. Wilson. Registered office: 35, Moorgate-street, E.C.2.

PERCY HARGER, LTD.—Capital £1,000, in £1 shares; to adopt an agreement with A. P.

Harger, and to carry on the business of manufacturers of fancy leather goods, letter and writing cases, pocket books, etc. Private company. First directors: S. P. Harger and Mrs. L. Harger. Registered office: 32, Fortescue-avenue, Hackney, E.8.

R. H. JACKSON, LTD.—Capital £2,000; advertising agents and contractors, designers, draughtsmen, printers, stationers, envelope manufacturers, bookbinders, account book manufacturers, papermakers, paper bag and box makers, cardboard manufacturers, etc. Private company. First directors: R. H. Jackson, Mrs. Marian Jackson and P. Brodey. Registered office: 56, Cannon-street, Manchester.

HERCULIN GLUE AND COMPOUNDS CO. (1922), LTD.—Capital £100 Private company. Permanent directors: C. H. E. Stevens and K. E. Bartlett. Registered office: Fulwood House, High Holborn, W.C.

GORDON HOLDSWORTH AND CO., LTD.—Capital £3,500; to acquire the business carried on at 7, Rook-street, Manchester, as "Gordon Holdsworth and Co.," and to carry on the business of pharmaceutical, manufacturing and general chemists and druggists, etc., manufacturers of boxes and cases wholly of card, wood, metal or otherwise, printers, colour printers, publishers, etc. Private company. First directors: H. G. Holdsworth and G. Roper.

TRAVERS CLEAVER, LTD.—Capital £10,000; advertising agents and contractors as formerly carried on by G. Cleaver and M. F. T. Cleaver, at 48, St. Martin's-lane, W.C., as "Cleaver and Co.," and at 10, Arthur-street, Belfast, as "Travers and Co." Private company. Permanent directors: G. Cleaver, M. F. T. Cleaver and H. S. Baker. Registered office: 48, St. Martin's-lane, W.C.2.

HEALEY AND WISE, LTD.—Capital £3,000; to acquire the business of Edwin Healey and Co. and other assets, and to carry on the business of stamp importers and dealers, philatelic publishers, etc. Private company. First directors: H. A. Wise and T. J. Wise. Registered office: 14, Wormwood-street, E.C.

STAMP PILLAR ADVERTISING CO., LTD.—Capital £10,500; to acquire the benefit of an agreement for the hire of automatic stamp machines and cases, dated February 6th, 1922, between the British Stamp and Ticket Automatic Delivery Co., Ltd. and J. E. Gurdon and W. F. J. Harvey, together with the business carried on in connection therewith by the said two last-named parties, and to carry on the business of general advertising agents and contractors, etc. Private company. Subscribers: Hon. E. Fielding and W. H. Thomson. First directors: Hon. E. Fielding, W. H. Thomson, J. Gurdon, M. P. E. Harrison, J. E. Gurdon, and W. F. J. Harvey. Registered office: 9, Arundel-street, Strand, W.C.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

WATKINS' (CARDIFF) PRINTING CO., LTD.—Satisfaction in full on March 1st, 1922, of debenture dated October 21st, 1913, securing £550.

W. HEFFER AND SONS, LTD., booksellers, stationers, etc.—Deposit on March 28th, 1922, of deeds of 18 and 19, Sidney-street, Cambridge, to secure all moneys due or to become due from company to Barclays Bank.

L. UPCOTT GILL AND SON, LTD.—Issue on March 7th, 1922, of £520 debentures, part of a series already registered.

EDWARDS AND SONS (OF REGENT-STREET), LTD., stationers, jewellers, etc.—Debenture charged on company's undertaking and property, present and future, except 157-9-61,

Regent-street, W., dated March 28th, 1922, to secure all moneys due or to become due from company to Lloyds Bank.

BURNLEY TRADESMEN'S BILLPOSTING AND ADVERTISING CO., LTD.—Covenant to surrender dated March 10th, and a surrender dated March 25th, 1922, to secure £1,700, charged on certain properties in Burnley. Holders: Burnley Building Society.

COLTHROP BOARD AND PAPER MILLS, LTD.—Second mortgage on various freehold properties at Thatcham, Berks, dated March 25th, 1922, to secure all moneys due or to become due from company to Williams Deacons' Bank not exceeding £65,000.

HUDSON SCOTT AND SONS, LTD.—Satisfaction on March 31st, 1922, (a) to the extent of £2,450 of "A" debentures dated November 16th, 1906, securing £10,900, and (b) to the extent of £4,750 "A" debentures dated March 30th, 1917, securing £19,750.

HILL AND AINSWORTH, LTD., printers, etc.—Particulars of £5,000 debentures authorised March 24th, 1922, and covered by trust deed of even date, whole amount issued; charged on certain lands and premises in Stoke-on-Trent and Newcastle-under-Lyne and the company's undertaking and property, present and future, including uncalled capital. Trustees: F. W. Carter and J. T. Sandland.

GENEALOGICAL PUBLISHING CO., LTD. London.—Particulars of £20,000 debentures authorised March 9th, 1922, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

SMITH AND WALE, LTD., paper merchants, etc., Leeds.—Debenture dated March 25th, 1922, to secure £2,000 and all other moneys due or to become due from the company to the mortgagees (National Paper and Pulp Co. (1920), Ltd., 66, Upper Thames-street, E.C.), charged on the company's undertaking and property, present and future, including uncalled capital.

PHILIP AND TACEY, LTD., educational, stationers, etc., London.—Satisfaction to the extent of £1,500 on March 14th, 1922, of charge dated June 8th, 1921, securing £7,000.

JOHN E. DALLAS AND SONS, LTD. (musical instrument merchants, music publishers, etc., London).—Debenture dated February 28th, 1922, to secure £2,500, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: Mrs. M. A. Dallas, 52, Verdant-lane, Hither-green, S.E.

BANKRUPTCIES, etc.

Re RICHARD WILLIAM JULIUS MEYE, 53, Myddleton-square, E.C.—The debtor, described in the receiving order as company director, had been engaged in the lithographic printing trade; he was adjudged a bankrupt in February, 1913, and his affairs came before Mr. Registrar Francke at the London Bankruptcy Court on Friday last week on the hearing of his application for an order of discharge. In reading his report, the official receiver stated that the debtor's estimate of £1,002 of his liabilities appeared to be approximately correct. No available assets were disclosed by the debtor and nothing had been or was likely to be realised. After having served his apprenticeship in the lithographic trade the debtor obtained employment in it until January, 1900. Then with capital of £80 he began business as a lithographic artist at 29, Spencer-street, Goswell-road, E.C. Early in 1906, however, he gave up the business, and having discharged all the liabilities joined in partnership another person who was carrying on business as a lithographic printer at 68, Aldersgate-street, E.C. They traded under the style of Woodroffe, Meye and Co., but the trading proved unsuccessful, and the losses, which amounted to £600, were discharged by the debtor out of borrowed money, some of which was still owing at the

date of the receiving order, and the partnership was dissolved in January, 1907. The debtor then continued the business alone, but met with no success, and in January, 1912, with the assistance of another person and with a view to pulling the business together, he sold the goodwill to Richard Meye and Co., Ltd. He became director of that company, his remuneration being one-third of the profits. He attributed his insolvency to lack of capital, to loss owing to inability to attend to business through an accident and to bad trade for some four or five years. The official receiver opposed the application on the grounds that the debtor's assets were not of a value equal to 10s. in the £; that he had omitted to keep proper books of account; and that he had continued to trade with knowledge of insolvency. His honour granted the debtor an immediate discharge subject to judgment for £5 being entered up against him.

Re Arthur Westwell.

A Bankruptcy Puzzle in the Paper Trade.

Arthur Westwell, a paper merchant, formerly of Southport, but now living in Sussex, appeared in the Manchester Bankruptcy Court on Friday to explain certain discrepancies in his accounts of transactions between his firm and that of Messrs. Strafford, Ltd., which at one time carried on a similar business in Mosley Street, Manchester. These discrepancies had been disclosed at a previous hearing, and the examination had been adjourned in order that the bankrupt could file an explanation of them.

The Official Receiver (Mr. J. Grant Gibson) said that in Westwell's books sales of paper by Westwell to Strafford were entered at figures much lower than those which appeared in the books kept by Strafford. Under the date April 11th, 1918, for instance, there was an entry in Westwell's books of a sale of a certain kind of paper for £450. But in Strafford's book the purchase price was entered as £615. This amount appeared also on the invoice. The bankrupt said there was an arrangement between them, suggested by Strafford, that he should invoice the goods at a fictitiously high price, that Strafford should pay that price to him and enter it in the books of Strafford's company, Strafford afterwards receiving from Westwell the difference between the true price and the fictitious price.

The Official Receiver called attention to another entry in Westwell's books. This related to 5,568 lbs. of paper at 2s. 0½d. per lb. No sum was entered in Westwell's books as having been received in respect of this transaction, but in Strafford's books £568 was entered as the purchase price paid. Debtor said the transaction appeared to be fictitious, the amount being returned privately to Strafford at his request.

In a similar transaction dated November 20th, there was no entry in Westwell's books of money received, but in Strafford's books there was an entry of £349 paid. Debtor said he could not trace this, but he believed the explanation was the same as in the case just mentioned. The prices entered in his books were the same as those at which his firm was selling similar classes of goods to other clients.

The Official Receiver: There are three conceivable explanations. One is that Mr. Strafford got the whole of the difference. The second is that you got it. The third is that you and Strafford divided the difference between you?—Yes.

All the documentary evidence—your invoices, the cheques Strafford gave to you, the entries in your pass book, and the cheques you drew in favour of your firm for the amounts paid—favours the view that you put the differences into your own pocket. I am not challenging your explanation. I am only stating this fact?—I agree that you could assume that.

And the suggestion that Mr. Strafford received the money rests upon your *ipse dixit* or your oath, if you like, and nothing else?—Quite.

And you are not able to give the court to-day a single receipt, formal or informal, or any acknowledgment by Mr. Strafford, of the receipt by him of these sums of money?—No.

The official receiver suggested that Strafford's showing that he paid these large sums and Westwell's entries of the smaller sums might reduce the claims for excess profits duty. Bankrupt denied that this was the motive.

The Official Receiver: I don't say it was. I only put it forward as a possible explanation. The examination was closed.

Re George Ernest Whitehouse.

Described in the receiving order as of King-street, Covent-garden, W.C., the debtor formerly carried on business as a manufacturing stationer at 76, Hanover-street, Edinburgh, and he attended before Mr. Registrar Mellor at the London Bankruptcy Court last week for his public examination. His statement of affairs showed liabilities £4,793 and assets £1,000. Before January, 1910, the debtor acted as managing director of a company which had taken over his business of an engineer. He was afterwards engaged as a commercial traveller in the stationery trade. In April, 1912, he began business as a manufacturing stationer at 76, Hanover-street, Edinburgh. At that time he possessed a capital of £3,000, which he borrowed, and had since repaid. In April, 1918, the business was taken over by a company formed for the purpose and styled Ludgate Limited. As vendor, he received 4,160 preference and 5,000 ordinary shares, all of £1 each, and credited as fully paid, and he became chairman and managing director of the company at a remuneration of £1,000 per annum. Afterwards his remuneration was increased to £2,000 per annum, but eventually it was reduced to £1,200 per annum. On May 9th last the debenture holders appointed a receiver who took possession of the company's assets. He had since been without regular occupation. He had been mainly engaged in journalistic work and in the publication of a monthly magazine called *Impressions*, which he had intermittently issued for several years past. The debtor attributed his failure and insolvency to the failure of Ludgate Limited to discharge a debt of £4,500 due to the petitioning creditor for the payment of which he (debtor) had assumed liability. The examination was concluded.

Irish Paper Mills.

Debentures Bought for Redemption.

The directors of the Irish Paper Mills announce that the provision of the trust deed for the redemption of the 8 per cent. guaranteed first mortgage debentures, three months prior to July 1st, 1922, have now been carried out by purchase in the market of £6,400 of the debentures for cancellation, and that drawings of the bonds will consequently not be necessitated.

The original issue was £150,000, and there will remain outstanding after July 1st £143,600.

The Wiggins Teape-Pirie Fusion.

Proposed Terms of Share Exchange.

Details are now available of the terms of the proposed fusion of interests between the two well-known papermaking firms of Wiggins, Teape and Co. (1919) and Alex. Pirie and Sons.

The terms are on the basis that Wiggins Teape will acquire up to 60,000 £1 Consolidated Ordinary shares of Alex. Pirie at 18s. 6d. per share, to be satisfied in fully-paid £1 shares in Wiggins Teape. This will effect an exchange of shares in the proportion of six Pirie shares for five shares of Wiggins Teape.

To give effect to the arrangement it will be necessary to increase the share capital of Wiggins Teape to £2,000,000 by the creation of 500,000 £1 ordinary shares, which will rank for dividend as from December 31st, 1921, while no further dividend will be declared in respect of ordinary shares of the Pirie Co. pending the completion of the deal.

It is stated in the circular to the shareholders that little or no profit has been earned by either company in the past year owing to the trade depression and depreciation in stock values.

MR. CHARLES H. WALTER, paper merchant, of 61, Fleet-street, owing to the expiration of lease, has removed to 9, Quality-court, Chancery-lane, London, W.C.2. T.N., Holborn, 5,047.

Trade Union Matters.

"NATSOPA" AFFAIRS.—The ballot of the National Society of Operative Printers and Assistants calling for an increase of contributions has resulted as follows:—For, 3,424; against, 3,326. There were 20 neutral voters and 37 spoiled papers. Notice was accordingly given that the increased contributions would be payable by all members affected on and after Monday, April 3rd, as follows:—Members previously paying 1s. will pay 1s. 6d.; male juniors previously paying 9d. will pay 1s. 1d.; members previously paying 6d. will pay 9d. The negotiations for the taking over of the premises in Gough square have had to be abandoned. The "Natsopa" Executive have now come to the decision to return to their original project of building in Blackfriars-road to suit their requirements. This matter was submitted informally to a meeting of the London delegates, who expressed a vote of encouragement for the Executive to continue with this idea. Plans are now being completed, and the Executive will shortly have before them a complete scheme for consideration.

UNEMPLOYMENT.—"Certainly better"—says a representative of the London Society of Compositors—"that is our comment on the state of the London printing trade last month. But still very bad—that is what we would impress upon the minds of men in the provinces who may be casting their eyes towards London. We would like our provincial friends to remember, before they accept work in London, that there are nearly a thousand L.S.C. members out of employment. In such circumstances, how can they expect to be received with open arms?"

EMIGRATION.—The suggestion was made at a recent delegate meeting of the L.S.C. that members should be encouraged to emigrate as there is a demand from Australia for men who are prepared to work on the land as peasant proprietors. The question has been raised whether it would be to the Society's advantage to subsidise any of its younger members who might be disposed to make the effort.

Book Trade Strike Settlement.

It is announced that an agreement has been signed between the Book Trade Employers' Federation and the National Union of Printing, Bookbinding, Machine Ruling, and Paper Workers, which recognises the present reduction of 5s. in the wages of packers and porters, together with further reductions stretching over the period until April of next year, amounting in all to 14s. 6d., after which date the employers have agreed that no further reductions shall be made before January, 1924.

It is further agreed that three months' notice shall be given of any intention to apply for a revision. It is understood that the men are returning to work this week.

Swedish Lock-out Settled.

Agreement Reached at Paper Mills.

News reached the Swedish Consulate in London last week that the lock-out at the Swedish paper mills had been raised. It is evident from this that agreement has been reached on the question of wages. Whether this result arises from the intervention of the Government, an action which was expected, has yet to be learned.

A later message states that the 10,000 Swedish paper workers are accepting a reduction of their wages to half those of 1920.

It may be recalled that the lock-out followed the unwillingness of the workers in the paper mills to accept a reduction in wages by 42½ per cent. The proposal had been approved by the union representatives, while the workers themselves turned it down.

Cable intimation of the settlement of the dispute came to hand with mail advices, which spoke of an improvement in the paper market, especially as regards news-print and wrappings. Prices of these classes of paper have displayed a rising tendency during the last few weeks. The effect of the lock-out, however, was to have a crippling action on new sales.

Trade Notes.

POST OFFICE SURPLUS.—The *Manchester Guardian* understands that a compromise will be reached about the disposal of the Post Office surplus. Probably half of it will go to the Treasury and half to the Post Office. The Post Office half will probably be used in reintroducing the penny post card, restoring Sunday collection of letters, and making a beginning at least in the reduction of telephone charges recommended by the Select Committee.

AMONG the week's announcements of partnerships dissolved is that between Philip Hawkins, Abraham Freeman and Ernest John Mitchell, printers, 10, Essex-street, Strand.

LAST month's fires included printing works at Belfast, with an estimated loss of £27,000, and wholesale stationers, at Croydon, with a loss of £20,000.

TICKETS for the opening of the new Lloyd Memorial Home for Women at Deal on April 15th can be obtained from the Secretary of the Home at 80, Blackfriars-road, S.E.

FIVE thousand applications have been received for entry forms for the Great Western Railway Poster Designs competition, which is to close on April 30th.

CARDIFF TYPOGRAPHICAL SOCIETY has sent £2 to the Cardiff Technical College, to be awarded as prizes in the classes in typography and linotype machine work.

COST CONGRESS IN JUNE. — Arrangements for a cost congress in Glasgow on June 5th are engaging the attention of the Costing Committee of the Federation of Master Printers, and a programme containing many items of interest is being prepared.

AT the New Gallery Kinema, Regent-street, W., on Sunday afternoon, a number of cinematograph films of interest to newspaper makers and newspaper readers were exhibited before a large audience. Among them was a complete record of the production of *The Times*, shown for the first time in public.

THE Photographic Fair at the Horticultural Hall, Westminster, is to be open from May 1st to the 6th.

NEW annual members of the Swedish Chamber of Commerce for the United Kingdom include Svenska Dagbladets A.-B., Stockholm (printers and publishers); A. L. Wise and Son, 40-43, London (paper mill agents), and Mr. John de Matern, of Stora Kopparbergs Bergslags A.-B. Agency, Ltd.

THE following goods imported into Portuguese East Africa are subject to the "contribution" or additional tax mentioned: Playing cards, 10 per cent.; books for commercial book-keeping, ruled, printed, etc.; gummed papers, lithographs, etc. (except printed books in any language, books, blocks, maps, etc., for school use, periodical publications not especially referring to the Province of Mozambique, catalogues, etc.), from any source, 25 per cent.

AN important sale by auction by Messrs. Goddard and Smith, in the Estate Auction Hall, 22, King street, St. James', S.W., is announced for Thursday, April 20th. By order of the mortgagees the business of the Glendower Aircraft Co., Ltd. (in liquidation), will be offered with the property at Kew, Surrey, as a going concern, and, if not so sold, then as to the land and buildings absolutely without reserve. An excellent opportunity is presented for manufacturing concerns to acquire extensive modern factories and land, with vacant possession. For particulars, etc., apply to the auctioneers as above.

NEWSPAPER "DICTATION."—Mr. Ramsden has asked the Prime Minister, "in view of the very large monopoly certain newspaper proprietors have acquired and are acquiring in this country, thereby dictating to a very large section of the community their personal policy and opinions, if he can see his way to make it compulsory for all newspapers, etc., to have the name of the proprietors printed on the front page of each edition, so that the public may know to whom the paper belongs." The Prime Minister's written reply is: "My hon. friend's proposal would in many cases only disclose the name of a company, and would not be effective for the purpose that he has in view."

THE death has occurred of Mr. John William Simpson, a promising young journalist on the staff of the *Sunderland Echo*.

A PETITION has been presented to the King in Council for a charter of incorporation by the Federation of British Industries.

THE death of Sir John Benn, of Messrs. Benn Brothers, removes a well-known owner, printer and publisher of several prosperous trade journals.

MR. T. C. DONNELLY, of the *Irish Independent*, and a well-known figure in Fleet-street, died in London on Monday.

MR. FREDERIC VILLIERS, the well-known war artist and correspondent, of the *Graphic*, *Illustrated London News*, and other journals, died last week.

THE death has occurred of Mr. William Nicholas Willis, of London, Sydney, and Straits Settlements, author and publisher.

THE death has taken place at Carnarvon of Mr. Shaw Burslem, a retired printer's overseer. Mr. Burslem belonged to Chester, and was for many years engaged in the printing department of the *Herald* office at Carnarvon. He was seventy-four years of age.

THE death occurred on Sunday, at Leeds, of Mr. William Fountain, who had been a member of the staff of the *Yorkshire Evening Post* since its inauguration, and in all had been employed in the offices of the *Yorkshire Post* for more than 50 years.

THIS week has brought the decrease of the price of the *Daily Telegraph* to 1½d., also the inclusion of the *Westminster Gazette* among the dailies running free insurance schemes for subscribers.

THE April number of the *Falcon*, replete with engagingly written news relating to all departments and activities of the house of Spottiswoode, Ballantyne and Co., Ltd., and produced with typographic excellence, makes an admirable issue.

THE *Stockport Advertiser* has celebrated its hundredth birthday by publishing an excellent centenary number, in which the history of the paper and of the social and industrial life of the town is adequately and attractively presented.

IN the King's Bench Division on Monday it was decided that the action by Sir Philip Dawson, Coalition Unionist M.P. for West Lewisham, against Lord Alfred Douglas, as editor of *Plain English*, and the publishers and printers of the paper, for damages for libel, would not be proceeded with, a settlement having been reached.

ARRANGEMENTS are being made by the General Council of the Trades Union Congress and the National Executive of the Labour Party for the publication of a new monthly magazine in the labour interest. The first issue will probably be made next month, under the title of the *Labour Magazine*.

LABOUR PUBLICATIONS' CRISIS.—The crisis in the history of the *Daily Herald* is the subject of comment by the *Co-operative News*, which remarks that the printing world is going through a lively time. In a few weeks the *Daily Herald* may have ceased to exist, it says; the *Woolwich Pioneer* has suspended publication after a plucky fight of 17 years; the London establishment of the National Labour Press has been sold; and in the Co-operative world the printing department of the C.W.S. shows a loss of £3,000 for the past half year. The *Co-operative News* comments that it is because the struggle to make ends meet has been too much for many papers that there has not yet been launched a daily paper under co-operative control. "Our progress towards the establishment of such a daily has been slow; we have convinced the co-operative Union, the two wholesale boards, and the C.P.F., that our policy and plans are on the right lines; and their representatives, at the recent special conference, agreed that National Co-operative Publishing Society should be supported in its developments in the direction of a daily." The journal adds that it would be a reproach to the labour movement if the *Daily Herald* were allowed to go under, and appends, as a sort of footnote, the remark that under Co-operative control even a daily paper could be launched at once if the movement gave evidence of its willingness to shoulder the responsibility involved.

BECAUSE of the heavy decrease in the export of Finnish cardboard during the past year, the managing director of the Central Association of the Finnish Wood-working Industries (Mr. Axel Solitander) pleads for a removal of the Finnish export duties on wood products, especially on cardboards.

A COMPETITION has been opened for designs of seven new postage stamps for French Indo-China.

SUPPOSED to be the rarest stamp in the world, the one-cent. British Guiana of 1856 was sold in Paris on Thursday for 300,000 francs.

THE world-wide work of the United Press Associations, New York, is described and illustrated in an interesting booklet just issued.

THE American Photo-Engravers' Association has published, in quarto pamphlet form, a detailed review of costs and prices during the last few years, so as to explain to block-buyers why prices have risen and why they are not now reduced.

PRINTERS' SUMMER SCHOOL.—With a view to improving the instruction in the various schools of printing throughout the country, and in an effort to help the teachers in these schools to conduct their work on a sound pedagogical as well as trade basis, the Department of Education of the United Typothetae of America proposes to conduct a conference for printing instructors during the coming summer for two weeks, from July 6th to the 20th. The sessions will be held at the United Typothetae School of Printing, at 1500, East Michigan-street, Indianapolis.

A TORONTO correspondent states that printers in Canada cannot obtain adequate supplies of English-made super-calendered papers, and it is urged that British paper manufacturers should keep their agents properly supplied. "Yet, on the other hand," says the writer, "I read that the mills in Yorkshire are standing idle, and that the paper market in England is depressed. What is the trouble?"

ARTICLES of association are being prepared for a Sydney (New South Wales) morning daily newspaper, of which Sir Joynton Smith will be chairman of directors. For the past two years the directors of *Smith's Weekly* have been perfecting the organisation, which will be distinct from this publication. The new daily will make its appearance in August of the present year.

A NEW AUSTRALIAN HOUSE ORGAN.—"Appertaining to Paper" is the title of a handsome and useful new house organ (to be published monthly), which, according to a statement contained in its pages, is launched with the laudable purpose of rendering a service to the printing and allied trades, and incidentally to the publishers, B. J. Ball, Ltd., paper and cordage manufacturers, Melbourne. The articles appearing in this first issue cover a wide variety of subjects of special interest to the papermaker and printer. The careful selection of suitable paper, together with the artistic typographic arrangement of its ornate cover and pages, have combined to make the booklet a very commendable production.

ON Tuesday, the 28th ult., a permanent exhibition was opened in the Rue de Ligne, in the centre of Brussels, by the Federation of British Industries. The opening ceremony was attended by Sir George Grahame, British Ambassador.

THERE has just appeared the first number of the first daily newspaper ever published in Germany in the English language. It is called the *Daily Berlin American*, and announces that it has come to fill a long-felt want among such members of the Anglo-Saxon and the Irish community in Berlin as are unable to read the German papers and are unwilling to pay ten to twenty marks for a London newspaper which is two days old when it arrives. It costs five marks the copy—some eight times more than other Berlin daily newspaper.

RUSSIA last year imported paper and paper goods to the extent of 30,000 tons, the value of which in gold roubles calculated on 1913 prices was 7,954,000. The weight of these consignments per cent. of total imports was 3.3 and the value per cent. of total imports 3.2.

M. TRANMÆLL, editor of the Norwegian *Social Demokrat*, and who was originally fined 1,000 kroner for articles published regarding the conduct of the police during the Norwegian Grand Strike was, on official appeal, sentenced by the Supreme Court to 120 days' imprisonment and 200 kroner costs.

MR. THOMAS REED (67), a foreman employed at the Ely Paper Mills, Cardiff, was working at the top of a twenty-foot ladder last week when the ladder slipped and he fell to the ground. He was removed to King Edward VII. Hospital in a critical condition, suffering from a fractured skull and a lacerated scalp.

The Argentine Market.

Tenders Wanted for the Mint's Paper Requirements.

The commercial secretary to H.M. Legation at Buenos Aires reports a call for tenders by the Argentine Mint for the supply of paper required for stamps, bills, forms, lottery tickets, wrappings, etc.

In all 17,400 reams of 500 sheets are required

in various sizes and weights, the stamped paper to be watermarked according to specifications.

Tenders on stamped paper and accompanied by a certificate of a deposit in the Bank of the Nation of an amount equal to 3 per cent. of the tender price are to be presented in Buenos Aires addressed to Senor Director de la Casa de Moneda on July 3rd, 1922.

Quotations are to be c.i.f. Buenos Aires, and payment will be made against delivery to the authorised representative of the tenderer.

Samples of the paper required and transla-

tion of conditions of contract, specification, etc., may be inspected by United Kingdom firms interested on application to the Department of Overseas Trade (Room 42), 35, Old Queen-street, London, S.W.1, up to April 6th, after which date they will be available for loan to provincial firms who are not in a position to inspect them in London.

In the event of any United Kingdom firms not being represented in the Argentine Republic, the Department will be pleased to assist by furnishing the names of firms likely to be in a position to act as representatives.

Printers' Managers and Overseers ASSOCIATION.

Business Meeting and Instructive Lecture.

The April meeting of the Parent Association was held at the "Old Bell," Holborn, on Tuesday of last week, the chair being occupied by the president, Mr. S. M. Bateman, and there being a fair attendance of members.

Arising out of the minutes of the March meeting, the subject of pensions was raised by the hon. pensions secretary, Mr. G. H. T. Freeman, who asked how the Association's four candidates had fared at the recent Printers' Pension Corporation election.

The President replied that every one of the four candidates had obtained a pension, Mr. John J. Smith having received 2,075 votes (singularly enough being awarded the P. M. and O. A. pension), Mr. Harry Blanks receiving 1,448 votes, Mrs. Mary Moyce, 997, and Mrs. Agnes M. Rignall 988.

The secretary read a letter from Mr. Thos. Rignall expressing his gratitude for the Association's efforts on Mrs. Rignall's behalf. He also read a letter from Mr. Mortimer, secretary of the Printers' Pension Corporation, drawing attention to the fact that one of the war orphans assisted by the Corporation was reaching the age of 14 years, and wished to be apprenticed to his father's trade as a printer. Mr. Whittle asked that any apprenticeship vacancy should be reported to him.

Mr. Freeman pointed out that the election of four more P.M. and O.A. candidates for pensions made eight elected within five years. He asked that the council should complete the Association's third pension at the earliest possible moment.

The following were, in the usual formal manner, elected members of the Association: Mr. E. M. Chesterman (Associated Newspapers, Ltd., Carmelite-street, E.C.4., overseer, machine room); Mr. W. J. Geddes (G. W. Bacon and Co., Ltd., Norwich-street, Fetterlane, E.C.4., works manager); Mr. G. E. Peeke (Harrison, Jehring and Co., Emerald-street, London, W.C.1, overseer, machine room); and Mr. F. G. Nobbs (University Press, Cambridge, Overseer, monotype department).

The President at this point drew attention to the fact that Mr. E. H. Berryman was present for the first time since his recent serious illness. He expressed the Association's pleasure at seeing him again.

Replying to a very hearty ovation, Mr. Berryman expressed his gratitude for the many kindnesses shown to him during his illness.

United Gathering at Liverpool.

The meeting then gave its attention to the subject of the forthcoming united gathering of the Association, the council having put forward the following recommendations:—"That the president, vice-president, general secretary, with Messrs. A. E. Jarvis, W. H. Gill and J. C. Pugh attend the united gathering at Liverpool on May 13th, 1922, to represent the Parent Association"; and "That the Parent Association pay half railway fare of any London member desirous of attending."

Mr. Dawson asked whether the gentlemen mentioned in the recommendations would be the only London members going to Liverpool. He raised objection to the paying of members' expenses, remarking that this was a new idea.

The secretary replied that he knew of several other members who intended to go. He said that the terms of the recommendations were the same, word for word, as appeared two years ago in the case of the united gathering at Leeds. There was nothing new in the matter.

Mr. Dawson recalled in detail the arrangements made in connection with previous united gatherings. He moved that the Association pay the expenses of two representatives only, the president and the secretary. In the course of his remarks he suggested that there was a recrudescence of "cliquism" in the Association. This remark, together with some personal allusions made, evidently roused the ire of many members present.

Mr. Jarvis said that as one of those proposed to represent the Association, he would be very happy to second Mr. Dawson's motion, as he thought it would exclude him (Mr. Jarvis) from going to Liverpool.

The chairman suggested that the recommendations before the meeting be dealt with first, and Mr. Dawson's motion be taken afterwards as an amendment.

Accordingly, the adoption of the council's

first recommendation was formally proposed and seconded.

Mr. Dawson then moved his amendment. Mr. Jarvis seconded the amendment, various members taking part in the discussion on the subject, and there being many strong protests against the suggestion of the existence of "cliquism" in the Association.

After Mr. Dawson had briefly replied, the chairman put the amendment to the meeting, but there was a large majority against it, only three members voting in support.

Mr. Jarvis then pointed out that the proposition before the meeting was a recommendation only, and if members wished to add other names, this could be done by vote. Protesting strongly against Mr. Dawson's remarks, he said he did not wish to represent the Association at Liverpool. He proposed that Mr. Dawson's name be added.

Mr. Dawson declined to allow his name to be put forward, saying it was his intention to go in any case. He remarked that he was the only London member who had attended every united gathering that had been held.

The chairman asked whether the Association's representatives should be confined to six.

On the motion of Mr. Jarvis, seconded by Mr. Moore, this was agreed to.

The chairman then put the first recommendation to the meeting and it was adopted with only one dissident. The second recommendation, specifying payment for half railway fare of representatives was carried unanimously.

Discussion on "Printing Ink."

The business of the evening having been concluded, the chairman called upon Mr. E. H. McLeod to lecture on "Printing Ink." The lecture, which is reproduced in another part of this issue, was followed with close attention throughout, and an interesting discussion ensued.

The discussion was opened by the chairman, who stressed the practical value of a knowledge of ink technology and made humorous references to his apprentice days when many tints had to be produced by the workmen from a very limited number of inks. In regard to the difficulty of printing ultramarine, he recalled that when the foreman had a grudge against an apprentice or journeyman he used to give him the ultramarine form to print. (Laughter.)

Mr. J. H. Burton expressed keen interest in the lecture, and asked for more information as to the base upon which the colours were precipitated.

The lecturer, in the course of his reply, said that a base was used in the same way as textiles absorb a dye; it was very difficult to precipitate a dye without a base. A great many bases were used, white lead was one, but had a tendency to "body up" and become almost unworkable. China clay, though much in demand for paints, was not much used in printing ink, he thought, as it tended to pile. The best medium was aluminium white. Aluminium hydroxide was an excellent worker and had a strong affinity for dye stuffs. Almost any of the pigments could be used as a base, but the most commonly chosen were aluminium white or barium sulphate.

In reply to other questioners, the lecturer said he had not experienced trouble in working with a zinc base. In case of difficulty it might be helpful to add varnish of mid consistency and wax, together. Asked as to the use of solidified china wood oil, he said it was practically insoluble, and he did not see how it could be used. Water rotogravure inks were not used in America; he thought the idea of using them was a mistake.

Mr. Burton proposed a hearty vote of thanks to the lecturer, from whom he felt they had derived much information.

Mr. French seconded. The vote being carried with acclamation, the lecturer briefly responded, remarking that he appreciated the honour of being asked to address the P. M. and O. A.

THE late Mr. Enoch Ward, R.B.A., formerly of the staff of *Black and White*, left £15,235.

THE "Compositors' and Printers' Handbook" for 1922 contains not only its usual mass of useful information, but has this year been enhanced by several new features. The "Handbook," which makes a ready appeal to the compositor, also contains within its covers useful data regarding the industry likely to be of service to those who have to do with printing in any shape or form. The price is 6d., and the booklet can be secured at the offices of the London Society of Compositors.

John Dickinson and Co., Ltd.

Presentation to Mr. J. W. Peacock.

Mr. J. W. Peacock, who has been the factory manager at the Nash Mills of John Dickinson and Co., Ltd., has just retired after a service totalling 52 years. In this connection an interesting ceremony took place on Saturday evening, March 25th, when the firm entertained Mr. Peacock and the whole of the staff and workers of the mill to tea, followed by a concert and the presentation to Mr. Peacock of a tea and coffee service, with good wishes from the whole of his fellow workers at Nash.

Mr. H. Goldstraw (the manager) was in the chair, and said the occasion was very unique, as it terminated the papermaking service of the Peacock family with the House of Dickinson. The grandfather of Mr. J. W. Peacock was a papermaker in the time of John Dickinson, he being followed by his son and his grandson—the guest of the evening. The total length of service was an uninterrupted period of 103 years. In asking Mr. H. Lane to make the presentation on behalf of the staff and workers, the chairman mentioned that Mr. Lane had a service even longer than Mr. Peacock's, namely, 58 years.

Mr. H. Lane, making the presentation, said the fact that the honour of making the presentation had been allotted to one of the employees indicated the spirit of unity which prevailed in the works of the company. He (Mr. Lane) had been in touch with Mr. Peacock for many years—he had been side by side with him at the bench. Referring to the time when printing and plate papers were made at Nash Mills, and when Mr. Peacock became head finisher, or *salle foreman*, he (Mr. Lane) was under him, also when he became factory manager, and he had been in touch with him ever since. Knowing him thoroughly, therefore, he would sum up Mr. Peacock's character in the words: "He is a gentleman," or, if they liked to have it in the words of the song, "He's a jolly good fellow." (Cheers.) They all desired to congratulate Mr. Peacock on his retirement, and trusted he would be spared long to enjoy a well-earned rest.

Mr. Peacock, in his reply, thanked his colleagues for the very handsome present and particularly for the kind feeling shown to him. He said he was born almost on the spot where the presentation took place, and he commenced his career at Nash Mills nearly 52 years ago, and included amongst his colleagues at that time were the fathers, grandfathers, and in some instances great grandfathers of those present. Mr. Peacock said during the time that he was at Nash he had seen many changes, and watched the mill grow enormously in output.

On the motion of Mr. H. Freeman, a hearty vote of thanks was given to the firm and to the management for a very enjoyable evening.

Paper Demand in China.

From statistics published in a recent issue of *Finance and Commerce* (Shanghai) it appears that of late years there has been a growing demand in China for paper. Between 1913 and 1920 Chinese purchases of the foreign product practically doubled. In 1913 the value of the paper imported was 7,169,255 Haikwan taels; whilst last year's figure was 14,159,186. Shanghai is the principal market, having absorbed no less than 8.1 million taels worth last year. Tientsin, which uses most of the commoner kinds of printings, comes next with just over a million and a half taels. Canton takes considerably less (817,000 taels last year), and Hankow imported direct less than three hundred thousand taels' worth. Dairen generally takes much more than her last year's supply of 40,791 piculs, which cost 530,000 taels, and Antung's share in the trade was only just over a half of the amount she took in 1919, but the whole of South Manchuria is a good paper market. As to the principal sources of supply, last year's returns placed Japan in the premier position, with shipments amounting to 319,297 piculs, valued at 3,802,987 Hk. taels; the United States being next with 194,095 piculs valued at 2,874,721 Hk. taels; followed by Sweden, which supplied 182,835 piculs, valued at 2,128,806 Hk. taels; Norway, 136,326 piculs, valued at 1,550,566 Hk. taels; and Great Britain, 60,567 piculs, valued at 1,059,478 Hk. taels.

Paper Competition in Australia.

Canadian paper suppliers are concerned about the keen competition in the paper trade of Australia and New Zealand, and the following figures are quoted:—English s.c. printings are being quoted at 4d. f.o.b. British port, including export packing. There is no duty. English cream laid paper is quoted at 4d. f.o.b., including the duty of 5 per cent. *ad valorem*. This price is below the cost of manufacturing in Canada.

Advices received from Australasia state that the paper business is still in a very depressed state. Stocks of all classes are very heavy and very low indent orders are being placed, while those orders that are placed are very small indeed. English and Scandinavian prices for all goods are very low.

Addressing the members of the Canadian Pulp and Paper Association at its annual convention, the president (Mr. Percy B. Wilson) referred to this matter as follows:—"The effect of this discrimination against Canada, which is placed on the same footing as Germany and other countries outside the Empire, will, unless alleviated, be to exclude Canadian paper from the Australian market. Numerous representations on the subject have been made by our executive to the Canadian Government and there is reason to believe that action looking to an amelioration of the situation may shortly be forthcoming."

Messrs CANA, MORTON AND CO., of 11, Elphinstone Circle, Bombay, inform us that they would welcome correspondence from manufacturers and exporters desiring to supply the Indian market. They handle machinery for the printing and allied trades, paper, inks, print shop supplies of all kinds, and stationers' supplies.

New Inventions.

Type and Stencil Printing.

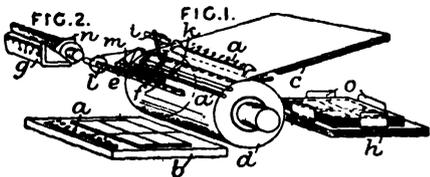

Mr. A. Mathes has patented a machine for type or stencil printing which comprises an inclined frame 2 in which is mounted type, or which can be fitted with a zinc-covered wooden frame when used for stencil printing. An impression roller 19 is mounted in adjustable spring-pressed bearings 18" carried by a pair of connecting rods 15, at the outer ends of which bearing rollers 14 are fixed which engage the undersides of rails 13 as the roller 19 is moved in an upward direction by crank discs 31, connecting rods 35, and links 16. The sheets are registered against front stops 24 on an adjustable frame 23 normally held raised by a cranked lever 27 operated on by a lever 30 which is on a shaft 29 controlled by a roller 37 on a lever arm and by a cam 38 on the shaft 6 of the crank disc 31. The stops 24 are depressed slightly from their normal position by the roller 19, and at the end of the upward travel of the roller 19, the cam 38 permits the stops to fall and the sheet is de-

livered in a downward direction. The rollers 14 return over bridge pieces 12 of the frame 1, and a new sheet is positioned against the stops 24 before the roller 19 reaches the full line position. The frame 2 is mounted in the main frame 1 by means of slots 3 which take over a rod 4, and by means of pivoted arms 7 with rollers 5 which rest on shaft 9, the position of the frame being controlled by set screws 11 in lugs 10 arranged to press on the rod 4 and on the arms 7. When printing from type an ink cloth is arranged above the type carried by the frame 2. When it is desired to print from a waxed sheet or stencil, this is fixed in a frame 40 which is mounted in bearings 42 on the frame 1. This frame is moved to and from the frame 2 by means of a lever 45 acted on by a cam 47, and the hard rubber roller 19 is replaced by a soft roller which receives ink from rollers not shown and acts both as an inking and impression roller.

Registering Scales.

In this invention two or more of the essential parts of a cylinder printing machine are provided with transverse scales in exact register with each other to enable the operative parts of the machine to be set in correct co-operating position without the necessity for taking trial prints. As shown, a centimetre scale *a* provided on the form

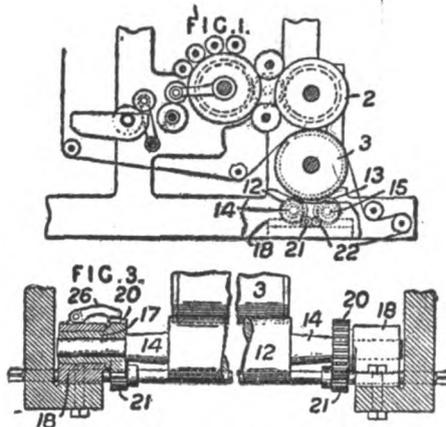

carriage *b* enables the form to be adjusted to the required lateral position. By means of other scales on the feed board *c*, compression cylinder *d*, and delivery table *h*, corresponding adjustment may be made of the front stops *i*, the cylinder grippers *k*, and the knocking up devices *o* respectively. Similar scales are provided on the parts *e*, *f* for adjusting the rolls *l* and levers *m* of the tape devices for pressing the sheets against the impression cylinder, which tape devices may be similar to those described in Specification 139,162 or

of other type. A scale is also provided on the ink duct *g*, Fig. 2, for setting the partitions *n*. The patentee is Mr. C. Winkler.

Supporting Impression Cylinders.

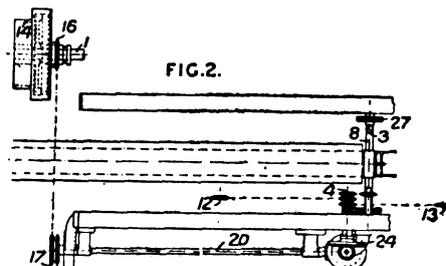

In an invention relating to fast rotary printing machines, patented by Messrs. R. Hoe and Co., the impression cylinder is supported throughout its length, against throwing or jumping, by means located below the cylinder and vertically adjustable to vary the impression, and serving also to iron the blanket. In the arrangement shown in Fig. 1, the impression cylinder 3, disposed vertically

below the form cylinder 2, rests on a pair of hard metal rollers 12, 13 disposed on opposite sides of the cylinder. The rollers are eccentrically mounted in sleeves 17, Fig. 3, on shafts 14, 15, and are adjusted simultaneously through gearing 20, 21, 22 retained in adjusted position by a latch 26 pivoted on one of the bearing blocks 18.

Envelope Making Machines.

This invention, which is patented by Messrs. John Dickinson and Co. and F. G. Hawdon, relates to envelope making machines in which the finished envelopes are fed to a drying and delivering device consisting of pockets formed on the links of an endless chain. The invention consists in driving this device from the main drive of the machine, and in providing means for transferring the drive to a secondary drive, when the envelope forming mechanism, etc., is stopped, in order that the chain may be cleared of envelopes without driving the gummets, folders, etc. In the construction shown in plan in Fig. 2, the machine is driven

by a clutch pulley 14 mounted on a shaft 1 and this shaft is connected by gearing (not shown) with a ratchet wheel 27, which is mounted on and drives a shaft 27, geared with a shaft 4. This shaft 4 drives the chain shaft 8 and shafts 12, 13 of supplementary motions. The clutch pulley 14 is connected by means of sprockets 16, 17 and a shaft 20 with a second ratchet wheel 24, which is mounted on the shaft 4. The gears are so arranged that, when the pulley 14 is clutched to the shaft, the machine is driven through the wheel 27, the wheel 24 rotating at a slower speed than the shaft 4, and thus running free. When the pulley 14 is declutched, the shaft 1 ceases to rotate, and the pulley continues to drive the chain shaft 8 and the shafts 12, 13 through the ratchet wheel 24, thus allowing the chain to be cleared without driving the folders, gummets, etc.

Bookbinders' Overseers at Dinner.

Eulogiums and a Presentation to the Retiring Secretary,
Mr. G. A. Eden, at the Annual Dinner of the Printing,
Bookbinding and Kindred Trades' Overseers Association.

A most enjoyable evening was spent on Saturday of last week at the Holborn Restaurant, the occasion being the eighteenth annual dinner of the Printing, Bookbinding and Kindred Trades' Overseers Association. Following on last year's success the Crown Room was again engaged and the organisers of this year's function, to judge by the satisfaction unanimously expressed, were fully recompensed for their labours. An important event of the evening was a presentation made to Mr. G. A. Eden, whose resignation of the post of general secretary after fourteen years, has been keenly felt by the members. The gift took the form of a gold watch, which bore the following inscription: "Presented to G. A. Eden, Esq., as a mark of appreciation after fourteen years as secretary of the Printing, Bookbinding and Kindred Trades' Overseers Association, April 8th, 1922." A canteen of stainless cutlery was also presented to Mrs. Eden. Mr. A. W. Hunt (the president), who presided over the gathering in his usual courteous and dignified manner, was capably supported by Mr. H. G. Milton (vice-president). The company numbered close upon 200 ladies and gentlemen, and among those present were Messrs. W. Alleston, C. W. Atkins, A. G. Aves, S. M. Bateman (president, P. M. and O. A.), W. Bullett (secretary, Electrotypers and Stereotypers Overseers' Association), G. A. Clifford (the Association's hon. solicitor), A. J. Daines, J. Dixon, G. A. Eden, J. Fleming, T. Goodall, W. H. Hillman, T. Hunt, D. Keats, J. Lee, W. T. Lingham, F. C. Peacock, A. W. Sandilands, B. J. Sansom, J. Walker, A. C. Ware, E. W. Whittle (secretary, P. M. and O. A.) and Arthur Cox (general secretary, P. B. and K. T. O. A.).

The stewards were Messrs. A. G. Aves, A. J. Daines and G. A. Eden.

Full justice having been done to the many good things provided the company then turned its attention to an excellent musical programme, between the items of which were interspersed several brief but well-rendered toasts. Mr. Gilbert Chester, who long ago earned a good reputation in connection with the Association's musical arrangements, was responsible as musical director and accompanist. Other artistes who contributed to a much-appreciated programme were Miss Nellie Beare (soprano), Miss Edith Price (humorous vocalist), and Messrs. Harry Hodsdon (baritone), Rex Harold (humorist), Gordon Marsh (entertainer) and Barnes and Elliott (black and white artistes).

The Association.

The toast of "The King" having been duly honoured, the president submitted that of the "Printing, Bookbinding and Kindred Trades'

Overseers Association." Referring to the Association's standing to-day compared with what it was a few years ago, Mr. Hunt said he could not help feeling proud at seeing such a distinguished gathering before him. It was a gathering which gave every evidence that their progress was in full swing. Referring to one or two points of the Association's activities, he said they had added 31 members during the past year; they had increased their funds, their subscriptions and also their benefits. Considering the adverse times, he thought they had made very substantial progress. The presence that night of such a representation of not only their own membership, but of representatives from kindred societies was proof of the developments they made during the last 18 years. Much of the success that had been attained was largely due to the efforts of Mr. Eden, whom Mr. Hunt eulogised for the assiduous manner in which that gentleman had carried out the duties of general secretary. He was pleased to be able to draw attention to the fact that the Master Printers' Association had honoured them by including their Association in its annual report as one of the societies of standing in connection with the printing and allied trades. They wanted to make their Association even more effective, and that could only be done by individual effort on the part of the members by endeavouring to bring into their ranks overseers and managers, of whom he believed there were quite a lot who ought to be members of their well-conducted and well-established society. (Cheers.)

The toast was heartily accorded.

President and Vice-President.

In offering this toast Mr. J. Walker said he had known Mr. Hunt practically since the inception of the Association. That gentleman had now come into his own, and he had revealed himself as one of the finest presidents who ever held the position, and they had had some good ones. He was sure he voiced the feelings of everyone present when he wished him long life and prosperity. He coupled with the toast the name of Mr. H. G. Milton (vice president), who, he felt sure, would in due course ably exemplify in the chair what had been accomplished in it by previous occupants.

The toast having been enthusiastically received, Mr. Hunt, in expressing his thanks, said throughout his long connection with the Association it had been his sole aim to create among the membership a spirit of goodwill and sociability.

Mr. Milton also briefly returned his thanks for the manner in which his name had been associated with the toast.

The Presentation.

Mr. E. A. Clifford, in making the presentations on behalf of the Association, made appreciative references to the zeal and enthusiasm Mr. Eden had put into his work as secretary. They all knew he was not relinquishing the post because he was tired of the job. Mr. Eden was identified with a Government Department, and that Department had decreed that he should give up the post. As far as Mr. Eden's withdrawal was concerned it was brought about by no fault of his own, but was what his (Mr. Clifford's) profession would describe as *force majeure*. Their late secretary's energy and ability had brought distinction to the Association, and, in spite of what he termed his *force majeure* resignation, he was glad to know his services were to be retained as the Association's honorary technical representative. (Hear, hear.) Mr. Clifford then, in the name of the Association, handed the gifts to Mr. and Mrs. Eden as described.

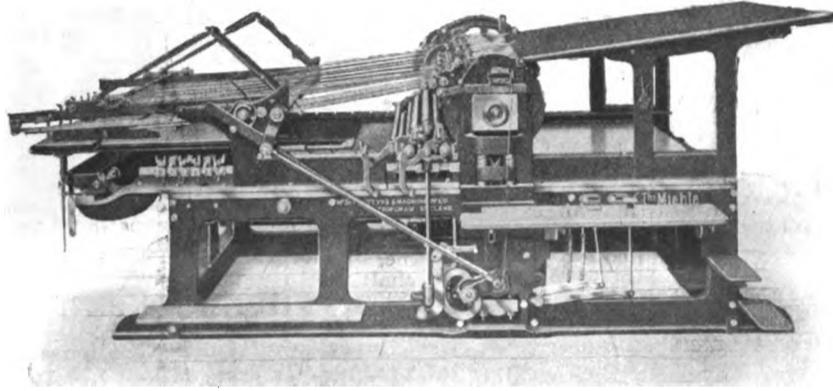

Mr. Eden, who, on rising, was received with loud applause, said he fully appreciated the intrinsic value of the gifts, but what he prized far more was the sentimental worth conferred by their feelings of goodwill towards him. The work he had done for the Association had been to him a pleasure. Regarding the watch, he would prize it for a very long time. It was the second one he had had in his life-time. At the age of 13 he was engaged with a broom, sweeping a bookbinder's shop at a remuneration of five shillings weekly. From this he was allowed 20 per cent. by a good mother, and with it, in the course of time, he purchased his first watch. That watch he had possessed off a few weeks ago. (Laughter.) The gift they had made to Mrs. Eden was also greatly appreciated. He felt unable to adequately express his thoughts, not only for what the tokens signified, but also for all the kind letters he had received from many of the members. (Cheers.)

Mrs. Eden, in response to calls for a speech, said: "Ladies and gentlemen, I thank you all very much indeed for the beautiful gift."

Our Guests.

The toast of "Our Guests—especially the Ladies" was eloquently given by Mr. A. J. Daines. On behalf of the Association he wished especially to welcome the ladies. Apologising for telling tales out of school, he said there was a time when a minority of their members thought it was right that only the male element should be invited to be present at that annual function. Looking round the room he could not see one of that small minority left. Among the guests whom he was pleased to welcome were Mr. Clifford;

YOU can get into line with the best by installing a **MIEHLE** two-revolution press.

IT IS BUILT WITH A MICROMETER,
 but does not need a micrometer to run it.

When you have a Miehle you will be able to print black and three-colour work equal in quality to the best produced by any other printers in the country—and good printing commands good prices.

The best advertisement for the Miehle is the Miehle. It has been the means of assisting many hundreds of printers to establish their businesses in the front rank, and what it has done for them it can do for you. The Miehle has, over and over again, proved that the best is the most profitable.

Shall we send full particulars?

The Miehle

is manufactured only by

In REELS or REAMS.

Mr. S. M. Bateman, president of the P. M. and O. A., and the worthy secretary of that Association, Mr. E. W. Whittle, and also Mr. W. Bullett, the secretary of that thriving organisation, the Electrotypers and Stereotypers Overseers' Association. They felt highly honoured by the presence of these gentlemen, representing as they did kindred associations to their own. He also heartily welcomed a representative of the *British and Colonial Printer and Stationer*, a journal which, he said, had contributed in no small degree to make their Association what it was to-day. Alluding to the overseers' associations, Mr. Daines concluded by saying that he longed for the day when there would be one united association of managers and overseers representing the many phases of the printing world. He coupled with the toast the names of Mr. Bateman, Mr. Bullett and Mr. Whittle. (Cheers.)

The toast was heartily endorsed.

Mr. S. M. Bateman, in responding, congratulated the president on the excellent company he had got around him, and remarked that both their Associations had many objects in common, although he thought they could possibly be brought into closer contact than they were to-day. (Hear, hear.) When questions affecting the trade came to the front, he thought it might be a good thing if a preliminary conference could be held to decide on a common course of action. Their own Association had put up a strong representation to the Whitley Council, which, in fact, they thought to be irresistible, but it resulted in the door being slammed in their faces. Managers and overseers had to be tactful and had to exercise discretion with the difficulties that arose from time to time. The P.B. and K.T.O.A. had made one advance on his Association in inviting the ladies to their annual dinner, although in future he thought the P.M. and O.A. would rectify that. After paying a tribute to the work of Mr. Eden, Mr. Bateman concluded by expressing his and Mr. Whittle's thanks for the invitation, and also for extending it to their wives, a courtesy which he hoped would be returned in due course. (Cheers.)

The Stewards.

Speaking at a late hour, Mr. J. Dixon briefly eulogised the excellent manner in which the stewards had carried out their duties. Their efforts had been crowned with success and he was sure they all felt deeply grateful for what they had done. (Cheers.)

On behalf of the stewards a reply was made by Mr. A. G. Aves and a happy and memorable evening was brought to a close by the joining of hands and the singing of "Auld Lang Syne."

Paper Trade Golf Circle.

A movement has been set on foot to form a golf circle for papermakers in the home counties. It is hoped to arrange friendly matches and competitions, which are bound to strengthen the social element in the industry. The gatherings will be of an informal character; and if a sufficient number of papermakers notify their intention of joining, a medal round will be fixed up at an early date. It is suggested that this should take place in the morning, and that in the afternoon, after a friendly luncheon, foursomes should be played. After the circle has been launched it is proposed to form a team for the purpose of challenging other allied golf organisations. A number of promises of support have already been received, and any papermakers in the Southern area who have not been approached can obtain full particulars on applying to Mr. A. W. Foster.

Messrs. DAVIES AND ROYLE, the well-known paper agents, of 7, Old Swan-lane, London, have opened new offices at Leeds and Manchester. The Leeds address, where Mr. W. A. Cuss is in charge, is Owen's Chambers, 4, Duncan-street; Telephone No., 26703, and telegrams Elroy, Leeds. The Manchester office at Cromwell-buildings, Blackfriars-street, is in charge of Mr. H. Attoe; telegrams Elroy, Manchester. Both Mr. Cuss and Mr. Attoe have been delegated from the London office of Messrs. Davies and Royle. It might also be mentioned that the Glasgow office of the firm, which is under the control of Mr. R. Mellis, is at Waterloo Chambers, 19, Waterloo-street, Glasgow; Telephone, Central 6467; and telegrams Elroy, Glasgow.

Up-to-Date Overlay Processes.

The American "Oak Leaf Overlay."

Writing to us anent the article on "Overlay Processes—Old and New," by Mr. William Gamble in our issue of January 5th last, the director of the Department of Research of the United Typothetæ of America, Mr. W. R. Colton, is good enough to send us fuller particulars than we had previously possessed of an interesting variant of the chalk overlay. The new process is in very extensive use in the United States and Canada, in the States under the name of the "Oak Leaf Overlay," and in Canada of the "M. B. Overlay," the patents being controlled by the Miln-Bingham Limited, 6, Johnston-lane, Toronto. The variant from the usual chalk board is that this board is coated on both sides, and an impression and an offset impression are taken from the half-tone at the same time. The board is then etched, and used in the method described by Mr. Gamble in the article cited above.

The Oak Leaf Process Described.

The basic material required for this process is what is known as "Oak Leaf" overlay paper—an etchable coated paper or board for making overlays for half-tone printing. It is an article of American manufacture and is used in the leading printing establishments of the United States. Then there is required also "Oak Leaf" overlay ink—a specially manufactured ink for use in pulling overlay proofs, and intended to be used only in making the overlay. "Oak Leaf" overlay etching powder also is required; it is furnished in powdered form and, when mixed with water, is used to etch the print, making it into a relief overlay. The print can be etched immediately after pulling or can be laid aside for a more convenient time. Properly to etch or "develop" an overlay requires from three to five minutes—depending upon the strength of the etching solution and the dexterity of the operator.

When the overlay is made it forms an exact reproduction of the original cut, showing in perfect relief all of its variations and shades and retaining all of its many values, even to the minutest detail.

The official instructions for the use of "Oak Leaf" overlay paper on a platen press direct the user first to take two impressions—one on top of the other—upon a sheet of the best coated paper obtainable. Next place a sheet of overlay paper, cut to size, upon the coated paper and pull one impression. This will give an impression on the front of the overlay, with an offset impression on the reverse side. Now remove both the overlay and the coated paper. Place a clear sheet of coated paper on the press and make two impressions; again place the overlay on the coated paper and pull another impression. It is necessary to repeat these operations as described in order to secure sufficient ink density on the front and back of the overlay. If a shallow overlay is desired, however, it is necessary to make the impression upon one side of the overlay only. It is recommended that overlay proofs be made upon a platen press, as this method has been found to be the most satisfactory.

If, however, it is desired to make the overlay in a cylinder press, the first point is to see that all cuts are type-high when locked in chase to insure an even impression. It is important that care be taken in underlaying the cuts, so that an even, yet light and firm, impression may be obtained. When the cuts are even and type-high, place a sheet of good coated paper on the cylinder as a top sheet. This sheet takes the offset and should be a smooth, non-picking paper which will take the ink well and give an even, clear offset print. Directly under the offset place four or five sheets of soft thin paper, preferably news. This increased and soft impression is necessary in order to obtain a clear offset on the overlay paper without mottling. Before printing the offset sheet, wash and dry the cuts thoroughly so that no dirt or grease will be left on them. Then lift rollers and thoroughly ink the cuts with a hand-roller, using overlay ink. Take an impression on a sheet of coated paper to determine whether enough colour is being carried (which should be very full), being careful that all the values in the cuts can be plainly distinguished. This sheet is also necessary to stretch back the offset sheet so that a perfect register will be obtained. Take two or three impressions—one on top of the other—on offset sheet, ink-

ing up form each time with hand-roller; run press very slowly, preferably by hand, to prevent picking. Sheet bands and brushes should be lowered so they will not smear the print. With feed-board raised, place the overlay paper on the cylinder on top of offset print, letting grippers close on same, and take an impression. This will give one impression on the face of the overlay paper and an offset on the back from the offset sheet. The overlay is now ready to etch.

Etching the Paper.

The etching of the paper is done in an etching solution prepared with the special etching powder. The operator has before him one pan of the etching solution and one of clear water. The method of operation is to grasp the edge of the overlay with a special paper-holding clip and work it slowly through the etching solution until the chalky substance near the edges and in the high lights is entirely removed. Occasionally dip a camel's-hair brush into the clear water and pull it lightly across both sides of the overlay, laying the overlay during this process upon a smooth sheet of glass or metal. Watch the overlay with care while etching and hold it to the light from time to time so as to ascertain whether all high lights are clear and the solids retained. Care should be taken not to etch the sheet too much, as the detail is then lost. Test by drawing through the fingers along the margins or some unprinted part of the picture. If the chalk is easily removed and the paper feels rough, the etching is complete. When sufficiently etched, wash the overlay thoroughly in the pan of clear water, brushing it gently but firmly with the camel's-hair brush to remove loose ink and partly dissolved coating. This brushing will not remove that part of the coating which should adhere to the overlay. Then place between blotters and press lightly to take up surplus water. Lay upon a wooden table or steel base to dry, turning the overlay occasionally to equalise the drying. When dry the overlay is ready for printing. For vignettted half-tones remove screen edge by scraping with a knife before etching.

Another process—distinct from the above—is used specially for the purpose of printing a deep etched half-tone on writing papers which is put out by the Crocker-McElwain Co., Holyoke, Massachusetts, under the name of "Flex O-Lay," which is practically the same as the "Typo-Lith" process which was extensively advertised some years ago, but is meeting with more success because of the careful methods laid out by this concern.

Messrs. Thom and Cook.

The new offices which Messrs. Thom and Cook have taken at 56, Carter-lane, London, are well adapted for the increased business which has gradually been built up since the firm was established in January, 1912, in Queen Victoria-street. The whole of the ground floor has been entirely reconstructed by Messrs. Wallis, Gilbert and Partners, providing just the accommodation which is required for a paper agent's business. In the centre of the ground floor is the general office, from which radiate the various departments. On the right of the entrance passage is the private office of Mr. W. Thom and Mr. A. F. Cook, who before they came into partnership 10 years ago had each of them had wide experience in the paper trade. Adjoining this large and well-lighted office is the private room of Mr. E. M. Thom, the son of Mr. W. Thom. Close to the counter in the general office is a convenient waiting-room, and adjoining are four offices, three of which are placed at the service of the travellers now in the employment of the firm, the fourth being reserved in the event of improved business allowing of another to be engaged. In addition, there are a sample-room, which is specially fitted for the purpose, the typists' office, and a store for office stationery. The whole of the rear section of the ground floor, representing an area of 2,500 square feet, is being fitted up as a stock-room, to which access is obtained by separate entrance from Carter-lane. Here there is also accommodation for a cutting machine, which previously had been housed in a warehouse apart from the offices. The whole of the new premises have been re-decorated and fitted with electric light, so that there is all the light that is required in the handling of paper, while economy of motion is studied in the general lay-out of the extensive ground floor.

Trade Notes.

It is reported that Messrs. Thomas De La Rue and Co., Ltd., of New York, are printing the postage stamps for the new Irish Free State.

THE collection of Morland engravings and colour prints which was formed by the late Sir Edward Coates, M.P., will be sold at Sotheby's next month.

THE Argus and *Financial News* Athletic and Social Club—of which Sir Ernest Flower is the president—will hold a dance and concert at the Manchester Hotel, Aldersgate-street, on Tuesday next. Tickets are 1s. 6d. single and 2s. 6d. double, and may be obtained on application to any member of the committee or to the secretary.

IN Stockport County Court last week, Augustus Fossett Vaughan was awarded £50 and costs against Mr. Horatio Bottomley in respect of a deal in debentures. It was stated that the plaintiff, in reply to a circular advertising the issue of debentures in the Sunday Publications, Ltd., of which Mr. Bottomley was chairman, forwarded a cheque for £50 payable to Horatio Bottomley or order. Despite several letters from plaintiff and his solicitors, neither debentures nor bonus shares had been received.

MR. W. BULLETT, secretary of the Electrotypers' and Stereotypers' Managers and Overseers Association, writes under date April 18th:—"I wish to point out that the statement made by one of the speakers at the annual dinner of the Printing, Bookbinding and Kindred Trades Overseers Association to the effect that my association was the younger of the two associations is incorrect. Being founded in 1899, we respectfully claim seniority as to period of existence. At the same time I wish to say that I fully appreciate the cordial spirit shown both to myself and my Association on the occasion in question."

MESSRS. CHARLES HOOPER AND CO., LTD., inform us that they are, as from April 1st, taking over the works and plant of Suffolk and Watts, Ltd., at 12, Wilson-street, E.C.2. For many years the directors of the two companies have been the same, and the management and staff will be continued.

MR. EDGAR SAMUEL LEWIS, who had been editor and director of the *Hull Daily Mail* since 1890, has died in his 69th year.

THE death has occurred, after a brief illness, of Mr. V. D. Hughes, secretary for a number of years to the Irish Newspaper Owners' Association.

MR. ALBERT F. BAILEY, editor of the *Dursley Gazette*, a Gloucestershire weekly, was found dead on Thursday morning in his office chair with his pen in his hand.

THE death has occurred of Mr. William Harry Price, of the well-known firm of Pryce and Son, printers and stationers, Powis-street, Woolwich.

MR. CHARLES BERNARD HEYES, for many years a member of the staff of the London News Agency, *Reynold's Newspaper* and other journals, died, at the age of 59, on Thursday.

MR. WILLIAM WALL, managing director of the firm of Messrs. Thomas Wall and Sons, Ltd., printers, of Wigan, and editor of the *Wigan Observer*, died on Tuesday at Southampton in his 69th year.

THE death occurred on Tuesday at Whetstone, London, of Mr. Robert Eadon Leader, who was formerly editor of the *Sheffield Independent*, and a member of the family that founded and owned the paper for many years, and who was at one time chairman of the Committee of Management of the Press Association.

MR. DAVID LEITH PRESSLY, for eighteen years managing editor of the *Yorkshire Herald*, died last week at York, aged 67. Mr. Pressly commenced his journalistic career on the *Aberdeen Free Press* in 1872. Subsequently he went as a reporter to the *Cape Times*. He held positions afterwards on the *Londonderry Standard*, *Londonderry Sentinel*, *Belfast Telegraph*, and was editor of the *Aberdeen Daily Journal* and the *Eastern Morning Gazette* at Norwich. He was appointed editor of the *Yorkshire Herald* in 1904.

At the first annual conference of the National Union of Travellers, held on Saturday in London, the executive were empowered to publish a journal to be called the *Commercial Travellers' Journal*.

TENDERS were invited last week for the goodwill and copyright of the *London Mail* (in voluntary liquidation).

AN agreement has been entered into by the *Illustrated London News* and the *Sketch*, Ltd., and the *Sphere* and the *Tatler*, Ltd., subject to modification, with the object of the two companies co-operating in the production and sale of their respective publications. The agreement also provides for the pooling of the two companies' profits and a scheme for the distribution of dividends.

WITH the publication of its issue of the 12th inst. the *Kelso Mail* completed the 125th year of its career. Its first printer, publisher, and editor was James Ballantyne, the founder of the Ballantyne Press, of Edinburgh, now represented by Ballantyne, Hanson, and Co., London.

Trade Union Matters.

PROPAGANDA COMMITTEE of the Jobbing Guild of the Typographical Association reports that much success is attending their efforts to increase the membership of this body. The Manchester branch of the Guild now comprises 561 members, Birmingham has 230, Liverpool 204, Halifax 80, Hull 70, and branches have been formed in most of the important centres of the Association.

MESSRS. W. BOTTOMLEY (Leeds), F. Dunn (Birmingham), J. Morgan (Liverpool), J. D. Harvey (Newcastle), and H. T. Whitley (Belfast) have been re-elected without opposition to the Executive Council of the Typographical Association. Election has yet to take place of the remaining 16 places on the Council, the number of which is to be raised to 22 under the new constitution recently approved by the members.

THE annual conference of the National Union of Journalists opened on Thursday at Nottingham under the presidency of Mr. Thomas Jay, of Bristol, and was continued on Friday. About 60 delegates attended, representing 4,900 members. A civic welcome was given to the visitors.

By an overwhelming majority the London District Council of the Newsagents' Federation has decided that, in the event of a strike or lock-out in the industry, newsagents will not handle any paper or periodical produced by non-union labour.

Costing Classes.

Keen interest is still being maintained in scientific methods of ascertaining cost. During the past session, St. Bride, the London centre for teaching this important subject, has had overflowing classes, some 150 students having passed through the classes. An examination takes place on Monday, May 8th at 6.30 p.m. at Stationers' Hall.

Subject to sufficient enrolments, a summer term is to be held on Wednesdays during May and June. This is a short course of eight weeks and intended for those holding executive positions. Any readers desiring to enrol for this course should make early application to the Principal. The first class commences on May 3rd, and will be held every Wednesday until the end of June.

Printing Trade Football.

The final match in the "Natsopa" Charity Shield Competition was played off on Good Friday at Tilling's Sports Ground, S.E. After a keenly contested game, which attracted a good crowd, the play resulted in a win for the *Daily Mirror* over *The Times* by 2 goals to 1.

On Easter Monday, at the Dulwich Hamlet F.C. Ground, under the auspices of the Printing and Allied Trades Charity Sports Association, a match in aid of the Printers' Pension Funds was played between Fry's Metal Foundry and the Stereotypers (Rest of the Trade). After extra time the game resulted in a win for the Stereotypers by 5 goals to 2. At the close of the match a handsome cup was presented to the winning team by the president of the P.A.T.C.S.A. (Mr. W. R. Masters, managing director, Fleetway Press, Ltd.). The medals for the winning team are to be presented at the Stereotypers' concert in October.

Lloyd Memorial Home.

Annexe Opened at Deal.

On Saturday several hundred London members of the newspaper and printing trades visited Deal for the opening of the Lloyd Memorial Caxton Seaside Home Annexe for Women. When the "special" carrying the delegates arrived, a crowd of people were present to welcome their guests. The Mayor and the officials of the Corporation welcomed Lieutenant-Colonel E. F. Lawson, D.S.O., M.C., Mrs. Lawson, and the delegates, who were later entertained to luncheon at the Royal Hotel.

Responding to the toast of his health, the Mayor said they in Deal were glad that the usefulness of the Lloyd Memorial Home had so grown that it was necessary to open an annexe. Thanks were due to the good work of the committee and their excellent matron, Miss Gray.

Proposing "Success to the Annexe," Lieutenant-Colonel Lawson said the institution was originally designed for sixty-four patients, but the need for more accommodation was such that the annexe was purchased to give accommodation for 100 patients in all, and when further building was carried out next year the number would be increased to 140. Last year 1,679 patients were received, making a total since the opening of the institution of 10,941. The home was doing invaluable service for the workers in the printing and allied trades. The purchase of the annexe, with its fine view of the sea, channel shipping, and the French coast, involved a debt of £2,000, but the secretary, Mr. Parker, had very little to learn in the art of persuasion, and they were inviting donations to meet the deficit.

The toast was seconded by Alderman Edgar, who was Mayor of Deal when the home was opened in 1911, and supported by Mr. T. E. Naylor, M.P., who spoke of the institution as a permanent memorial of the fraternity between the workers and employers in the printing and allied trades.

Mrs. Lawson responded to the toast of "The Visitors," proposed by Mr. W. R. Stuart.

The Mayor proposed the health of the chairman, Lieut.-Colonel Lawson, and, in seconding, Mr. W. T. McMullon, chairman of the home, said he was specially pleased to do so because Lieut.-Colonel Lawson had helped to raise the tone of English newspapers to a higher level than ever before, and had also won the attachment of those working under him, and was, moreover, a craftsman in every branch of the printing trade.

Lieut. Colonel Lawson made suitable response.

The secretary presented to Mrs. Lawson a souvenir key of the annexe, and the health of the secretary was proposed by Mr. Doherty.

At 4.30 the Mayor and Mayoress and members of the Deal Town Council held an "at home" at the Winter Garden Theatre, where many of the delegates spent an enjoyable time, the Mayor and Mayoress of Maidstone, the county town, being also present in their official capacity. At 6.30 half the delegates returned by their special train to London, the Mayor leading the cheering and the singing of "Auld Lang Syne" as the train left the platform. The remaining delegates accepted free passage to pier and pavilion concerts in the evening arranged and given by the Deal Amusements Committee.

A WALKING stick made of paper is the work of a Bridgewater cripple named Arthur Brooke. It is composed of 17,000 pieces of the *Daily Telegraph*, cut into small circles, soaked, and passed over a steel rod, and then compressed. The only tools employed were a razor, a rasp, a file, and a small spanner. The stick has the pliability of a Malacca cane, retains its natural colour, and is polished. It bears on an embedded coin the date 1855, the year when the *Daily Telegraph* was founded.

WEST AND NORTH-WEST London Master Printers' Association

Alliance President Attends Annual Meeting.

Lieut.-Col. J. R. Truscott, president of the L.M.P.A., received a hearty welcome when he visited the West and North-West London Master Printers' Association for the annual meeting, which was held on Tuesday of last week, the meeting being attended not only by a goodly muster of local members, but also by several prominent representatives from other district associations. The gathering took place at the Norfolk Hotel, London-street, Paddington. Light refreshments were provided and the proceedings brightened by an excellent programme of music. Very cordial appreciation was shown of pianoforte playing by Miss Burt, and of singing by Mrs. Emlyn Jones, whilst songs by Mr. Harry Wyatt called forth enthusiastic applause.

The chair was occupied by Mr. E. W. Wormald, who opened the meeting by expressing the Association's very hearty welcome to the new president of the London Master Printers' Association. He also welcomed individually the visiting members—Messrs. C. A. Bates, J. R. Brigenshaw and F. Mason from the South-East Association; Mr. F. H. Cole from the South-West; and Mr. W. J. Mizen from the North London Association.

The Secretary's Report.

After the minutes of the last annual meeting had been approved and a number of apologies for absence conveyed to the meeting, the hon. secretary of the Association, Mr. J. R. Burt, read an interesting detailed report for the year 1921-22, the ninth year of the Association's existence. The report recalled a year of uncertainty and bad trade, of increased competition and reduced profits. Stress was laid upon the height to which wages had risen and the smallness of the wage-reduction obtained, whilst high postal rates and excessive taxation were also mentioned as serious hindrances to economic production. The report went on to detail the many useful activities of the Association during the year. Efforts had been made on behalf of the Printers' Pension Corporation and the Master Printers' Benevolent Fund; the question of direct dealing by the wholesale houses had been brought to the fore; a local directory with other information was in course of preparation, and it was hoped to circulate it in May; and it was proposed also to issue a list of overhead expenses. The report went on to recall the various useful meetings arranged by the Association from the time of the big joint meeting at the Printing Exhibition up to the recent lecture by Mr. Chas. T. Jacobi on the subject of "Simplified Printing"—a report of which, it was mentioned, appeared in the *British and Colonial Printer and Stationer* of March 25th. Thanks were expressed to the visitors and the local members who had devoted time and interest to the welfare of the Association. Appreciative reference was made to the Association's monthly lunches, under the presidency of Messrs. Langley and Pollock, and gratitude was expressed to Mr. and Mrs. J. Emlyn Jones for the oversight of the provision of light refreshments for the convenience of members attending the monthly meetings. Regret was expressed at the death during the year of Mr. J. Hastie. It was announced that 22 new members had been admitted, this being a record since the early days of the Association, and bringing up the total membership to 160. The appreciation of all members was expressed to the retiring president, Mr. Wormald, for the consistent attention and efforts made for the good of the Association, not only during his year of office but since the Association's inception. The thanks of the Association were also offered to Mr. A. T. Philp for his services as publicity secretary. The report closed with another reference to the wages question, stress being laid upon the harm done to the trade as a whole by the high wages at present paid, and hope being expressed that the conferences now taking place would not only be temporarily effective, but also provide a basis for such adjustments as might from time to time become necessary.

The Chairman suggested that, to be complete, the report should make some reference to the estimable work of the secretary.

Mr. A. Langley thereupon moved, and Mr.

Pollock seconded, the adoption of the report with the addition of an acknowledgment of the services Mr. Burt had rendered to the Association.

This was agreed unanimously.

The treasurer, Mr. F. Scarsbrook, then presented the financial statement, which showed a small deficit for the year.

Mr. F. Perry, in moving the adoption of the balance sheet, said he approved of the debit balance, as it showed that they had been doing something. He also expressed the Association's obligation to Mr. Scarsbrook for his work as treasurer.

The motion was seconded, and agreed unanimously.

Officers for the Coming Year.

Proceeding to the election of officers, Mr. Wormald, after expressing his thanks to those who had assisted him during his term as president, proposed Mr. S. Sidders for the presidency. This was duly seconded, and agreed *nem con.*

Mr. Sidders accordingly took his place in the chair.

As vice-president, Mr. Sidders proposed Mr. J. Emlyn Jones, eulogising the unobtrusive and kindly work which Mr. Jones had been performing on behalf of the Association ever since it started. Mr. King also, in seconding, spoke very highly of the services rendered by Mr. Jones, who was then unanimously elected vice-president.

As treasurer, Mr. Scarsbrook was re-elected.

Mr. Philp having asked to be relieved of the duties of publicity secretary, several nominations were made, but it was eventually agreed to let the matter stand over to be dealt with by the committee.

As representatives to the council, the meeting elected Messrs. J. R. Burt, A. Langley, F. Perry, and S. Sidders.

Mr. J. R. Burt was enthusiastically re-elected as secretary, the Chairman speaking of his work for the Association as "immeasurable," and referring to him as the "pioneer" of the district associations.

The formal business being concluded, the Chairman called upon Lieut.-Colonel J. R. Truscott to address the meeting.

L.M.P.A. President's Address.

After some humorous remarks as to the demands which his occupancy of the presidency made upon his time, Colonel Truscott referred to the very real work that the representatives of the West and North-West Association were doing on the L.M.P.A. council, and he expressed appreciation of the long and trying services thus unselfishly rendered. In the course of some interesting remarks on the subject of the wages negotiations, Colonel Truscott struck an optimistic note, asserting that there was no question whatever that a large section of the men realised that in order to get back to good trading conditions it was necessary that wages should come down. He thought they on their side might have to make certain time sacrifices in order to give the wives of their workmen an opportunity of getting accustomed to the reduction. The President intimated, however, that it was impossible for him to go into detail on the subject of wages, as the negotiations were still in progress.

Mr. C. A. Bates, being called upon to address the meeting, referred first to the very friendly and happy spirit animating the North-West Association, and went on to point out the need for progressive organisation, and the efforts being made in this direction by the South-East Association. After stressing the necessity of a reduction of wages, Mr. Bates touched on the subject of the sending of printing abroad. He told of the widespread circularisation of London firms by a Berlin printing house, which laid emphasis on its ability to undercut British printers on account of lower wages, cheaper paper and cheaper postage. He suggested a vigorous Press campaign against printing abroad.

Colonel Truscott suggested that this introduced the danger of advertising the possibilities of printing abroad.

Some discussion ensued on this point but without any consensus of opinion being reached. Reference was made to personal canvassing in this country for printing orders to be sent to Germany.

Mr. J. R. Brigenshaw, being asked to speak, congratulated the North-West Association on being "broke." They of the South-East were "doubly broke." The valuable propaganda work carried out was cheap at the price of the small deficits incurred. He indicated, however, that there would probably be in future an increase in the proportion of funds returned from headquarters to district associations for local expenses.

Mr. F. Mason expressed very cordial appreciation of the work of Mr. Burt, and referred to the North-West Association as being in many ways exemplary.

Mr. F. H. Cole spoke in similar strain, expressing appreciation of the hearty welcome given by the West and North-West Association to their visitors.

Mr. W. J. Mizen, in telling of the activities of the North London Association, suggested arranging with the West and North-West a joint outing of trade interest.

The proceedings ended with a hearty vote of thanks to those who had provided the musical items, and to the visitors.

North London Master Printers.

Annual Meeting of Association.

A goodly number met at Finsbury-park on Monday, April 10th, for the annual general meeting, at which Mr. D. A. Whitehead occupied the chair.

New members were elected as follows:—F. T. Herbert, 28, Balls Pond-road; Gordon Robinson, 110, High-street, Ponders End; W. J. Sparey, 116, Hertford-road, Enfield Wash; Samson and Hakes, 37d, Mildmay Grove, N.I.; A. E. Pettett and Co., 218, Seven Sisters-road; and the Cowper Press, 97, Church-street., Stoke Newington.

The presence of the L.M.P.A. secretary, Mr. Whyte, and Mr. J. Johnson was appreciated, and much helpful information was given during the evening by Mr. Whyte.

The election of officers for the ensuing year was as follows:—Mr. L. F. Hunt, president; Mr. Wilson, vice-president; Mr. W. J. Mizen, hon. secretary; Mr. W. R. Cummins, hon. treasurer and publicity secretary.

The representatives on the council for a number of years have been Mr. W. J. Mizen and Mr. H. C. Hill. The latter had intimated that for health reasons he must resign, but so unanimous was the opinion that his services were invaluable to the Association, that it was decided that Mr. Hunt should deputise for him until such time as he was able to resume full duties. The committee was then elected and consists of the following gentlemen:—Messrs. Curtis, Hammond, Woolridge, Whitehead, Brockman, Malcolm, Hayllar, Orchard, Soule, Wilson and Williams.

The hon. secretary, Mr. W. J. Mizen, gave an extensive report on the activities of the preceding year, and said North London had a membership of 100. He was very emphatic as to the position of the trade through the wages difficulty, subsequently moving a resolution that was seconded by Mr. Wilson, of Tettenham, and carried unanimously "that this Association welcomes the effort made by the L.M.P.A. for a reduction of wages and will do all in its power to support them in any action to bring it into effect."

Some little time was spent on the matter of wholesale stationers supplying direct, and on the motion of Mr. D. A. Whitehead it was decided that members with grievances in this matter should inform the branch secretary or write Mr. Langley of the North-West London Association.

A further resolution was moved by Mr. D. A. Whitehead—to be sent to the P.M.G., the Chancellor of the Exchequer, and each M.P. of the various constituencies in North London—"that this meeting of North London printers considers that in the interest of trade, a reduction in postal rates to pre-war standard is imperatively necessary."

The meeting concluded with a hearty vote of thanks to Mr. D. A. Whitehead for his able presidency during the past two years.

Paper Merchants' Partnership.

The case of Haynes v Skelton came before Mr. Justice Sargant in the Chancery Division last week on a motion by the plaintiff for the appointment of a receiver of the partnership business of paper merchants and storage contractors carried on by plaintiff and defendant. The latter did not appear, and his Lordship said it appeared from the report of the accountant who inspected the books of the partnership that it was insolvent. It was quite clear that a receiver should be appointed, and he made the appointment accordingly.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

	Three Lines	s.	d.
Agencies	3	0	0
Situations Wanted	1	6	0
Situations Vacant	3	0	0

 Africa, United States, South America, Canada, etc.

THURSDAY, APRIL 20, 1922.
Wages Negotiations Continue.

WAGES conferences with several trade unions were held before Easter, as indicated in last week's issue, and further conferences are being held this week, it being expected that all the unions concerned will have conferred with the employers' representatives before the meeting of the Joint Industrial Council on the 26th inst. Several unions acting together under the auspices of the Printing and Kindred Trades' Federation conferred with the Federation of Master Printers on Tuesday of last week and are to resume conference on Friday next; the lithographers had a meeting on the Wednesday; and conferences are arranged for this week with the London Society of Compositors, the Typographical and the other unions. We understand that the employers have submitted a revised demand for a reduction of 15s. a week by instalments, to operate between the second pay-day in May and the first pay-day in December. The employers were prepared to give an undertaking that, after these proposals were recommended for acceptance, no further application for a reduction of wages should be made to become operative before March, 1923.

Postal Rates Suspense.

THE question of the future of the postal rates would seem to be still in as doubtful a position as ever. The report which obtained currency in the Press last week to the effect that a compromise would be reached about the disposal of the Post Office surplus, half of it to go to the Treasury and half to the Post Office, remains without official confirmation. It would, indeed, be amazing as well as disappointing if—as the report referred to indicated—a compromise were made which left the rates for printed matter unaltered. The rates for printed matter have received an immense amount of emphasis in the representations which have been made from all quarters in respect of the burden which dear postage imposes upon industry in general. To maintain the present rates for this class of matter would mean the retention of a tax on trade which has already aroused universal

protest, and to the alleviation of which the Postmaster-General has very definitely set his hand. We cannot suppose, therefore, that it can be the serious intention of the Treasury to attempt to force a compromise so obviously unacceptable to the whole business community. Official silence, at any rate, gives room for hope that any such blunder will be avoided, for the latest statement drawn from Mr. Kellaway in the House of Commons is only a repetition of what has so often been said—that he is aware of the great anxiety in the printing and allied trades on the question of the adverse effect on their industry of the present postal rates, but the question is still under consideration by the Government, and he is, therefore, not yet in a position to make a statement on the subject.

Paper Prices.

THE trend of price, comparing April with March, has been slightly downward. We heard one well-known paper representative developing the theory that falling prices, or, more correctly, as he put it, low prices, were no good for the printer, as the profit return was proportionately less. This does not correspond with the printer's point of view, whose chief argument is that high prices are driving the big printing orders out of the country and causing consumers of print to curtail their requirements and altogether drop certain classes of work. If high paper prices give a bigger return, so does a high cost of production; but, logically, it is far better to have ten orders on a medium basis of price than one on the high rate. In the end, it is the aggregate that tells, and that can only be satisfactory when orders become plentiful enough to keep full staffs working.

Recent Reductions.

WITHIN the last month prices have eased in all directions, though only slightly. Hand-made papers have dropped 1d. and 2d. per lb.; E.S. papers are on the average about ½d. per lb. cheaper; cartridges and manillas show the same reduction; tub-sized papers of the better class have fallen by from 1d. to 3d. per lb. with different makers. Keen competition in cheap account-book paper has forced the price down another ½d. per lb., while wrappings stand much where they did a month ago.

Progress in De-inking.

IF the Elliott process of de-inking and repulping printed waste paper is as successful economically as it is materially, we should be within sight of a solution of one of the problems that has faced papermakers for a long time. The samples we have had passed on to us are small pieces of pulpboard produced from old copies of this journal. The colour is perfect, the fibre well retained, and there is not the slightest trace of ink or dirt. In the war days of paper scarcity, innumerable patents were taken out in almost every country for the reclamation of white pulp from printed waste, and there can be few readers of this journal who have forgotten the commotion aroused by the Winestock process. But it cannot be claimed that the problem of commercially economical reclamation has yet been properly solved. Our greatest contribution to the subject is the work of Mr. Strachan whose treatise, "The Recovery and Re-manufacture of Waste Paper," contains the most complete and authoritative information extant in published form. The progress of this new method, which is being developed at Bolton, will be watched with interest.

VISCOUNT NORTHCLIFFE, hon. treasurer of the Empire Press Union, is to be entertained by the home membership of the organisation at a luncheon to be held on May 10th, at the Hotel Victoria. Viscount Burnham (president of the Union) will take the chair.

Johnson-Riddle Jubilee Dinner.

A Memorable Occasion.

An interesting function significant of the trend of relationship between employer and employed took place at the Hamilton Hall, Great Eastern Hotel, on Monday of last week, when the directors of Messrs. Johnson, Riddle and Co., Ltd., the well-known poster and general colour printers, of Sumner Works, 32, Southwark Bridge-road, S.E.1, entertained their staff at dinner in celebration of the jubilee of the firm. In addition to the staff, numbering about 250, there were present some 30 guests, representing "the guiding brains of several of the largest industries of the world" to quote the remarks of Mr. Gunn, during the evening.

Dinner was served at 7.15, and after the splendid menu had been done justice to, the chairman, Mr. C. Arthur Bates, managing director, proposed the toast of "The King," which was loyally received and responded to with musical honours. A very excellent musical programme had been arranged, the following artistes delighting the audience with their talent—Miss Dorothy Greene, Miss Gladys Peel, Mr. Edward Halland, Mr. Archie Naish, and Mr. Lionel King, the conjuror, Mr. Chas. Forwood, accompanying.

Amongst the musical portion of the programme were interspersed three toasts. That of "The Firm" was proposed by Mr. A. E. Goodwin, secretary of the Master Printers Federation, and in the course of his speech he remarked upon the extremely useful service to the whole community that had been rendered by the firm in having done as much as any other house in the Kingdom to establish what is known as "The People's Picture Gallery." This was emphasised in the elaborately produced programme and history of the firm presented to everyone upon the occasion, in which it was mentioned that such well-known posters as Pears' "You dirty boy," the famous *Tit Bits* picture of the errand boy and the cat, "Skegness is so bracing," the well-known railway poster, and artistic productions such as the Japanese garden and the peacock design produced for the Royal Horticultural Association (to mention only a few) were printed by Johnson, Riddle and Co., Ltd., thus increasing business and enlivening the drab surroundings of our large towns. Mr. Goodwin also pointed out that the firm was always ready to take in new ideas and was always amongst the first to install up-to-date machinery, and employ every process that looked liked being a good one.

After the very excellent conjuring entertainment by Mr. Lionel King, interspersed with humorous patter which was much appreciated, the managing director, Mr. C. Arthur Bates rose to respond to the toast of "The Firm," and drew attention to the little history contained in the souvenir programme, which demonstrated that "we are a very active and happy family." He paid affectionate tribute to the help and work of his brother directors, and thanked Mr. Goodwin on his own and their behalf for his appreciative and encouraging sentiments. He suspended his further remarks till later in the evening.

Later in the evening Mr. Arthur L. Gunn, proposed the toast of "The Visitors," assuring them of the delight it was to entertain them and the honour he felt was done to the firm by their presence. Mr. Gunn coupled with this toast the name of Sir Percy Simmons, K.C.V.O., and Mr. Harold Walters.

Sir Percy Simmons, in responding for the visitors, said it had been a great pleasure to be associated with Johnson, Riddle and Co., Ltd., for so many years. He paid a personal tribute to the chairman and wished continued success and prosperity to the firm of Johnson, Riddle and Co., Ltd.

Mr. Harold Walters, in supporting Sir Percy Simmons' remarks, recalled the connection of the early days both of his father and himself with Johnson, Riddle and Co., Ltd. He paid a warm tribute to the founder of the firm, Mr. Walter Eldridge Johnson.

Towards the close of the evening, the chairman proposed the toast of "The Staff." He remarked that the printing industry was one which depended largely on absolute correctness of every detail in its numerous processes, and pointed out how much the quality of the finished article reflected the zeal, initiative and care of the staff as a whole. He mentioned that there is no question of passing on second-quality goods, because there are only two destinations for the printer's productions

—either to those who want them or the waste paper bag. On behalf of himself and his brother directors he stated that they much appreciated the keenness, intelligence and common-sense exhibited by the staff. Briefly condensing the appreciation which the board felt, Mr. Bates touched upon the energy and zeal of the sales staff, the importance of the estimating side of the business, and expressed much appreciation of the technical ability and loyal support of the designing, artists, composing, machine and warehouse personnel. The counting-house and correspondence staff were also complimented upon the very efficient and zealous manner in which their exacting duties were carried out. He also touched upon a few of the old and well-known members of the staff, both past and present, recalling to many of their colleagues present incidents which had occurred since 1872. He then mentioned how the policy of the firm was to keep the plant as up-to-date as possible, giving some details as to recent installations, including the photo process department.

The works manager, Mr. A. G. Coleman, in responding to the toast, said that it was no easy task to do full justice to the staff's appreciation of the generosity and splendid hospitality which they had received that evening, pointing out that the success of the firm was undoubtedly due to the directors' initiative, foresight and far-seeing policy, backed up by the hearty support of the staff, and felt sure that the latter was created by the sympathetic and tactful manner in which the directors—particularly Mr. Bates, who is more intimately concerned with the inside matters—dealt with all questions relating to the well-being and comfort of the employees. Mr. Coleman also laid much stress on the fact that the directors' office was undoubtedly a good pattern for the works to copy, inasmuch as the directors "did not come to business, but to work, which were two entirely different things." He concluded by assuring the directors that the whole of the staff, from the youngest to the oldest, could be relied upon to do their utmost, and more than might be expected of them, to ensure if possible that the second half of the firm's century might be more successful than the first. He then called upon the staff to demonstrate personally their gratitude and sincere feelings for their directors, which they did by loud and continued cheers.

An extremely pleasant and memorable evening concluded with the hearty singing of Auld Lang Syne, and the company dispersed at 11 p.m., with lasting impressions of such a jubilee celebration as any firm could be proud of.

Personal.

THE King and Queen will attend a matinée which is to be given at Drury Lane Theatre on Tuesday, May 16th, in aid of the Newspaper Press Fund. It is being organised by Mr. B. A. Meyer and a committee.

THE matinée is under the patronage of Lord and Lady Burnham, Lord and Lady Northcliffe, Lord and Lady Rothermere, Lord and Lady Riddell, Lord Beaverbrook, Lord and Lady Bathurst, Sir Edward and Lady Hulton, Lord Dalziel, Sir Frederick and Lady Jones, Sir William and Lady Berry, Lord Leverhulme, chairman of the 59th Newspaper Press Fund Festival, and others.

MR. AUSTEN CHAMBERLAIN, the Leader of the House of Commons, was entertained by the Lobby journalists on Tuesday, last week, at luncheon at the House of Commons.

THE new Lord Chief Justice is to be the principal guest at the dinner of the Newspaper Society on May 10th, at the Waldorf Hotel.

SIR ANDREW CAIRD, K.B.E., presided at the Abercorn Rooms, E.C., on Thursday evening, at one of the large annual gatherings of the composing staffs connected with the newspapers with which Viscount Northcliffe is associated.

AT the same time another gathering of the *Daily Mail* and *Weekly Dispatch* machine managers was being held at the Royal Adelaide Galleries, Strand. Mr. A. Beggs, deputy overseer of the *Daily Mail* machine room, was in the chair. Among the guests were Mr. H. W. Howes, secretary of the Printing Machine Managers' trade society; Mr. E. M. Chester-

man, overseer of the *Evening News* machine room; and Mr. E. Reynolds, overseer of the engineers' department.

MR. W. M. BOWER, of Linotype and Machinery Limited, was the lecturer at the April meeting of the Manchester Centre of the Printers' Managers and Overseers' Association, and took as his subject "An Hour with Modern Linotypes." A report will appear in next week's issue.

MR. C. CROSS, having completed a period of 25 years as proprietor and editor of the *Rushden Echo*, the whole of the staff has joined in presenting him with a very handsome hall barometer and an address.

MRS. STAN. HARDING, the British journalist who was imprisoned by the Soviet authorities in Russia, described some of her experiences at the annual conversazione of the London District of the Institute of Journalists, in aid of the Institute Orphan Fund.

MR. JOSEPH ORCHARD, letterpress printer and Mr. William Thomas Bassham, operative printer, are among the new guardians for Islington.

MR. J. B. SHORTER, the racing editor of the Press Association, has retired after having completed over half-a-century with the agency.

MR. A. P. ROBINSON, the well-known Yorkshire newspaper-owner and huntsman, has been appointed Master of the Tipperary Hounds.

Continuation Schools.

SIR,—As a London printer who has for many years taken a keen interest in secondary and technical education, particularly in regard to our craft, I deplore the publication of Mr. Burchell's letter, in regard to continuation schools, and am grateful for Mr. Arnold's effective reply.

It is rather wasting time and your valuable space in these days, to point out that modern industry demands severe specialisation, and with it systematic technical and scientific instruction; and it is very obvious, even to the simple, that such a training needs as a basis a much higher standard of education than any lad of the tender age of 14 can possibly attain. Just as the university demands of its candidates on admission a certain standard of education, so—even if in a lower degree—the printing student must have reached a standard of education by which alone he is capable of acquiring anything but the most rudimentary facts of science or technical knowledge. It is absolutely essential, therefore, that a greater knowledge of mathematics, grammar and composition, and language, and a grounding in the wide range of subjects required by a printer, should precede the technical school training.

How can this be done except time is allowed from the workshop during working hours? Surely Mr. Burchell would not desire to send a boy of 14 to an evening class in London after a day's work?—at the close of which the lad would arrive at his home after 10 o'clock, and be obliged to leave it again at 7 a.m.!

Mr. Naylor, in the L.S.C. report on apprenticeship, rightly says that "the status of a trade is high or low in proportion to the skill and intelligence of its workers," and I had indeed hoped that in these days it was not necessary to remind a London printer that in America and in Germany the success of their expansion and development is entirely due to the wise and generous expenditure of money on education.

Many of us printers have for many years anticipated the Fisher Act, to our own benefit, and to the advancement of our craft and citizenship, and such a retrograde step as that Mr. Burchell advocates is not only deplorable, but inimical to the best interests of the individual printer, the craft and to citizenship.

Yours, etc.,

GEO. EATON HART.

DIVIDENDS AND REPORTS.

"ILLUSTRATED LONDON NEWS AND SKETCH."—No dividend recommended on ordinary; £23,000 to reserve; £413 forward. No distribution on either class of shares previous year.

JOHN DICKINSON AND CO., LTD.—The directors have declared an additional interim dividend of 5 per cent. on the ordinary shares of the company in respect of the year ended December 31st, 1921. It is not anticipated that the directors will recommend the payment of any further dividend in respect of that year.

WESSEX ASSOCIATED NEWS, LTD., in the year ended June 30th, 1921, made a profit of £2,719 and £3,624 was brought forward. A dividend of 5 per cent. absorbed £1,272, and £5,071 was carried forward, subject to corporation profits tax. The directors have decided to make an issue of £20,000 8 per cent. debentures to provide additional working capital, and to cancel the existing £8,000 of debentures. The company has acquired the goodwill of the Mendip Press, Ltd., of Weston-super-Mare.

NEW COMPANIES.

TULLIS, HUNTER AND CO., LTD.—Capital £50,000, in £1 shares; stationers, paper merchants, printers, lithographers, electrotypers, die-sinkers, account book manufacturers, etc. Private company. First directors: T. D. Hunter and S. A. Alexander. Registered office: 7, George-street, Edinburgh.

HAMPSON, BETTRIDGE AND CO., LTD.—Capital £17,200, in £1 shares (17,000 10 per cent. cum. pref. and 200 ord.); to adopt an agreement with J. Hess, A. Hess and A. J. Hess for the acquisition of the businesses carried on by them (1) at 2 and 4, Fann-street, E.C., as "Hampson, Bettridge and Co."; (2) at 5, Fann-street, E.C., as "N. J. Hill and Co."; and (3) at 3, Errol-street, E.C., as "S. Robson," and to carry on the business of printers and mechanical engineers, founders, manufacturers of printers and other machinery, etc. Private company. Directors: J. Hess, A. Hess and A. J. Hess. Registered office: 2 and 4, Fann-street, E.C.

PARTRIDGE AND COOPER (OFFICE EQUIPMENT), LTD.—Nominal capital of £2,000, in £1 shares; to take over the office equipment business of Partridge and Cooper, Ltd. (in-

corporated in 1902) and to carry on the business of office furnishers, stationers, printers, lithographers, paper bag and account book makers, box makers, cardboard manufacturers, etc. Private company. First directors: Sir Geo. W. Truscott, H. D. Truscott, J.P., Lt.-Col. J. R. Truscott and T. R. Dewell. Registered office: 15, Clerkenwell-close, E.C.

ARTHUR LOWE, LTD.—Capital £3,000, in £1 shares; to adopt an agreement with A. Lowe and to carry on the business of printers, engravers, publishers, book and print sellers, bookbinders, art journalists, stationers, etc. Private company. First directors: A. Lowe and J. H. Lowe. Registered office: 42, London-road, Sevenoaks.

PIBEL AND MUDDITT, LTD.—Nominal capital of £2,500, in £1 shares; printers, machine rulers, stationers, envelope and paper and box makers, etc. Private company. First directors: G. N. Crisford, W. D. Mudditt, A. Grevatt, R. V. Cook, H. R. Bridges, G. L. J. Tuck and A. Seates. Registered office: Central-buildings, Blackfriars.

W. RAWLINGS AND CO., LTD.—Capital £2,200 in £1 shares; to adopt an agreement with C. Wynes, W. Hance and H. Oakley, and to carry on the business of printers, stationers, lithographers, machine rulers, typesetters, stereotypers, etc. Private company. Directors: C. Wynes, W. Hance, H. Oakley and H. W. Rawlings. Registered office: 9-9½, Love-lane, Eastcheap, E.C.3.

GRAPHIC ENGRAVERS, LTD.—Capital £2,000, in £1 shares (1,000 ord. and 1,000 pref.); engravers by photographic or any other process, electrotypers, stereotypers, manufacturers of blocks, plates and dies, etc. Private company. Subscribers: G. T. Cooke and D. G. Cooke. Subscribers appoint directors. Registered office: Westown House, Brislington, Bristol.

OXFORD MUSIC Co., LTD.—Capital £500 in £1 shares; music publishers, printers, engravers, etc. Private company. Directors: A. L. de Leeuw and R. C. Hardy. Registered office: 3, New Oxford-street, W.

M. A. RAPPORT AND CO., LTD.—Capital £15,000 in £1 shares (10,000 7 per cent. preference and 5,000 ordinary); to carry on the business of importers, exporters and manufacturers of and dealers in fancy goods, etc. Private company. First directors: M. A. Rapport, H. Rapport, and M. Rapport. Registered office: 75, Bridge-street, Cardiff.

VARCOES CHINA CLAYS, LTD.—Capital £55,000, in 40,000 ordinary and 15,000 7½ per cent. non-cumulative participating preference shares of £1 each; preparers for market of and dealers in china clay and stone of all kinds, papermakers' materials, chemicals and cognate substances, to acquire the merchants' business of Wm. Varcoe and Sons, Ltd., and to adopt agreements with the said company, Cornish Kaolin, Ltd., and Tehidy Minerals, Ltd. Private company. Directors: C. S. Varcoe, W. Varcoe, R. G. Varcoe, G. M. Johnson, C. A. Moreing, M.P., and A. H. Moreing. Registered office: Bank Buildings, High Cross-street, St. Austell, Cornwall.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

PORTALS, LTD. (paper manufacturers, etc., Whitchurch).—Issue on April 3rd, 1922, of £5,000 debentures, part of a series already registered.

JONATHAN POTTS, LTD. (paper stock merchants, etc., Grimsby).—Particulars of £5,000 debentures authorised March 9th, 1922, whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

BANKRUPTCIES, etc.

Re D. SMITH AND SONS, Cardboard box manufacturers, 19 and 20, Rupert-street, Leman-street, E.—The receiving order in this case was made at the London Bankruptcy Court on December 15th, 1921. Upon the petition of B Lipton, Ltd., the debtors being Colman Smidck, otherwise Smith, Gabriel Smidck, otherwise Smith, and Mrs. Jennie Littman. The two male debtors commenced business in 1905, and attribute their failure to the loss of law actions, depreciation in the value of stock and slump in trade. The liabilities are roughly estimated at £20,000 and the assets are valued at £3,000. A sitting of the Court was appointed to be held last week before Mr. Registrar Mellor for the public examination of the debtors. Mr. W. Boyle, official receiver, reported that at a previous sitting his Honour made an order upon the debtors to lodge the statement of their affairs on or before March 14th. That order had not yet been complied with, but the accounts were in course of preparation by accountants and would be completed very shortly. The Registrar made an order for the statement to be lodged by April 30th, and adjourned the sitting for the public examination of the debtors till May 30th.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

Stanley Hallas, William Hallas, Arthur Westlake Sealey, and Ernest Gillett, wholesale stationers, 2, Victoria-street, Bristol; so far as concerns Arthur Westlake Sealey.

Joseph Bringham Marsh and Samuel Arthur Newman, advertisement contractors, Oxford House, 9, Oxford-street, W.C.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDERS.

T. Gerald O'Sullivan, 5, Green-street, Leicester-square, London, advertising agent, April 12th.

Harry Oddy Witton, 62, Haydock-street, Bolton, wholesale paper stock merchant, April 12th.

Government's Help to Trade.

The following amounts, included in the guarantees for loans which the Treasury have approved up to March 31st, under the Trade Facilities Act, 1922, relate to the paper and board industry:—

CROPPER AND CO., LTD.

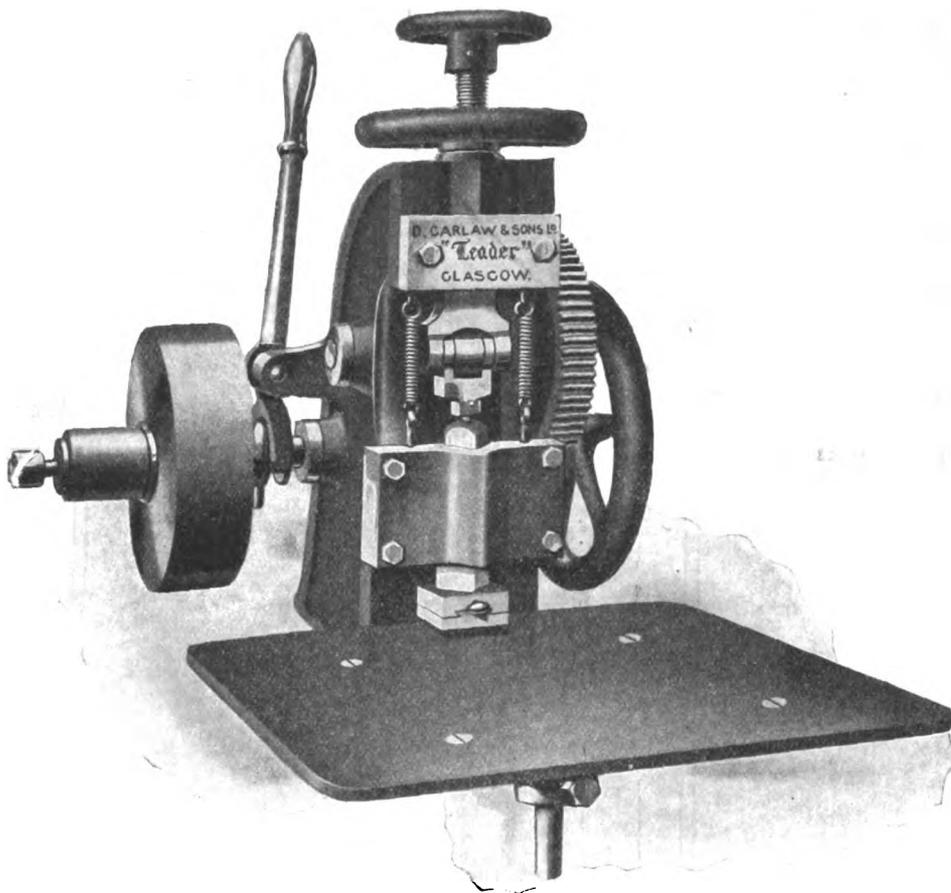

£100,000 (ten years) for building and equipment of new factory for manufacture of folding boxes at Thatcham.

MERTON BOARD MILL, LTD.—HUGH STEVENSON AND SONS, LTD.

£100,000 (ten years) to complete erection and equipment of board mill by erection of buildings and provision of engines and boilers.

The agreement reached in the Swedish paper industry, it is reported, provides for its operation until February, 1923, and for a wage reduction immediately and another on September 1st.

The Paper Doctor.

By E. A. DAWE.

To that excellent publication *St. Bride Students' Cake*, which consisted of ingredients by students and staff of the St. Bride Foundation Printing School, and which was issued with the object of raising a sufficient sum of money to found a St. Bride Students' Printers Pension in connection with the Printers' Pension Corporation, Mr. E. A. Dawe, of H.M. Stationery Office, contributed a pleasant little sketch under the title of the Paper Doctor. Mr. J. R. Riddell, the principal of the St. Bride School, has given us permission to reproduce the article and Mr. Dawe's own drawings which accompanied it:—

I have the greatest difficulty in convincing myself that it was only a dream. It seems to me that I have experienced it all in another existence, and that at any moment some of the *dramatis personae* will meet me round the next corner. However, you want the story.

It was December 20th. The staff of St. Bride School had celebrated the 25th anniversary of the School by dining well (and wisely) at a City restaurant. We had talked shop, and we had talked otherwise, and had an excellent time. Reaching home tired and comfortable, I stretched in a chair by the fire and dozed. Then I must have started a train of thought influenced by the talk of the evening.

It appeared that I was walking from Ludgate-circus to Blackfriars, when I glanced down Tudor-street, and was somewhat astonished to see little figures coming along. They were small in girth and not more than two feet six inches in height, walking as though suffering from sickness of some kind. They reminded me of a troop of undersized children formed up in a queue outside one of the dispensaries in Blackfriars, excepting that the hopefulness of the London gamin was absent from the narrow, cadaverous faces.

"Queer creatures; what can they be?" said I to myself. Just then one stumbled and fell, and I assisted it to its feet. I could see what it was. It was a roll of paper, with a pinched face and sad features, and a broken bottle was regarded ruefully by this strange figure. There were three of these curious creatures, two of which had passed on and were now out of sight, having turned from Tudor-street into New Bridge-street, E.C.4.

The little fellow I had righted bore at his waist a manilla tag, which bore the words, "Art Paper: Complaint: Picking."

"Come, now," I said, "what's the matter with me? Surely, I'm sober." I picked up the broken bottle and read the label:

HOT AIR
not exceeding
90° F
Dose for one hour:
(Repeat if necessary.)
P. A. PYRUS, D.Sc.
Tudor Street, E.C.

More puzzled than ever, I looked at the quaint figure again. It was clearly a sheet of art paper, rolled on a strawboard tube, a little longer than the sheet. It murmured, "I'm all right now. Please give me my bottle and I must go." I did as requested, and rubbed my eyes.

I saw more of them coming along the street. "Now," thought I, "let me solve the mystery," and I marked the building from which they emerged.

I stopped outside and looked at the brass plates. Yes, this was what I sought. "P. A. Pyrus, D.Sc., Paper Specialist. Third Floor," announced a very new plate. I ascended the stairs, passing a figure from whose head came forth long electric flashes, but I was now ready for anything. Reaching the third floor, I saw the office of the specialist and entered. "Kindly go into the waiting-room," said the attendant. I did so, and saw further figures seated in this apartment, each with a tag, and a more or less cheerless expression. One was covered with dark patches, and was otherwise yellow. Another had a wrinkled appearance, and was labelled "Cockly edges." I felt, surreptitiously, to see if I had a label on. Just then a serious-looking, young, middle-aged man, with a fair moustache and not too much hair on his head, looked in, and seeing me, exclaimed, "Hallo! whatever do you want here?"

"I beg your pardon," said I, "but are you Dr. Pyrus?"

"Certainly," he replied; "can I be of service to you?"

"Indeed you can. First, tell me if I am awake or asleep; drunk or sober; on my head or on my heels; in the city or the tomb?"

"Come, come," said the doctor. "Perhaps you will follow me into the consulting-room."

I went. When the door was closed, I commenced, "Who are you, and what are all these strange fellows I meet in the street, on the stair and in the waiting-room?"

"Half a minute," the doctor interposed. "It is my turn. Who are you? and what use shall you make of such information as I may communicate?"

I pondered a moment, gave my card, and said, "I am assisting in the concoction of a

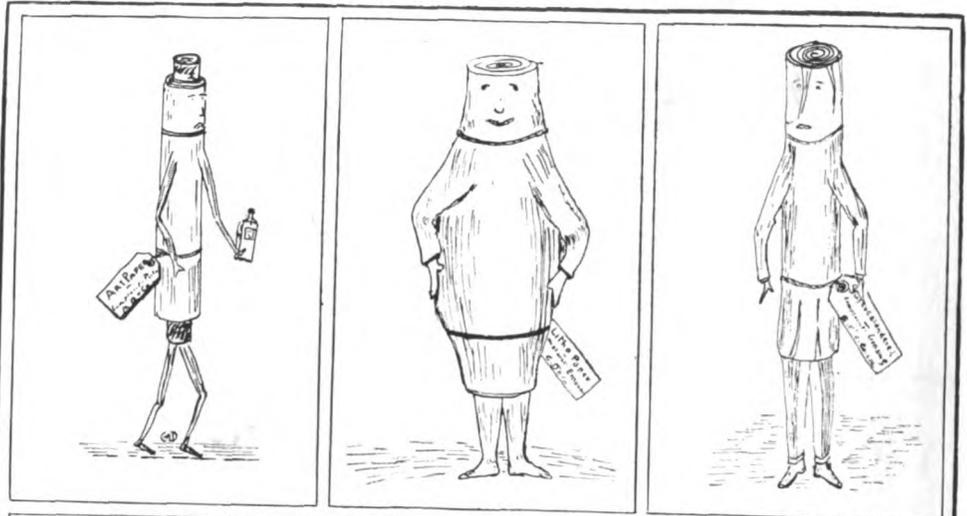

I read so far when the doctor asked me, "What do you think of it all?"

"Marvellous!" I said. "Why hasn't it been thought of before? How did you start? Is it worth more than the wages of a news comp? Do you want a partner?"

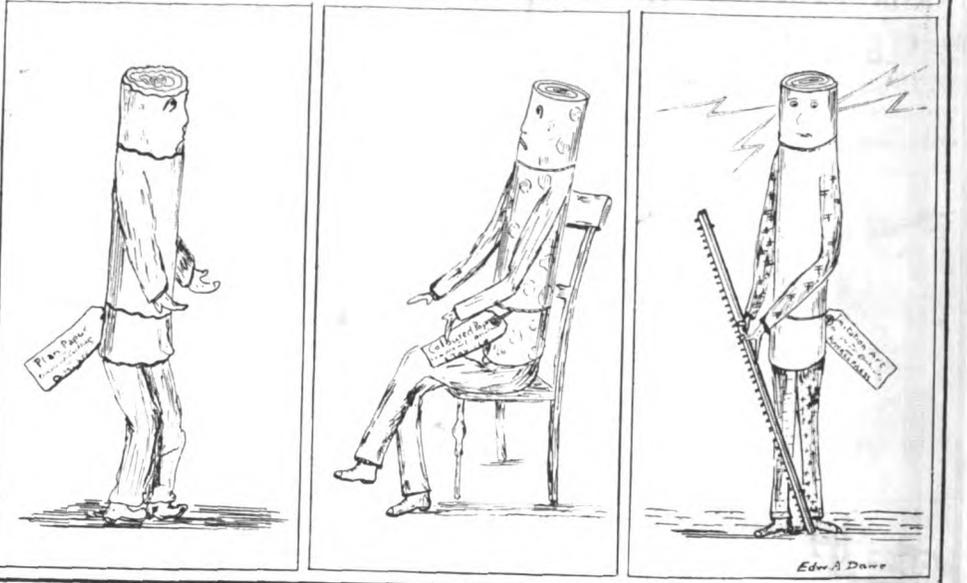

He laughed outright.

"One at a time, if you don't mind, and I will make you my father confessor. Once upon a time, I was like you, a technical instructor. I enjoyed the work, but found it very trying. While the students seemed to get younger every year, I felt I was ageing. So on my fortieth birthday I said, 'P.A., it is time you struck a new line, and let a younger man teach the young mind how to earn £1,000 a year.' A pile of students' queries set me thinking. This was the order of my thoughts in form of questions:—

1. Whose troubles are these?

Panel Patients
of the Paper Doctor

cake, and methinks this will afford some spice for it. The cake is *St. Bride Cake*."

"Ah!" the doctor said, "honours easy. Well, here goes. You know my name; you see my profession. I am THE Paper Doctor. There is only one of us—Pyrus. Successful? Yes, indeed. My work? Curing the troubles to which paper is heir. Oh, yes, as the sparks fly upward so do complaints come upon paper. There is one disease which, I am sorry to say, is incurable in paper."

"What is it?" I hoarsely asked.

"Consumption," he replied. "There is no cure. The disease increases daily and gives printers more concern than anything else."

"Would it be asking you too much to tell me the names and complaints of your visitors of to-day?" I ventured.

"Not at all; not at all. He reached behind him and handed me his consultation book, when I read:

Date.	Patient.	Complaint.
Dec. 29	Art Paper Litho Paper Supercalendered Plan Paper Coloured Paper Imitation Art	Picking Expansion Creasing Cockling Discoloration Electricity

2. Who benefits by my advice?
3. Who pays for the information?
4. What do I get out of it?

I need not give you my answers. But the next day I started this venture here, and now the employer pays for the employer's troubles, and I pocket the dust. I would show you my laboratory, my curious cases and all the bag of tricks, but I have a long day's work in front of me, and your other questions too. I manage to improve even upon the income of a news comp., and to enjoy life, and to spare a little for the Printers' Pension Corporation. As to a partner, I have your card, and will not forget you. And now I must say good-bye. I am very pleased to see you, and mind you send me some *St. Bride Cake*."

He accompanied his request with a hearty hand-shake and a crisp Treasury note.

I bade him farewell, and retraced my steps through the consulting room, where the

patients were discussing the merits of black and double-tone inks for half-tone work.

I descended to the street again, and who should run against me but "Art Paper: Complaint: Picking."

"Give the child his bottle," shouted the figures from the third floor window.

I woke, rubbed my eyes, saw it was three o'clock, and started upstairs to obey the order.

Was it all a dream, or is it a prophetic message from Mars?

MARTIN AND CLARKE.—This firm of paper-makers' agents and wholesale paper merchants of 3, Joiner's Hall Buildings, Upper Thames-street, London, have issued their April stock and price list, which makes very

attractive offers in a wide variety of papers and boards. The list itself is printed on a new stock of buff manilla. It is apparent that the stocks of Messrs. Martin and Clarke are moving and new making orders are in hand. Very little is left in the nature of old stock, and most of the items are regular lines. New lines are contemplated. Consumers of paper and board will do well to consult this list for prices and qualities.

Mr. F. M. Carson.

President of the National Association of Wholesale Stationers and Paper Merchants.

Mr. Frank Murray Carson, the new president of the National Association of Wholesale Stationers and Paper Merchants, was born on Valentia Island, South-West of County Kerry, in the year 1869. His father, Mr. James Hamilton Carson, late manager of the Anglo-American Telegraph Co., Ltd., who was one of the pioneers of Ocean Telegraphy, was stationed at Valentia in that year, engaged in the laying of the 1869 cable.

Mr. Frank Murray Carson, who was privately educated, inherited his father's leaning towards engineering and started his business career in the City of London, setting up in

apart from his business association with the paper trade, Richard Herring placed it under other obligations. Some of his writings became standard works. Among his publications were "Paper and Papermaking, Ancient and Modern," which ran to three editions; "Collection of Rags" and "A practical guide to the varieties and relative values of Paper"; the latter a large quarto volume which made a big reputation.

In addition to his writings, Richard Herring displayed his industry by inventing a telegraph printing machine for the manual transmission and definite record of morse signs, which, curiously enough, was utilised by Mr. Carson, senior. In 1855, at the suggestion of Matthews Marshall, Chief Cashier of the Bank of England, he introduced "Pure Wove" writing paper, which has been on the market ever since and carries as a watermark, the facsimile signature of the originator. A short time prior to Richard Herring's death, on October 5th, 1886, the business was purchased

similar associations in other parts of the country, was merged into what is now the National Association of Wholesale Stationers and Paper Merchants. During the years 1915 and 1916, Mr. Carson held the Presidency of the Association of Wholesale Stationers, and he now occupies that position in the larger amalgamation.

Public Work.

A man of energy, Mr. Carson has devoted a great deal of time to political and public work. He started his political activities in North St. Pancras in 1903. Seven years later he stood as Progressive candidate in the L.C.C. election for North Kensington, but failed to be elected. In the same year, 1910, he stood for Parliament for the same division in the Liberal interests. In 1918 he was adopted as Liberal candidate for Harrow, but did not go to the poll. Mr. Carson, who is a man of fine appearance and has the faculty of expounding his views, has not yet given up his Parliamentary ambitions, and he hopes to follow a political career when he has more time on his hands. In the meantime he is devoting himself to public work at Whitstable, Kent, where he has resided since the War. For two years he has been chairman of the local Urban District Council and was largely instrumental in setting on foot the housing scheme of 51 houses, which has been a considerable success. He also formed one of the first ten Child Welfare Centres in Kent. His strenuous life has left little time for recreation. He was at one time known in London chess circles and still enjoys an occasional game, is a reasonably capable musician, but to-day makes his principal recreation motoring.

MR. F. M. CARSON,

President of the National Association of Wholesale Stationers and Paper Merchants.

business on his own account as an engineer some 30 years ago. He is still conducting this undertaking as well as developing his daper connections.

He is managing director and chairman of Messrs. Richard Herring and Co., Ltd., a fine old paper business, which was established by Mr. Richard Herring in Watling-street, London, in 1855. This business was converted into a private limited company in 1907, when Mr. Carson joined it as managing director, a position he has held ever since.

Richard Herring and Co., Ltd.

All through its business career, the house of Richard Herring has been associated with progress in the paper trade, and the name stands high in the paper annals of this country. Looking back through some old editions of the *World's Paper Trade Review*, printed on deckle-edged antique laid, we found in the issue of October 15th, 1886 (vol. 6, No. 16) an obituary notice of Richard Herring. He was the son of George Herring, wholesale stationer of Walbrook, and was taken from school before he was fourteen years of age and entered the house of Messrs. Herring, Dewick and Hardy in 1844. Shortly after Richard Herring commenced business in 1855, he was appointed Stocktaker of H.M. Stationery Office and held that position for a number of years. So high a place did he hold in the paper industry that in 1864 he was proposed to Lord Palmerston for the vacant position of Controller of H.M. Stationery Office, and Lord Palmerston received Mr. Herring at a private interview at Cambridge House, but the Patronage Secretary had by then arranged the new appointment.

by Mr. William Patey, father-in-law of Mr. Frank Murray Carson.

After this event, Richard Herring's son Alfred managed the business until his death in 1903. From that time, Mr. Alfred E. Loft carried on the business for Mr. Patey and later for his executors until the formation of the present company in 1907. Mr. A. E. Loft, who, by the way, is a director of the company, has been associated with the business for 36 years, that is all his working life, and he joined the board three years ago. It may be interesting at this point to mention the other three directors, who are Mr. H. W. Patey (nephew of William Patey), Mr. C. F. Corbould-Ellis and Mr. A. J. Mitchell.

The business has been situated in Finsbury at any rate from May, 1886, being now established at 14, Bunhill-row, E.C.1. During Mr. Carson's association with it, this old House has been inspired by new enterprise and its developments are by no means yet at an end.

Married into the Paper Business.

Mr. F. M. Carson married the eldest daughter of Mr. William Patey, who, as already indicated, purchased the business from Mr. Richard Herring; thus he married into the paper business. But for this fortuitous circumstance, Mr. Carson might never have become identified with the paper trade in the way he has done. Once in the trade, however, he was bound to come to the front by reason of his strong personality, his keen business instincts and his eloquence. His firm were elected members of the Association of Wholesale Stationers in March, 1910. This body, which represents the Southern portion of the United Kingdom, about two years ago, together with

British Paper in Siam.

Serious Competition on Price.

The 1920-21 imports of paper into Siam were valued at Ticals 3,521,436 (£367,582), as against Ticals 2,846,131 (£252,316) in the preceding year. The contributors, in order of importance, were:—The United Kingdom, 35 per cent.; Japan, 27 per cent.; China, Hong Kong, Norway, and Singapore.

More than half of the total import consisted of unprinted paper, the largest contributor in this line being Japan (£65,905), and the next largest the United Kingdom (£39,255).

These facts are presented in a report on the commercial situation in Siam at the close of the third quarter, 1921, prepared for the Department of Overseas Trade by Mr. J. Crosby (H.M. Acting Consul General, Bangkok).

The writer is advised that the British manufacturer has much to fear from Japanese competition as regards news-printings and tissues, and from German competition as regards the good papers. The sole objection to the British article is on the score of price. German and Japanese prices are said to be now so low as to cut even Swedish paper.

Details are given in an appendix of the paper, imports and countries of origin, as follows (£1 = Ticals 958):—

UNITED KINGDOM, Ticals 1,243,093 (£129,761), consists of printed matter other than books, music, etc., Tcs. 569,886; unprinted paper, Tcs. 376,067; paper manufacturers, Tcs. 225,077; books, music, etc., Tcs. 72,093.

JAPAN, Ticals 946,527 (£98,795), chiefly unprinted paper, also printed matter other than books, music, etc., and paper manufactures.

CHINA, Ticals 325,321 (£33,960), chiefly unprinted paper.

HONGKONG, Ticals 205,931 (£21,498), chiefly unprinted matter.

NORWAY, Ticals 204,798 (£21,378), mostly unprinted paper.

SINGAPORE, Ticals 185,302 (£19,342), chiefly printed matter other than books, music, etc., and unprinted paper.

OTHER COUNTRIES, Ticals 410,464 (£42,848).

MESSRS. JOHN WILD AND SONS, LTD., the well-known papermakers, Broad Dumers Paper Works, Radcliffe, near Manchester, have extended their telephone facilities, the new numbers being 149 and 150 Radcliffe.

MESSRS. ELLIOTT, BAXTER AND CO. inform us that they have taken Mr. Geo. Henderson into partnership. Their combined experience now covers every kind of paper manufactured by British, Continental and American mills, from "news" to writings, surface, envelope, wrapping papers, etc.

New Inventions.

Sheet Delivery Apparatus.

Table lowering mechanism of sheet delivery apparatus for printing, etc., machines, as patented by the Harris Automatic Press Co., is normally held out of action by a reciprocating mechanism comprising a trip latch when the same is actuated in full stroke, and is brought into operation when the stroke of the reciprocating mechanism is restricted by the increasing height of the pile of sheets on the table. The pile table 21 is supported by chains 24, 25, passing over idler wheels 26, 27, and then wound round sprocket wheels 28, 29, the latter being rigid on shafts 30, 31, with worm gears 35, 36, which engage with worms 33, 34 on a shaft 32. Said shaft is fitted with a ratchet wheel 49, adapted to be rotated step by step in each cycle of operation of the delivery chains 11, 14, by means of the cam 41 engaging a roller 42 on a pivoted arm 43 connected by links 44, 45, and 46 to one end of a rock lever 47 loose on the shaft 32. A pawl 48 pivoted at the other end of the rock lever 47 is normally held out of engagement with the ratchet 49 by means of a notch 51 on a

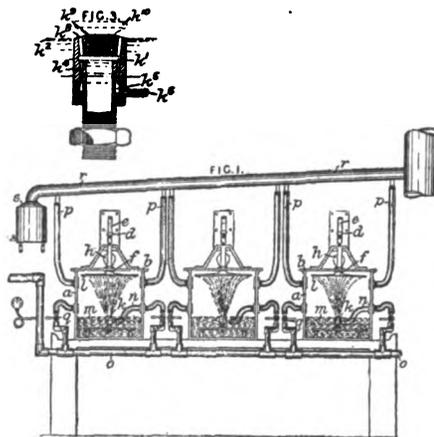

lug 52 on the under side of an oscillating guard 53 loosely pivoted on the shaft 32 and connected by a rod 56, bell crank 57, and rod 59 to a pivoted lever 60 carrying a detector arm 62, located immediately above the pile 22. If the height of the pile is such that the rocking detector 62 does not contact therewith, the guard 53 rises and falls with the rocking lever 47, and the pawl 48 is held out of engagement with the ratchet, the table-lowering mechanism being thus inoperative. When the pile has increased to such a height that the detector contacts therewith, the downward stroke of the guard 53 is restricted so that the pawl 48 leaves the notch 51, and is forced by the spring 50 into engagement with the ratchet, whereby the pawl on its next upward stroke becomes operative for lowering the table. On the next downward stroke of the pawl, an incline on the rear end 54 thereof engages a pin 55 for the purpose of resetting the pawl against the notch 51.

Etching Printing Plates.

In an invention by Messrs. H. C. and A. J. Lucas, etching apparatus of the kind in which the surface of the plate, etc., to be etched is supported in an inverted position and in which the etching fluid is projected upwards thereon in the form of spray produced by compressed air, comprises a closed ventilated chamber, adapted to be clamped on the chamber, and suction devices on the lid for supporting the plate, etc., to be etched. The air passages of the spray-producing nozzles, which are immersed in the etching fluid, are interrupted by a transverse chamber below the level of the fluid, the air issuing from the lower portion of the air passages forcing the layer of fluid in said chamber through the upper portion of the air passages in the form of a fine spray. As shown in Fig. 1, the lids *b* of the etching chambers *a* are carried by vertically hinged brackets *e* and are clamped in position by

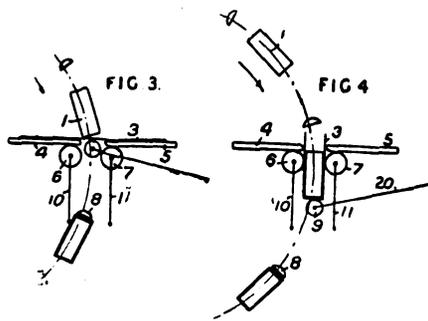

screws *d*. The plates *l* to be etched are supported by suction plates *f* provided with suction bulbs *h*. The spraying nozzles *k* immersed in the etching fluid *m* are connected by pipes *n* to the compressed air supply pipe *o*, other pipes controlled by cocks *q* being adapted to admit air to the upper part of the etching chambers for expelling evolved gases, etc., along pipes *p* to the conduit *r*, fitted with a draining chamber *s*. Fig. 3 shows the construction of the spraying nozzles. Compressed

air is admitted by the pipe *k* to an annular space *k*^o and issues therefrom through a series of passages *k*^a into a thin annular space *k*ⁱ which is below the level *k*^o of the etching fluid. The fluid in the space *k*ⁱ is thereby atomised and blown through the upper passages *k*^a. The nozzles may have an aperture *k*^o so that the surrounding atmosphere above the fluid may be associated with the induced fluid, and a deflector *k*¹⁰ may be provided.

Making Paper Bags.

Mr. G. Orstrom has patented an invention that relates to machines for making paper bags or capsules in which a blank is folded around a mandrel, and consists in making the fold by means of rollers between which the blank is forced by the movement of the mandrel. The mandrels 1, Fig. 3, are carried by a disk or by arms rotating in a vertical plane, or they may be attached to a chain or the like moving in an endless path. A gummed blank 3 is fed on to two top folders 4, 5 and the mandrel is then moved downwards through the space between the folders, carrying with it the blank. During this movement, two rollers 6, 7, mounted on pivoted arms 10, 11 drawn together by springs, bear

against the mandrel and wrap the blank around it, as shown in Fig. 4. The mandrel stops in this position while the upstanding edges of the blank are folded down on to the mandrel by inward movement of the folder 4, 5. A presser 8, associated with the mandrel, then presses the flaps to ensure that they stick together. A third roller 9, mounted on a pivoted arm 20, which is drawn upwards by a spring, holds the blank against the lower side of the mandrel during the folding operation. The end of the bag is then formed by any suitable mechanism and the mandrel then passes between spring-actuated presser rollers which form sharp edges at the end of the bag.

Sectional View of the
"Fryotype" Pot.

Compare the advantages
 of the
"Fryotype" Melting Pot

- 1.—Lowest gas-consumption per cwt. of metal melted.
- 2.—Empties quicker than any other pot on the market.
- 3.—No radiation of heat, or unhealthy fumes from metal or gas.
- 4.—Initial cost is lower.

These are only four of the many reasons why nearly 200 "Fryotype" Melting Pots have been sold in the Printing Trade since Jan. 1921. How many competitive Pots have been sold in the same period?

Cardiff's Printing and Stationery.

City Council Discusses Municipal Trading Project: Local Printers Make Strong Protest.

There was a long debate at a recent meeting of the Cardiff City Council on the question of the cost of printing and stationery, and the proposal of the Finance Committee that a Gammeter printing machine be inspected with a view to its purchase for the execution of the smaller printing jobs required by the different departments of the Corporation.

Councillor Curran elicited from the Lord Mayor that the binding of the Council's minutes had gone up 470 per cent.; that the printing of the Education Committee minutes had gone up 235 per cent.; and that on the Council's minutes there had been an advance of 271 per cent.

The Lord Mayor said the Committee felt that the time had come when these contracts should be reconsidered.

Councillor Curran: I should think so. There is no other commodity which can show such increases at the present time.

In regard to stationery supplies and the Gammeter printing machine the reference back of this part of the recommendation was proposed.

In seconding, Councillor Sidney Jenkins objected that the Council proposed to set up a new department which would mean fresh clerks and extra expenditure. They were seeking to increase the industries of Cardiff, yet they proposed to compete with a large firm, who were large employers in the city who paid heavy rates and took extensive supplies of power and light from the Corporation. The firm supplying the stationery had always given entire satisfaction, as no department of the Corporation after ten years could do.

When another councillor asked whether this latter statement was correct, the Lord Mayor said they were not satisfied with the services rendered, and the Director of Education added that the quality of the paper obtainable to-day was not as good as before the war.

Councillor Curran said paper had been supplied to the schools that the children could not write upon. The council was paying through the nose and being badly treated, and it was time something was done.

Councillor Hiles said head teachers were complaining bitterly about the quality of the goods. One brought him an article which was charged at 12s. 6d. per thousand and the same day he had purchased in the open market a better article for 4s. 6d. a thousand. He said they must get back as soon as possible to the old system of contracting for everything they wanted. In regard to the firm in whose favour Councillor Jenkins had spoken, he would suggest that they should at least pay their workpeople decent wages.

Answering a question as to whether the proposal would mean increased staff, the Lord Mayor said that it might mean they would have to put some people on packing and distributing, but they might be able to do that with the existing staff.

Councillor Howell said that as they would not be buying paper direct from the mill but through agents they would be in no better position than any substantial firm, so they were not going to save what they thought. They were, however, going to add to their municipal trading, which they knew was an expensive item.

The Lord Mayor remarked that this was hardly municipal trading. The Council proposed simply to buy in the open market.

The proposal to refer the question back for further consideration was defeated by 15 votes to 11.

Deputation of Printers.

The printing and stationery trades at Cardiff have vigorously taken up the challenge and an important joint deputation representing the employers and operatives in the allied trades attended before the Cardiff Finance Committee on the 11th instant, to enter emphatic protest against the proposals. The deputation was introduced by Mr. E. W. Holder, president of the Cardiff Master Printers' Association, and Mr. W. C. Short, of the Educational Publishing Co., was the first spokesman.

Mr. Short began with a protest that the Council had come to a decision in the matter before the trade had been consulted or an interview granted, although a request for an interview was made on March 30th. Insufficient consideration had been given to the proposal to set up a stationery department. It was a highly complex question and there was a variety of material which had to be ordered from a large number of firms. Contractors could deal more cheaply because their orders were large. It was only by securing a large number of contracts that a school-contracting firm was able to carry on, and the loss of one large contract might easily make the difference between profit and loss. The Educational Publishing Co. employed about 150 men and women, paid in rates alone £250 a year, and paid the Corporation over £500 a year for electric lighting and power. Before the war they supplied materials on the lowest possible terms. It was found necessary to increase prices on a percentage basis during the war and particulars were always given and the committee always agreed. Prices reached their highest in 1918, when the advance on stationery was 484 per cent. By December last that had been reduced to 175

per cent. and prices were again reduced in March to about 150 per cent. The present prices were reasonable. The setting up of stationery stores would be unfair to local traders and would undoubtedly mean that the Council would have to increase their clerical and administrative staff. It was the thin edge of the wedge, and it was all very well to say that local firms would still be able to tender as mills, manufacturers, publishers, and so on would all be quoting direct. They regarded it as a clear case of infringing on the rights of contractors. It was quite possible that this move would be followed by the installation of a municipal printing plant. That was the logical conclusion of the whole proposal. Contractors had built up their businesses at great expense and considerable labour, and this scheme placed them at a serious disadvantage in that they would have to pay rates to support competitors.

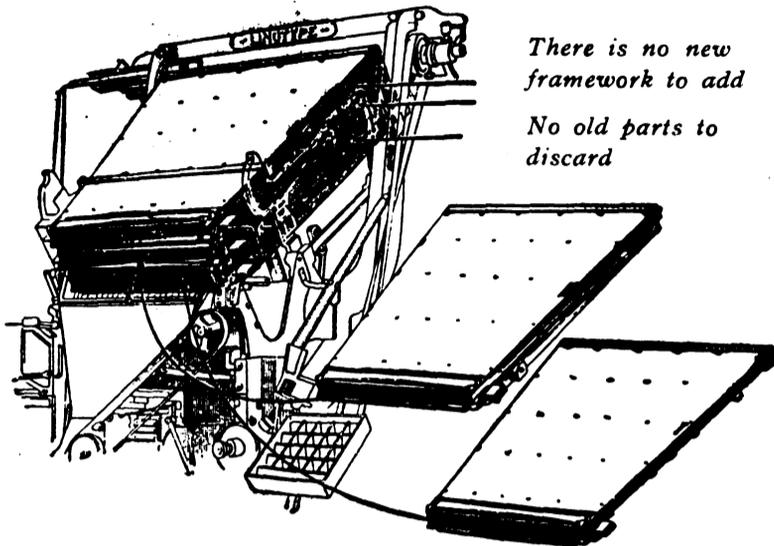

As to the charge of a member of the City Council that the Educational Publishing Co. did not pay fair wages, that was disproved by the fact that the fair wages clause appeared in every contract. Mr. Short pointed out that the high percentage of increase on binding related to work which did not amount to £50 last year. He was prepared to justify the increases, and the Master Printers' Association would welcome any investigation. Their businesses were run upon an approved costing system. The prices of material were up 100 to 200 per cent., the wages of men up 190 per cent., and the wages of girls up 200 per cent. Mr. Short said the increase in the prices charged the Corporation had all been granted by agreement and the decreases had been made without any application. In regard to distribution they had the organisation in being and could do the work cheaper than the Corporation could.

Mr. Holder said they were striving to make Cardiff a big printing centre. If the proposals of the Corporation were carried out, Cardiff printers would be swamped by traders from all over the country.

The Gammeter Machine.

Mr. A. L. Carter, chairman of the Cardiff Printing and Kindred Trades Federation and of the Cardiff Typographical Association, said that his Federation viewed the proposed introduction of the Gammeter machine with alarm, and their main objection was that it was proposed to employ girls at a wage of 30s. a week, which was only one-third that of an operative printer in the Cardiff district. There seemed some inconsistency about this question. Only recently they were invited by the Lord Mayor to an apprenticeship conference. An apprentice had to serve seven years

ANY OPERATOR CAN CHANGE A MODERN ONE-MAGAZINE LINOTYPE INTO A TWO OR THREE-MAGAZINE MACHINE IN LESS THAN HALF AN HOUR

There is no new framework to add

No old parts to discard

The Linotype can be purchased with only one magazine if so desired. Two more magazines can be added in your own composing room at any time. This plan enables any printer to own the Linotype he needs. Even when sold with only one magazine,

every machine is built and tested with all three. When you buy a one or two magazine Linotype, you buy a three-magazine machine with part of the equipment removed. Then when you convert it, you simply slip the removed parts back into place.

This is only one of the many advantages you get by adopting the Linotype way

at the printing trade and at the end of that time his wages were not good. If the Gammeter machine were introduced, would the committee observe the fair wage clause? This was the fundamental principle of trade unionism and they would have to fight it to the last. This was a printing machine, and they claim that the wage should be a craftsman's. They further contended that only an experienced craftsman could work the machine. Regarding the stationery stores, this would also affect the Federation, because it would result in 70 of their members being thrown out of employment. Mr. Carter said that from the operatives' point of view the Educational Publishing Co. was one of the houses in which they took a fair amount of pride as giving more generous conditions than some houses; 49 per cent. of the employees were getting more than the trade union rate of wages, and it had never been reported to his Federation, and it was not correct, that any men or girls on the distributing or any side had been working under unfair conditions. Mr. Carter stated that every printing house in Cardiff was now paying a fair wage.

Mr. Holder said he understood there was a Gammeter in one house in Cardiff, but it was used only for one kind of special account work and he believed it was worked by a clerk. If Mr. Carter's federation came to know of it he thought they might have something to say.

Mr. Carter: "If we know of it we shall have something to say. It is news to me." He added that in any trade union house the Gammeter would not be tolerated unless it was worked by a craftsman.

Mr. Robert J. Webber, a director and general manager of the Western Mail Ltd., said in regard to the increased prices which seemed to have occasioned so much surprise, he wished to remind the committee that in 1914, the basic year, the printing trade in Cardiff and in most other parts of the country was a sweated industry, and speaking for one firm they would never go back to those conditions. "We objected very strongly at that time," said Mr. Webber, "to the wages paid to the workmen; they had not a living wage. We were ashamed of it, and the reason was that the printers in this city were working for this corporation and other bodies for less than cost, fools that they were. Comparison with pre-war prices is not a fair comparison, our men have a considerably improved status, and we will close our works rather than go back to the old conditions."

Mr. Webber, continuing, said that in 1914 the wage was 36s. for a skilled workman. That was what those 1914 figures were based upon, for one of the most skilled classes of labour in the country in which men served seven years at the trade. That was why the comparisons appeared to be rather bad.

The Lord Mayor informed the deputation that the committee would postpone their decision until the next meeting.

Portuguese Tariff on Paper.

The *Diario do Governo* (Lisbon) for March 31st contains two Decrees (Nos. 8,084 and 8,085) of the same date, which raise two new headings in the Portuguese Customs Tariff, providing for the levying of duty on various articles not formerly included in that Tariff. One of the new headings is paper for printing and lithography, not specially mentioned (in the Tariff), and the rate of import duty is 0.4 centavo per kilog.

Russo-Finnish Paper Contract.

It is stated that Russia has signed, through the Trade Delegation, a contract with the Finnish Paper Combine for the purchase of 3,300 tons of writing paper, valued at about Fmk20 million. This is the first large contract made by Russia in Finland since the resumption of trade relations between the two countries.

Considerable orders have been booked recently by the Finnish paper mills, particularly for news print, at steady prices. The prices of wrapping paper, however, have been reduced by 15 per cent., in sympathy with the fall in the quotations of Swedish sulphate and sulphite. The export demand for high class writing paper is slow.

Printers' Managers and Overseers ASSOCIATION.

Manchester Lecture on Linotypes.

President Thos. Rignall presided over an exceptionally large gathering of the craft, at the April meeting of the Manchester and District Centre of the P. M. and O. A., held in the Mitre Hotel, Cathedral Gates.

Mr. Alfred Harrison, overseer, letterpress machine-room, Messrs. E. Hulton and Co., Ltd., of Withy-grove, was admitted to membership.

The ordinary business being concluded, Mr. W. M. Bower read a paper entitled, "An Hour with Modern Linotypes."

Mr. Bower traced the history of linotypes from the genesis of the idea with five Congress reporters who were tired of the tediousness of transcribing their notes into long-hand; he mentioned the connection with the watchmaker, Mergenthaler, who produced a machine that was controlled by a keyboard, this being followed by a blower machine, by the square base linotype in 1892, and latterly the star pattern. There were in use over 43,000 linotypes, also other machines for mechanical composition, and yet, more than 75 per cent. of typesetting was still done by hand, the greater portion being jobbing work. Had master printers been enterprising and desirous of possessing more economical means of producing display work, the L. and M. plans would not have lain so long in the archives of the company. The hand compositor claimed superiority, but there was no difference between mechanical and hand composition as it did not require any art to set up types. If art was a question of type faces the honour should be given to the typefounder, as it was he who studied the designing of typefaces for the benefit of the compositor. Linotypes were built and issued in numbers, and the difference between one model or another was in the magazine or distributor equipment, some models being built to produce certain classes of work quicker than others. For instance, a book house did not require the same standard of machine as used by a jobbing printer. When machine composition for display work did come into its own, master printers who appreciated quality printing would employ lay-out men and consider those services as a sound investment.

Mr. J. Eddie inquired about the changing of moulds.

Mr. Bower replied that the operator need not move from his seat, as by turning a wheel he obtained the size he required. With the universal moulds the wheel could be placed into position and the correct liner inserted.

Mr. J. H. Nuttall asked how it was that printers could tell whether a job was set linotype or by hand; also, why was mechanically set loose type counted as something superior?

Mr. Bower answered that it was possible to produce bad linotype work, it being brought about by various causes. Printers' managers and overseers were not always able to give the operator what he required, and, should one or two defective matrices—where the walls were broken down—be allowed to run in a fount the work was sure to be deficient.

Mr. F. E. Robinson desired explanation where too lines were used to complete a measure and on a pull being taken there appeared a fine white space down the page.

Mr. Bower said there should not be a white if the operator had his machine adjustments in good working order.

Another speaker wanted a remedy for slugs going off their feet, particularly when run on a cylinder machine.

Mr. F. J. Hughes stated that the springing of linotype matter arose from several causes. To lock up a form correctly, the ends of the lines should receive the first squeeze, and then the foot of the page. The form should be lightly planed after being half locked, and then a final lock up again beginning with the end of the slugs. The operator assisted the springing of linotype matter by having hollow slugs, there being no solid metal for the bars to stand upon. The pressman sometimes overpacked his cylinder and produced undue strain on the slugs, or when washing out the form he allowed an excessive amount of liquid to run down the sides of the slugs, thereby causing them to slip. The sidesticks, footsticks, or furniture might be rocky, or the chase might not be level, one corner not

resting on the machine. The defective sidesticks and furniture should be changed, and the chase packed at the corner so that there would not be any rocking motion each time an impression was being taken. Some operators helped to make defective matrices as they did not take away those that had caused stoppages on the disse-bar. If the damaged matrices were immediately removed until there was time to give them proper attention, and afterwards they were run several times through the channels there would be less showing of hairlines between the letters after casting.

Mr. Richard Bates having made a special study of mechanical composition, mentioned that certain linotype faces did not print as heavy as ordinary type. On a competitive machine that heaviness had been secured. The tops of some of the characters usually broke away and spoiled the look of what might be a good job. The specimens on view were excellent work, but the ordinary run of slug faces did not give the same solidity.

Mr. Bower pointed out that the founts Mr. Bates had mentioned were brought out when printers used damp papers and those resembling parchment, which when printed upon from linotype bars gave all the details, but with the introduction of so-called art papers the old style matrices were unsuitable. As Mr. Bates had admitted, the specimens of work were perfect it proved that the suggested defect had been remedied. L. and M. had the largest range of faces in the world, and one of the advantages was that a customer could quickly be supplied with a desired fount. Furthermore, in the days when most of those present were apprentices, it was usual to have a great number of small founts, and as far as possible introduce them into each job. With modern display work many printers had set up in business and produced excellent work with a few founts, having series of each, this style affording greater opportunities for mechanical display work.

Mr. C. L. Stern followed with a chat on the standard cylinder machine which, he said, was a universal favourite with high-class printers. He explained that the bed was ground to the thousandth part of an inch, and the cylinder was subjected to a similar process, thereby insuring running in unison which gave an even impression all over. Before being sent out every machine was thoroughly tested, a job being mounted, made ready and good impressions taken before it was passed. Perfect impressions from every machine turned out of the works were kept, so that they could be used as references. Some persons did not take into consideration that if managers and overseers did not give the minder 100 per cent. of requisite materials and assistance they could not expect to get the best out of the machine. Oil was an essential factor in the smooth running of the machine. At each end of the bed of the machine there were two buffers to ease and take away the strain, and, when once set, these should not be moved whether running a full or small form. On a 60 by 40 machine the air pressure was about 60 lbs. at one end and 65 lbs. at the other end when running at a maximum speed. Buffers were a most important part of the machine and great care was exercised in their setting. If the air pressure was correct, the minder obtained better register and therefore better printing. In the operation of making-ready, minders had their own peculiarities, some using hard packing and others favouring soft packing. He had heard of a Continental pressman whose idea of hard packing was a sheet of zinc fastened around the cylinder and a sheet of manilla drawn over the top. That was the limit, and no doubt it provided a great amount of wear and tear to type, printing blocks and the machine itself. At the present time some minders used a thin canvas-backed rubber next to the cylinder and had a sheet of manilla drawn over it, thereby reducing the make-ready time by 50 per cent. Another school of pressmen obtained very good results by just cutting out the high lights of half-tone blocks. The rubber blanket dressing for the cylinder appeared to have the following advantages: it lengthened the life of the plates; less ink was used, and washing up was reduced to a minimum; also it had a tendency to keep the blocks clean, because the resiliency of the rubber gave a perfect impression at each revolution of the cylinder. Speaking of mounts, Mr. Stern recommended the steel grooved kind, as wood mounts might be dry one day and warped the next day. A great many printers were using metal—old soft metal—planing it down and nailing the plates upon it. If a block did not require interlaying, it did not require overlaying, therefore there was

a saving of time in make-ready. Money was made only in the press-room. [Voices: "The poor old comps again!"] Some houses would not allow any wood to go on to the machines, the materials being metal, iron or steel, and they found it to be an exception to have a block slur or wear on the edges.

Mr. E. C. Balls found that the rubber blanket kept the high lights in the blocks more clear.

Mr. Stern said the non-use of rubber allowed an indentation in the make-ready, the continual impressions forming a sink, and if the interlaid blocks were mounted on wood, the interlay would be forced into the mount and the desired printing effect lost.

Mr. W. Smith found some cylinders had not sufficient beard to allow of a thin canvas-backed rubber being used. He used dental rubber for both type and block forms.

Mr. Stern hinted that it was not necessary to use the rubber for type forms. By using the thin film of rubber, printers were able to run regularly and continuously. Certain houses still adhered to the big wood mount, and when any plate required moving it proved a waste of time. Some firms were using soft metal mounts, fixing around them pica reglets, and then nailing the plates on to the reglets, leads of varying points being used as packing for desired widths. Of course, that work had to be done on the machine as a piece of reglet might fall out when removing the form from the imposing surface to the bed of the machine. By that system a valuable machine was held up unnecessarily. As had been mentioned before, oil was a necessity, but when one heard of a machine causing a slur on a block, and finding that the pressman almost daily oiled the cylinder bearers one was inclined to the belief that oil was a curse in the hands of some persons. Another failing with certain printers was that they built down to the forme and had even been known to raise the cylinder and tack two or three manillas on the bearers expecting to print without a slur. A cylinder should not be moved after being correctly set. When pressmen found their cylinder sheets creeping either backward or forward it was a sure sign that the bed and cylinder were not travelling in unison. The day of hard packing had gone, the day of soft packing ought not to return, but there should be something that had a certain amount of yield, and that something lay in the use of the rubber blanket.

Mr. A. Young wondered if the use of a rubber blanket would avoid interlaying of vignettted blocks.

Mr. Stern advised painting the back of the blocks two or three times with shellac, then filing away the outer edge and bending down.

Mr. F. J. Hughes suggested that some houses doing fine vignette work usually sent duplicates to other printers who were unable to achieve equal results because the edges of the blocks were harsh.

Mr. Stern replied that it had been found so.

Mr. W. Smith had not much faith in the lay gauges. Seldom did he find them square to paper, therefore the register was affected. If they were more on the wedge principle there would be a better chance of obtaining register.

Mr. Stern agreed it would be an advantage. A great many printers were indifferent in setting the form in line with the take of the cylinder, therefore there was less certainty of obtaining register.

Mr. A. Young thought one might get trouble from air buffers when a machine was on a wooden floor.

Mr. Stern recommended building up the machine to make it more rigid.

A voice enquired whether the setting of the cylinder was timed with the rollers.

Mr. Stern replied that both were separate.

WEE MAC.

"FREEMAN'S JOURNAL."—After three weeks of partial disablement the *Freeman's Journal* reappeared last week-end in its old familiar form. Since the smashing up of the printing office by the irregular I.R.A. on the 29th ult. the *Journal*, copying the example of the *Manchester Guardian* during the printers' strike, has appeared as a typewritten summary of the day's news. The first day after the raid a single printed sheet in the form of a handbill was published, and this within three days grew into a bulletin of seven or eight sheets typewritten and duplicated. Later the original copy was duplicated by a photographic process, and appeared for sale on the streets and stalls in the usual way.

Starting a Boy in Industry.

Prospects in the Printing Trade.

"No industry is so sensitive to the general trade atmosphere as the printing industry. It is said that if you watch the printing trade you can judge pretty accurately the possibilities of the near future with regard to the whole trade of the country. When traders see signs of tightness the first thing in which they begin to effect economy is their printer's bill, and when they see things looking more promising they at once seek the printer's aid to enable them to make the most of the chances." So says a writer in the *Yorkshire Evening Post*.

Printing in all its branches, he says, is one of the best Leeds trades. Leeds ranks with Nottingham, Hull, and one or two other places as the chief centres of the industry outside London. In some printing offices, notably in London, it is the custom to employ a large number of boys who are not apprenticed, but who grow up to be packers, warehousemen, etc. Though in a good office these boys are well looked after, and qualify for very fairly paid posts, it is not recommended that a father should put his boy to such work, unless he is forced by circumstances to do so. Far better is it to find an opening in one of the definite crafts within the trade, and to apprentice him to that. The practice of the trade with regard to indentures varies, but whether an indenture is executed or not, the agreement is more or less binding on both parties. Two courses are open to the father. He may send his boy to a small jobbing printer's, where he will learn something of the whole trade, thereby qualifying himself to hold the position of journeyman or foreman in a small general business (or to start such a business on his own account), or to a large firm, where he will learn one craft only in the trade, and become a compositor, machine-man, lithographic artist, etc.

On the subject of chances for boys in industry, the writer says that all branches of the printing trade are specially suitable for intelligent boys; indeed, no boy who does not show signs of intelligence above the average ought to enter the trade. An ignorant and stupid compositor is a great nuisance, and one who tends instinctively to spell rightly and to form sentences grammatically, and to observe rules of punctuation, is a very valuable man. In all trades in the industry it is usual to serve at least five years' apprenticeship; some employers prefer seven years. A fairly rough list of the trades is as follows:—Compositors, machinists, lithographers, stereotypers, engravers and process workers. So far as compositors are concerned, the great need is for speed and accuracy. A lad usually starts by learning his cases, i.e., getting to know where the various kinds of type are. He then goes on to distributing type, after it has been used. He then learns to set histype, and finally comes to display, making-up, paging, insertion of blocks, etc. The more styles of display that an apprentice can get accustomed to the better.

Dealing with mechanical skill, the writer points out that the skill of a machinist is something quite different from that required by a compositor. Mixing inks, keeping his machine in order, regulating the ink supply, and duties of that kind fall to his lot. What is known as "making ready" is the chief process. The rest consists in making the machine do the work. In some shops a lad may be lucky enough to learn to make ready process blocks and colour work.

A lithographer may be a printer and transferer, an artist, or a designer. The last-named makes the design, the artist draws it on the stone or plate, and the printer does in lithography what the machinist does in typography. The printer or transferer does the more mechanical work. There is this difference between him and the typographical machinist—that he has to know about the action of the acids, so that a boy with a turn for chemistry would find the work interesting. The work of the artist and designer is obviously suitable for boys with a talent for drawing.

Stereotyping and electrotyping is highly specialised work, calling for a considerable degree of theoretical knowledge of chemistry and electricity. For a lad who is willing to study hard, the trade affords a first-class opening.

Process work and engraving is work calling for a high degree of technical skill and thepr-

etical knowledge. They are both most interesting trades, and are well paid, though openings are limited. In some firms collotyping is done. This is another trade calling for boys of exceptional intelligence; the wages earned by a journeyman are higher than in any other branch of the industry.

In conclusion, the writer observes that, take it all in all, the printing trade affords as good an opening as any, especially for boys who are inclined to be interested in science, or who give promise of artistic talent.

The F.M.P. Annual Conference.

Cost Congress at Glasgow.

The Federation of Master Printers having arranged to hold its annual conference in Glasgow from June 3rd to June 9th this year, a most interesting programme has been drafted, to include a reception and ball by invitation of the Lord Provost, Magistrates and Councillors of the City of Glasgow, various excursions to the numerous beauty-spots of the neighbourhood, a trip to Edinburgh, golf, and other social items—in addition to the important business sessions, the latter including a cost congress.

The programme for the cost congress is now arranged, and the following are the speakers and subjects:—Mr. W. Howard Hazell—"The Past, Present and Future of the Costing Movement"; Mr. J. R. Richmond, C.B.E. (partner with Lord Weir)—"The Value of Scientific Costing"; Mr. Alec Orrock—"Costing Publishers' Bookbinding"; Mr. Geo. D. Stewart—"Costing a General Bindery"; Mr. Geo. Eaton Hart—"What I Saw and Heard in U.S.A."; Mr. John D. Wise—"How a Small Printer Benefits by the Costing System"; Mr. H. V. Chappell—"The Organisation of a Small Printing Office"; Mr. A. Williamson (secretary of the Costing Committee)—"Costing as an aid to efficiency."

The State of Employment.

Only Slight Improvement Last Month.

In the paper and bookbinding trades employment continued bad generally during March—according to the official information of the *Labour Gazette*; it showed a slight improvement, however, in the printing trade, as compared with the previous month. A good deal of short time was still being worked in all three trades, especially in the paper and bookbinding trades.

The percentage of workpeople unemployed in the printing, publishing and bookbinding trades, as indicated by the unemployment books lodged at Employment Exchanges, was 7.6 at March 27th, as compared with 8.2 at February 21st.

With letterpress printers employment, on the whole, showed a slight improvement on the previous month, both in London and the provinces. In the lithographic printing trade employment continued bad, and much short time was worked. Of over 7,600 workpeople in the letterpress and lithographic printing trades covered by returns received by the Board of Trade, 24 per cent. were working short time and losing, on an average, 8 hours each per week; in London there was also some overtime worked by a considerable number of letterpress printers.

Employment in the bookbinding trade continued bad generally. Of 2,900 workpeople concerning whom returns were received, 37 per cent. were working, on an average, 9 hours per week short of full time.

According to the returns received from trade unions for March, of 76,810 members engaged in the printing industry 6.0 per cent. were unemployed at the end of March as compared with 6.9 per cent. at the end of February and 5.7 March last year—a decrease of 0.9 on the preceding month, but an increase of 0.3 on a year ago. Of a bookbinding membership of 13,327, 11.4 per cent. were unemployed at the end of March as compared with 11.1 at end of February and 9.4 March last year—an increase of 0.3 on the previous month and of 2.0 on a year ago.

The late Mr. Ernest Wilberforce Smith, Llandudno, Carnarvon, until recently head of Messrs. Smith Bros., paper merchants, St. Paul's-square, Birmingham (died November 15th, aged 62) left £8,585.

The Post Office Surplus.

Renewed Demand for Fairplay.

The Chancellor of the Exchequer having this week returned from Genoa, he is understood to be now giving his attention to the completion of his work on the Budget. This entails, no doubt, a decision on the question of the disposal of the Post Office surplus. It is very appropriate, therefore, that those who realise the vital importance of a cheap and efficient postal service—the "life-blood of commerce"—are on all sides making their voices heard through the medium of the daily Press.

On behalf of an organisation which does not represent a particular sectional interest, but aims at voicing the views of the general community, the secretary of the National Citizens' Union writes to demand that the Government be bound to the pledge given through the Postmaster-General in June of last year in which it was indicated that any surplus from the Post Office revenue would be applied to the reduction of postal rates and telephone charges. The National Citizens' Union is making definite recommendations for the following reductions: Letter rate from 2d. to 1½d., postcard rate from 1½d. to 1d., printed paper rate from 1d. to ½d., and the restoration of the collection and despatch of letters on Sunday.

Mr. W. H. Burchell has continued his useful correspondence campaign in the Press, stressing particularly the absurdity, in face of the P.O. surplus, of continuing postal rates which have led to a decrease of 190,000,000 items of printed matter carried, as well as a big falling off in other classes of postal matter, together with an immense weekly loss to labour because of the cutting down of trade entailed.

Mr. Burchell states that the eleven months' protest campaign against high postal rates is about to yield successful results. He has just received a letter from the Chancellor of the Exchequer who writes that he "will deal with the question of Postal Charges on Monday next."

Sir Adolph Tuck writes to emphasise the strong case for an immediate reduction of the postage on picture postcards. "We have it on the most incontestable evidence," he says, "namely, the heavy decline of the British picture postcard industry from the day, June 13th, 1921, the increase in the postage of picture postcards from 1d. to 1½d. took effect, that the prediction I made to the Postmaster-General when heading the deputation to him the previous month, that 'if he persisted in the threatened increase the use of picture postcards by the public would at once be decreased by 50 per cent. or more,' has been more than verified. The revenue actually derived during the past year from this source by the Post Office with the postage at 1½d. cannot be less than 25 per cent. below the amount which was realised when the postage was 1d. A once flourishing British industry has been brought to its knees; and this, sad to relate, not only without the slightest advantage to the postal revenue, but actually involving it in serious losses.

"The French postal authorities, who had made the same blunder, with the same result, by last year raising the postage on picture postcards to 20 centimes, reversed its decision three weeks ago, when the Senate confirmed the bill for the modification of postal charges, which had been passed by the Chamber of Deputies."

Sir Adolph concludes: "With all the foregoing indisputable facts before the Chancellor of the Exchequer, it would be clearly doing an injustice to his intelligence in assuming for a moment that he will not show the same consideration to the British picture postcard industry, at present stagnant, and so alleviate the distress caused by the unemployment of so many thousands of workers."

"How we won the Gold Medals" is the title of an attractive little folder issued by Messrs. Hill, Siffken and Co., Ltd., drawing attention to their prowess in poster printing, which led to their winning the only gold medal for pictorial posters at the Printing Exhibition of 1914 and winning another gold medal at last year's exhibition.

THE late Mr. James Ramsbottom, of Old Colwyn, papermaker, chairman of Messrs. Ramsbottom, Lyons and Co., Ltd., Manchester and London, died January 23rd, aged 75, left £11,620 (net personality £11,441).

Trade Union Matters.

L.S.C. BALLOT ON LEVY.—The following is the result of the ballot taken by the London Society of Compositors on the three levy proposals:—"Are you in favour of a levy to provide against a possible lock-out?"—for, 8,146; against, 1,955; majority in favour, 6,191. "Are you in favour of a levy based on the poundage system, at the rate of 1s. in the pound or part of a pound above 10s., up to £6, with an increase to 2s. in the pound above £6?"—for, 5,468; against, 4,106; majority in favour, 1,362. "Are you in favour of a levy of 7s. per week for all members in full employment?"—for, 3,246; against, 5,764; majority against, 2,518.

T.A. MEMBERSHIP ERROR.—When the last half-yearly report of the Typographical Association was published the trade press commented on the fall in membership—the first in the Society's history. The total was given as 30,580, a decrease of 651. An error, however, has been found in the totals with the result that the membership was 31,318 or an increase in membership of 84 over the previous half-year.

NON-UNION ELECTROTYPER.—The result is announced in the *Labour Gazette* of a dispute in which agreement was reached following negotiations by an officer of the Ministry of Labour. The case was the National Society of Electrotypers, etc., v. H.M. Stationery Office. Difference—As to the employment of a non-unionist who was being paid a rate below the trade union rate of £6 5s. per week. Agreement—The man concerned would be paid £5 10s. per week, to be increased to £5 15s. per week at the end of three months from the date of agreement, and to £6 at the end of six months. At the end of nine months he would be paid the standard rate of wages in operation in general printing firms (where compositors and machine men are employed) in the London Area.

THE N.U.J.—At the recent annual delegate meeting of the National Union of Journalists, held in Nottingham, it was stated that the year opened with a membership of 4,888, and closed with 4,680; new members to the number of 238 were admitted. The first proposal considered was that the union should withdraw from the Trades Union Congress. After lengthy discussion the proposal was rejected by a large majority. The conference adopted with complete unanimity and acclamation a resolution expressing regret at the breakdown of the negotiations between the union and the Institute of Journalists for the fusion of the two bodies, and declaring the readiness of the union to reopen negotiations with the Institute, providing the formula agreed upon by the executives of both bodies was adhered to. The meeting adopted a resolution of the E.C. that the organisations of newspaper owners should be approached with the object of establishing a joint super-annuation scheme. Mr. T. A. Davies (South Wales and Mon.) was unanimously elected president of the union in succession to Mr. Jay. Mr. W. Meakin (Surrey) was elected vice-president. It was decided to hold the next delegate meeting at Portsmouth.

Trade in Printing Type.

EXPORTS.—During the first quarter of the present year the total quantity of British printing type exported amounted to 57 tons (of the value of £17,819). This figure compares with 104 tons (£31,620) last year and 60 tons (£16,092) during the corresponding period of 1920.

IMPORTS.—During January-March 14 tons (of the value of £3,350) of printing type were imported into this country, as against 11 tons (£4,168) last year and 6 tons (£1,953) during the first three months of 1920.

IN the course of an address before the Edinburgh Rotary Club, on "the making of a newspaper," Mr. Edgar W. Smith said one daily newspaper in Britain used between 2,300 and 2,500 miles of paper (two pages wide) every day. That paper weighed from 170 to 200 tons, which meant the clearing of anything from ten to twenty acres of forest land to supply the necessary timber for its manufacture. When it was considered that that was only one newspaper, some idea was gained of the tremendous scale of the newspaper business to-day.

Mr. H. F. Harding.

WE regret to have to record the death of Mr. Henry F. Harding, manager of Messrs. J. B. Nichols and Sons. Born in London in 1846, he became apprenticed to Mr. R. K. Burt, whose printing office was on Holborn Hill. The completion of his apprenticeship was served under Mr. Burt at the Crystal Palace, where Mr. Burt had a printing office, and was authorised printer for the Crystal Palace Co. Later, when Messrs. Charles Dickens and Evans held the printing contract for the Crystal Palace, Mr. Harding transferred his services to the new firm. In 1873 Mr. Harding became the manager, and he remained in the employ of Charles Dickens and Evans for 16 years. Upon leaving that firm in 1888, to take over the management of Messrs. Nichols and Sons, he was the recipient of many testimonials, showing the esteem and regard in which he was held. Amongst them was a letter from his employers, Charles Dickens and F. M. Evans, which was dated from "Office of All the Year Round, November 3rd, 1888," and read: "Understanding that your friends are entertaining you to-day at dinner, we should like to take this opportunity of expressing our regret that the connection between us, which has existed so long and so pleasantly, has been terminated. In entering on your new sphere of action you have our best wishes, and it will always give us pleasure to hear of your continued prosperity and success." During the whole of his working life Mr. Harding took a keen, personal interest in every effort in aid of the charities connected with the trade. From his earliest years he took a special interest in the work of the Printers' Pension Corporation, and from the year 1885 until his death he was an honoured member of the Council of that Institution, as well as serving for many years as chairman of its Finance Committee. He organised the Crespin-Harding Pension Association, which has been instrumental in securing in annual payments to the Printers' Pension Corporation a total sum of £2,000. His name will be permanently identified with this work in the pension which bears his name. His was a nobly-spent life, self-sacrificing to a degree in the cause of works of benevolence, and his modest, lovable character endeared him to everybody with whom he came in contact.

Mr. Thomas Chapman.

A PROMINENT Irish master printer and newspaper proprietor has passed away in Dublin in the person of Mr. Thomas Chapman, managing director of the Athlone Printing Works Co., Ltd., and proprietor of the *Westmeath Independent* and the *Offaly Independent*. The deceased gentleman had been in delicate health for some time, but was making progress until November, 1920, when the premises of the Athlone Printing Works Co., Ltd., were completely destroyed by British armed forces. The total destruction of the works—the largest printing concern in the Irish provinces, and the monument of his life work, seriously affected Mr. Chapman's health. In 1883, having completed his apprenticeship to the printing trade in Dublin, the late Mr. Chapman went to Athlone and purchased the printing works and publication offices of the *Westmeath Independent*. At that time the *Westmeath Independent* consisted of a small sheet of little value as a newspaper. The offices were then practically derelict. The stock-in-trade consisted of a few cases of type, a small hand press and a tiny printing machine of ancient pattern. By dint of hard, fearless work, the newspaper developed, and as business grew, more up-to-date machinery and type were purchased and, in addition, the staff was increased. Mr. Chapman was actively identified with the public life of Westmeath and the political cause of his country. By his employees he was held in high regard, and the Athlone Typographical Society passed a resolution expressing their regret at his departure.

WILLS.—Mr. James Cope Cornish, bookseller and publisher, £41,098; Dr. Ralph Stapleton Ward Jackson, managing director, and for fifteen years editor of the *Rand Daily Mail*, £2,185; Mr. Francis Frederick Gordon, proprietor of the *Advocate of India*, Bombay evening journal, £1,050.

Government Contracts.

Contracts were placed with the following firms during March:—

Stationery Office.

PRINTING, RULING, BINDING, ETC.

Group 115 (1922) — Admiralty — Specified Items, No. 4, Sect. A.—Odhams Press, Ltd., London, W.C.

Specified Items, No. 4, Sect. B; 6,000 Books, T.E. 1091.—W. P. Griffith and Sons, Ltd., London, E.C.

Group 115 (1922) — Admiralty — Specified Items, No. 4, Sect. C.—John Corah and Son, Loughborough.

4,000,000 Forms A/cs. 325.—Swire and Sons, Rochdale.

10,000,000 Forms A/cs. 455.—F. Duffield and Sons, Leeds.

2,000,000 Forms, U.I.A. 80 Ex.; 150,000 Books, Med. 46 (Revised).—H. Blacklock and Co., Ltd., Manchester.

CONTRACTS FOR COMMAND ORDERS, ETC.

Northern Command.—Thos. Wood, York.

Southern Command.—Salisbury Times Co., Salisbury.

Eastern Area.—Cullingford and Co., Ltd., Colchester.

Western Command.—G. R. Griffiths, Ltd., Chester.

R.A.S.C. Records.—R.A. Institution, London, S.E.

Scottish Command.—McFarlane and Erskine, Edinburgh.

Welsh Area.—Livesey, Ltd., Shrewsbury.

Highland Area.—Wood and Son, Perth.

West Lancashire Area.—C. Tinling and Co., Ltd., Liverpool.

Dover Sub-Area.—Executors of late George Spicer, Dover.

Group 24 (1922)—Census of England and Wales, 1911, Vol. XIII., Part II.—Wyman and Sons, Ltd., Reading.

Division I. (1922) — England—Letterpress Binding; Division II. (1922)—England—Letterpress Binding; Binding 1,190 Telephone Directories, Vol. II.; Binding 3,495 Pilot Books; Binding 7,750 Copies Admiralty Manual of Navigation, Vols. 1 and 2.—James Adams, London, E.C.

Group 14 (1922) — Accounts Relating to Trade; Group 25 (1922) — War Office Miscellaneous; Group 26 (1922) — War Office Special Works, No. 1; Group 27 (1922) — War Office Special Works, No. 2; Group 28 (1922) — War Office Special Works, No. 3.—Harrison and Sons, Ltd., London, W.C.

Division III. (1922) — England — Letterpress Binding.—Thomas de la Rue and Co., Ltd., London, E.C.

Confidential Letterpress Binding.—England; Binding 5,500 copies "Signal Letters of British Ships, 1922."—Eyre and Spottiswoode, Ltd., London, E.C.

50,000 Registry Jackets.—Waterlow and Sons, Ltd., London, E.C.

600 Books "Cash Receipts V. 27"; 1,000,000 Forms A.I.—I.; 2,500 Books, Mines and Quarries Form, No. 50.—McCorquodale and Co., Ltd., Wolverton and Newton-le-Willows.

Binding 2,995 Copies "North Sea Pilot."—G. and J. Kitcat, Ltd., London, E.C.

1,000 Occurrence Books.—Wm. Collins, Son, and Co., Ltd., London, E.C.

Binding 6,000 Handbooks of "Physical and Recreational Training," Vol. 2; binding 3,955 London Telephone Directories, April, 1922.—J. M. Dent and Sons, Letchworth.

Binding 10,000 London Telephone Directories, April, 1922.—Dow and Lester, London, E.C.

Binding 1,995 Copies West Indies Pilot, Vol. III.—Webb and Sons, London, E.C.

24,000 Post Cards (Wallace Collection).—University Press, Oxford.

CONTRACT FOR STAMPING, ETC., PAPER, SCOTLAND.—G. S. Malloch and Co., Edinburgh.

Crown Agents.

PRINTING MACHINE.—Messrs. B. Furnival and Co., Ltd., Reddish, Stockport.

THE Pneumatic Rubber Stamp Co. (Buck's Patent), Ltd., of 18 and 19, Queenhithe, Upper Thames-street, London, E.C.4, send us a number of leaflets which they have prepared, giving particulars and prices of their rubber stamps, rubber printing outfits, etc. In order to enable dealers personally to recommend the dovetail pneumatic cushion rubber stamp, the company offers to supply free sample stamp with dealer's own name and address.

SPECIAL PREPAID ADVERTISEMENTS

 Africa, United States, South America, Canada, etc.

THURSDAY, APRIL 27, 1922.

The Wages Negotiations.

AN important development in the current wages negotiations took place at the end of last week, and the following official statement was issued by the Federation of Master Printers on Saturday: "A conference was held on Friday with a group of important trade unions, by representatives of the Federation of Master Printers of the United Kingdom and the Newspaper Society (which represents the provincial newspaper employers). Certain modifications were made in the original proposals for wage reductions, for men and women, and the representatives of the unions undertook to recommend the acceptance of these to their members, and ballots will be taken immediately. The conference was of a very friendly character, and if this arrangement is accepted by the members of the unions wages will be stabilised up to December 31st, 1923." The trade unions referred to were, we understand, those which are acting together under the auspices of the Printing and Kindred Trades' Federation, and the modified proposals specify a 15s. reduction in gradual instalments. The remaining unions are negotiating separately, and no official information is available as to the progress made; we gather that in regard to some of these the position is still a very difficult one. There was a meeting of the Council of the Federation of Master Printers on Tuesday, when the question of wage-reduction was given careful consideration prior to the subject being discussed at yesterday's (Wednesday's) meeting of the Joint Industrial Council.

Postal Rates Position.

Those interested in the vital subject of cheap postage have their eyes now upon the Chancellor of the Exchequer, who, just returned from Genoa, is completing his Budget proposals. He is treating the question of a decrease in postal rates as one of the many problems which his Budget involves, and he has not as yet given any public indication that he is considering more favourably the Postmaster-General's claim that the Post Office surplus is already earmarked for the relief of the overcharged patrons of the postal services, and must not be drawn upon to add

weight to the credit side of the Chancellor's balance-sheet. That there will be very strong opposition, not only in the country but also in the House of Commons if British industry is cheated of its long-awaited relief, seems now beyond question. To maintain the present heavy burden upon the circulation of advertising literature and other printed matter would be to adopt a policy now recognised as economically unsound and opposed to the interests not only of the printing trade but also of the whole industrial community.

German Printers' Efforts.

MEANWHILE our high postal rates remain, and we continue to notice further evidence of the efforts of Continental printers to make the most of their advantages. As an anonymous verse-maker remarks:—

"What drives our print far over sea,
 And gets it 'made in Germanee,'
 Leaves British printers up a tree?—
 The G.P.O."

German printers are certainly making efforts to take as many British printing orders as possible across the Channel. One office in Berlin announces as a speciality "mass-dispatch of printed matter by the million," and is prepared to undertake "addressing in all languages" at a charge of 100 marks (1s. 6d.) per 1,000. Postage for printed matter to places abroad is stated to be only 80 pfennigs, or about one-sixth of a penny, per 50 grammes (1 4-5 oz.). That the printing, as well as the posting, can be done on the Continent is made plain to clients, and German printers are not hesitating to point out the advantages which lower wage-rates, cheaper paper, etc., add to those conferred by cheaper postal services.

Three Months' Paper Imports.

A FEATURE of the imports of paper and boards into the United Kingdom during the first quarter of the year, as shown by the following figures, is the heavy arrivals during March:—

January ...	683,688 cwt.	£822,613
February ...	408,793 "	591,246
March ...	984,052 "	1,094,545

The total quantity received for the three months ended March amounts to 2,081,533 cwts., as compared with 1,344,963 cwts. for the corresponding period of last year, and 2,735,222 cwts. for the first quarter of 1920. An increased importation has to be recorded so far this year of 54·7 per cent. as compared with 1921, and a decrease of 23·8 per cent. as compared with 1920. Of the total imports during January-March last, the receipts of boards (mainly strawboards) account for 34·5 per cent., packings and wrappings 30·8 per cent., and printings and writings 27 per cent. During the last three months, as compared with the corresponding period of last year, important increases are shown in the imports of the following goods:—Boards, 173,072 cwts.; packings and wrappings, 365,821 cwts.; and printings and writings, 121,204 cwts. The total value of the imports of paper and board during January-March last stands at £2,508,404, and reflects the steady drop in prices. Notwithstanding that the quantity received shows an increase of 54·7 per cent., the value as compared with the corresponding period of last year marks a decrease of 19·2 per cent., and as compared with the first quarter of 1920 a reduction of 54·9 per cent.

Paper Exports Disappointing.

AT present the export trade in British paper, etc., is by no means satisfactory, but, fortunately, the outlook is more encouraging and it is to be hoped that the overseas demand will gradually improve. The following figures show the shipments during the last three months:—

January ...	146,915 cwts.	£581,481
February ...	119,201 "	421,560
March ...	137,935 "	460,882

The total quantity amounts to 404,051 cwts., as compared with 461,888 cwts. during the

first quarter of 1921, and 437,453 cwts. in the previous year. The decreased exports during January-March, as compared with the corresponding period of last year, amount to 12.5 per cent., and, as compared with 1920, to 7.6 per cent. Of the total exports during the three months ended March last printings comprised 49.2 per cent., writings 7.7 per cent., packings and wrappings nearly 16 per cent., and coated papers 7.2 per cent. Owing to a falling off in exports to Australia, India, South Africa and other markets the shipments of printings to British Possessions during last quarter amounted to only 137,434 cwts. as compared with 198,349 cwts. during the corresponding period of last year; supplies to foreign countries, however, were on a larger scale, viz., 61,443 cwts. as against 49,715 cwts. As to writings a slump has been experienced in supplying both colonial and foreign markets, the former taking only 23,482 cwts. during last quarter as compared with 55,376 cwts. during January-March of 1921, whilst foreign countries took 7,809 cwts. as against 9,660 cwts. The total value of the exports during January - March amounted to £1,463,923, decreases being shown of £1,462,584, or 49.9 per cent., compared with last year and £511,494, or 25.8 per cent., against January-March, 1920.

The Paper Market.

THE recent slight improvement is well maintained; but there will have to be a much larger paper demand before the mills begin to feel real benefit. Here and there we hear of mills with satisfactory order books, mainly news-print mills; but, taken all round, the condition is poor. Machinery is still idle and unemployment prevails. Writing and printing mills still find it difficult to accumulate work which will keep the machines going for more than a week or two ahead. Merchants are certainly doing an improved business, and their prices are very competitive. For one thing, the mills are finding it necessary to look after inquiries for themselves and they are traversing much the same ground as the merchants. Naturally, the maker is not concerned about small lots; but he cannot sit idle while the larger inquiries are turned in any direction behind his back. Until the mills entered the arena, prices were maintained at too high a level, and the apparent disparity between English and foreign paper prices seemed enormous. Now that the mill figures are popularly known, it is seen that there is no great gulf between home prices and foreign quotations. In fact, there is no question of foreign paper when delivery, quality, standard and reliability have any bearing on the issue.

Sets of Samples.

MESSRS. THOMAS AND GREEN have solved the printer's difficulty of showing specimens of paper by producing a range of miniature sampling sets free from name, etc. They have also produced a new comprehensive sample book of their papers arranged to show the whole issue in a tabbed and sectionalised form. Not only are all the pre-war grades and colours embodied; there are also several additions. Then there is the new discount scheme which secures to the customer an allowance proportionate to his custom, a most equitable arrangement. In the matter of service there are a good number of houses which might do worse than emulate the efforts of the Bucks firm.

PRESIDING at the annual general meeting of the News-vendors' Benevolent and Provident Institution, in London on Monday, Viscount Burnham (president) said what they in the trade supplied had become a necessity of life to the greater part of the community; they were not dealing in luxuries. The newspaper and allied trades had become, in a real sense, necessary for the life of the average citizen in the modern world.

Personal.

VISCOUNT BURNHAM will preside at the 78th annual festival of the Shaftesbury Society and Ragged School Union, at the Queen's Hall, London, on Monday next.

LORD BEAVERBROOK will preside at the 28th annual banquet of the Associated Wholesale Newsagents, Ltd., Sunday Newspapers Distributing Association, at the Hotel Cecil, on Wednesday, May 10th.

VISCOUNT NORTHCLIFFE, as hon. treasurer of the Empire Press Union, has accepted the invitation of the president and council of the Union to a luncheon to be given in his honour by the home membership of the organisation on Wednesday, May 10th, at the Hotel Victoria. Viscount Burnham will preside.

LORD ATHOLSTAN, the wealthy Canadian newspaper proprietor, has decided to give the £22,000 he recently offered for cancer research work to the Imperial Cancer Research Fund, who have received a letter from him formally announcing this decision.

THE Lord Mayor of London (Sir John Baddeley) and Sir T. Vansittart Bowater attended the recent installation meeting of the Londinium Lodge of Freemasons, Sir Vansittart being an hon. member.

SIR JOHN LE SAGE, managing editor of the *Daily Telegraph*, received many congratulations on the celebration on Sunday of his 85th birthday.

AFTER a few years' journalistic work in the Provinces, Sir John Merry Le Sage joined the staff of the *Daily Telegraph* in 1863. In 1913 his colleagues entertained him at a banquet in celebration of his fifty years' service on this journal.

MR. T. P. O'CONNOR, M.P., has received unofficial information that the Municipality of Athens has granted him its Freedom in acknowledgment of his Parliamentary efforts for the protection of the lives of Christians and of Greek rights in Anatolia.

LIEUT.-COL. J. R. TRUSCOTT, secretary of the London Master Printers' Association, will attend a meeting of the South-West London Master Printers' Association on Tuesday next, May 2nd, at the Hotel Belgravia, Grosvenor-gardens, S.W.1, when light refreshments will be served, and time will be devoted to short addresses and discussion, interspersed with musical items.

INFORMATION concerning the new technical school was given by Mr. J. R. Riddell at the monthly meeting of the Electrotypers and Stereotypers Managers and Overseers' Association on Tuesday evening. A report will appear next week.

MR. E. P. MATHERS, proprietor of *South Africa*, left on Friday last for South Africa.

MR. JOHN ADAMS has been appointed by the Co-operative Publishing Society as full-time secretary for Scotland.

MR. JOHN SMITH, of the composing staff of Messrs. George Outram and Co., Glasgow, has been the recipient of a handsome testimonial on completing 57 years' service.

MR. WALTER BIGGS, who this spring completes 50 years of service in the reporting department of the *Manchester Guardian*, was on Friday presented by Mr. C. P. Scott with a clock on behalf of the directors. On Saturday the National Union of Journalists and the Manchester Press Club jointly entertained Mr. Biggs at dinner, when another presentation was made to him.

MR. SIDNEY E. THOMPSON, of the composing department of the London and Norwich Press, has been made the recipient of a solid silver cigarette case, suitably inscribed, on severing his connection with the firm after 16 years' service to venture on a new life in Canada.

Continuation Schools.

SIR,—My recent letter in your columns concerning Continuation Schools was written mainly on account of the action the Municipal Reform Party intended to take with regard to these schools, and to show my fellow master printers their position with regard to the boys and girls engaged by them. It appears that my remarks have been misunderstood by your contributors, Mr. E. George Arnold and Mr. Geo. Eaton Hart. I am anxious to remove this misunderstanding.

In speaking of the ordinary continuation schools I had no intention of including the technical classes which are for the improvement of our apprentices in their trade. In proof of the high esteem in which I hold this instruction, and of the assistance I gave in the early days to the formation and conduct of these technical classes I will quote a letter which I received a quarter of a century ago from Sir Philip Magnus, Bart., M.P.

The letter is dated July 29th, 1896, from the City and Guilds of London Institute, Examination Department. Sir Philip Magnus writes: "I am directed by the Committee of this Institute to express to you their sincere thanks for the very able assistance you have rendered them in superintending and reporting on the work of the candidates at the recent examinations held by the Institute in Printing. The Institute is at all times very grateful for the assistance of anyone conversant with trade subjects who is willing to help the committee in their endeavours to promote technical education."

It is very desirable that a greater knowledge of mathematics, grammar, composition and language should be imparted to the boys and girls attending ordinary continuation schools prior to their technical school training, and if that were the result of their attendance then the schools would have my heartiest support. But when I find upon inquiry that the time of these lads and lasses is taken up with dancing, boxing, football, pyrotechnics and other frivolities, then the system has my heartiest condemnation.

Again, there is an unfair and vexatious side of the Education Act. Take an example known to me of three boys, one living at Mitcham, one at Penge, and one within the L.C.C. area. Mitcham and Penge boys are absolved from attending the continuation schools, whilst the boy living within the L.C.C. area is compelled to attend these schools—Mitcham and Penge being on the outskirts of the compulsory area. The effect of this absurd distinction is to make it difficult for the L.C.C. area boy or girl to get employment when pitted against the applicant from the outskirts. This becomes a hardship to poor parents badly needing the earnings of their boys and girls.

My opinion, as expressed in my former letter, is formed on the above facts, and it is the opinion of the Municipal Reform Party of the L.C.C. Their opinion is that the continuation schools—because of the little good they effect and the great friction they cause by the above mentioned anomalies—should be abolished altogether. If the Board of Education decides that the schools shall be made voluntary and not compulsory, then they will soon abolish themselves.

May I ask my critics, Messrs. Arnold and Eaton, to keep clear in their minds that I am a firm believer in the good effects produced by the continuation classes for the technical education of our apprentices, and that I will lend my fullest support to them. I am ever ready to support any educational work, which is properly administered and is essential to the development of the British printing industry.

Yours, etc.,

W. H. BURCHELL,
Governing Director, The Caxton Press, Ltd.

Hon. Sec., Association of Master Printers, London Central Districts.

13-15, Leather-lane, E.C.1.
April 24th, 1922.

MESSRS. EDWIN THOMAS AND CO., LTD., of 34, Upper Thames-street, E.C.4, have brought under our notice samples of their "Royalty Art." This speciality lends itself admirably for the work of the artistic printer, and at the prices quoted may be regarded as exceptionally good value.

DIVIDENDS AND REPORTS.

"ILLUSTRATED LONDON NEWS AND SKETCH."
—Dividend of 5½ per cent. per annum, less tax, on preference shares for half-year.

NORTH OF IRELAND PAPER MILL CO., LTD.
—Accounts of North of Ireland Paper Mill Co. for 1921 show loss from working account, after charging depreciation and crediting repayment of excess profits duty, of £57,124, making debit balance carried forward £34,667. Amount owing to company includes over £30,000 receivable in cash from Government for excess profits duty overpaid. Part of this has already been received, and balance is expected shortly. Position at bank is therefore, to-day considerably better than shown in balance-sheet.

NEW COMPANIES.

HALLETT, HOWES AND CO., LTD.—Capital £5,000; letterpress and general printers and lithographers, stationers, account book manufacturers, etc., and to adopt agreements with A. C. Hallett and H. Howes. Private company. First directors: A. C. Hallett and H. Howes. Registered office: Boston-buildings, James-street, Cardiff.

GEORGE ROBB (ADFLPH), LTD.—Capital £3,000; lithographers, printers, engravers, stationers, etc. Private company. First directors: William Watson, George Milne and William Leslie. Registered office: 13, Adelphi, Aberdeen.

WOOD, MILES AND CO., LTD.—Capital £3,000; to take over the business of type-founders and general engineers carried on by W. Miles and Co., at 44, Hounds Gate, Nottingham. Private company. First directors: C. A. Wood and W. Miles.

OLD TOWN RIBBON AND CARBON CO. (ENGLAND), LTD.—Capital £2,000; printers, stationers, etc. Private company. First directors: A. M. Gould, A. King and G. M. Hedges. Registered office: 57, Farringdon-street, E.C.4.

STRINGER, LTD.—Capital £2,000; agents for advertising, lithography and printing and to adopt an agreement with C. H. Stringer for securing his services as managing director. Private company. First directors: F. G. Dixon and C. H. Stringer. Registered office: 113, Kingsway, W.C.2.

TUDOR STUDIOS, LTD.—Capital £1,000; designers, engravers, printers, lithographers, publishing and advertising agents, etc.

Private company. First directors: W. G. Briggs and R. Darby.

P. CASSIN, LTD.—Capital £500; printers, stationers, general merchants, agents, manufacturers, etc. Private company. Permanent directors: P. Cassin and D. Marr. Registered office: 98, Great Tower-street, E.C.

CROSS PAPER FEEDER CO., LTD.—Capital £500; to carry on business as indicated by title and that of manufacturers of and dealers in machinery, implements and tools, engineers, founders, metal workers, etc. Private company. Subscribers: H. A. Phinney and E. S. Howard. Directors: H. A. Phinney, E. S. Howard and N. Reynolds.

ST. MICHAEL'S LAW STATIONERY SOCIETY LTD.—Capital £200; typewriters, printers and law and general stationers, etc. Private company. Subscribers: D. T. Garrett, G. N. Russell (?), H. M. Holman and J. G. Archibald. Registered office: 1 and 3, Creechurch-lane, E.C.

SPASHETT AND CO., LTD.—Capital £5,000; to take over the business of a stationer and dealer in fancy goods and toys, carried on by Mrs. M. J. Spashett at 43, London-road North, Lowestoft, as "Spashett and Co." Private company. Permanent directors: Mrs. M. J. Spashett, A. Spashett, and H. A. Spashett. Registered office: 43, London-road North, Lowestoft.

FILM ACCESSORIES, LTD.—Capital £1,000; producers and manufacturers of, agents for, and dealers in, cinematograph films, phonographic records, song, music, play and general publishers and printers, etc. Private company. Subscribers: H. B. Judge and G. E. Binsted. Registered office: 3-6, Rupert-street, W.

TOPICAL ADVERTISING SERVICES, LTD.—Capital £1,500; general advertising agents, contractors, and canvassers, etc. Private company. Permanent directors: T. S. Pullinger and S. C. Marchant. Registered office: 68, Coleman-street, E.C.2.

J. THOMAS CARR ADVERTISING SERVICE, LTD.—Capital £500; to take over the business of an advertising agency carried on by J. Thomas Carr at 43, Springroyd-terrace, Bradford. Private company. First directors: H. Ramsden and J. Thomas Carr. Registered office: 45, Church-street, Halifax.

J. AND A. SMALLEY, LTD.—Capital £6,000; to acquire the business carried on in Manchester, Rhyl and elsewhere by A. E. Smalley as J. and A. Smalley, and to carry on the business of paper merchants, paper bag makers, manufacturing stationers, importers of toys and fancy goods, etc. Private company. First directors: A. E. Smalley F. T. Turner and W. H. G. Baker. Registered office: Mason-street, Swan-street, Manchester.

MORA PAPER CO., LTD.—Capital £3,000; manufacturers of, and dealers in, paper and other bags, coverings and receptacles of all kinds, manufacturers of and dealers in paper of all kinds, articles made from paper or pulp, etc. Private company. First directors: E. E. Fox, N. V. Barrow and J. S. Parkes. Registered office: 15, Tariff-street, Manchester.

CONKLIN, LTD.—Capital £5,000; manufacturers of, and dealers in stationers' sundries, haberdashery, etc. Private company. Subscribers: F. M. Caporn and G. L. Campbell. Registered office: 7, St. Bride's House, Salisbury-square, E.C.4.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

HUDSON SCOTT AND SONS, LTD. (printers, etc., Carlisle).—Issue on March 31st, 1922, of £12,150 debentures part of a series already registered.

W. SPEIGHT AND SONS, LTD. (printers, publishers, stationers).—Mortgage dated April 13th, 1922, to secure £1,000, charged on certain freehold land in Norwich-street, Fetter-lane, E.C. Holders: G. J. F. Knowles and Miss M. M. Knowles.

ROBT. ROBERTS (PRINTERS), LTD. (Cardiff).—Debenture dated March 28th, 1922, to secure £15,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: Public Trustee.

CLARE, SON AND CO., LTD. (stationers, printers, newspaper publishers, etc.).—Two mortgages dated April 3rd and 4th, 1922, to secure £1,000 and £550 respectively, charged on 9, High-street, Wells, Somerset. Holders: H. M. Gregory, Wells, and R. Bath, Glastonbury.

WINTON CAVEN CO., LTD. (stationers, printers, etc., Leicester).—(a) Satisfaction in full on February 20th, 1922, of debenture dated March 2nd, 1921, securing all moneys due or to become due; (b) also registered particulars of £4,000 debentures authorised March 24th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

COLLIERY GUARDIAN CO., LTD.—Satisfaction to the extent of £3,000 on March 24th, 1922, of debentures dated February 6th, 1902, securing £4,000.

EBURITE PAPER CO. (1919), LTD.—Issue on March 20th, 1922, of £3,000 debentures, part of a series already registered.

STANDARD CATALOGUE CO., LTD.—Issue on February 13th of £4,000, on March 13th of £3,000, and on April 5th, 1922, of £5,750 "B.S.E." debentures, parts of a series already registered.

THORNBORROWS, LTD. (stationers, etc., London).—Particulars of £300 debentures authorised March 25th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

PEERLESS PHOTO PAPER CO., LTD. (Rickmansworth).—Issue on April 10th, 1922, of £85 debentures, part of a series already registered.

FROST AND REED, LTD. (fine art publishers, etc., Bristol and London).—Mortgage dated April 4th, 1922, to secure £14,000; charged on 10 and 12, Clare-street and 2, Marsh-street, Bristol. Holders: Trustees of Liverpool Victoria Friendly Society.

Bankruptcy.

Re JACOB PINKUS SCHAFER (trading as Mark Miller), paper bag manufacturer, 6 and 8, Ward-road, Stratford, E.—A sitting of the London Bankruptcy Court was held recently before Mr. Registrar Mellor for the public examination of this debtor, who filed his own petition on February 8th. The statement of affairs shows total liabilities £11,415 (unsecured £6,395), and net assets valued at £1,567, after deducting £60 for payment of the preferential claims. Questioned by Mr. W. Boyle, official receiver, the debtor said he was a Polish Jew and came to this country with his parents in 1889. Until 1903 he was employed, first by his father and afterwards by his brother, in the paper bag making trade, but in that year he started on his own account, and 1905 added the branch of a printer. In 1907 witness handed over both businesses to a creditor from whom he had borrowed money. He then went to New York where he made and sold paper bags, but returned to London in 1908. In the meanwhile his wife had commenced business as a dealer in paper bags under the style of "Mark Miller" at 58, Brushfield-street, E. Witness took over the business and subsequently removed it to 54, Brushfield-street, where he recommenced manufacturing. In February, 1913, he took larger premises at 6 and 8, Ward-road, Stratford, but gave up the latter premises in 1919. The debtor further stated that as the Ward-road premises were too large for his purposes he and another person converted part of them into a cinematograph theatre, "the Stratford Palladium," and he continued to run it until February 4th last, when his effects were sold under a bill of sale. He continued to trade as a stationer, printer and paper bag manufacturer at the factory in the rear of the theatre; in March, 1920, that factory was destroyed by fire; although his effects were worth £23,000 he was only insured for £5,250, and after payment of his claim and realisation of the salvage he sustained a loss of about £15,000. During reconstruction of the premises, witness, by arrangement with a firm who were to repair his machinery, continued his paper bag making business from their works at Sunbury-on-Thames; they subsequently sued him in respect of removal charges and new machines, and obtained judgment for £3,300, in satisfaction of which he gave them in July, 1921, the bill of sale previously referred to, covering all his effects, and payable by monthly instalments of £100 each. His factory at Ward-road was rebuilt and witness recommenced to trade from it in June, 1921; he continued to do so until the bill of sale holder took possession in January, 1922, and subsequently sold his effects, whereupon witness was advised to file his petition. He attributed his insolvency to loss by fire and consequent expense, to loss in the cinema business, to depreciation in the value of the lease, machinery and fittings, and to law costs. The examination was concluded.

De La Rue Removal.

Messrs. Thomas De La Rue and Co., Ltd., whose showrooms have been situated at Imperial Buildings, 56, Kingsway, have now removed to 17, St. Bride-street, E.C.4 (near Ludgate-circus, Fleet-street), where a combined display of the manufactures of Messrs. Thomas De La Rue and Co., Ltd., Messrs. Chas. Goodall and Son, Ltd., and Messrs. Warrillows, Ltd., will be on view as from May 1st, 1922. This will include a full range of fountain pens and stylos to retail at from 3s. 6d. to 10 guineas; metal and silver and gold-cased pencils at 7s. to 10 guineas; the latest patterns in British-made playing cards, in cardboard and leather-covered cases for all card games; fancy leather goods; children's picture books; boxed stationery; writing pads, and other articles.

STRETCH IT A BIT, OLD TOP.—With this heading the *American Printer* gives the following paragraph: In England chemists are experimenting with a substitute for paper, the substitute being composed basically of india rubber. By stretching our imagination a bit we can picture the advertisements of the near future: Buy the Stenographers' Daily Delight. You read it, then chew it. The Automobile Gazette—Full of news and fine for patching tyres. Read the Morning Mist—Then wear it as a raincoat.

Trade Notes.

AMONG the week's announcements of partnerships dissolved is that between Philip Alan Sainsbury and Charles Birstingi, 24, Peel-street, London, W., printers.

THE North-Western Alliance of the Federation of Master Printers is arranging a meeting for May 9th at Penrith, and it is expected that the president of the Federation, Mr. J. MacLehose, M.A., LL.D., will be present.

THE annual meeting of the East Anglian Alliance of the Federation of Master Printers is to be held on May 2nd. Dr. MacLehose and Mr. A. E. Goodwin have both undertaken to attend.

HORACE M. TALBOT (London), Maurice Taylor (Bradford School of Art), Gladys Rees (London), and John Wadsworth (Malvern) were the first four of the 400 competitors submitting designs for jam labels under the scheme originated by the Design and Industries Association.

£105 FOR POSTER.—A prize of 100 guineas lies at the office of the Executive Committee of the Combined Appeal for the Hospitals of London (19, Berkeley-street, W.1.) for an artist whose poster design for use in connection with the appeal campaign is selected. Designs must be delivered not later than May 15th.

FOR burglary and theft at the Reading office of the *Star*, Frederick Goddard (27), engineer, was at the Quarter Sessions on Friday sentenced to three years' penal servitude, and Robert Chapman, who was associated with him, to six months' hard labour.

A MEMORIAL to the Genoa conference to recommend the removal of all post-war restrictions on the freedom of trade and to agree upon such further measures as will ensure the progressive liberation of trade and commerce throughout the world as one of the chief means whereby economic property can be restored is signed by a large number of individuals and firms, including Becker and Co., Ltd.; Hazell, Watson and Viney, Ltd.; Jacobsen, Welsh and Co., Ltd.; Livingstone, Page and Co.; Mather and Platt; A. W. K. Trueman and Sons, Ltd.; and Raphael Tuck and Sons, Ltd.

PRINTED BOOKS.—Printed books exported from this country during January-March of the present year amounted in quantity to 52,966 cwts., 83,794 cwts. last year and 57,491 cwts. in the first three months of 1920. The value in the respective periods were: £636,305 (1922), £969,173 (1921) and £722,729 (1920).

BOOK-PRINTING COSTS.—Mr. C. S. Evans, of the firm of William Heinemann, lecturing to the Society of Bookmen, on Tuesday evening, expressed the view that present prices were as low as they could be, in view of the costs of printing and binding. These were, roughly, 100 per cent. above pre-war level. They allowed for only a minimum return to author, publisher and bookseller, and any further reduction in price would be possible only with a reduction in production costs.

ON May 1st the price of the *Liverpool Post and Mercury* will be reduced from 2d. to 1d.

THE *Liverpool Courier* announces the reduction of its price from 2d. to 1d. as from May 1st.

THE *Civil Service Gazette*, which has ceased publication, was the oldest journal published in the interests of the Civil Service.

THE *Daily Herald* keeps up its campaign for funds. Towards a special £25,000 fund several thousands have been received. Much assistance is being arranged by trade unions.

MESSRS. SPERLING AND CO. having decided to discontinue the publication of *Sperling's Journal*, Mr. Sydney Brooks, its editor, wishes it to be known that he has severed all connection with the journalistic enterprises of that firm, including the *Saturday Review*.

IRISH NEWSPAPER RAIDED.—The office of the *Sligo Champion* was raided on Friday morning by a gang of men who completely smashed up the frames and type for last week's issue. The raiders broke up all the matter in type, and destroyed about ten thousand partly printed copies of the issue. Fortunately the raiders spared the linotype machines and printing machines, and it was hoped to resume publication this week.

MISSSED from his post in the rue Lepic, Louis Sensat (74), a Paris newspaper seller, was found dead in his lodgings by the police, who

found concealed in a straw mattress 10,000 francs in bank notes, some 60 deeds and bonds, and 384 francs in coin.

THE death took place on Thursday last of Mr. Walter Scarrow, of Rawtenstall, for many years manager of the *Rossendale Free Press* printing works.

THE death has occurred of Mr. Samuel P. Southwell, for about 40 years a member of the staff of the *Exmouth Chronicle*, and for a considerable part of the time reporter-manager.

THE death took place, on Monday, at his residence in Newcastle, of Mr. David Denholm for forty years cashier at the *Newcastle Chronicle* office, in which he was employed 50 years.

FOUND unconscious in the Edgware road last week, Mr. John Peat, who is understood to be the editor of a Halifax journal, was conveyed to St. George's Hospital, where he died four hours later.

LE BLOND COLOUR PRINTS.—The recent death, in his 78th year, of Mr. Bernard A. Maynard Le Blond—writes a correspondent of *The Times*—removed the last link with the producers of the Le Blond prints. He was the younger son of Mr. Abraham Le Blond, and was himself an artist of no mean ability. The business was a prosperous lithographic printer's, and although the subjects might sometimes be deemed commonplace, the process was brought to a high standard. Reproductions from Baxter's plates, and also designs of the Le Blonds' own, are much sought after on account of the excellent colour effects and precision of style of this past art. There are only one or two lists in existence printed by Abraham Le Blond of the prints. The Le Blond family was of Huguenot descent; it was a Le Blon or Le Blond, painter, engraver and printer in colours (1670-1741), who is generally regarded as the inventor of the modern system of chromo-lithography and similar processes of colour printing.

DURING 1921 the property of the News-vendors' Benevolent and Provident Institution was increased to the extent of £8,222.

OVAL postage stamps for a limited "non-urgency" penny postage will be proposed at the conference of Post Office workers at Cheltenham on May 9th. The suggestion is that letters so stamped shall only be available for posting between the hours of 9 a.m. and 3 p.m.

AN official correction of the Spanish Customs Tariff shows that in tariff Nos. 1030 and 1031 (Paper) "100 kilograms" should be read for "100 kilograms G."

THE Italian Socialist Party has just founded a new daily paper, *Il Popolo Socialista*, which will be published at Turin.

A WIRE from Durango (Colorado) states that a controversy on prohibition in the editorial columns of the *Democrat* and the *Herald*, two local papers, has had a fatal result. Mr. R. S. Day, the editor of the *Democrat*, on meeting Mr. W. L. Wood, the rival editor, shot him dead with a revolver.

MR. EDWARD L. MEGILL, the inventor, patentee and manufacturer of Megill's gauge, notifies us that he is removing as from May 1st to new and more commodious premises at 761-763, Atlantic-avenue, corner Adelphi-street, Brooklyn, New York.

THE Lindenmeyr and Johnson Paper Co. Ltd., paper mill agents and contractors, 11b, Upper Thames-street, E.C.4, have arranged, with Messrs. Busbridge and Co., Ltd., to distribute their printing specialities for the British Isles. They think very highly of these papers, and are confident of great success.

LANCASHIRE PAPER TRADE GOLF SOCIETY.—The spring meeting of this Society has been arranged to take place on Monday, May 8th, on the links of the West Lancashire Golf Club, at Blundellsands, near Liverpool, which have been kindly lent for the occasion. In addition to the Partington trophy and silver replica, prizes have been presented by the following members: Messrs. J. Beswick, F. W. Bishop, N. Duxbury, J. Lockett and A. F. Norbury. The secretary (Mr. Harvey Hollows, 144, Princess-street, Manchester), will be pleased to hear from intending competitors, and entry forms should reach him not later than May 1st.

THE business of Tullis and Co., Ltd., wholesale and export paper merchants, Edinburgh, has been reconstituted, a new company having been formed under the name of Tullis, Hunter and Co., Ltd., to acquire the business. The management will remain the same.

SOME ACCOUNT OF THE OXFORD UNIVERSITY PRESS, 1468-1921. Oxford: The Clarendon Press. Paper boards, cloth back; 112 pp.; 9 $\frac{3}{4}$ in. x 7 in. Price, 5s. net.

This volume makes a valuable addition to the history of printing in England, presenting as it does an interesting and informative account of the past and present presses connected with the University of Oxford. Excellent in design, the book is printed in an old style type, with generous and well-proportioned margins, and its interest is enhanced by the inclusion of many quaint ornaments, reproductions of old title pages, illustrations, etc., as well as modern half-tones, the last-mentioned providing views of various buildings belonging to the Oxford University Press in this country and abroad, also of workshop interiors and other subjects. The earliest press at Oxford is acknowledged, as at any rate the oldest press but one to be established in England, its only predecessor being Caxton's press at Westminster. The latter issued its first book in 1477, whereas the actual date of the first Oxford book is believed to be 1478, though its colophon is dated ten years earlier. The first Oxford press came to an end about 1485, and it is from the second, which lasted from 1517 until 1520, that the present day Oxford University Press claims direct descent. Many interesting facts are here told of the early days and of the great later development of printing at Oxford. As regards the present day, one learns with interest that the total quantity of type in the Press is estimated at over one million pounds of metal, and includes some 550 founts of type in some 150 different characters. There are about 50 machines, ranging "from the last survivor of the old flat-impression double Platens to the most modern American double-cylinder 'perfecting' presses with their automatic feeders." There is a bindery too, which prides itself on the fine bindings it is capable of producing, and the Press also owns the Wolvercote Paper Mill of which a short illustrated account is included in this volume. In a chapter on "The Oxford Standard," stress is justly laid upon the high standard of scholarship, accuracy and literary excellence maintained at the Press, a standard which, it is believed, is unexcelled throughout the world. Not the least interesting sections of the book are those detailing the numerous important publications produced at the Clarendon Press. Outstanding among these is, of course, the great Oxford Dictionary of the English language. The work of printing this monumental production has been going on for about 40 years—one compositor, by the way, has had 38 years' continuous work on the Dictionary—and there still remain some important sections to be completed. Some indication of the immensity of the task is shown by the fact that the quotations, printed as illustrations of the uses of words, already number about one and three-quarter million. *The Times* referred to this dictionary as "the greatest effort which any University, it may be any printing press, has taken in hand since the invention of printing." Certainly the Oxford University Press can claim an unchallengeable place among the greatest printing houses of the present day, and this excellent account of its activities should serve a good purpose in making better known a printery which has played a big part in giving to British printing the good name it enjoys all over the world.

GEOGRAPHIC NAMES: THEIR SPELLING AS A FACTOR IN TYPOGRAPHIC STYLE, by Douglas C. McMurtrie. Greenwich (Connecticut): Condé Nast Press.

This eight-page pamphlet, well printed at the author's own press, is issued to serve a very commendable purpose—to advance the cause of uniformity in the spelling of geographic names. Pointing to the confusion resulting from the modification of names of towns, etc., in their transfer from one language to another, Mr. McMurtrie asks "Where is Londres? It sounds like a French town in which some members of the American Expeditionary Force were stationed"—and again "Did you ever hear of Basel, in Switzerland? What is its geographic relation to Bâle? Perhaps Basle, the third alternative spelling for the same place, may help to

heighten the ambiguity." In looking for a remedy, the author forcibly remarks: "The correct spelling of a city's name, in my belief, is the spelling adopted by its own inhabitants, appearing in the post mark on letters, cut in stone over the door of the town hall." Excellent! But what if the inhabitants adopt several variant spellings?—and if the spelling on the post mark is different from that on the town hall? Again, what if the inscription is written in foreign characters, having no agreed transliteration into Roman? These, as Mr. McMurtrie himself recognises, are difficulties in the way of standard spellings. Another hindrance to uniformity, not indicated in this pamphlet, is the fact that so many geographic names which are not in keeping with the native version are now so deeply rooted that it seems impossible to hope to supplant them. He would be an amazing optimist, for instance, who should expect to persuade the English-speaking peoples in referring to Germany to say Deutschland! Apart from such difficult cases, however, there is certainly a big field for much-needed standardisation, and every effort towards the elimination of variant spellings is to be welcomed. "The printer," as Mr. McMurtrie rightly remarks, "has troubles enough making the final result accurate in accordance with accepted standards. But the difficulty is enhanced when authorities do not agree and there are no fixed rules on which to rely."

Shorter Notices.

MR. J. EMLYN JONES—to whom we had occasion to refer last week, very cordial appreciation having been expressed at the annual meeting of the West and North-West London Master Printers' Association of the services which he has rendered to that association—has favoured us with a copy of a volume, printed for private circulation, in which he has collected letters from France written home by his only son, Captain Llewelyn Jones, 1/3rd Batt. London Regiment. Included also are tributes of friends to the outstanding character of this 22-year-old officer, who made the supreme sacrifice under heroic circumstances in August, 1917. Touching and striking witness is borne, in Mr. Emlyn Jones's foreword, in numerous testimonies of friends (including one by Dr. Clifford, of Westbourne Park), and by internal evidence in the young officer's own letters, to the beauty of his character and the affection and respect he inspired in his fellow-officers, his men, and all who were acquainted with him. This book, which is a fine tribute to the heroic dead, cannot fail to bring consolation to many who have mourned his loss.

"THE ESTIMATOR" is the title of a useful little book compiled by Mr. Ed. Jackson and published by Messrs. Wm. Sessions, Ltd., the Ebor Press, York. The book is based on the lines adopted by the Master Printers' Associations in the United States and Canada for their official price lists, but adapted to English usages. It contains tabulated price lists for almost every class of work that is handled by the ordinary printer, and can be used also as an estimate builder, as there are complete tables upon which an estimate for any job not listed may be built up quickly and accurately. Section one is devoted to these tables, and sections two and three give selling prices for general everyday jobs, while a fourth section gives the net cost for stereos, electros, half-tone and other blocks. Each section of the book is printed on different coloured paper, which adds to ease of reference, and there is an index at the end which is an aid to its usefulness. A book such as this is invaluable to all who have to estimate for printing jobs, large or small. In the United States such a book is in the hands of heads of firms in every printing office, and also in the hands of every employer who may be called on to give estimates for work, and it has been found most useful by printers' travellers, who can in a few minutes give a price for almost any job. The price of "The Estimator" is £1 post free, and it is good value for the money in view of the excellent information it contains.

A NEW issue of the *Monotype Recorder* just to hand is particularly attractive, both as regards its get-up and its contents. The various articles contained have many points of interest—apart from any advertising purpose; and the pages, which are well designed, are mainly of monotype material. The pamphlet has been "arranged and printed" at the Cloister Press, Heaton Mersey, near Manchester, which press forms the subject of one of the articles. We note that the Lanston Monotype Corporation is cutting matrices on

the model of the Garamond type (1480-1561), and is sparing no pains to secure a perfect reproduction of this classic letter.

MESSRS. SHERRATT AND HUGHES, of 34, Cross-street, Manchester, send us a copy of "Production and Fair Profits: The Key to Industrial Peace," by James Turner. This tackles in bold and suggestive fashion the subjects of profits, wages, profit-sharing and the like, which lie at the base of the vitally important question of the relation between capital and labour. The price, in cloth gilt, is 6s. net.

THE Commissioner of Commerce, Ottawa, has issued an attractive volume entitled "Canada as a Field for British Branch Industries." The 132 pages contain a wealth of information concerning the vast natural resources of the Dominion, with maps, photographs, etc. It is mentioned that it is a matter of regret to Canadians that, while so many American industries have established branches in Canada, British manufacturers have shown very little interest in the subject.

A PIECE of beautiful linotype typography is the new pamphlet "Old Style Number Ten Series," issued by Messrs. Linotype and Machinery Ltd., to show the use of this series in combination with italic and small caps, Doric and De Vinne. It contains many fine examples of printing, proving what excellent effects both in book work and jobbing printing can be obtained with the use of these faces.

MESSRS. BENN BROS. have in active preparation, for publication during the spring, the first "Year Book of the Design and Industries' Association." This will give examples of the best and most straightforward modern English work now being turned out in the ordinary way of trade, and printing will be among the branches of industry dealt with.

TO THE office of the *Westminster Gazette* there has come from a reader at Bridgewater a walking-stick which, it is said, is made of many thousands of circular pieces cut from the *Westminster Gazette*, strung on a steel centre, and forced together under pressure. Outwardly it is simply a heavy, varnished cane, with variegated markings, but it represents the labour of many hours with primitive tools by a cripple.

The City Election.

Candidature of Sir T. Vansittart Bowater.

Few men are better known in the civic and commercial circles of London than Sir T. Vansittart Bowater, Bart, and there are not many who have the municipal and business records which stand to his credit. His determination, therefore, to present himself as the Conservative anti-waste candidate at the forthcoming by-election has created a great deal of interest throughout the City. Paper

Barratt's Photo Press, Ltd., London.

SIR T. VANSITTART BOWATER, BT.

men, who form a large and important section of London's trading community, are doubtless pleased to have one of their members coming forward to champion the cause of economy, and the presence of Sir Vansittart in the House of Commons will give the paper industry that representation in the councils of the nation which it has long desired.

Personally Sir Vansittart is one of the best known and most picturesque figures in the City. Standing a good six feet and possessing a personal appearance of distinction, he is quite a marked man wherever he goes, ever wearing the button-hole which is a conspicuous feature of his trim attire.

With regard to his civic activities, Sir Vansittart has devoted as much time and attention to public affairs as almost any man now living. It is twenty-three years ago since he first joined the City Corporation, and over fifteen years have elapsed since he was elected to the Bench of Aldermen for the Castle Baynard Ward. He has served on innumerable committees and taken part in almost every aspect of the Council's varied work, besides being a Guardian of the Poor. In 1905-6 he occupied the office of Sheriff of the City of London, and in that capacity performed the duties with credit and satisfaction, the honour of knighthood being conferred upon him in recognition of his services. The year 1913 saw him elevated to the highest position in the City when he became Lord Mayor; holding office until November, 1914, he covered the opening three months of the war, a very anxious period. In this position he fulfilled all the promise which his previous career had given, since he brought to bear upon it ripe experience in the affairs of men, a wealth of dignity, and an intelligent appreciation of the responsibilities of his high post. His year of office, of course, was a complete success, and Sir Vansittart upheld the position as worthily as any man who either preceded or succeeded him. It was at this time that he received the additional honour of a baronetcy.

So far as honours are concerned, Sir Vansittart seems to have had his share—all well deserved, however—for he has not only been recognised by His Majesty, but by the potentates of other countries. Thus he is a Knight of Norway, the Order of St. Olaf having been conferred upon him in 1906. He is also

a Grand Commander of the Royal Order of the Redeemer, Greece, a member of the Palmes d'Academie Francaise, an Officier de l'Ordre de la Couronne, Belgium, Commander of the Legion of Honour and Commander of the Order of Leopold (Belgium), Governor of the Honourable the Irish Society, Treasurer of the Royal Masonic Institution for Boys, and Honorary Freeman of the City of Manchester.

During the war, Sir Vansittart's activities found full play in various directions, apart from the great demands of his own business. He was prominent in many of the movements which started in the City of London during the anxious four years.

Sir Vansittart is well known in Masonic circles, where he is extremely popular, and has held most of the coveted offices of the craft, being a P.G.W. of England.

In commercial circles in the City, and, indeed, throughout the country, the name of Bowater is well known in connection with all classes of paper business. The firm of W. V. Bowater and Sons was founded in 1881 by Mr. Wm. Vansittart Bowater, of whom Sir Vansittart is the eldest son. Since 1891, when Mr. Wm. V. Bowater retired from active participation in the direction of the concern, it has been carried on by Sir T. Vansittart Bowater and his two brothers, Major Frank Bowater and Sir Frederick Bowater, in later years with the assistance of their respective sons. The house of Bowater has had a remarkable record of success, prompted by the initiative and ability of the directors, who have ever been alert to develop new lines in paper. Originally established in Queen-street, Cheapside, London, with a warehouse at Haydon-square Station, E., the business was in 1908 transferred to its present headquarters at 159, Queen Victoria-street. There are other branches of the business in various parts of the City, chiefly along the riverside, where facilities for handling paper by water have been a great asset. During their career, the firm have handled some quite colossal contracts in paper, and it is mentioned as an

instance of the magnitude of their transactions that on one occasion they entered into a contract with Messrs. Harmsworth to supply news-print of the value of something like £3,000,000 sterling. The name and fame of Bowater, therefore, is known throughout the industry, and the directorate are still full of youthful vigour, which will mean further extensions in the future.

In the meantime, Sir Vansittart will throw all his energy and wonderful vitality into the Parliamentary fight in the City of London. It can safely be said that no man can more thoroughly represent the interests of the business community, especially in these days when sound administration is necessary to maintain the commercial supremacy of London and the country as a whole. Furthermore, his experience in local government will stand him in good stead as a member of the Imperial Parliament.

It is in keeping with the family traditions that Sir Vansittart should come forward to champion the cause of economy and sound business. It is recalled that his ancestors include Admirable Edward Bowater (Admiral of the White Fleet, 1829), who took part in the Battle of Trafalgar under Lord Nelson, and Gen. Sir Edward Bowater, who fought with the Iron Duke at Waterloo and later became equerry to the Prince Consort.

Stinnes Paper Deal.

By his purchase of the Elbe Paper Mills in Austria, Herr Hugo Stinnes becomes the owner of four Vienna newspapers, namely, the *Extrablatt*, the *Mittags Zeitung*, the *Wiener Allgemeine Zeitung*, and the *Sonn und Montags Zeitung*. None of these newspapers possesses any great political influence, but the *Extrablatt*, an illustrated daily newspaper, has a large circulation. The *Allgemeine Zeitung* is one of the leading Bourse organs. The Elbe Company also owns two illustrated Vienna weekly newspapers and three paper mills.

New Inventions.

Composing Machine Keyboards.

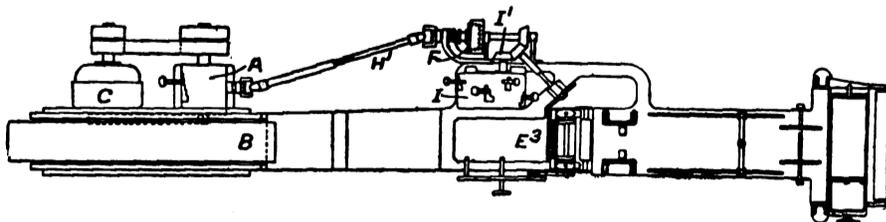

A locking device for the keyboard, adapted to be operated by hand or automatically, invented by the Mergenthaler Linotype Co., comprises a plate C mounted to slide on the slotted front plate A² of the keyboard, and formed with slots through which the key levers extend. The slots c in the plate C normally register with those in the plate A², but rearward movement of the plate C brings the ends of the slots c into engagement with

the key levers, which are thereby locked. The plate C also serves to restore the key levers to normal position. The plate may be actuated by means of a pivoted cam-plate D having a handle D², or may be automatically controlled by the movement of the assembler elevator, the switch which controls the driving motor of the machine, or the main driving clutch. Other forms of locking device, e.g., one which prevents or permits the release of matrices from the magazine, may be automatically controlled in the same way.

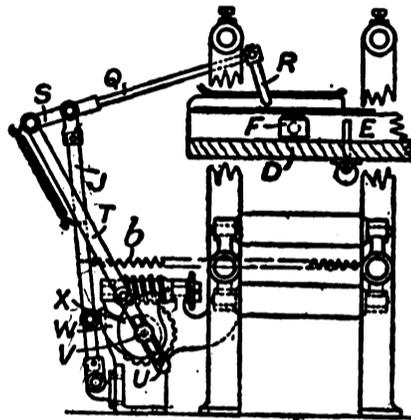

Making Paper Bags.

An invention by Mr. M. A. Collis relates to machines for making paper bags from continuous tubular blanks, and consists in providing change speed gears between the driving motor and the drying cylinder, and between the cutters and the draw rolls, etc.,

in order that the size of the bags made by the machine can be quickly and easily changed. As shown in plan in Fig 1, the drying cylinder B is driven by a motor C through a change speed gear A, and the gear is connected by a shaft H and universal joints with a clutch F which is in gear with the cutter E². The draw rolls, gummets, etc., of the bag making mechanism are driven from the cutter through a bevel wheel I¹ and a change speed gear I. By altering the gears I and A, the r-lation between the speeds of the cutter and the draw rolls can be altered, and therefore the size of the bags made by the machine, the rotation of the drying roll being altered ac-

ordingly to preserve the spacing of the bags. The rod H is made removable and telescopic to permit the addition of printing mechanism. Another patent by Mr. Collis is one in which a paper bag-making machine is provided with a knocker-up or ejector which is moved in one direction, when a pre-determined number of bags have accumulated in a pile on the delivery table, to push the pile off the table, and on its reverse movement is lifted to clear the bags which are being delivered on to the table. The device, as shown in cross-section in Fig. 2, comprises a delivery table D to which the bags are fed by a drying and pressing cylinder, the bags accumulating in a pile against a back lay F and side lays E, the latter being pivoted and counterweighted to

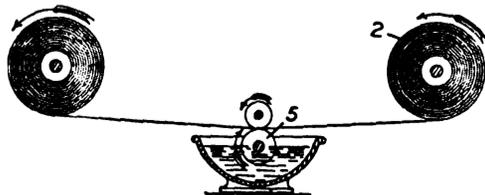

allow them to swing downwards when a pile of bags is pushed towards the right. The ejecting device consists of pins R carried by levers Q which are pivoted at the top of a bar J, the short arm S extending from the levers Q being pivoted to a bar T. The bar J is hinged at its lower end to the frame, and the bar T is formed with a slot U which rides on a shaft V, cams W and X actuating the bars J and T respectively. When a pre-determined number of bags have accumulated, the fingers R are dropped on to the table D and are drawn towards the right by a spring b, thus pushing the pile of bags over the lays E into position to be taken up by the operator. The pins are then raised permitting them to clear the bags which are accumulating in a new pile on the delivery board D.

Surfacing Paper.

According to an invention by Mr. A. Tiburzi, patent application for which has been made in this country, a perfectly smooth and shiny surface is imparted to paper, to render it suitable for use in preparing very thin metallic sheets, by immersing in a solution of substances such as 10-12 per cent. caustic soda or 50-60 per cent. sodium car-

bonate. The paper may be treated on one side by means of a roller 5 and on the other

by winding on a drum 2, and is subsequently calendered.

Trade Composition: Past, Present and Future.

The Function, Success and Growth of an Important Section of the Printing Trade.

There are few, if any, composing rooms the extent and elasticity of whose equipment are such that an exceptional rush of orders of a certain kind is not liable to cause embarrassment. The extra work may be casual and only temporary, in which case only temporarily extended facilities are desirable. Should the extra work give sufficient promise of repeating itself, extensions of plant would probably be contemplated, but even then some immediate temporary extension of capacity is necessary. It is here that the trade composition house finds its sphere of usefulness. Such a house serves the important function of acting as a sort of telescopic extension to a printer's composing room, giving him temporary increase of man-power and expanded type-resources to carry him past a "peak" in customers' demands.

The facilities offered by trade composition houses are far more widely utilised in the United States than in this country, and in America this branch of the trade has its own organisation, known as the International Trade Composition Association, the president of which is Mr. E. J. McCarthy. Mr. McCarthy, writing in the *American Printer*, sets forth some facts and opinions relating to trade composition which will be read with interest by British printers.

With the development of the slug-casting machines—says Mr. McCarthy—came the sale of composition as a commodity. The printer without composing machine equipment naturally made use of the facilities of his competitor who possessed it, and finally, as the direct result of a demand, the exclusive trade composition plant came into existence. This was approximately 20 years ago.

Trade composition has now taken its place along with trade binding, electrotyping and photo-engraving as trade service necessities. Without the service rendered by the trade compositors of the nation a great many printers would find it impossible to carry on operations unless they made considerable investment—over-equipment—in typesetting machines.

The demand of the printer for composition brought into being the trade composition plant. With the increase of these demands for service has come such a growth as to make the trade composition industry one of the most important factors in the entire field covered by the graphic arts.

During the past 20 years the number of trade composition plants (in America) has grown until now there are in the neighbourhood of 450 such concerns, confining their efforts exclusively to composition and make-up for printers. At the present time there are approximately 5,000 persons employed in the trade composition plants of the country.

These plants represent an investment of close to 10 millions of dollars and last year did a total business of nearly 15 millions of dollars.

Those of us who have been watching closely the rapid progress made by the industry are forecasting that the next five years will see as great development as has been produced in the previous 20.

Elements of Service.

The rapid development of the trade service composition plant has been due to the following causes:—

The concerns manufacturing slug and type-casting machines have developed mechanical means whereby the versatility of their machines has been so broadened as to make possible the production of all classes of composition.

The trade compositor, being a specialist, operates with a minimum amount of non-productive time, and is thus enabled to produce at a minimum of expense—much more economically than can the average printer owning his own machines.

The trade composition industry has shown increasing attention to bettering the quality of the work which it produces and extending its services to include, not only composition on the galley, but every operation "from copy to press," including even the locking up of forms.

The installation of the standard cost-finding system has enabled the printer owning machines to ascertain correctly the cost of his product. This knowledge has impressed the printer with the price which he was paying for production in his own plant and has caused him to send increasing quantities of composition to the trade service house.

In the beginning, the product of the trade composition plant was mostly publication work, sold on the galley—in fact, until perhaps, five or six years ago the majority of the work turned out was of this character. At the present time, however, this class of work constitutes a minor portion of that turned out by the more progressive and modernly-equipped plants.

At the demand of his printer customer the trade compositor now carries on activities which include not only the most intricate and varied composition, but also the finished production of made-up jobs of every nature, locked up for the press or foundry—publications, catalogues, broadsides, tariffs, letter-heads and other small work, etc. In fact, every class of matter which can be handled in any composing room is now being economically handled by the trade service composition houses.

We also find the trade compositor a manufacturer of founts and sorts, labour-saving

metal furniture, slugs, leads, rules and composing room material of all kinds. He is becoming the most versatile of all those who render the printer trade service and he is satisfactorily performing every operation from the receipt of the copy clear through to the delivery of the forms to the press or foundry.

The rapid development of the trade composition plant and the broadening of the scope of its activities is the direct result of the economic pressure of the times. As time goes on it is inevitable that a constantly growing proportion of work will be handled by the trade service composition house. We who have been actively connected with the industry during the past decade see the future trade composition plant handling a greater proportion of the composing room work which is now being done by the printer. It is the inevitable reward of efficiency through specialisation.

Factors in this Development.

Specialisation has made the trade composition house efficient, and in the future it will be more so. Each of these houses numbers among its customers a great many small printers. Because of the large quantity of work which is handled it is possible to employ highly skilled and expert workmen, and thus possible to offer each customer the services of a class of employees which is far beyond his individual ability to employ.

The plants are equipped with all modern devices for efficiently handling composition and makeup, and each customer is offered a range in type-faces which he could not himself duplicate without an enormous investment.

The amount of composition which the trade plant can handle is practically unlimited. The friendly relations existing among those engaged in the trade composition business has produced such a spirit of mutual helpfulness and co-operation as to give each customer the entire facilities of all of the trade plants in his locality, should necessity dictate.

The composing room of the printer has sometimes been referred to as the "sink hole" of the business. It has almost been an axiom that a composing room cannot be operated at a profit. The trade composition plant affords the printer an opportunity to reduce his operating costs by purchasing composition and made-up at a price which is below that at which he can produce it himself. Thus the printer may now make a direct profit on the composition element of a piece of printing, instead of being compelled to take a loss, as has heretofore been the case in many instances.

Growth Due to Economy.

Mr McCarthy believes that the growth of the trade composition business has been primarily due to the fact that the trade composition plant can sell to the printer at a price which will enable him to add his legitimate profit and then sell the finished job to his customer at a lower figure than would be the case if he produced the entire job in his own plant. He believes the greatest future developments of the trade composition industry will be along the lines which will include the delivery to the printer of the made-up job, locked in forms ready for the press. He views the future trade composition plant as rendering every service up to the operation of a press room, and looks forward to the day when the printer will be able to devote a great portion of his time to sales promotion, leaving his composing room worries to the composition house.

He feels that trade compositors are just entering upon an era of increased usefulness to the printing industry, and that during the next decade the trade composition industry will be an active factor in reducing the cost of the finished printed product by the development of its services and resources.

John Dickinson and Co., Ltd.

Report of the Directors.

The directors, in their annual report, consider it desirable to remind the shareholders that the conditions prevailing during the period under review were of an unprecedented character, and the results cannot therefore be regarded as any indication of normal trading. During the greater part of the year there was a universal stagnation in trade, and this company was particularly affected by the unparalleled fall in values, the prolonged coal strike, and the grave difficulties arising from the state of the foreign and Indian exchanges. After passing through a period of such extraordinary and difficult conditions the financial strength of the company as indicated by the balance sheet is a satisfactory feature.

The net profit for the year ended December 31st, 1921, after providing for depreciation, income and Corporation tax, and interest on debenture stock, amounts to £44,715 making, with the amount brought forward from last account, viz., £150,576, a total of £195,291. The estimated adjustment of Excess Profits Duty, which is not yet finally settled, is included in these accounts.

Dividends of 5 per cent. per annum have been paid on the preference stocks, and an interim dividend of 2½ per cent. was paid on the ordinary shares on September 30th, 1921, resulting in a balance on profit and loss account of £152,791 at December 31st, 1921. From this balance the sum of £8,475 is applied to the debenture stock redemption in accordance with the terms of the debenture trust deed, and an additional interim dividend of 5 per cent. on the ordinary shares amounting to £50,199 was paid on March 31st, 1922. The directors do not recommend that any further dividend be paid on the ordinary shares for the year 1921, and that the balance of £94,116 be carried forward to the next account. The directors record their appreciation of the services of the employees of the company under conditions of unusual difficulty.

An extraordinary general meeting of the company was arranged for May 2nd following the ordinary general meeting for the purpose of considering a resolution altering the articles of association, so that the directors may appoint an employee of the company to be an annual director.

The Half-penny Newspaper.

The quarterly spring meeting of the National Federation of Retail Newsagents at Chester last week agreed to telegraph to the Chancellor of the Exchequer asking for a reinstatement of the half-penny postage rate on picture postcards, both in the interests of the producer as well as the retail distributor.

After discussion, it was decided to oppose resolutely the re-introduction of the half-penny newspaper on the ground that it was an economic impossibility, from the newspaper interest as well as from the distributing interest, to handle a production of such low economic value.

Electrotypers and Stereotypers

MANAGERS & OVERSEERS' ASSOCIATION

Mr. J. R. Riddell on the New Technical School.

There was only a fair attendance of members at the monthly meeting of the Association, held on Tuesday of last week, at the headquarters, St. Bride Institute, Bride-lane, E.C.4, the president, Mr. A. Chadwell, occupying the chair.

At the last monthly meeting the president and others expressed the opinion that the Association should financially support the new technical school, but no result was come to, the members expressing the desire to know more about the policy to be pursued by the school before supporting it. At that meeting it was therefore decided to invite Mr. J. R. Riddell to address the members on the matter at their next meeting. Mr. Riddell cordially accepted the invitation, and his remarks relating to the work of the new technical school were very warmly received.

After the secretary (Mr. W. Bullett) had read the minutes, which were duly confirmed, the president briefly explained to Mr. Riddell some of the difficulties that were in the minds of many of their members with regard to the new school. Some of them had been suspicious that the school might be run on commercially competitive lines and so constitute a danger to trading establishments. They recognised it as the duty of the Association to endeavour to safeguard the interests of not only the men but the employers as well. He then called upon Mr. Riddell to clear up the point of misunderstanding that had arisen.

Mr. Riddell, after expressing delight at the opportunity afforded him of dissolving the misunderstandings that were in the minds of his hearers, traced the developments that had taken place in the formation of the new technical school, explaining that in the year 1918 a meeting of representatives of the printing trade was held to consider the best method to be adopted for providing better technical educational facilities for those engaged in the printing and allied trades. At that meeting Lord Riddell, who was the great driving force, gave the movement his personal support, and they soon learned that they could not have a better man to get things moving. Innumerable difficulties were swept away in his characteristic manner. They put forward a scheme; which, by the way, had been proposed some years before, that the employers should pay a certain sum corresponding to the amount of wages paid, that the unions should also contribute a penny a member per annum, and that managers' associations should give according to the extent of their membership. But the basis of the scheme was that they should be clear of all educational bodies. They at first intended to provide a capital sum, and then having obtained that, approach the St. Bride Governors to carry out a plan whereby more accommodation for the plant needed for the training of apprentices at St. Bride Institute could be obtained.

At this point Mr. Riddell said he would like to make it quite clear that they did not enrol apprentices or journeymen to learn branches of the trade other than those in which they were engaged. They did not teach a compositor machine minding, although they gave to their students that little knowledge of the other sides of the trade that went to make a man a better craftsman.

Mr. Riddell proceeded to say that after a lot of fighting and the passing of numerous resolutions—many of them pious ones—they determined to see the Education Committee of the London County Council, and storm that body in their own den. Lord Riddell pointed out to them their duty, and Mr. T. E. Naylor, Mr. Howard Hazel and Mr. Alfred Bladés voiced the feelings of the industry. The Council, however, would not move until a sum of money was promised from the printing trades.

A proposal was then drawn up, and £1,500 a year for at least five years was the amount asked to be raised from the trade. The amount was too small for the Council, who suggested that the sum to be contributed should be £2,500. They then had to ask the various associations to increase their subscriptions by one-third in order to meet the requirements. The sum promised had now reached close upon £3,000, and they were going ahead with the building in Stamford-street. When the necessary alterations were

completed it would be the finest technical institute in the country, if not in the world. He was pleased to say that every section of the trade had responded, even to the smallest trade unions, which gave their few pounds to be identified with the movement.

Referring to the question that had been in their minds as to the policy of the new school, Mr. Riddell asked "How can a technical institute ever compete with a trade shop?" A job done at the school might take three months to execute, while in the workshop it would probably be done in an hour. The main idea at the school was to teach the student the underlying principles of his business and teach them thoroughly.

They had got the employers behind them, and they had had no difficulty in securing the sympathy and support of the unions, but they realised that when a lad left his shop to attend his technical class the general routine of work was sometimes upset. It was for this reason that he particularly appealed to the overseers to give him all the help they could.

Mr. Riddell, in conclusion, made brief reference to the constitution of the governing board of the new technical school, explaining that it was to consist of three panels of eight members, these panels representing the interests of the employers, the managers and the unions.

Several interesting questions having been put to Mr. Riddell and answered, Mr. Chadwell asked what the Society was doing in the matter of supporting the school.

Mr. H. W. Clark (London Branch Secretary, Society of Electrotypers and Stereotypers), said that altogether £50 per year for five years had been promised.

Mr. W. M. Forsyth moved that the sum of £5 for five years be granted from the funds of the Association. This was seconded by Mr. H. Filkins.

On the proposition of Mr. Bullett, seconded by Mr. A. Perrott, an amendment was made to make the sum £10.

On the matter being put to the vote the amendment was lost and the motion carried by a small majority.

The remaining portion of the evening's proceedings were occupied in the discussion of private matters concerning the Association's affairs.

Government Paper Contracts.

Contracts were placed with the following firms during March:—

Post Office.

PAPER, BAUDOT, GUMMED.—Waterlow and Sons, Ltd., London, E., and S.E.

PAPER FOR ENVELOPES.—R. Craig and Sons, Ltd., Airdrie.

PAPER, TINFOILED FOR CONDENSERS.—Brittains, Ltd., Cheddleton, near Leek, Staffs.

Stationery Office.

CARBON PAPER.—Caribonum Co., Ltd., London, E.

ENVELOPES.—McCorquodale and Co., Ltd., Wolverton.

MILLBOARDS.—Jackson's Millboard Paper Co., Bourne End.

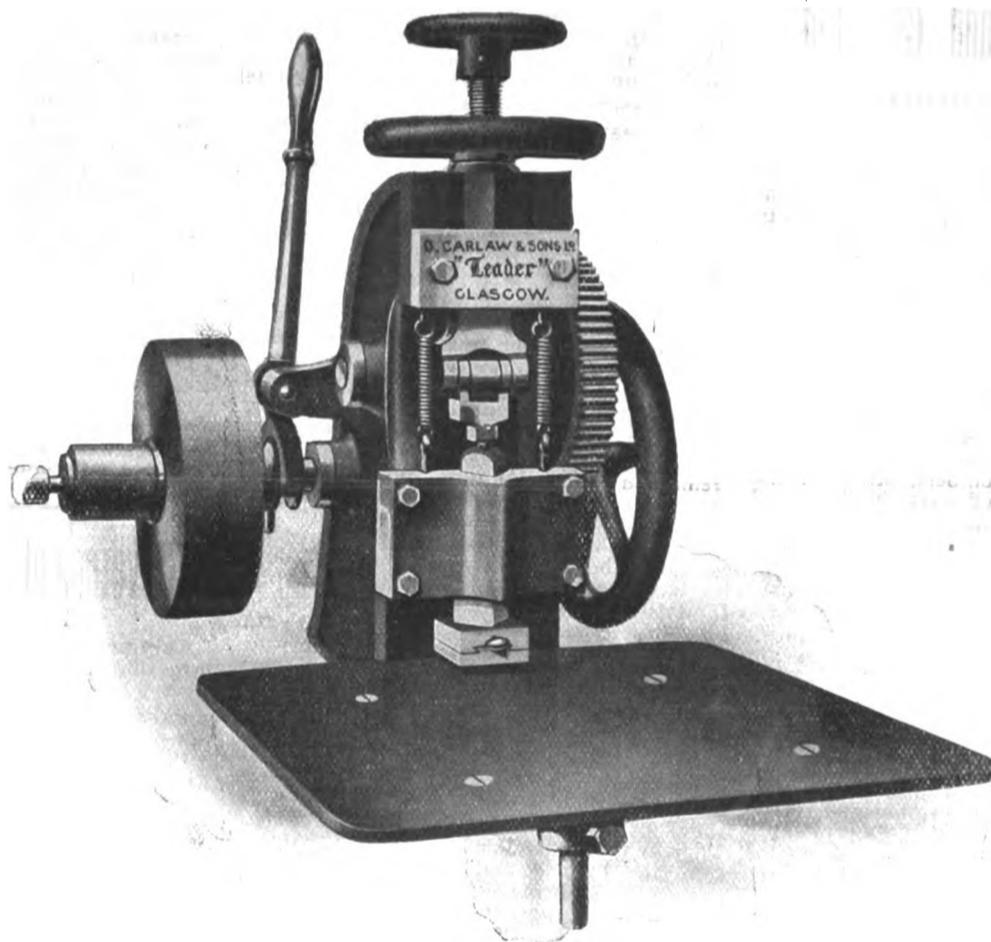

PAPER OF VARIOUS DESCRIPTIONS.—J. Brown and Co., Ltd., Penicuik; J. A. Weir, Ltd., Alloa; Thomas and Green, Ltd., Woburn Green; S. C. and P. Harding, Ltd., London, S.E.; Olive and Partington, Ltd., Glossop; Ulverston Paper Co., Ltd., Ulverston; T. Chalmers and Sons, Ltd., Linlithgow; S. Jones and Co., Ltd., London, S.E.; Adcocks, Ltd., London, N.; E. Collins and Sons, Ltd., Glasgow; Darwen Paper Mills Co., Ltd., Darwen; Northfleet Paper Mills, Ltd., Northfleet; J. Cropper and Co., Ltd., Kendal; R. Craig and Sons, Ltd., Caldercruix; Barclay and Fry, Ltd., London, S.E.

PORTFOLIOS.—McCorquodale and Co., Ltd., Wolverton; Rutland Printing and Binding Works, London, E.C.; J. Adams, London, E.C.; Webb, Son and Co., Ltd., London, E.C.

Where Paper Orders are Plentiful

Reporting on trade conditions in Bavaria H.M. Consul states: The coloured paper industry of Aschaffenburg and the cardboard and paper factories found all over Bavaria have been well supplied with orders of all kinds, and complaints have only occasionally been heard about the lack of coal and raw materials and wage demands.

The

“LEADER”
**POWER STAMPING AND
EMBOSSING MACHINE**

DESIGNED for Plain, Relief, or Cameo Stamping of all kinds of notepaper, envelopes and cards. The illustration shows the Machine for plain stamping work, with hand clutch giving continuous running. For a small extra charge this machine can be adapted for colour work by fitting a foot operating clutch which gives continuous running or single blow and stop.

All parts on above Machine subject to pressure and wear are made of hardened steel.

Trade Notes.

L.M.P.A. ANNUAL MEETING.—The annual meeting of the London Master Printers' Association will be held at Stationers' Hall on Tuesday, May 16th, at 12 noon. We understand that the wages position will receive consideration after the ordinary business has been dealt with.

CARDIFF Education Committee on Friday decided to purchase the whole of the schools' supply of stationery in the open market instead of by private contract, as has been the case in the past.

KENT EDUCATION COMMITTEE (Maidstone) has accepted yearly contracts as follows: Printed forms, Charles and Son, London, £922 10s. 9d.; bound forms, Young and Cooper, Maidstone, £867 13s. 6d.; minutes and reports, Charles and Son, London, £734 14s.; pamphlets and circulars, Headley Bros., Ashford, £451 3s. 11d.; schedule of payments, Vivish and Baker, Maidstone, £142 16s.

THE Powell Duffryn Steam Coal Co., Ltd., invites tenders for the supply of printing for three or six months. Particulars are available from the stores manager, Aberaman Offices, Aberdare.

MESSRS. WIGGINS, TEAPE AND CO. (1919) LTD., announce that resolutions for the fusion of interests with Alexander Pirie and Sons have been confirmed.

MESSRS. BLADES, EAST AND BLADES have removed to their new offices at 17, Abchurch-lane. The firm have carried on business in Abchurch-lane for nearly 100 years.

A WINDING-UP PETITION has been presented by John Dickinson and Co., Ltd., against W. H. Bowyer, Ltd., the hearing of which is announced for the 9th inst.

HOME COUNTIES MASTER PRINTERS' ALLIANCE sends us a useful card-blotter announcing the Association's annual meeting and social functions to be held on Saturday, May 14th, 1922. (Ladies invited). During the annual meeting of members, ladies of the party will be conducted over the Tower of London. There will follow luncheon at Stationers' Hall, where the Rt. Hon. the Lord Mayor of London and the Lady Mayoress have consented to lunch with the members and ladies; then a visit to St. Paul's Cathedral (crypt, library, whispering gallery, stone gallery), followed by a reception by the Rt. Hon. the Lord Mayor and the Lady Mayoress at the Mansion House.

THE next monthly meeting of the Association of Master Printers of South-East London will be held at the Bridge House Hotel, London Bridge, S.E., on Tuesday, May 9th, at 4.30 p.m.

CRAFT EDUCATION.—At a meeting of the Stationers' Livery, on Wednesday of last week, Major Richard Rigg, O.B.E., T.D., J.P., B.A., appealed to the City Guilds to identify themselves more closely with the crafts which they represented and no more valuable work could be undertaken than assisting craft education through Local Education authorities, particularly at the present time when serious cuts were being made in educational activities and it was most probable that technical education would be one of the first sections affected.

MR. JOHN J. BAILEY, stationer, etc., of Tonyrefail, was the defendant in an action brought by Messrs. Raphael Tuck and Sons, Ltd., in the City of London Court on Thursday, to recover £47 0s. 8d. for books printed for him and for Christmas cards made and supplied to his order. Plaintiffs' counsel stated that, in April last, defendant gave a signed order to one of their representatives. On September 24th, when some of the goods had been prepared and were awaiting delivery, defendant sent a letter to plaintiffs stating that owing to a local colliery employing 2,000 men, on which his trade depended, having been closed down indefinitely, he must cancel all orders on hand. The goods were delivered to the defendant, however, ten days after his attempted cancellation, but he refused to keep them and returned them on October 8th. An order for payment of the sum claimed at the rate of £5 per month was made.

At the *matinée* in aid of the Newspaper Press Fund at Drury-lane on May 16th, which the King and Queen are to attend, the performers will include an extraordinary number of "stars" of the first magnitude.

AN entertaining speech by Lord Leverhulme, who presided, was the feature of the 50th anniversary dinner of the Newspaper Press Fund at the Hotel Victoria on Thursday last. It was announced during the evening that donations to the fund amounted to the record sum of £12,600. Miss Marie Löhr auctioned six boxes for the fund *matinée* at Drury-lane on May 16th, which brought in £1,280, and a number of stalls were also auctioned at good prices, these bringing the total donations to over £14,000.

NEWSPAPER PRESS FUND.—The West Riding of Yorkshire District of the Newspaper Press Fund this year forwarded £141 9s. to the central fund. The principal subscribers were the *Yorkshire Post*, £52 10s.; the *Yorkshire Observer*, the *Leeds Mercury*, the *Yorkshire Evening News*, and the *Bradford Daily Telegraph*, each £10 10s.; Lord Barnby, £10 10s.; Mr. S. A. Hirst, £5 5s. Mr. A. H. Mann (editor, the *Yorkshire Post*), £5; Sir W. Middlebrook, M.P., Mr. C. F. Ryder, and Messrs. T. G. and J. Jubb, each £3 3s.; Alderman A. Braithwaite, Mr. H. C. Derwent, and the *Dewsbury Reporter*, each £2 2s.; Mr. Robert Armitage, M.P., Sir Robert Clough, M.P., the Lord Mayor of Leeds (Mr. W. Hodgson), Alderman Mallalieu, M.P., Mr. E. George Arnold (ex-president Federation of Master Printers), Mr. A. W. Pullin, Alderman A. W. Willey, and Mr. Henry Crossley, each £1 1s.; and Colonel the Hon. V. Willey and Colonel Lane Fox, each £1.

The death has occurred at Wigan, at the age of 51 years, of Mr. Sydney Hill, a member of the editorial staff of the *Wigan Observer* for 34 years.

The death occurred on Saturday at Danby Lodge, Darlington, of Sir John Scott, Bart., who was a member of the firm of the Walter Scott Publishing Co., Ltd.

The death took place recently at Dover of Mr. Henry W. Kember, aged 63, who for 49 years was a stoker at the Crabble Mills of Wiggins, Teape and Co., Ltd.

Two old employees of Messrs. H. Allnutt and Son have passed away recently—Wm. Horton, who was apprenticed at Ivy Mill and remained with the firm until he retired, was 82 years of age, and Mrs. Tugwell, who reached the age of 75 years.

WILLS.—Mr. George Washington Bacon, founder of Messrs. G. W. Bacon and Co., Ltd., map publishers, left £113. Mr. George Davidson, director of the Aberdeen and North of Scotland Newspaper and Printing Co., Ltd., who died on January 31st last, aged 75 years, left personal estate in the United Kingdom valued at £144,325, of which his holdings in the Aberdeen and North of Scotland Newspaper and Printing Co., Ltd., amount to £10,675. Dr. Ernest Denney, Mus. Doc., publisher of the *Normal Press*, Ltd., who died March 2nd, left £32,346; Mr. William Gwenlyn Evans, master printer, Carnarvon, (died December 16th, aged 69) left estate to the value of gross, £3,450 being net personalty.

AQUATINTING.—There was a large attendance of members of the Newcastle Print Collectors' Society and others at a demonstration on "Aquatinting," given under the auspices of the Society in the School of Art, Armstrong College, Newcastle, last week, by Mr. Arthur Heslop. Mr. Heslop first explained the several methods which have been adopted for obtaining the "ground" on the zinc or copper plate, and then demonstrated two or three of them as far as the etching in the acid bath.

RATING OF MACHINERY.—In moving the second reading of the Rating of Machinery Bill in the House of Commons on Friday, Sir James Remnant said its object was to make it clear that in estimating rateable value for the purposes of local rates of any hereditaments which may be used for the trade, business, or manufacturing purposes, machinery should not be included unless it was fixed or attached to the hereditaments. The whole system of rating was in such a muddle that no manufacturer knew in what position he stood. In his opinion one of the chief reasons for the fact that approximately two millions of our workmen were out of work or on short time was because many of our manufacturers and business men were paying in State and local taxes alone more than their competitors abroad had to pay in labour plus standing charges. After a four hours' discussion, the second reading was carried by 127 votes to 17.

For the ice cream and soda fountain trades a new trade monthly journal called the *Ice Cream and Soda Fountain Journal* is to be started.

THE Cricketer (weekly, edited by Mr. P. F. Warner), will make its first appearance for the 1922 seasons next Friday.

THE Bury Trades Council has received a letter from the Bury Labour party drawing attention to the fact that a monthly Labour paper, the *Bury Pioneer*, has been launched, and asking the delegates to bring it to the notice of their organisations.

"THE MERCANTILE GUARDIAN"—The current number of the *Mercantile Guardian* is the 500th issue of that well-known monthly, and contains upwards of a dozen columns of congratulatory messages of good wishes from friends in all parts of the kingdom.

WITH last week's issue of the *Manchester Guardian Commercial* published the first of a series of 12 special numbers which will form the most considerable contribution any newspaper has made to European reconstruction. The numbers aim at providing an authoritative survey of all those factors and conditions that enter into the disordered state of European industry and commerce. Mr. J. M. Keynes, as general editor of the series, has enlisted the services of the greatest authorities of Europe.

NEWSPAPER STOPPED.—Just as the *Clonmel Nationalist* was about to publish on Friday evening, a body of armed I.R.A. entered the offices and said that no papers would be allowed to leave the offices. The staff then left the building.

THE Direct-Photo Engraving Co., Ltd., of 38, Farringdon-street, E.C., have chosen as the design for the May issue of their monthly calendar a three-colour reproduction of a dancing subject which is one of the latest and most striking designs to be seen on London hoardings. We understand that the reproduction, which is excellent, was accomplished from a quad crown poster in 24 hours.

THE two French companies specialising in the manufacture of millboard, Messrs. Benoist, Dallot and Benoist and Messrs. Piguet and Denis, have been amalgamated. The capital is 327,400 francs.

HEADQUARTERS of a gang of forgers of English bank notes has been traced to Constantinople.

A BERLIN report states that, owing to high costs of newspaper production, in February 156 newspapers and periodicals were compelled to suspend publication, and in March 177 more were forced to close down.

GERMAN PRINTERS' WAGES.—From an informative "Report on the Economic and Financial Conditions in Germany to March, 1922," issued by the Department of Overseas Trade, we take the following wage rates "as settled by tariff for various branches of industry in Berlin, for January, 1922": Printer, married, 553 marks per week; printer, unmarried, 541 marks; lithographer, 460 marks; offset printer, 545 marks; heliographic printer, 480 marks; copper plate printer, 460 marks (all the foregoing being weekly wages); bookbinder, male, 11.50-11.70 marks per hour; bookbinder, female, 7 marks per hour.

THE Petrograd Public Library is attempting to re-establish its former practice of receiving and storing all printed works published on Russian territory. This practice was interrupted during the revolution.

THERE are 20 large daily papers in Tokio, the largest of which has a daily circulation of 2,000,000 copies. The news-print paper industry in Japan is rapidly expanding. More mills are being built each year.

At a recent meeting of the Prague Paper Mills Co. it was decided to wind up the company, with a view to amalgamation with the Ollechan Co. The net profits of 8,500,000 crowns gave a dividend of 12 per cent.

THE Anglo-Norse Paper Agencies, Ltd., have been appointed sole agents in the British Isles for the Stromso Paper Mill, Drammen, Norway.

THE late Mr. Alfred Nichol, of Portobello, Edinburgh, retired paper manufacturer, formerly of the Portobello Paper Mills, left £24,183.

Postal Rates Reduction.

Definite Announcement at Last.

The Budget statement made by the Chancellor of the Exchequer, in the House of Commons on Monday afternoon, happily included announcements of reduced postal rates which will go a long way in mitigating the very heavy burdens which high postal charges have imposed upon the printing trade. The reductions, which will apply from the end of this month, include a halfpenny off inland printed papers, *i.e.*, 1 oz. to be $\frac{1}{2}$ d.; 2 oz., 1d.; for every additional 2 oz. up to 2lb., $\frac{1}{2}$ d.; a halfpenny off inland post cards, the rate being reduced from $\frac{1}{2}$ d. to 1d.; inland letters are to be $\frac{1}{2}$ d. for 1 oz., 2d. for 3 oz., and $\frac{1}{2}$ d. for every additional oz.; and letters to Dominions and U.S., $\frac{1}{2}$ d. for 1 oz., and $\frac{1}{2}$ d. for every additional oz. Sunday collection, but not delivery, is to be reintroduced.

The Federation of Master Printers deserve a good share of the credit for the postal reductions. Led by their president (Mr. J. Maclehoose) and their secretary (Mr. A. E. Goodwin), they took every opportunity, by deputation and otherwise, of pressing forward the needs of the printing and allied industries. That their efforts have been so far successful is distinctly gratifying. The whole scheme of campaign for a cheaper postage was well conceived and vigorously carried out. Indeed, the co-operation of all the parties to the agitation was whole-hearted, and illustrates what can be done with a good cause wisely directed.

The Employers' Federation of Envelope Makers and Manufacturing Stationers, who also brought strong pressure to bear upon the Government in regard to the postal rates, are pleased with the announcement of the Chancellor of the Exchequer so far as it goes. The new rates are likely to give an impetus to the envelope industry, since greater use will be made of the postal facilities. It is, however, suggested by Mr. F. L. Armstrong, the secretary of the Federation, that something more might have been done in offering advantages to letter writers. Thus, half-ounce packets might have been allowed for a penny, one ounce for three halfpence, and so on. By such a sub-division of rates, it is also conceivable that the revenue would have been increased at the same time that industry was stimulated.

Lord Blyth, who has strongly advocated a return to cheaper postal rates, was in the House on Monday to hear the Budget speech. He afterwards expressed his pleasure that postal charges were to be reduced, and Sunday collection resumed. He was disappointed, however, that Sunday delivery was not also conceded, and said that we must never rest satisfied until the magic 1d. letter rate, the $\frac{1}{2}$ d. post card, and the Sunday delivery of letters had been restored; further, the public should by every possible means raise an emphatic protest against the application of any portion whatever of surplus profit on Post Office business devoted towards the liquidation of the National Debt.

Mr. W. H. Burchell is, of course, delighted at the success of the long-drawn-out agitation, in which he has played so prominent a part, showing a dogged determination which has kept vital facts before the public eye with good effect. He writes us as follows: "The return to the halfpenny postal rate on printed matter is welcomed as a great boon to the printing and allied trades. Huge publicity schemes held up for the return of cheaper postage will now go forward, benefiting trade and commerce and creating employment in the printing industry. On behalf of the Master Printers' Association (Central London Districts) may I, through the courtesy of your columns thank those 600 industrial firms who signed the Protest Petition against high postal charges and hundreds of correspondents who in other ways contributed to make the postal protest campaign a success. In thanking the *British and Colonial Printer and Stationer* for the hospitality shown to the letters from my pen and the editorial support which has appeared in its columns from time to time since May, 1921, may I add that without the power of publicity which the Press affords, little could have been accomplished."

Sir Adolph Tuck, whose strenuous efforts on behalf of cheaper post card postage are known to all, expresses himself satisfied for the time being with the reduction to a penny. He is confident that even this concession will provide renewed employment for many thousands in the trade — block-makers, paper-

makers, and printers — who have suffered under the 1d. rate. New ideas and designs, which have been held up, will now be introduced. Sir Adolph has, of course, tried to get the rate reduced to a halfpenny, but believes the Government had done all that was possible in present circumstances, and that they have treated the trade fairly. He is hoping, however, that before the end of the year, the Postmaster-General or the Chancellor of the Exchequer will be able to make a further reduction to a halfpenny. That, he feels sure, would not mean any loss of revenue, because double the quantity would be used.

Mr. D. Eisner, of the City Post Card Co., expresses the opinion that the penny rate on post cards will certainly cause a revival in the picture post card trade, which has been very adversely affected by the previous increase. He points out that seaside traders have been waiting to see what the Budget would produce before placing their orders for the forthcoming summer holiday trade. Now that a reduction has been announced, they will be encouraged to give largely-increased orders.

LATER information, obtained by Sir Adolph Tuck from the Post Office authorities is to the effect that the postage on picture postcards bearing no writing other than date, name and address of sender and addressee, and a message not exceeding five words of courtesy or of a conventional character, will be reduced to $\frac{1}{2}$ d., the printed matter rate. The Postmaster-General is to deal fully with the question of Post Office finance when he moves the Post Office estimates to-day (Thursday).

Oxford Printers and Plant Values.

The late Lord Clarendon, the founder of the world-famous Clarendon Press at Oxford, was present on April 25th when Oxford master printers assembled at the Clarendon Hotel for their annual meeting. Unfortunately his late lordship was present only in oils, but he looked out benignly and very interestedly from his massive gold frame. The Oxford of two centuries or more after his time was represented by the Mayor of Oxford; a master printer, Mr. Vincent, and by the head of the University Press, Mr. Hall, M.A.

There was a pleasant reunion at the tea tables. At the after meeting Mr. Hall presided, Mr. H. J. Alden, who for about a dozen years has been hon. secretary and perhaps factotum of the Oxford Association, being at his left hand. The private business of the Association, including the receipts of reports and the election of officers, and the ventilation of matters of interest, having been disposed of, Mr. Frank Colebrook gave an extempore talk upon the principles and procedure of valuation in reference to insurance, general accountancy, costing, or rating.

Fire assessors, he said, by his experience, had been very wishful that an insured firm which had a fire should receive the utmost to which they were entitled under that contract of indemnity called the insurance policy. The assessor wished that all parties should be satisfied, but their trouble was that they frequently did not know what was a fair payment. They were very glad when a business-like and independently attested statement of values was put before them—a statement showing what sum would again put the firm which had suffered the fire in possession of a similar plant to that which had been burnt—no better and no worse. Fire insurance was not a bet; it was not a speculation, it was simply a contract of indemnity of the actual loss. What amount would suffice did certainly need annual re-consideration, especially at these times. (One of the principal printers present in the subsequent discussion confirmed this, saying that it was his practice to secure independent annual revision.) There was no necessity for the independent valuer's valuation total, arrived at for insurance purposes, to be incorporated in the balance-sheet, though where his and the balance-sheet totals were very discrepant, a suspense account could be opened and a reconciliation of the two figures by stages would seem to be wise. Mr. Colebrook said he had heard that a certain bank chose to put down its very valuable premises in its balance-sheet at a shilling; they must be worth quite half-a-crown. (Laughter.) It should be clearly expressed in a certificate as to whether the value was the insurable value or in what other connection the assessment was made. Sometimes a plant was valued by some outsider

to see what security it would afford for, say, a further advance by one of its directors, and an appraisal made to the instruction and purely for the guidance of such a proposing lender, would not represent the insurable value, but the forced realisation value, and it would be most unfair to all parties for such an appraisal to be regarded as simply "the value," without qualifying words.

The average clause was explained and, on the whole, approved by the speaker. He said that, if general, it should lead to full value insurance also being general. Speaking as one who was not an insurance broker, he hoped the insurance broker would be more consulted in the future. Quite possibly his protective advice would cost nothing in some cases. Printers should read their policies, particularly their warranties, more carefully; the warranties might be mitigated if too stringent. The income tax surveyors were severally laws to themselves, but they sought after common sense. A correct complete, common-sensible presentation of values would be the natural means to secure from the income tax surveyor an adequate allowance for depreciation. Depreciation account could be just as accurately and more pleasantly called a plant replacement account. Other points dealt with were values in relation to costing and to general accountancy; and a good deal was said on the subject of machinery rating, as to how the law stood, and what steps could be taken to support the recommendation of the Royal Commission on local taxation that if machinery was to be rated it should be only such machinery as was fixed to the building or could not be removed without some removal of part of the building.

In the discussion, reference was made to a printing fire. After the signing and sealing of the settlement the fire office representative, who had protested that he had conceded the last farthing, said to the printer's manager, over a glass of wine: "If your people had only stuck out a little more, they could have got another thousand pounds out of us."

Mr. Hall moved a vote of thanks to Mr. Colebrook and remarked on the lucidity of his explanations. This was cordially endorsed.

Trade Union Matters.

THE annual conference of the Printing and Kindred Trades' Federation of the United Kingdom takes place next week, on May 9th, 10th and 11th. It is being held at Blackpool, where the use of the council chamber of the Town Hall has been secured for the purpose. The meetings promise to be well attended and the proceedings of much interest, especially as the current wages negotiations will doubtless be given a front place on the agenda as a matter of special urgency.

"T.A." E.C. ELECTION RESULT.—The 22 successful candidates for the Typographical Association Executive Committee are:—Manchester, H. B. Marsh, A. Trickey; No. 1 District, T. E. Roche, J. E. Howarth; No. 2 District, E. G. Yates, L. P. Bristow, W. P. Toynebel; No. 3 District, F. O. Roberts, W. Wesson; No. 4 District, T. Dove, W. Colby; No. 5 District, E. Barnet, S. Oaten; No. 6 District, J. D. Harvey; No. 7 District, C. Powis; No. 8 District, J. Deveby; No. 8 (North), H. T. Whitley; Birmingham, F. Dunn; Leeds, W. Bottomley; Liverpool, J. Morgan; machineman representatives, North, J. Barron, South, S. H. Porch.

PAPER TUBE WORKERS.—Under an arrangement whereby wages fluctuate in correspondence with the Ministry of Labour index number of retail prices, etc., paper tube workers in Bradford, Keighley, Huddersfield, Rochdale and Castleton on the first pay day in March received a decrease in wages of 2½ per cent. on rates as adjusted from September, 1921, making a total reduction of 7½ per cent. since that date.

THE literary department of the Trade Union Congress and the Labour Party published on Monday the first number of a new six-penny monthly, under the title of the *Labour Magazine*. It will incorporate both the *British Trade Union Review* and the *Labour Party Bulletin*.

MESSRS. JAMES SPICER AND SONS are issuing a new sample set of their Effra high-grade writing papers. This quality is now stocked in cream-laid and wove, vellum wove and yellow wove. The price is reduced to 6d. per lb.

New British Patents.

THURSDAY, MAY 4, 1922.

The Wages Ballot.

In connection with the printing trade wages negotiations, interest now centres upon the ballot being taken by the trade unions on the revised proposals put forward by the employers. These proposals are: "A reduction of 15s. per week for men, to become operative in instalments as follows—5s. on third pay-day in May, 1922; 2s. 6d. on first pay-day in July; 2s. 6d. on second pay-day in August; 2s. 6d. on first pay-day in October; 2s. 6d. on first pay-day in January, 1923; a reduction of 7s. 6d. for women, in instalments respectively of 2s. 6d., 1s., 1s. 6d., 1s. 6d. and 1s. on same dates as for men; no further reductions than the above sums of 15s. and 7s. 6d. to become operative before December 31st, 1923." The Joint Industrial Council recommended that all the unions should submit the employers' proposals to ballot by their members; the unions were to inform the employers' organisation not later than yesterday (Wednesday) whether or not they were taking the ballot. At the time of going to press most of the unions have notified their decision to take the ballot, and it is expected that all the unions will do so. This is a move in the right direction, as it will at any rate give an opportunity for expression of opinion by the moderate section of trade unionists who, we believe, recognise that printing trade workers cannot continue—with due regard to present-day conditions and the industry's need to take advantage of every possibility of reducing costs—to refuse to make any concession at all in response to the reduced cost of living. A continuation of such an attitude will certainly lead to very serious difficulties in the trade. Ballot papers are to reach the employers' organisation not later than the morning of Thursday, May 18th

Reduced Postage Now in Sight!

A SIGH of relief goes up from long-suffering British printedom at the announcement that next month is to bring substantial mitigation of the burden of excessive postal charges under which the printing industry has been labouring. The reductions granted will unquestionably be reflected in a drop in the unemployment figures for the printing trade.

The re-introduction of the halfpenny rate for printed matter will mean some immediate increase of printing orders—much direct advertising having admittedly been either held over or curtailed solely on account of the high cost of postage. The return, also, of the cheaper rates for post cards is expected to bring a much-needed revival to the picture post card industry. We feel that the Chancellor of the Exchequer need have no qualms that, in granting this relief, he has gone any too far; rather the contrary. We believe the increased volume of postages will itself compensate for the reduction of rates, whilst the incidental benefit to industry in general must result in substantial gleanings for the Exchequer. The thanks of the trade are due to all those who have been to the fore in maintaining the long agitation against high postal charges, and we congratulate them on the success of the cause they have championed. Whilst there is still room for further reduction of the charges, we are highly gratified that this important step towards reform, the need for which we have for so long been emphasising in our columns, has at last materialised in substantial fashion.

Hand-Made Paper Wages.

THE cost of living figure having dropped to 82 there comes into force a reduction in hand-made wages, under the agreement with the Original Society of Papermakers, of 2d. per day's work for journeymen and 1d. for apprentices. The fall in the cost of living has, of course, a distinct bearing upon wages, and the fact is generally recognised. Accordingly, most of the new wages agreements are guided by this factor. Although it is difficult to follow the declines in detail when considering the household bills, the index number of the Ministry of Labour clearly shows that during the past 12 months there has been a decline of 51 points, namely from 133 to 82. Thus, surely and steadily, the cost of living is coming down the scale, and it naturally follows that wages must take the same course. No doubt the lowering cost will have a bearing upon the ballot which is being taken among the unions associated with the machine-made paper mills of the country.

Employment in the Paper Trade.

It is good to learn from an authoritative source that the paper trade during March indicated a slight improvement in one or two districts. The majority of the mills reported on, however, were again working irregularly, and some were closed down altogether. Of over 8,000 workpeople covered by returns received, 32 per cent. were losing on an average 13 hours each per week through short time. There is thus a great deal of leeway to be made up before the position in the British paper industry can be regarded as satisfactory. According to information received from employers who furnished returns, there were 10,904 workpeople employed in paper manufacture in the week ended March 25th. This figure represents an increase of 1.1 per cent. compared with a month before, but a decrease of 4 per cent. as against the position a year ago. Wages paid amounted to £26,883, declines of 1.6 per cent. and 14.5 per cent. as compared with a month before and a year ago respectively.

THE International Book Fair, opening at Florence during this month, and continuing during June and July, has many features of interest to printers, including a technical exhibition of the graphic arts, an exhibition of the applications of photography to the graphic arts, and an exhibition of book illustration and decoration. From the London tourist office of the Italian State Railways (12, Waterloo-place, Regent-street, S.W.1), we have received leaflets on the subject, also an intimation that all travelling arrangements, etc., can be made at the office mentioned above.

Personal.

SIR ERNEST BENN, BT., Sir Harry Brittain, M.P., Sir Herbert Morgan, Sir Albert and Lady Spicer, and Mr. J. M. Dent were among the many well-known people who last Thursday attended an "At Home" at Admiralty House, under the auspices of the English-Speaking Union, "to meet the American professors who are now in this country." Eight professors, one a lady, are on a visit to London, some for pleasure and others for study.

OWING to a motor accident in Belgium nearly a year ago, Sir Harry Brittain, M.P., has to undergo a slight operation, and has been ordered to cancel all engagements for the next two weeks.

THE Parliamentary Press Gallery holds its annual dinner at the House of Commons on May 26th, when the guests will include the Lord Chancellor, the Lord Chief Justice, and Mr. Sidney Robinson, M.P.

LADY HULTON is organising a ball at Claridge's Hotel on Thursday, June 8th, on behalf of the Arthur Pearson Memorial Fund.

SIR MEREDITH T. WHITTAKER, who has for over twenty years been president of the Linotype Users' Association (now being amalgamated with the Newspaper Society), is to be honoured by the Linotype Users' Association in recognition of his long services to the Association and in celebration also of his having been knighted at the beginning of this year.

SIR MEREDITH and Lady Whittaker are both to receive presentations, the gift to the former being his portrait in oils. A fund has been opened for the purpose, subscriptions being limited to a five guinea maximum. The treasurer is Mr. J. E. Thornton, of the *Yorkshire Post*, Leeds.

SIR ALEXANDER JEANS, of the *Liverpool Post* and *Liverpool Echo*, has just celebrated his jubilee, having joined the staff of the *Post* in 1872 as a reporter. He is now the editor and one of the chief proprietors, in addition to being one of the foremost figures in the newspaper world.

SIR T. VANSITTART BOWATER is contesting the City by-election with Mr. Grenfell, the member of the great banking firm of Morgan, Grenfell and Co. Sir Vansittart is standing in the interests of the merchants of the City, who, he holds, would like to have one of their own in Parliament, and not a banker to join Sir F. Banbury.

SIR CHARLES HIGHAM, M.P., will leave for America on the "Olympic" on May 24th to extend an invitation to the Associated Advertising Clubs of the world to hold their annual convention in London in 1924.

THE HON. RUPERT E. BECKETT, the chairman of the *Yorkshire Post*, has been re-appointed Treasurer of the University of Leeds. Mr. E. George Arnold, ex-president of the Federation of Master Printers, is Pro-Chancellor of the University.

LIEUT.-COL. TRUSCOTT, President of the L.M.P.A., attended a social gathering of the South-West London Master Printers' Association on Tuesday, at the Hotel Belgravia, Victoria, and gave a short address.

A RESOLUTION was passed congratulating Mr. W. H. Burchell on "the successful issue of his untiring efforts on behalf of the craft in securing substantial reductions in the postal rates."

MR. EDGAR WATERLOW, entertained as guest of honour at last week's monthly luncheon of the West and North-West Master Printers' Association, spoke on a number of points of much importance to employing printers. His remarks, which were of a private character, provoked an interesting discussion, and the thanks of members were expressed to Mr. Waterlow by Mr. S. Sidders, who presided.

MR. H. SEYMOUR BERRY, a director of the

Western Mail and other publications, has left South Wales for the South of France.

MR. BRUCE RICHMOND, editor of the *Times Literary Supplement*, is to have the honorary degree of Litt.D. conferred upon him by the University of Leeds.

MR. JAS. OSTELL gave a recital of "Prose and Poetry: Grave and Gay" at Tuesday's meeting of the Printers' Managers and Overseers (Parent) Association.

MR. G. A. RUTHERFORD delivered an interesting address on the "Three Colour Process" at the monthly meeting of the Printing, Bookbinding and Kindred Trades Overseers Association on Tuesday evening. A report of the proceedings will appear next week.

THE pass lists of the final examination for admission to the Bar, issued on Thursday, contained the name of Mr. Edward James, London correspondent of the *Western Mail*.

THE marriage has taken place, at Trinity Wesleyan Church, Sheffield, of Miss Winifred Chandler, lady editor of the *Sheffield Daily Telegraph*, and daughter of Mr. C. H. Chandler, for many years assistant editor of the *Sheffield Daily Telegraph*, to the Rev. I. T. Kempster, D.S.O.

THE marriage has taken place, at Leeds, of Mr. Harold Matthew Whittaker, eldest son of Mr. Matthew Whittaker, for many years representative for the Linotype Company, to Olive, only daughter of Mr. J. L. Walker, of Roundhay, Leeds. Mr. Harold Whittaker is now in partnership with his father as dealers in linotype and other printing machines.

AT the annual dinner of the bookstall staff of Messrs. Wyman and Sons, held at the Midland Grand Hotel, St. Pancras, on Saturday night, tribute was paid to the services rendered to the firm during the past 11 years by Mr. Duncan Macintosh, general manager of the bookstall department, who, in view of his having resigned this position, was presented with a gold watch and chain on behalf of the whole of the employees of the firm.

MR. HERBERT BROOKES, chairman of the Australasian Paper and Pulp Co., has been appointed a member of the Australian Tariff Board, which will deal with such questions as the operation of deferred duties, negotiations with other countries for reciprocity, anti-dumping and concessional duties.

MESSRS. ARTHUR T. DIMMOCK, LTD., of London and Manchester, importers of all qualities of paper and boards, have recently acquired the services of Mr. Edgar Middleton, as their representative for Manchester and the North of England. Mr. Middleton is well known and much respected in the trade, and he has the good wishes of his many friends for success in his new undertaking.

Amalgamated Press Reorganisation

The directors of the Amalgamated Press, Ltd., have issued a circular to the shareholders informing them that in the course of a few days a scheme of reorganisation will be formulated which will affect both the preference and ordinary shareholders. It is believed that the rate of interest on the 5 per cent. cumulative preference shares will be raised and colour is lent to that view by the rise in the price of these shares, which are now quoted at 19s. 6d., compared with 13s. 6d. at one time last year. There have been active dealings lately in the ordinary £1 shares, which have changed hands at over £7. For years past dividends of 40 per cent. per annum, free of tax, have been paid on these shares, and substantial reserves have been accumulated, while properties have been written down to such an extent as to create large inner reserves. Goodwill and copyright items have been entirely eliminated from the balance-sheet. It is believed that the directors contemplate a distribution of some of these surplus assets, and details of their scheme will therefore be awaited with considerable interest. The last occasion when a bonus was distributed was in 1913, when 30 per cent. was paid in ordinary shares.

Continuation Schools.

SIR,—It was scarcely conceivable that Mr. Burchell could seriously object to the higher education of our lads, and his reply last week is reassuring on the point.

The vexatious terms of the Education Act to which he refers are indeed a menace to effective education, both technical and secondary. But what I think is little understood is the fact that the L.C.C. are most desirous to help individual trades to give that kind of secondary education to the boy of 14, which will be a great factor in his success as a skilful craftsman.

Evidently Mr. Burchell, like many other master printers, is not aware in this connection of the splendid secondary school for printers' lads at Wild-street, Drury-lane, where the lads of each department of printing have an educational training suitable to the section of the craft he is learning. In this way an embryo compositor gets a three years' training in general educational subjects connected with his trade, with a bias towards printing. His reading and mathematics deals with printing and most of the students when they arrive later at the technical school have very precise knowledge of the theory of display and lay-out, together with an excellent knowledge of the theory of printing generally.

The same kind of industrial instruction can be found at most of the L.C.C. schools, and I bound in sheer fairness to add, that for years I have found the teachers and officials most enthusiastic, painstaking and thorough in their methods, and I have in the testimonials given to boys who have served their time abundant proof of the great value of this early secondary education.

Yours faithfully,
GEO. EATON HART.

St. Clements Press,
Portugal-street, W.C.2.
May 3rd, 1922.

Stationers' War Memorial.

A memorial to members of the Stationers' Company who fell in the war was unveiled by the Master (Mr. C. R. Rivington, J.P.) at Stationers' Hall, on Tuesday, in the presence of the Wardens, Court and subscribers.

The memorial takes the form of a mural tablet on the outside of the Hall and is inscribed in memory of the "Liverymen of the Worshipful Company of Stationers who gave their lives for God, King and Country during the Great War, 1914-18." There are eight names, as follows: William Edward Davy, Robert Lancaster, John Harris Miles, Harry R. S. Pulman, Heriot Baker Roe, Cyril A. Truscott, Francis G. Truscott.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

James Edward Gran and John Goldman, advertising agents, 173-5, Fleet-street, E.C.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

Edward Norfolk and Ambrose Tristram Smith, paper merchants, 53, St. Paul's-street, Leeds. April 25th.

The *Kentish Mercury* of April 28th consisted of 24 pages. This is believed to be a record in local newspaper enterprise in the United Kingdom. The proprietors of the *Mercury* are offering £250 in prizes in connection with the "Catford, Lee and Lewisham Traders' Exhibition Week."

The Bookbinder.

Notes and News.

The Wages Question.

At present the most important matter in the bookbinding trade is the wage reduction. At the moment of writing there is a slight hold-up despite promising announcements in the daily Press. Protracted negotiations are bad for trade but unfortunately it is impossible to secure quick agreement when so many different interests are at stake. In the old days a local union could meet a local association and make a local arrangement in quick time. That, of course, was only the beginning of what finally became known and detested under the descriptive title of the vicious circle. The national agreement may render negotiation a much more delicate and prolonged process, but it has the merit of eliminating all the local work and discord, and settling at one stroke the entire issue for all the country and all the unions. When we look at it fairly the national organisation of the printing, bookbinding and allied trades is a wonderful achievement and a model for the industrial world.

Improved Tone of Trade.

There is not a great volume of trade moving about, but there is certainly a well-sustained if slight improvement. The figures of employment are growing better, though we have never seriously regarded them as a reliable index to the real state of trade. On the publishing side there is a marking-time policy, in view of the promised wage-drop and ultimate lower cost of production. Sooner or later there will be quite a respectable boom in books. Fiction works are naturally bound to grow, but in the educational and industrial spheres the issue of new works has not kept pace with progress. The process of publication was well under way in 1920 when the slump came and put a stop to everything. That process will have to be resumed and, to make up for lost time, the pace will require to be accelerated. Fundamentally the war

has changed everything, ideas, prices, methods of production and organisation, educational training and the whole gamut of things which constitutes human progress and development.

The Place of the Time Docket.

Presumably the wage business has temporarily overshadowed the time docket controversy, but there is an inevitable relation between wage and time which simply must be faced without further delay. Wage is a paramount factor in cost of production, but the chief factor is always time. On a given article the cost cannot be correctly ascertained unless the time is known. We do not know times in the bindery, hence we do not know real costs. The binding department in any factory cannot be controlled efficiently because of the lack of data. Week by week and month by month the exact standing of all other departments is known and weaknesses can be rectified at once. Meantime the bindery stands outside the sphere of organisation and any figures produced are worthless because they do not correctly represent definite costs or definite periods. Rectification of this anomaly is long overdue and the strongest pressure should be brought to bear on the parent organisations which represent the industry and its interests.

Prices of Materials.

On the market, prices of bookbinding materials have undergone very little reduction of late. If there is cause for complaint in any direction it is certainly in regard to tapes and threads. It is nothing short of scandalous that prices to-day should be more than four times what they were pre-war, yet that is what the binder is paying for thread. The agents blame the combine and profess themselves powerless, as no doubt they are. According to one factor there is less relative profit for the agent on to-day's prices than there was pre-war. Questioned as to whether

there were not supplies available from outside sources at a lower price, he agreed there were, but the qualities were not so reliable and gave ground for complaint.

Book-Covering Materials.

Leathers remain practically unaltered except for a slight easing in basils and skivers. Bookcloths are still at the same figure, nearly three times pre-war price, and here there is reason for complaint. Imitation leathers have been reduced more recently, as also have buckrams, but calicoes and lining materials are unaltered. A good-grade calico costs 5½d. per yard to-day, marble papers vary according to source. Direct supplies are cheap if the quantity can be placed. Merchants are asking far too much and the smaller binder would be well advised to use substitutes such as self-coloured printings or diaper patterned paper.

Board Prices.

Strawboards are steady and fairly scarce. Present prices per ton lots and up are £7 15s. per ton, unlined, plus £1 5s. per ton for 1½ lbs. and up. Leather boards are quoted £18 per ton; grey boards, £23 to £30; and black hand-made boards, £53 per ton.

Gold Leaf.

Foreign gold leaf is quoted 52s. per 1,000 in 3½ in. by 3¼ in., and 63s. 6d. in 4 in. by 3½ in. from home stocks, or 49s. and 60s. if bought direct in 10,000 lots. English gold leaf is quoted 74s. per 1,000.

Duxeen Samples.

Messrs. Robert Williams and Sons, Ltd., of Gorton, Manchester, are issuing very attractive sample books showing Duxeen in a variety of shades, patterns and substances. Prices range from 5½d. to 9½d. per yard and we understand that bookbinders and box-makers are using this material in increasing quantity.

The Master Bookbinders' Association.

Now in the twelfth year of its existence, the Master Bookbinders' Association has proved its value to employers in this particular branch of the industry, and though small in numbers (it has, we believe, about three dozen members), its membership includes pretty well all the most influential binderies in the trade. The Association's list of officers, as recently re-elected, contains many well-known names. Its president is Mr. F. Grey (the Greycaine Book Manufacturing Co., Ltd.); its chairman, Major Robert Leighton (Leighton, Son, and Hodge, Ltd.); vice chairman, Mr. John G. Bain (A. W. Bain and Co., Ltd.); treasurer, Mr. Ernest Straker (A. Straker and Son, Smith Bros., Ltd.). The executive committee of the Association comprises Messrs. Arthur E. Calkin (Robert Riviere and Son), A. S. Colley (A. W. Bain and Co., Ltd.), J. Crowlesmith, J. P. (Hazell, Watson and Viney, Ltd.), L. G. Kitcat (G. and J. Kitcat, Ltd.), E. Macintosh (Wyman and Sons, Ltd.), and Percy H. Whiting (Key and Whiting, Ltd.), and the honorary officers. The Association has also a costing committee consisting of Messrs. J. Alexander Bailey (Bailey Bros., Ltd.), Arthur E. Calkin (Robert Riviere and Son), L. G. Kitcat (G. and J. Kitcat, Ltd.), and the honorary officers. The secretary is Mr. Hedley Miller, with office at 1, Oxford-court, Cannon-street, E.C.4.

An idea of the activities of the Association can be formed from the fact that during the twelve months ended March 31st, quite apart from a weekly luncheon at the Holborn Restaurant, and without including discussions on labour matters (which come under the aegis of the Bookbinding Section of the London Chamber of Commerce), no less than 45 meetings of the Association and its committees took place.

Workmen's Compensation Insurance.

A most interesting new feature of the Association is the Bookbinders' Mutual Assurance Co., Ltd., legally a separate entity, but in effect, part and parcel of the Association. Consequent upon a report submitted by a committee appointed by the Association in 1920 to make a preliminary investigation of the subject, a second committee (consisting of Messrs. A. S. Colley, Douglas Leighton, Ernest B. Judd, Percy Whiting and Ernest Zaehnsdorf) was nominated to work out a scheme in detail. This committee ultimately recommended the registration of a special form of limited company to consist of members (not shareholders), and the proposal was endorsed by the full body of members. The requisite sanction of the Board of Trade having been obtained, the Bookbinders' Mutual Assurance Co., Ltd., was registered and commenced

operations towards the end of last year, as recorded at the time in our columns. The gentlemen named above were elected as the first directors. The success of this Assurance Co. was immediate. Practically all the members whose existing policies have fallen in since October 1st have insured with the company, and it is expected that before another year is out the membership of the company will embrace almost the whole London trade. The advocates of the scheme point to obvious advantages: the security is complete; the expenses are exceedingly low; no special offices are required (the work is done by the secretary of the Association), and the balance over and above expenses and claims will be returned to the policy-holders.

Efforts for Trade Betterment.

The latest annual report of the Association shows that much good work is being done on behalf of the bookbinding trade in general. Binders' costing is one important matter which has received attention. The committee which commenced in 1920 the work of producing a scientific costing system for bookbinders continued its sittings throughout the past year, and in February the "Introduction" and the "Plant" portion of the scheme were issued to the members generally; the remainder will follow in due course.

The Association was active also in regard to recent attempts to tax imported gold leaf. When application was made by the Gold-beaters' Federation for a 33½ per cent. duty to be placed upon imported gold leaf, under Part II. of the Safeguarding of Industries Act, the Association unanimously resolved to oppose the application before the committee appointed by the Board of Trade under the Act to report upon the matter, and in this action other interests, including the Master Printers, joined forces with the binders. When the committee heard witnesses for and against the duty, Major Leighton gave evidence for the bookbinding industry and, indeed, acted as chairman of the committee (composed of representatives of the various opposition groups) which raised the necessary funds and generally directed matters. The Association subscribed £25 towards the defence fund. As we have previously announced, the investigating committee eventually reported that the conditions laid down by the Act had not been fulfilled, and that no further action in respect of the complaint in question would therefore be taken.

In regard to the new printing and kindred trades technical institute, the Association has undertaken, as representing the bookbinding industry, to guarantee for five years an annual contribution of £150 towards the £2,500 per annum required for the institute. Messrs. Joseph Brown, A. E. Calkin, and A. S. Colley represent the bookbinding industry on the council, and it may be mentioned that the subscription decided upon is conditional upon bookbinders having a direct representative on the executive committee. Master bookbinders are agreed that the movement constitutes a decided advance upon all previous efforts of the kind.

Various other recent moves give further evidence that the Association is alive to all questions of the day which affect the trade. The Association resolved to affiliate with the Income Taxpayers' Society (annual subscription £1 is.) in view of the undoubted need for an influential organisation to protect the interests of payers of income tax. Again, the Association has taken action to support the Master Printers in their opposition to the proposed duty on imported paper under the Safeguarding of Industries Act. They have also taken part in the agitation against high postal rates, realising the close relation of the bookbinding trade to the printing industry in general, the whole of which has suffered, and always must suffer, from the absence of cheap and efficient postal services

End Papers and Binder's Estimates.

The question of the custom of the trade with regard to the inclusion of the cost of end papers when quoting a price for binding is raised by a correspondent in India. The manager of a printing works in Bangalore writes us as follows:—

"Printer A is asked to quote by Customer X for a certain work. A accordingly quotes for setting and printing, supplying paper and binding. X wants to know whether in the item of binding charge end paper should be included or whether it should be charged for as a separate item by the Printer A." He adds: "From my experience and according to my practice, I include the charge for end paper in the binding costs, namely, labour and material, according to the 'Federation Printers' Cost Finding System.' I suppose this is the correct method. Customer X supplied the paper finally. Can A, at this stage contend and say that he has used Customer's paper for end paper and his charge for binding did not include the cost of end paper?"

The question is not altogether clear, but we gather that the gist of it is this: If a quotation is given for "binding," can the customer claim, in the absence of any clause to the contrary, that the cost of end papers is included in the price quoted?

Some binders, we know, make a point of never quoting a price for binding without specifying what class of end papers shall be used and whether binder or customer shall supply them. Where something special in end papers is required this is obviously the only course to take; it is the best practice also for general work, as it leaves the matter beyond dispute. There is, however, a well-marked custom of the trade that plain white or other ordinary end papers are provided by the binder. Whether this custom is sufficient to give legal authority to the assumption that the cost of such end

papers is covered in a quotation for "binding," we are not in a position to say; we should be pleased to hear from any correspondents who can provide information on the point.

Bookbinding Trade Customs.

An American Schedule.

The following schedule of customs of the trade has recently been adopted by the Employing Bookbinders of America:—

1. Cases, Wrappers, etc.—All receptacles such as wooden cases, wrappers or packing material which contained merchandise delivered to the binder by the customer or his authorised agent, become the property of the binder, unless a separate and distinct agreement is made for the return of same when an additional charge will be made.

2. Option to Fold, etc.—The binder will fold, plate, gather and sew all unordered sheets received, except a separate and distinct agreement is made in writing covering certain steps in the manufacture, the doing of which would be against the customer's best interest. Any work performed will be promptly charged for.

3. Material Supplied.—Whenever any material, cloth, leather, paper, etc., is supplied by the customer, an additional charge on the value thereof will be added for handling same.

4. Defective Work.—The binder will not be responsible or liable in any way for defects in paper or printing which appear on the inside of folded signatures. The quoted price includes only the regular examination of the completed work, which consists of the following operations: Freeing the end papers, observing that the book is cased in properly, once fanning through the leaves, and rubbing off the cover preparatory to wrapping. For a special examination a separate and distinct agreement in writing must be made, which will carry an additional charge to be agreed upon.

5. Wrapping.—The quoted price covers only delivery of the books without wrappers. A separate and distinct agreement must be made and additional charges fixed for wrapping books with jackets; sold in packages; sealing; wrapping individually; inserting books in wooden boxes, cartons, or folding boxes, affixing labels; inserting circulars.

6. Dies.—The quotation does not cover standard brass dies, whether for ink, leaf, gold or blank stamping. These must be supplied by the customer unless separate agreement is made.

7. Customer's Property.—All material furnished by customer, and completed books are held at customer's risk, and binder assumes no responsibility for loss or damage by fire, water, insects, rats, dirt, or from any other cause whatsoever. Binder only insures the value of his labour and material on all orders until the goods are charged.

8. Terms.—Net cash payment thirty days, unless otherwise specified. Deferred payment will have interest added. Binder's lien attaches on all property in possession, notwithstanding the giving of credit or accepting of notes or guarantee of payment. All goods to be billed upon completion, whether delivered or held in stock by the binder, unless a separate and distinct agreement is made to hold books in stock without billing for the binding. Under such separate and distinct agreement, all work performed and material supplied on bound books in stock by the binder on December 31st of each and every year, shall be billed to the customer, payment to be made within thirty days.

9. Acceptance.—The quotation is subject to acceptance within ten days. Until acceptance is received, the quotation is subject to change without notice. The binder may cancel order without liability within five days after acceptance by customer, if credit of customer is found not satisfactory.

10. Delays.—The binder is not responsible for any delay caused by accident, fire, strikes, water or any other cause not herein enumerated beyond control.

11. Quantities.—The quotation covers only the specific quantity stated to be bound as an initial order. Should, however, the customer in the initial order, call for a part or lot less than the entire edition, then it is understood that the binder, on such parts or lots, will add any increase in the cost of labour or material to the quoted price.

12. Count.—The binder makes no hand

count on receipt of sheets or other material unless separate and distinct agreement is made, carry an additional charge for service. For the purpose of this contract the basis of count shall be the folded and gathered record made as soon after the receipt of sheets as convenient.

13. Agreement.—No verbal agreement or representation by salesmen, shall be binding unless confirmed in writing.

Lecture on Bookbinding.

Lecturing under the auspices of the Sheffield District Committee of the Joint Industrial Council, at Sheffield recently, Mr. W. Slinn, Instructor of Bookbinding, Sheffield Technical School of Art, took as his subject "The Art of Bookbinding." A feature of the lecture was the showing of about 70 lantern slides, among the interesting bindings illustrated being the famous Omar Khayyam (Sangorski and Sutcliffe), which went down in the "Titanic."

The lecturer first gave an informative general review of the history of bookbinding, and then proceeded to detail some of the chief points of technical interest in the development of the craft. The value of technical education was stressed, and instructive illustrated descriptions were given of the various processes involved in the binder's art.

Casing-in Pass Books in Bindery.

Many firms make a speciality of producing pass books in quantity, and have their own particular methods of doing the work differing in many cases from each other. It is always good to know how others work and the following notes on American practice, from the *American Printer*, should be of interest.

"The usual method of casing-in pass books is to paste up one side of the book, lay it in the case, paste up the other side and bring over the remaining cover. There is, however, a much quicker method than this, not only quicker but better. Instead of pasting up the books, lay out a stack of covers, pasting the entire inner side of the cover, which is then passed to a second workman, who fits the book in place. Twenty or more may be run off in this way, and then press-nipped, after which they should be laid out between boards for seasoning. If the paste should be squeezed out in press-nipping, a small stiff-bristled brush is brought into play, brushing the edges of the books thoroughly, thus removing all paste. Any batch of books having a very small square can be cased-in in this manner, no matter whether they are leather or cloth bound. Considerably less handling is required by this method, thus increasing the output of the workmen. If the edges of the books are coloured, it would be well to apply the paste sparingly, so that there is little danger of it squeezing out when nipped. Too much paste might discolour the edges or blotch them. With a natural edge, though, there is no danger of this."

BOOKBINDERS' WAREHOUSING.—The question having been raised of a charge by bookbinders for looking out broken hundreds of sheets, the Master Bookbinders' Association decided generally that binding prices referred to binding alone; extras, such as warehousing and looking out small numbers of sheets (other than for binding orders), were subject to additional charges according to the work entailed.

We are indebted to Mr. Stanley I. Galpin, of the Cartonite and Arborite Syndicate, Ltd., 40-43, Fleet-street, London, E.C. 4, for a copy of the "Dorset Year Book," published by the Society of Dorset Men in London (2s. 6d., by post 3s.). Mr. Galpin is a life member of the society, and the volume before us is a very interesting publication, with a particularly strong appeal, of course, to the men of Dorset. There are a number of original sketches with the Dorset flavour and innumerable illustrations of an excellent character. A clever adaptation has been made of the Veritas mantle advertisement with the altered inscription "Lumme! It must be a Dorset Man!"

Mrs. S. TERRY, who had been employed at the Basted Paper Mills for upwards of 50 years, passed away recently at Borough Green, Kent.

DIVIDENDS AND REPORTS.

AMALGAMATED TRADE PUBLICATIONS.—The Amalgamated Trade publications announce dividend of 6 per cent., free of tax, making 12 per cent. for year, carrying £12,320 forward.

SUNDAY PICTORIAL NEWSPAPERS (1920).—Profit for year ended February last, after deducting all working, office, and other expenses, and providing for corporation profits tax, contingencies, etc., amounted to £148,282, to which has been added £11,039 brought forward. Preference dividends have been paid to shareholders for six months to August last, and interim dividends to ordinary shareholders to February 28th last. Directors do not propose to pay any final dividend on ordinary in respect of last financial year. After payment of interim dividends, remaining balance of £32,447 has been reduced by preference final dividend of £20,000, paid on April 1st, leaving £12,447 to carry forward.

NORTH OF IRELAND PAPER MILL CO., LTD.—The report of the North of Ireland Paper Mill Co. for the past year shows a loss on on working of £57,100, as compared with a profit of £31,900 in the preceding year. According to the *Financial Times* the sum brought in reduces this to £34,700, and as there is still £30,000 to come in in respect of excess profits duty refunds the real deficit is only about £4,700. This puts a much better complexion upon the state of affairs and argues that the handicap on future profits will not be so great as appears on the surface. The directors state that the whole of the trading losses to date are covered in the accounts and that there are no outstanding contracts of an onerous nature to be dealt with. Stocks amount to £76,100—a decrease of £123,000. In respect of 1920 a dividend of 17½ per cent. was distributed.

CHARLES MORGAN AND CO.—In the report for 1921 the directors remark that depression in the paper trade was greatly accentuated in the latter part of the year, and this, combined with the general slackness in trade and the necessity of writing down stocks, has resulted in a trading loss of £36,263, the total being arrived at after providing for the balance of excess profits duty and corporation tax for 1920 and income tax. After deducting the sum of £9,493 carried forward from 1920, when a trading profit of £25,189 enabled a dividend of 15 p.c. to be paid, there remains a debit balance of £28,579 to be carried forward. The report adds that, in view of the fact that owing to a change in ownership new premises

had to be procured, the directors decided to purchase on favourable terms the extensive freehold properties consisting of Nos. 182, 183, and 184, High Holborn, with additional frontages to Smart's-buildings and Goldsmith-street, and the business has now been transferred from Cannon-street to that address, which, with the alterations which have now been made, are in every way suitably adapted for the trade. A portion of the premises is at present sublet, but will shortly be available, when it is intended to move there the stocks now in the warehouse in Southwark-street, and so have the whole business carried on in one building. On completion of this arrangement it is confidently anticipated that substantial economies will be effected in several directions.

NEW COMPANIES.

REGENT PRINTING CO., LTD.—Capital £1,000; publishers, journals, newspaper and magazine proprietors, printers, etc. Private company. Subscribers: G. L. Borrodaile and E. X. Robidoux. Registered office: 129, Regent-street, W.

MANOR PRESS, LTD.—Capital £500; proprietors and publishers of books, journals, magazines, etc. Private company. First directors: A. Craven, T. G. Craven, J. H. Craven and A. A. Craven. Registered office: 99, Corporation-street, Manchester.

F. J. DIPROSE AND SON, LTD.—Capital £1,500; printers, proprietors and publishers of newspapers, journals, magazines, books and other literary works, stationers, lithographers, type foundry, etc. Private company. First directors: F. J. Diprose and Mrs. Frances A. Diprose. Registered office: 81, Carter-lane, E.C.

D. SMITH AND SONS, LTD.—Capital £5,000; box manufacturers and merchants, stationers, printers, relief stampers, gold blockers, paper and cardboard manufacturers and merchants, timber merchants, etc. Private company. Subscribers: A. L. Fredericks and T. Nye. First directors: G. S. Brighton, J. Smith and J. C. Sherratt. Registered office: 19 and 20, Rupert-street, Leman-street, E.

LESTY AND CO. (1922), LTD.—Capital £1,000; lithographers, stereotypers, letterpress, music, photographic, intaglio and colour printers, printers' contractors, etc. Private company. Permanent directors: A. G. Jackson and E. H. Diprose.

PI-RA, LTD.—Capital £3,000; to adopt an agreement with F. W. Cook, A. H. Phillips, J. A. Houlton and J. Nevitt, trading as the Pi-Ra Photo Co., at Terrace-gardens, St. Albans-road, Watford, for the acquisition of the freehold buildings, works and factory there, and the stock, plant, fixtures, etc., used by them in their business of photographic picture post card manufacturers. Private company. Subscribers: G. Stracey and F. W. Cook. First directors: F. W. Cook (managing director), J. Nevitt and G. Stracey. Registered office: Pi-Ra Works, Terrace-gardens, St. Albans road, Watford.

"NATIONAL OPINION."—The *National Opinion*, Ltd., was registered as a "private" company with a nominal capital of £5,000 in £1 shares. Objects: To take over the journal *National Opinion*; to adopt an agreement with Lord Amphill, G.C.S.I., G.C.I.E., Col. H. Page Croft, C.M.G., M.P., and Sir Richard Cooper, Bart., M.P. (nominees of the Council of the National Constitutional Association); and to carry on the business as newspaper proprietors and publishers, etc. The signatories to the Memorandum of Association are G. N. D. Shaw and B. Hooper. First directors: B. Hooper (appointed by the said "nominees" who have the right to appoint half of the directors so long as they hold the shares allotted to them under the above agreement), E. H. F. Morris and Sir Richard Cooper, Bart., M.P. Registered office: 64 Victoria-street, S.W.1.

BELL'S RELIANCE MULTICOLOUR PRINTING PREPARATION, LTD.—Capital £3,000, in £1 shares; to take over the connection of A. Bell and R. T. Parker in the selling of a preparation known as Bell's Reliance Multicolour Printing Preparation in the United Kingdom, and to carry on the business of printers, lithographers, photographic printers, papermakers, printing ink manufacturers, advertising contractors, etc. Private company. Subscribers: R. T. Parker and A. Bell.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

SEARGEANT BROTHERS, LTD. (printers, Abergavenny).—Particulars of £7,000 debentures authorised March 30th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

PIONEER PUBLISHING CO., LTD.—Particulars of £3,000 debentures authorised April 6th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

STRINGERTYPE MANUFACTURING CO., LTD.—Issue on March 20th, 1922, of £200 debentures, part of a series already registered.

RAITHBY LAWRENCE AND CO., LTD. (printers, etc., Leicester).—Issue on March 28th, 1922, of £700 debentures, part of a series already registered.

A. AND S. WALKER, LTD. (printers and stationers, etc.).—Charge on 62, King-street, Manchester, with outbuildings and lands dated April 19th, 1922, to secure all moneys due or to become due from company to L.C.W. and Parr's Bank.

DAWSON PAYNE AND ELLIOTT, LTD. (printers' engineers, etc.).—Particulars of £150,000 debentures authorised April 6th, 1922, and covered by trust deed of even date, present issue £120,000; charged on certain lands and premises at Otley. Three capital redemption policies for £10,000, £200 and £15,000 respectively, and the company's undertaking and property, present and future, including uncalled capital. Trustees: London, City and Midland Executor and Trustee Co., Ltd. Also trust deed dated April 6th, 1922, to secure £58,690 debenture stock, charged on above-mentioned property, and subject to above debentures. Trustees: C. Payne and E. Scott, Otley, Yorks.

MANETTE PRESS, LTD. (music printers, etc., London).—Satisfaction to the extent of £500 on February 13th, 1922, of debentures dated November 30th, 1920, securing £4,500.

HUDSON SCOTT AND SONS, LTD. (printers, etc., Carlisle).—Satisfaction in full on March 31st, 1922, of "B" debentures dated December 9th, 1912, securing £8,000.

SIR ISAAC PITMAN AND SONS, LTD.—Satisfactions in full on January 17th, of charge dated March 24th, 1922, securing £2,300.

COUNTY END PAPER MILL CO., LTD.—First mortgage debenture dated April 7th, 1922, to secure £10,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holders: J. Griffiths, Union Bank of Manchester, Oldham; and W. Rostron, 17, York-street, Manchester.

RADCLIFFE PAPER MILL CO., LTD.—First mortgage debenture dated April 11th, 1922, to secure £20,000, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: L. Grimshaw, Union Bank of Manchester, Radcliffe, and W. Rostron, Bank of Manchester, York-street, Manchester.

Thief-Proof Fiberite Cases.

An interesting reference to the freedom from pilferage secured by fiberite boxes is made in a report which has been made by a committee of the London Chamber of Commerce. The Committee was appointed to investigate the allegation of pilfering of goods in transit on land. One of the inventions devised to obviate this complaint is the fiberite box manufactured by the Thames Paper Co., Ltd. The committee found that fiberite boxes made with wooden frame ends could not be pilfered without the destruction of the case, and that this was suitable for the inland trade and also the cross-Channel trade; but the committee did not consider that the cases would be most suitable for long voyages. They found that when boxes of fibre-board were secured merely by glue and sealed with printed paper tape there would be a possibility of opening the case by damping the paper bands and again gumming them down without leaving traces, but that this would

be a matter of considerable difficulty, and would involve a greater expenditure of time than would normally be at the disposal of pilferers. This possibility was, however, entirely eliminated in the case of one sample by strapping the box with the Signode system. It is claimed that the cost of these boxes, which varies with the numerous sizes and types, is normally less than that of an ordinary wooden case, and that they are suitable for units of from 56 lb. to 84 lb.

Cardboard boxes were exhibited by the Alliance Box Co. These boxes could be fastened either with wire staples or with bifurcated rivets, the latter affording the greater security, but costing rather more. The committee considered that such boxes had their strict limitations as regards the export trade, but that they would provide a fair amount of protection against pilferage for certain types of merchandise in the inland trade.

The manager of a Tunis Communist newspaper is reported to have been expelled by the French authorities.

Leatherboards.

The imports of leatherboards into the United Kingdom during March were as under:—

New Inventions.

Inking and Wiping.

Inking and wiping mechanism for plate printing presses, as patented by Messrs. R. Solomon and G. H. Shryock, comprises a frame 2 carrying a recessed table 3, a support 5 sliding on the table and carrying a plate 6, an ink trough 7 and roller 8 supplying ink to an inking roller 9, an adjustable wiping roller 12 in the path of movement of the plate, a scraper 23 bearing against the wiping roller 12 and secured to one edge of a box 24 for receiving the removed ink, springs 29 engaging the box 24 and yieldingly pressing the scraper against the wiping roller, and a flexible wiping band 51 wound on drums adapted for step-by-step movement. The roller 8 is positively driven and drives the inking roller 9 frictionally. The wiping roller 12 is supported by slidable bearing boxes 17, Fig. 1, adjusted

by swivelled screws 19 and pressed downwards by springs 13 adjustable in tension by screws 22. The box 24 slides in guides 33, Fig. 2, and may be released for removal by swinging the brackets 31, carrying screws 30 against which the springs 29 abut, about pivots 32. The drums carrying the wiping band 51 are mounted on spindles 50, Fig. 3, supported in the halves of bearing boxes connected by links and screws, and are given their step-by-step rotation by a reciprocating rod 61 which oscillates a rod 59 fixed to a pivoted arm 56. This arm is connected by a cross bar 54 to levers 52, which are pivoted to the spindles 50 and carry pawls engaging ratchets 62 on the drums. The band 51 passes under a felt pad 44 fixed to springs 45 secured to blocks 45' slidable in guides 42, and adjustable by swivelled screws 45". The whole of the wiping band mechanism is rotated by revolving shafts 36 fixed to discs provided with diametrical undercut slots 39 engaging the conical heads of bolts 40 secured to the lower flanges 41 of the guides 42.

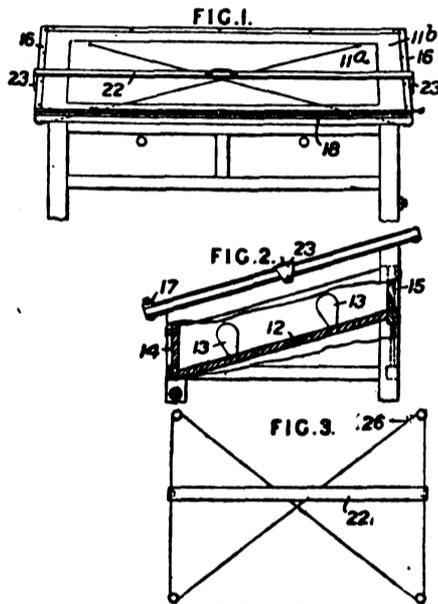

Waterproofing Paper.

A British patent has been granted to Mr. L. Kirschbraun covering a process for waterproofing paper. In the production of a waterproof paper or felted web, according to the process described in Specification 151,029, the emulsion is produced by a continuous process. The clay suspension, or the emulsified product of a previous operation, is heated to the melting point of the asphalt, and the molten asphalt, or asphalt and clay, added with rapid agitation. The mixture is produced and the supply maintained in a mixer having, for example, helical blades. As the mass tends to thicken, water of suitable temperature is added to maintain the desired viscosity and temperature. For binding media of high melting point, the emulsification is carried out in closed mixers under pressure. The emulsion is preferably added to the pulp at the mixing box between the machine chest and the screens and is formed into a sheet in the usual way. At the driers, the asphalt particles coalesce. Saturated sheets containing 30 parts of pulp to 58 parts of asphalt and 12 parts of clay may be used for roofs. Flooring felt, wrapping papers, lining papers, shoe elements such as counters, etc., may contain less asphalt. The

presence of sawdust in the pulp facilitates easy removal of water in the manufacture of thick papers. The waterproof sheet may be dried in a drying room at relatively low temperatures.

Inspecting Proof Sheets.

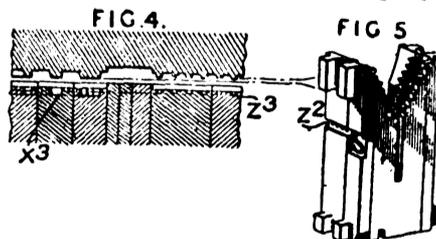

Messrs. E. L. West and Somerville and West have patented a device for inspecting printers' proof sheets, to determine the alignment of the series of printed pages, or other units thereon, which consists of a table having a transparent top, with illuminating means thereunder, and an aligning-bar arranged to move parallel to the front edge of the table. The table has an inclined top, beneath which is an inclined floor 12, preferably having a white surface and provided with lighting means such as lamps 13, which are accessible through hinged doors 14, 15. The table top comprises a sheet of glass 11a retained by metal end strips 16, and resting at its lower

edge against a straight-edge bar 17. The glass plate rests on a border surface 11b of wood covered with felt, etc. The proof sheet is clamped with its lower edge in contact with the bar 17 by spring clips operated by cams on a rotatable bar 18. An aligning-bar 22 is caused to move parallel to the bar 17 by attachment to an endless wire or thread 26, Fig. 3, passing around rollers. The bar 22 has end cheek pieces 23 carrying rollers which engage the underside of the table top, and may have ball bearings running on the strips 16. The proof sheet is placed with its lower edge against the straight edge bar 17, and the alignment of the printed pages is observed with the aid of the aligning bar 22.

Low Type Characters.

In order to avoid the perforating action of leader and other characters, type or type-bars bearing these characters are cast slightly be-

low full type-height so as to give a lighter impression. Type or type-bar matrices of usual form are employed, the formative cavities Z^3 , Fig. 4, of leader matrices being of less depth than those X^2 of ordinary matrices. Alternatively, the routing notch Z^2 , Fig. 5, of type-bar matrices may be made shallower than usual, or, in the case of separate type, a mould of less height than usual may be employed. The invention is by the Mergenthaler Linotype Co. of America.

Delivery ex Stock
at Prices not
Exceeding those
Asked for Similar
Second-Hand
Machines.

Exceptionally strong construction, excellence of design and workmanship, adequacy of inking, coupled with speed and lightness of running make the "TERNO" equally suitable for running at high speed as for printing of the closest registering colour work at normal speed. Its many distinct mechanical advantages made it deservedly popular throughout the world. It is built in 7 sizes. The practical speed of the Double Crown Machine is 2,700 per hour.

NUMBER 19.

[REGISTERED AS
A NEWSPAPER.]

LONDON: MAY 11, 1922.

EVERY THURSDAY.
PRICE TWOPENCE.

A Distinguished Visitor from the States.

Mr. Charles Francis of New York, One of the Most Eminent Printers of America, Interviewed in London.

In the course of a tour of the world on behalf of the Labour Department of the United States Government, Mr. Charles Francis, of New York, has arrived in England (by aeroplane from France), after travelling for nearly two years, during which time he has visited Japan, Australia, Tasmania, New Zealand and South Africa, as well as many European countries. Mr. Francis, whose house of business, the Charles Francis Press, is one of the largest printing offices in New York—therefore one of the largest in the world—is a veteran printer, whose name is honoured throughout American printedom. He is known not only as a master craftsman, but also as one who has rendered most eminent services to the printing industry by his whole-hearted and fruitful efforts to improve the relationship between employers and employed in the American printing and allied trades. There are only three American printers, so far as we know, of whom a bust has been cast in bronze; they are Benjamin Franklin, Theodore L. De Vinne and Mr. Charles Francis. People waited until Franklin and De Vinne were dead before honouring them in this way, but the compliment has been paid to Mr. Francis while he is still alive and able to appreciate it. Such a bust was presented to him on the occasion of his 70th birthday, February 16th, 1918, when a big complimentary dinner was held in his honour in New York, and all sections of the American printing trade, including both employers and labour representatives, joined in paying tribute to him on a scale on which no American printer had ever been honoured before.

Mr. Francis was kind enough the other day to receive a representative of the *British and Colonial Printer and Stationer* at the Hotel Cecil, where he has engaged a suite of rooms for his stay in London, and he had many interesting things to say as to his varied experiences and the opinions he holds after nearly 60 years as an active printer.

A Varied Career.

Although he has made his name in America, Mr. Francis is a Londoner born, for the first five years of his life were spent in this city; he was then taken to Australia, moving later on to New Zealand, where he served his time. He has recollections that while working eight hours a day as an apprentice in a printing office he used to put in another eight hours nightly feeding a cylinder press for a local morning paper, thus contriving to screw his wages up to the pitch of 16s. a week. In 1866 he was producing the *Otago Punch*, a weekly illustrated newspaper. He went later to Australia again, and then decided to see once more the land of his birth, reaching London

in a characteristic fog in the year 1868. For three years he worked as a compositor in the office of Fredk. Straker, 35, Camomile-street, Bishopsgate-street Within. At this time, by the way, he was a member of the London Society of Compositors. He had, however, the hankering for further travel, and decided on making a move for America, where he landed in 1872. Then came a series of business efforts—in Dubuque, St. Paul, Minneapolis, Chicago, etc.—in the course of which he proved his managerial ability, being successful in pulling several printing businesses out of the mire of financial trouble. He then went to New York, where he eventually took over the management of a bankrupt printing office on behalf of a creditor firm of paper merchants. That unpromising plant, which sold at the time for \$8,300, was destined to become under his management the successful Chas. Francis Press, turning out annually over \$500,000 worth of printing. The fascinating story of the Chas. Francis Press—together with a mass of interesting information and practical advice upon numerous important aspects of the printing trade—are to be found in the recently issued volume "Printing for Profit," of which Mr. Francis is himself the author, and which is published by the Bobbs-Merrill Co., of New York, in conjunction with the Chas. Francis Press.

The Charles Francis Press.

The Charles Francis Press, by the way, has much admirable colour printing to its credit. Some examples seen by our representative were of a particularly difficult character, such as two-colour work on tin foil, and two-colour printing on the thinnest of paper, worked in very large sheets. These jobs, after being rejected by other printers as impracticable were executed by the Charles Francis Press with entire success. The forte of the Press, however, is its magazine printing. It does on the average the printing and mailing of a publication every business day in the year, and on some days two or three are issued. These follow each other with the same regularity as the editions of a morning or evening newspaper, this being possible only because this Press like many others in America, has immense resources of machinery and equipment such as usually amaze the English visitor who sees them for the first time.

On his recent return to the Antipodes after more than half a century's absence, Mr. Francis was enthusiastically received by big gatherings representative of both employers and employed in the printing trades. The *Otago Daily Times*, referring to a dinner given in his honour said: "One of the warmest and most cordial welcomes ever accorded a visitor to

Dunedin was tendered Mr. Charles Francis by the Master Printers' Association, the Typographical Union and the Printers', Machinists, Bookbinders and Related Trades Union." And at Wellington there took place what a local newspaper described as "the greatest gathering yet held in Wellington of men engaged in the printing trade," when the Wellington Master Printers' Union in conjunction with the local newspaper proprietors gave a social in Mr. Francis's honour.

Accompanying Mr. Francis on his world tour is his distinguished daughter, Mrs. Lillian Francis Fitch, who is what in America is called a "counselor at law," i.e., a barrister. Like Mr. Francis, Mrs. Fitch has a service to render to the United States during the tour upon which the two are engaged, as she is an appointee of the United States Bureau of Education.

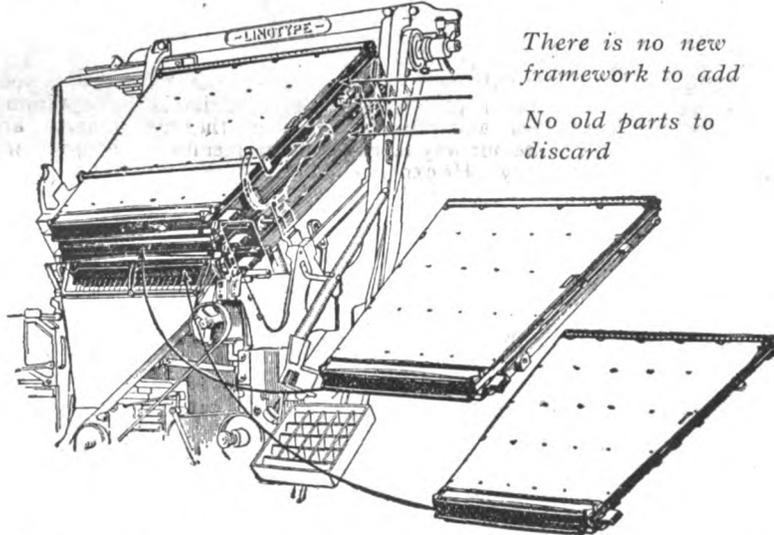

Impressions of British Printing.

Asked as to his impressions of technical progress in British printing, as compared with that of the States, Mr. Francis remarked that he noticed that some big strides forward were being made in this country. The amount of offset litho work now being done here has especially impressed him, and he thinks that in this particular line the home printer has progressed further than his American confrere. On the letterpress side, however, he holds with those who maintain that American printers are pre-eminent.

The question of the relationship of employers and employed is a subject in which Mr. Francis takes a very special interest. He realises keenly that needless loss is inflicted upon everyone concerned because workpeople and employers too often pull different ways instead of pulling together. He is out for co-operation between the two parties, in order that the energies of both may, instead of being dissipated in strife, be utilised for the creation of wealth to the advantage of both. In the application of these views Mr. Francis became the founder, and still is president emeritus, of the Printers' League of America, an employing printers' organisation formed to tackle labour problems in the spirit of co-operation. He was the originator, also, of the National Joint Conference Council, a body which serves in America much the same function as our own Joint Industrial Council.

Mr. Francis expects to leave this country on or about July 14th, sailing then for South America and completing the return to the United States by way of Brazil and the Argentine. Meanwhile his time is to be pretty fully occupied. He will be staying in London until May 20th, on which date he commences a tour of some of the important centres in the United Kingdom, his itinerary

ANY OPERATOR CAN CHANGE A MODERN ONE-MAGAZINE LINOTYPE INTO A TWO OR THREE-MAGAZINE MACHINE IN LESS THAN HALF AN HOUR

There is no new framework to add

No old parts to discard

The Linotype can be purchased with only one magazine if so desired. Two more magazines can be added in your own composing room at any time. This plan enables any printer to own the Linotype he needs. Even when sold with only one magazine,

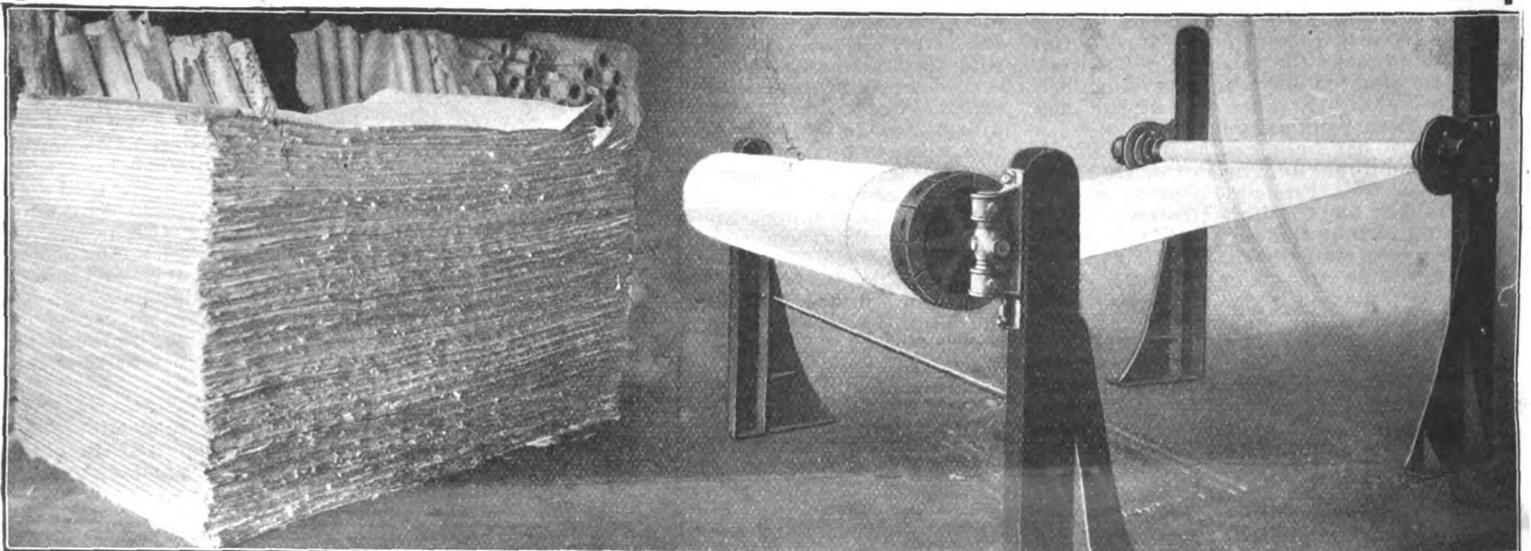

every machine is built and tested with all three. When you buy a one or two magazine Linotype, you buy a three-magazine machine with part of the equipment removed. Then when you convert it, you simply slip the removed parts back into place.

This is only one of the many advantages you get by adopting the Linotype way

LINOTYPE AND MACHINERY LIMITED, 9 KINGSWAY, LONDON.

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES:

- 1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading.
- 2.—It occupies a space of only six feet on the run, and is quite noiseless.
- 3.—The power required is such a small amount that it can be driven from any existing shafting.
- 4.—Centres of any kind or width can be worked on the machine.
- 5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day.
- 6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills.

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., *Engineers,* Myrtle Road Works, Brentwood, ESSEX

being as follows: Manchester, May 20th to May 23rd; Huddersfield, May 24th; Leeds, May 25th to May 27th; York, May 27th to May 29th; Edinburgh, May 29th to June 3rd; Aberdeen, June 3rd to June 5th; Glasgow, June 7th to June 16th. We understand that arrangements are being made for him to address meetings of printers in these towns, and we feel sure that at a time when matters of technical efficiency and industrial relations are of such vital moment, British printers will be eager to avail themselves of any opportunities provided to enable them to hear something more about printing trade developments in the United States and about American methods of tackling problems similar to those with which British printerdom is now confronted.

The Australian Paper Market.

Imports.

The imports into Australia of paper, stationery and printed matter during December last were as follows, the values for the corresponding month of 1920 being given in parenthesis:—

Cardboard and other paper boards, £12,644 (£35,315); printings, £215,845 (295,374); wrappings of all colours, £28,113 (£91,762); writing and typewriting paper, £32,336 (£140,552); other paper, £59,657 (£94,529); printed books, directories, etc., £73,275 (£92,230); and other stationery, £42,599 (£80,326).

The values for the first six months of 1920-21 and 1921-22 were as follows:—

Paper	1920-21	1921-22
Cardboard and boards	£171,070	£66,058
Printing	1,696,265	1,045,986
Wrappings (all colours)	312,566	122,848
Writing and typewriting paper	460,866	144,811
All other	570,408	295,148
Books, printed		
Directories, etc.	581,110	518,796
All other	457,449	274,431
	4,219,702	2,482,673

The imports for the month of January, 1922, were as follows, the values for the corresponding month of the previous year being given in parenthesis:—

Cardboard and other paper boards, £13,165 (£42,086); printings, £189,119 (£541,557); wrappings of all colours, £27,401 (£74,543); writing and typewriting paper, £43,096 (£133,923); other paper, £43,857 (£117,038); printed books, directories, etc., £71,171 (£127,628), and other stationery, £42,856 (£101,833).

Exports.

Paper exported from the Commonwealth during December, 1921, amounted to £3,776, as against £5,138 during the corresponding month of 1920. Stationery exported during December represents a substantial advance on the preceding December, the figures being £24,094 last December and £15,590 in December, 1920. During the first six months of 1921-22 paper exported amounted to £29,210, comparing with £52,184 in the corresponding period of 1920-21. Stationery exported during the six months' period (1921-22) stood at £112,227, as against £115,706 in 1920-21.

Exports of paper during the month of January, 1922, were of the value of £2,830, and a year before, £2,890. Stationery exports were valued at £10,747 during January last, and £12,693 in January, 1921.

Newspaper Proprietors' Association

Lord Northcliffe and Printers' Wages.

The following correspondence has passed between the Associated Newspapers, Ltd., and the Newspaper Proprietors' Association:—

The *Daily Mail*, London Editorial Department, Carmelite House, E.C., May 3rd.

Dear Mr. McAra,—You are no doubt aware that Lord Northcliffe saw Lord Burnham and Lord Riddell the other day about our relations with the Newspaper Proprietors' Association, and intimated to them that we did not see our way to continue as members of that body. He expressed, and I am desired to repeat, his grateful acknowledgment of the fine work done during the war for the British newspapers by Lord Burnham and Lord Riddell. Their long fight with the Press Bureau and the Paper Control was of infinite value to the Press as a whole, and will not be forgotten.

During the years of the war the Newspaper Proprietors' Association was therefore of great value to us all. But the situation is now quite different. Capitalists have come into Fleet-street who have made fortunes in other industries, and with no experience of newspapers at all. It is unreasonable that they should take part in dictating the conditions and wages of printers to those who have been associated with newspapers and printers all their lives. Lord Northcliffe strongly objects to certain proposed reductions in wages. We feel that we ought to have full liberty to deal with these matters ourselves. Therefore we desire to give formal notice to-day to terminate our membership of the Association.

In the event of any lightning strike, or other foreign method on the part of extremists in the Labour world, we shall act as drastically, and doubtless as successfully, as in the recent strike in Paris. Our colleagues can rely upon our full support if any section of workers should be so foolish as to attempt such action.

There are certain small responsibilities in regard to pensions which have been arranged in recent years, and we shall gladly honour our financial responsibilities for these as if we were still continuing membership.—Yours faithfully,

For the Associated Newspapers, Ltd.,
W. G. FISH.

The Association's reply is as follows:—

6, Bouverie-street, E.C.4, May 4th.
Dear Mr. Fish,—I am instructed by my council to acknowledge your letter of May 3rd notifying the resignation of the Associated Newspapers, Ltd. (comprising the *Daily Mail*, the *Evening News* and the *Weekly Dispatch*), from the Newspaper Proprietors' Association.

In order to avoid misunderstanding, my council desire to point out that your firm took a leading and active part in the recent negotiations for the revision of the trade union agreements regarding wages and working conditions. These were thought necessary owing to the fact that all classes of employees in London newspaper offices were still receiving the highest rates of wages paid during the war. Indeed, on October 12th last you yourself moved that "all the unions with whom the Newspaper Proprietors' Association had agreements should be requested separately to send representatives to meet the

council with a view to discussing the question of wage reduction." There was no disagreement as to policy, and your firm were actively concerned in all that was done. Until March 8th their representative regularly attended the meetings of the technical committee, at which these matters were discussed with the trade unions, and the council meetings, at which the recommendations of the committee were adopted. As a result, provisional agreements embodying wage reductions were entered into with five of the eight trade unions concerned. To these agreements your firm were parties.

As you are aware, the Newspaper Proprietors' Association was formed in 1906 at the suggestion of your firm to deal with labour matters, and in particular to settle rates of wages and conditions. Since then these functions have been performed satisfactorily in spite of many difficulties, and cordial relations have been established and maintained with the trade unions involved. In other ways, too numerous to mention here, the association has rendered valuable services to the Press and the public, in which your firm has taken an important part.

Regarding the question of proprietorship, I am desired to say that the association has never concerned itself with this subject. Every London morning, evening and Sunday newspaper has been admitted to membership, irrespective of its ownership or political views, as will be seen from the following list of members:—

“SLOGGER”

AUTOMATIC SHEET FEEDER.

We wish to inform all interested in automatic sheet feeders that we have acquired the **SOLE MANUFACTURING** and **SELLING RIGHTS** of this noted British Machine, and wish to advise you, that in future all enquiries and communications must be sent direct to us at our registered offices (**H.T.B., Ltd.**) at the address given below.

We have completed the equipment of a modern works, which now enables us to make prompt deliveries at a very competitive price of the latest model, which aroused so much interest at the Printing Exhibition of 1921.

Since the Exhibition there have been installed in Printing Works, at Home and Abroad, 35 of our **FEEDERS**.

We have pleasure in announcing that this **MODEL** is guaranteed for 12 months, and we will at all times give you every assistance to produce efficient and economical feeding.

Awaiting your esteemed commands and enquiries,

We are,

Yours faithfully,

H. T. B., LTD.

BLACKHORSE LANE, WALTHAMSTOW, LONDON, E.17.

Trade Notes.

NEWSPAPER POSTAGE.—In the House of Commons on Tuesday Mr. Pike Pease (Assistant Postmaster-General) informed Mr. Raper that the newspaper post had always been unremunerative, and the Postmaster-General could not see his way at present to modify the rate.

MR. CECIL CHISHOLM writes to urge that if the Postmaster-General can see his way clear to advance the date of the reduction to May 15th he will do an immense service to business, and to the printing trade in particular, for the month of May is one of the best months in the year for sales effort.

CONTINUATION SCHOOLS.—There was a full attendance of members at Tuesday's meeting of the London County Council, and a long debate took place on the recommendation of the Education Committee that the Council should seek release from its statutory obligations to provide day continuation schools. "Progressives" and "Moderates" favoured abolition of the schools, but Labour members strongly defended. Rev. J. Scott Lidgett moved as an amendment that the Council should approach the President of the Board of Education by deputation in order to confer with him as to the possible methods by which the existing difficulties in regard to day continuation schools might be removed. The amendment, however, was rejected by 92 votes against 15. The Committee's recommendation was then put to the Council, a division showing 74 for the motion and 27 against.

SATURDAY next, the 13th inst., is the date of the annual meeting of the Home Counties Master Printers' Alliance, the proceedings opening with the meeting at Stationers' Hall at 11.0 a.m. Luncheon is at 1.0, also at Stationers' Hall; at 2.40 members visit St. Paul's Cathedral, and at 4.0 members attend at the Mansion House for a reception and tea.

At the annual general meeting of the Association of Master Printers of the London Central Districts on Friday next, May 12th, at 5.30 p.m., in Stationers' Hall, Lieut. Col. J. R. Truscott, president of the L.M.P.A., is expected to be present and speak.

PRINTERS' RECREATION GUILD.—On Thursday last representatives from the various printing trade unions met the representatives of the Rochdale Master Printers' Association to consider the proposal to form a recreation guild. It was decided to form a guild which should eventually cover all the recreative part of the craft. A bowling and cricket tournament is to be started. For one of the events Mr. H. Ormerod, jun (Ormerod Bros., Ltd.), generously offered a cup to be played for. Mr. Haddock, editor-proprietor of the *Rochdale Times*, was elected president, Mr. W. A. Ashworth, of the Bookbinders' Union, was elected as secretary and a committee was formed from the delegates present.

THE annual meeting of the members of the Press Association, Ltd., was held on Tuesday afternoon at the chief offices, Byron House, Fleet-street, E.C., Colonel Sir Joseph Reed (*Newcastle Daily Chronicle*), chairman of the Association, presiding. After the meeting the Committee of Management met and elected Sir Joseph Reed again as chairman, and Colonel Lewis as deputy chairman for the coming year.

A NEW woman's periodical has made its appearance in the *Ladies' Field Fashions*, published by George Newnes, Ltd., at a shilling.

THE *Merthyr Pioneer*, the Socialist organ started in 1911, to which Mr. Keir Hardie was a regular contributor, announces the temporary suspension of publication. The paper was taken over by the Merthyr Independent Liberal party twelve months ago. The committee of management expresses the hope that it will be possible to resume publication when the economic position of the workers in the borough has improved.

ON Thursday the *Aberdeen Free Press* attained its fiftieth anniversary as a daily paper, and a special number of the paper was issued on the occasion containing numerous interesting articles on developments in northern journalism.

FACTORY MAGAZINES.—More than 60 editors of works magazines or "factory newspapers" attended the Conference of Works Editors at the offices of the Industrial Welfare Society on the 28th ult. The general opinion of this conference was that the factory magazine

should be non-political, and that it should contain no deliberate propaganda of any kind. One speaker stated that employers who respect their workers' freedom would refrain from exercising any power their works journal might have to influence thought or opinion on matters of party politics or religion.

AT the invitation of Viscount Burnham, president of the Empire Press Union, a gathering of distinguished British journalists met at the Savoy Hotel at luncheon last Thursday to do honour to Dr. Frank Crane, editor of *Current Opinion*, New York, and known as one of the most widely-read writers of the world's Press.

CHARLES WALKER, an Oxford bookbinder, died from heart disease while going upstairs with an early morning cup of tea to his wife.

THE death occurred on Saturday of Mr. G. H. Stonestreet, 54, of 53, Mabledon-road, a member of the firm of Stonestreet and Sons, printers. He took an active interest in the business up to about three months ago, when his health failed.

THE late Mr. George Heath Cantle, until lately a director of the Amalgamated Press Ltd., who died on June 2nd, left property of the value of £13,669.

MR. FRANCIS JOHN COLLIER, chief sub-editor of the *Morning Post*, and prior to that of the *Manchester Courier*, who died February 26th, aged 56, son of a former editor of the *Essex County Chronicle*, left £1,937.

MR. WILLIAM RAMAGE LAWSON, formerly on the staff of the *Dundee Advertiser*, the *Standard*, and the *Daily Telegraph*, afterwards editor successively of the *South Australian Register*, the *Adelaide Observer*, the *Edinburgh Courant*, and the *Financial Times*, and author of several books on finance, who died on January 15th last, aged 81 years, left estate of the gross value of £54,745, with net personally £54,621.

THE shop of Mr. A. G. Jones, newsagent, 44, Alexandra-road, Newport, was gutted by fire on Friday.

Trade Union Matters.

P. AND K. T. F. CONFERENCE.—It is difficult this week to find any of the leading representatives of the London trade unions in the printing trade, as most of them are off to Blackpool for the annual conference of the Printing and Kindred Trades Federation, which, as we mentioned last week, extends over Tuesday, Wednesday and Thursday. The wages crisis lends special interest to this year's conference, which we hope to report in next week's issue.

"NATSOPA" AFFAIRS.—We are glad to learn that the litigation which has darkened the sky of the National Society of Operative Printers and Assistants is at an end, and there is good hope of a period of rest from destructive internal strife in the union ranks. It is announced that, following the friendly intervention of a committee representing a number of London chapels, a meeting has been held between Messrs. Brodie, Smith, Hill and others and G. A. Isaacs and G. T. Bevan, and an understanding has been reached between all persons on both sides of the controversy, whereby all charges made are withdrawn, also the legal and other actions dropped, and no further charges or actions of any kind at law or under the society's rules to be preferred by either side.

LEEDS TYPOGRAPHICAL SOCIETY.—The quarterly report of the Leeds Typographical Society says that so far as the Typographical Association members are concerned there has been no change in the state of the printing trade in the Leeds district. The number of men unemployed has varied between 130 and 76, and since the close of the quarter there has been no improvement. The only gratifying feature to record is the special branch unemployment fund, where the debit balance of £66 at December 31st last has been turned into a balance in hand of £340. The income for the quarter included £1,530 from members' subscriptions, and £721 from the branch unemployment levy. The principal items of expenditure were £934 for association unemployment benefit and £301 for superannuation payments. Special branch expenditure included £315 for unemployment special grants, £137 for sick benefit, and £113 for branch unemployment benefits.

Bristol Master Printers.

The annual meeting of the South-Western Alliance of the Federation of Master Printers was held at Bristol on Monday last, when Mr. R. C. Hobbs, the vice-chairman of the Alliance, presided at the lunch given by the Bristol Master Printers' Association, and Mr. Frederick Steel presided at the meeting which followed.

In moving the annual report—which was submitted by Mr. G. F. Jones, J.P., the able secretary—Mr. Steel reviewed the present position of the printing trade and made striking reference to Lord Northcliffe's recent action in regard to wages (a reference which is reported elsewhere in this issue). He alluded to the concession which had been obtained by the Federation for workmen's compensation insurance, and urged all present to increase the membership during the incoming year.

Mr. H. V. Chappell, of the National Labour Committee, gave further details of the wages negotiations, and answered a number of inquiries as to the delay which had taken place.

Mr. A. E. Goodwin also referred to the critical position of the wages situation, and asked members to be patient and to give the committee their confidence. He replied to a criticism that the employers should not have undertaken to ask for no further reduction in 1923, and pointed out the advantage of stabilising conditions so that the whole trade would know that so far as labour costs were concerned there would be no further alteration. He referred to the attempts to introduce municipal printing, and asked that headquarters should be advised of any movements in this direction. He mentioned that they had been able to convince the Cardiff and Newcastle authorities of the folly of embarking on such dangerous experiments as municipal printing.

On the motion of Mr. Bodey, seconded by Mr. J. Corrigan, Mr. Frederick Steel was re-elected president and Mr. R. C. Hobbs vice-president of the Alliance.

SOUTH-WEST

London Master Printers' Association

Social Gathering at the Hotel Belgravia.

A new departure was taken by the South-West London Master Printers' Association on the occasion of their meeting on Tuesday last week. This took the form of a social gathering which comprised refreshments, music and short speeches.

Mr. J. D. Wise, the president of the local association, was in the chair, and Lieut.-Col. J. R. Truscott, president of the London Association, attended, together with representatives from the W. and N.W., S.E., N. and Thames Valley Associations. Following the reception and refreshments, Mr. Wise introduced Lieut.-Col. Truscott, who, he mentioned, had been working very hard for some time in connection with the wages negotiations. They were grateful to him for coming there that evening to encourage the South-West London master printers in their efforts at organisation, and at the same time give them the latest information concerning the wages negotiations. Referring to the progress of the south-west branch, Mr. Wise mentioned that there were three further members to be enrolled that night.

Lieut.-Col. Truscott, who was cordially received, expressed his pleasure at being present. He was only sorry he could not tell them very much which they did not know already regarding the question of wages, because they were in the middle of the ballot, which had been accepted by the unions. That in itself was a point gained.

The speaker went on to refer to the long hours and the arduous work which the negotiations entailed upon the members of the council. He thought when Mr. Langley, the vice-president declined to accept the main office in February last he knew something. (Laughter.) He hoped, however, that next year Mr. Langley would see his way to accept the office, because by that time he (Lieut.-Col. Truscott) would have had quite enough of it. (More laughter.)

Last week they had had a great many conferences with the men, and there were fifteen meetings altogether. It was very gratifying to realise the position which London occupied in relation to the industry of the country. The Federation president was constantly asking the advice of London, and on every occasion the advice put forward by London's representatives had been accepted. (Applause.)

With regard to the present demand for a reduction of 15s. (spread over eight months) for men and 7s. 6d. for women, the president emphasised the importance of the proposed stabilisation for twelve months after the reductions. That would give them a chance of settling down.

Reference was then made to the dangerous competition which was arising from various quarters, and mention was made of the fact that a large proportion of the novels of today were printed in America. He did not mention Germany, because even if wages came down to £1 per week, British master printers would not be able to compete in that quarter. They ought to have a tariff where Germany was concerned. Urging the necessity for a reduction in wages, the president mentioned that the high cost of printing was holding up a great deal of printing. Were they to say that their trade was to be the only one which should not bear its share in the general decrease in costs? He thought not. In conclusion he urged the master printers of London to stand firm in the present crisis.

Congratulating Mr. Burchell.

Lieut.-Col. Truscott subsequently moved the following resolution: "The members of the South-West London Master Printers' Association tender their best thanks and heartiest congratulations to Mr. W. H. Burchell, the hon. secretary of the Central Districts Association, on the successful issue of his untiring efforts on behalf of the craft in securing reductions in postal rates." The speaker said he had great pleasure in moving the resolution, because he knew Mr. Burchell had given a great deal of time and money to that most successful appeal; on one occasion he had sent out 1,000 is. telegrams.

Mr. Wise seconded the resolution, and was given permission to attach the names of the representatives of the other Associations to the resolution.

Mr. J. R. Burt, in the course of an address, said he believed the strength of master prin-

ters in London was to be maintained by these friendly visits of one Association to another. Their craft would be very much improved in status if there was more friendly communication between individual printers. It had been the folly of the past that they had looked upon their neighbouring printer as an enemy rather than one who was engaged in the same business and with whom they could consult. Referring to the difficult task which was now before the Labour Committee, Mr. Burt said the quicker this matter was settled the quicker would they bring prosperity to their trade.

Mr. Wise explained the position with regard to the wage negotiations, and pointed out that under the proposals of the employers the final reduction would not take place until January next, and after the first reduction of 5s., the average over the remaining period would be at the rate of 1s. 3d. per month, as against a figure of 1s. 9d. per month during the last ten months. Accordingly, if the fall in the cost of living was as great during the next eight months as it had been during the past ten the workers would still be better off so far as the purchasing value of their wages was concerned than they were to-day. If the present proposals were accepted the trade would know where it was for the next eighteen months, and that he regarded as a greater advantage to the craft even than the lowering of wages, because it would prevent people holding back their work in the hope that prices would become lower. While he did not suggest that 5s. reduction would so lower the price of print as to stimulate orders, it would be a source of hopefulness to the master printer, with the result that he would go out for orders with a better heart than he was able to do under existing conditions. It was by an increased amount of work that expenses were met, and not by a reduction of labour or even by lowering wages, because their departmental and overhead charges went on all the same. Therefore, it was increased output at which they must aim. Mr. Wise emphasised the mistakes master printers had made in the past in admitting too freely that printing was too dear. They needed to convince the public that printing was cheap in relation to the services it performed. Let them bring their costs to the bottom and go out for business.

Mr. A. Langley, in his address, particularly referred to the subject of wholesale houses going direct to customers, and asked for evidence of such competition.

Friendly and outspoken addresses were also given by Mr. Mizzen and Mr. Young.

The meeting agreed to accept the invitation to visit one of the paper mills of Messrs. John Dickinson and Co., Ltd., in June.

During the evening the company were entertained by Miss Gertrude Cole, Mr. Aspinall and Mr. Brevett, with Mrs. Aspinall at the piano. Mr. Spring (past president) also delighted the company with a recitation. A hearty vote of thanks was accorded to the artistes.

St. Bride Students' Night.

An enjoyable and excellent musical programme was provided by the students of St. Bride Printing School at the Institute on Friday last, the event being the annual concert which marks the completion of the evening classes for the session. The evening's entertainment was characteristic of all that St. Bride undertakes—being of an exceptionally high grade. This is as it should be, for it will probably be the last printing students' concert to be held at St. Bride Institute.

The programme was contributed entirely by the students and staff, including some of the old favourites such as Mr. R. Cowpere in his ventriloquial sketches, Mr. G. Willis, Mr. L. Askham, Mr. L. Burns and Mr. G. Culliford, and amongst the new contributors there was not a dull item (many of them proving of exceptional merit) during the long programme of three hours.

It has been said that during the present session St. Bride has reached the high-water mark of technical instruction. This remark can be applied with equal truth to the excellent social entertainment held on Friday last.

There was an exhibition of students' work done during the session, including the competitive work with the adjudicators' awards. The work brought home to those who are well qualified to judge, the high standard of craftsmanship done in the school both from a technical and artistic standpoint.

Printers' Managers and Overseers

ASSOCIATION.

PARENT CENTRE.

At the May monthly meeting of the P. M. and O. A., held at the "Old Bell," Holborn, on Tuesday of last week, a short business session was succeeded by a recital of "Prose and Poetry: Grave and Gay," by Mr. Jas. Ostell.

The president, Mr. S. M. Bateman, was in the chair, and there was a fair attendance of members, the number, however—perhaps on account of its being an exceptionally fine evening—was below normal.

The April minutes having been approved, the chairman remarked upon the fact that—for the first time in a long period—there were no candidates to be elected to membership.

Auditor Elected.

Nominations being asked for the post of auditor, three names were forthcoming: Messrs. Blenkins, French and Freeman. A show of hands was taken and Mr. French was declared elected.

Under the heading of "general business" the secretary read a letter received from Mrs. Acton, the wife of Mr. J. Acton of the National Institute for the Blind. Mr. Acton, it was explained, was involved three months ago in an unfortunate street accident in which his leg had been injured. Mr. Whittle mentioned that he had been in communication with Mr. Acton and intimated that Mr. Acton was hoping to be back at the Association's meetings at an early date.

The Forthcoming United Gathering.

The secretary then read three communications from the Liverpool Centre with regard to the forthcoming United Gathering, and from these it appeared that Liverpool members were afraid London would not be satisfactorily represented on this important occasion.

The chairman explained that he thought the writers of these communications were coming to conclusions before waiting to know what London was going to do. He understood that the secretary already had 30 names of members intending to go to Liverpool. He thought that the root of the matter was that Liverpool was arranging important functions on Saturday morning, including a reception at the Town Hall by the Lord Mayor, for which London members travelling on Saturday would be too late.

The secretary corroborated what Mr. Bateman had said. He added that the Liverpool centre had not asked for a list of names until the 5th inst., and he had to reply that a complete list would not be available until after the present meeting. Mr. Whittle explained that to travel on the Friday would mean a considerable increase of expense, whereas by travelling on Saturday members could get to Liverpool at 12.40 p.m., though they would be sorry thus to miss the opening proceedings.

Mr. Jarvis raised the question of whether the agreement to pay half fares of members attending would hold good for any who went to the trouble of travelling on the Friday. He proposed that half fare should be paid in such cases also.

Mr. Dawson seconded.

The secretary said he did not wish to see the party broken up. He thought they should all go together, either on Friday or Saturday.

Mr. Jarvis' motion, however, was put to the vote and was carried *nem con.*

Mr. Ostell's Recital.

The business agenda having thus been brought to an end, the chairman introduced Mr. Ostell, who had been transferred from the Liverpool centre.

Mr. Ostell was very cordially received, and proceeded to give his recital of "Prose and Poetry: Grave and Gay." This proved to be a varied programme and elicited much applause from those present. It included some well-known favourites, such as selections from W. S. Gilbert, as well as newer and less familiar pieces, and its range covered everything from comedy to tragedy. At the close of the recital a hearty vote of thanks was proposed by the vice-chairman, Mr. R. H. Berry, who said they had enjoyed a most entertaining time. This was seconded by Mr. Bateman, who commented upon the performance as being a remarkable feat of memory, and expressed the hope that they might hear Mr. Ostell again on some future occasion. The vote of thanks was endorsed by hearty applause, and Mr. Ostell briefly responded.

Municipal Printing Schemes.

Cardiff and Newcastle Efforts.

Representatives of the Federation of Master Printers were very busy last week dealing with the activities of two important municipalities, Cardiff and Newcastle-on-Tyne. On Monday Mr. E. G. Arnold and Mr. A. E. Goodwin interviewed the Finance Committee of the Corporation of Cardiff, where, as we have previously reported, proposals were under consideration for establishing a stores, with the prospect of a municipal printing plant being installed at no very distant date. The facts and figures presented by the master printers' deputation evidently impressed the committee, and the printers were assured by the Lord Mayor and the City Treasurer that they had no intention of embarking on such an ambitious project as a printing plant. It was pointed out to the committee, however, that many of these municipal printing experiments had started in a small way, and had grown to extravagant proportions. A deputation from the Printing and Kindred Trades Federation was also in attendance to urge that if a Gammeter machine were installed in the municipal offices it should be worked by trade union labour. The committee were asked whether, in the event of such a machine being installed, they would waive the fair wage clause for contractors who had to compete against the product of the machine.

The following day Mr. Goodwin was in Newcastle, conferring with the Newcastle Master Printers in preparing the case for submission to the Corporation on the following day. Mr. J. B. Leslie-Smith introduced the deputation, and Mr. Goodwin presented a statement claiming that there would be no saving to the rates if the proposals were carried out, and that the master printers of Newcastle were in a position to do the whole of the work more efficiently and more economically. Mr. E. G. Arnold gave several striking instances of the failure of such experiments, and stated that the only railway company that had its own printing plant was reported to spend more on its printing in proportion to its other expenditure than any other railway. He also referred to the failure of the State printing works at Harrow to secure contracts in open competition. An animated discussion took place after the deputation withdrew, the proposal to establish a plant being warmly supported by all the labour members on the council. One councillor suggested that the labour party on the council should improve their proposition by establishing their own paper mills and manufacturing their own lead pencils! The report was rejected, and referred back to the committee for consideration a year hence. In the meantime arrangements are being made for placing contracts locally, subject to a proviso protecting the Corporation against restriction of competition and standardisation of prices. The motion to reject the committee's report was carried by 38 votes to 19.

Caxton Convalescent Home,
LIMPSFIELD.

Opening of War Memorial Ward.

At the above institution on Saturday afternoon last the Federation of Master Process Engravers opened a memorial ward, dedicated to the memory of members of their craft who fell in the war. The ward is situated in the War Memorial Wing of the building, and is planned for the occupation of four beds.

In the presence of members of the Council of the Federation, and the Process Engravers' Society, Mr. Andrew Dargavel (president) declared the ward open, and gave a short history of the movement that had culminated in their presence at the Home that afternoon, paying a sincere and sympathetic tribute to the men whose memory they had met to honour. Concluding, he handed to the treasurer of the Home (Mr. C. W. Bowerman, M.P.) a beautifully illuminated Roll of Honour book, containing the names of the officers and men who had made the supreme sacrifice, to be placed in the safe keeping of the institution.

Mrs. Dargavel then gracefully unveiled a memorial plaque, bearing the inscription—

"This ward was endowed by the Federation of Master Process Engravers in memory of members of the Process Engraving Craft who fell in the war—1914-1919. 'None doubting of the cause, none murmuring.'"

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

Patents for Sale	2	0	
Legal and Financial Announcements	2	0	

Replies may be addressed to Box Numbers, Office of the "British and Colonial Printer and Stationer," 58, Shoe Lane, London, E.C.4 for which a fee of 6d. is charged to cover postage of replies.

Cheques and Post Office Orders to be crossed and made payable to **STONHILL & GILLIS.**

Telegrams: Stonhill, Fleet, London.
 Telephone: 8407 City.

Situations Vacant.

A LONDON Manufacturing Stationers are requiring the services of a REPRESENTATIVE with an established connection, either in London or the Provinces, to sell Lithograph and Letterpress Work, Duplicate Books, Printed Paper Bags and General Stationery; good sound commission, no expenses; a good opportunity where a change is contemplated.—Write, in strict confidence, giving amount of turnover and district.—Box 13940.

COMMERCIAL ARTIST.—A large firm of Printers have a vacancy in their Studio for competent ARTIST-ASSISTANT; must be good at Lettering and Figure Work, able to prepare Original Lay-outs; knowledge of Type Faces and Type Display essential. Write, stating age, experience.—Box 13939.

PRINTER'S PRESS READER wanted for East Anglia; state age and experience.—Apply, Box 13936.

PRINTING.—REPRESENTATIVE required for well-known London and Country firm, well equipped for Fine Printing.—Write particulars, in confidence, Box 13937.

TRAVELLER, with connection, wanted, for Process and General Engraving Business; good position for energetic man.—Full particulars and terms, to Box 13938.

Situations Wanted.

BINDER and MARBLER (Soc.), young, seeks situation; Colours or Inks.—Apply, Box 13943.

COMPOSITOR (T.U.) requires situation on Piece; used to Trade Papers and Tabular Work; quick, clean; 5 years' war service; age 30; good references.—Box 13945.

ENGINEER, NEWS PRESSMAN, qualified to take full charge as Manager in all departments; used to high-speed, up-to-date Rotaries, Auto-Plate Machinery, Stereotyping, Matrix and Half-Tone Production; accept position home or abroad; live man; steady; good references.—Box 13910.

LETTERPRESS OVERSEER (32) desires change, present position 5 years (12 hands); Charge Composing, Machine and Warehouse; Estimator, thoroughly practical; C. and G. Certificates.—Box 13930.

MACHINE MINDER (Miehles), Single, Twin or Trip Tandem Machines, well up in best class Work, Black and White and Colour Process, desirous of change; single, and with good references; Cross Feeder knowledge, etc.; society.—Box 13931.

Mr. C. W. Bowerman conveyed the warmest thanks of the executive of the Home to the Council of the Federation for associating their trade memorial with the beneficent work of the institution. He was sure that any patients sent to occupy the beds in that ward would derive lasting benefit. The handsome illuminated book would find a place of honour in the Home.

The sounding of "The Last Post" concluded the function.

PUBLISHERS' BINDER (middle age) seeks situation (Town or Country); good all-round; publishers' requirements and big output a speciality; could organise department.—Box 13942.

YOUNG MAN (20), expert Shorthand, knowledge Economics, Literary, seeks Journalistic opening.—Box 13941.

Agencies.

TRAVELLERS calling on Engineering, Motor, Produce, Corn, Asbestos, and similar firms, to sell SMALL CALICO SAMPLE POST BAGS; cheapest on market; 10 per cent. commission (weekly).—Box 13921.

Machinery for Sale.

DAWSON'S Quad Demy REVERSUS, with rotary slitter and Klimsch counter, fitted with Slogger feeder, £700.

FURNIVAL'S Quad Demy 2-REVOLUTION, with rotary slitter and Klimsch counter, fitted with Slogger feeder, £700.

DAWSON'S Quad Crown WHARFE, balanced flyers, rotary slitter, geared inkers and Klimsch counter, £250.

DISC RULER (Brissard), take sheet 24-in. by 26½-in., two-side, two-colour, £180.

DISC RULER (Brissard), take sheet 26½-in. by 33-in., two-sider, two-colour, £200.

DITTO, £200.

DITTO, with perforator, £220.

BOOK-FOLDING MACHINE "PREUSSE," take sheet 30-in. by 49-in. (running at 2,000 per hour, hand-fed), £200.

DITTO, £220.

All the foregoing machines are in full working order, and may be seen running by appointment with the Factory Manager, Messrs. E. J. Arnold and Son, Ltd., Butterley-street, Hunslet-lane, Leeds.

All offered subject to intermediate sale. Any reasonable offer will be considered. 13944

FOR SALE.—An ALL-SIZE MARINONI PERFECTING WEB PRESS, to print a sheet 40 by 50 in.; minimum cut 22 in. and by ¼-in. up to a maximum of 40 in.; width of web 40 in.; speed 4,000 to 5,000 per hour; open delivery; in good running condition.

A DRUM-CYLINDER FLAT BED PRESS by Messrs. Hoe and Co.; will print a sheet 40 by 60 in.; pyramidal inking; speed 1,200 per hour; in excellent condition.—Full particulars and prices from Temple Press, Ltd., 7-15, Rosebery-avenue, London, E.C.1. 13919

FOR SALE, by financial concern, Several LINO-TYPES with all Accessories; also ROTARY PRESSES. Good opportunity for buyers.—For full particulars, apply Box 13932.

Machinery Wanted.

WANTED, Second-hand CROWN and FOOLS-CAP FOLIO TREADLE PRINTING MACHINE.—Write, Box 75, c/o 35, New Oxford-street, W.C.1. 13933

Business for Sale.

TO PRINTERS and OTHERS.—For Sale as a Going Concern, an Old-established PRINTING BUSINESS in Liverpool, with extensive connection; turnover last year £6,800; good living for practical man or opportunity for opening branch.—For further particulars apply to Simon Jude and West, Chartered Accountants, 10, Cook-street, Liverpool. 13934

Miscellaneous.

COLONIAL NEWSPAPER CUTTINGS, dealing with the Paper, Printing, Stationery and Allied Trades, are wanted by Advertiser.—Communicate, stating terms, to Box 13882.

WANTED, BLOCKS (Odd or Series), Half-Tone, Line, etc.; suitable for small Magazine.—Particulars and price, to Simpson, Largs, Ayrshire. 13915

BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long) in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

Opportunity was taken by the ladies and gentlemen present to inspect the Home and grounds, and much satisfaction was expressed at the manner in which the whole institution—both inside and out—was being administered and carried on.

Tea, partaken in the spacious dining hall, and a photograph of the company on the lawn, brought a very interesting afternoon to a close.

THURSDAY, MAY 11, 1922.

Wages Ballot Being Taken.

ALL the trade unions concerned are this week taking the ballot on the employers' proposals of wage-reduction (detailed in last week's issue), and it is to be hoped that, in view of Lord Northcliffe's utterances, trade union members will bear in mind the distinction, which his Lordship has himself pointed out, between newspaper production and the general trade. There is growing evidence that foreign competition in printing is a much more serious menace than is generally supposed, and book, circular, bag, carton and colour work is undoubtedly going abroad. Though no one expects wages to be reduced to a level which would protect the trade from Continental competition, under the present condition of the exchanges, yet customers cannot be expected to pay the high prices which ruled during the war, and their desire to be loyal to the British printing trade would be more readily put into effect if a reasonable reduction in wages were made.

The Northcliffe Bombshell.

THE sensation of the week in printing and journalistic circles has been the announcement of the resignation of Associated Newspapers, Ltd., from the Newspaper Proprietors' Association. We print on another page the letter written on behalf of the Associated Newspapers, Ltd., to the Newspaper Proprietors' Association, together with the Association's reply. Lord Northcliffe followed up the publication of the letter of resignation by a long article from his own pen emphasising very forcibly his intention to act independently of other newspaper proprietors in the matter of wages, and urging that there is no need for wage-reduction in the newspaper trade. As regards the question of independent action, we believe the general view of all sections of the printing trade will be that independent action, though it may be of temporary advantage to a few, is contrary to the general principle of collective bargaining, and to depart from collective bargaining means to take a step in the direction of chaos in industrial relations. The well-worn maxim "Every workman in his union and every employer in his association" represents, we believe, the view of the great majority of those

who are aiming at the betterment of industrial conditions and the general advancement of the industry. Then as regards Lord Northcliffe's denial of the need for wage-reduction in the newspaper branch of the printing trade, one remembers first the very strong case put up by the general body of newspaper proprietors—and their arguments are backed by the fact that running at a loss, amalgamating, or ceasing publication seems a regrettably common state of affairs among newspapers to-day. Lord Northcliffe seems to regard newspaper production not as a commercial proposition but as a sport for millionaires. He rightly points out, nevertheless, the difference between newspaper production and the general printing trade. The big newspaper producer sells news and advertisements, and his labour costs form a comparatively unimportant section of his total bill. The general printer, however, sells printing, and because labour costs bulk much more largely in his balance sheet, wages uneconomically high mean a heavy handicap, especially in view of foreign competition.

Lord Northcliffe and the Printing Trade.

THE question of the effect which Lord Northcliffe's action would have on the general printing trade was touched on at Monday's annual meeting of the South-Western Alliance of the Master Printers' Federation (reported on another page). The chairman, Mr. Fredk. Steel, said the remarkable article which Lord Northcliffe had contributed to the *Daily Mail* that day on the matter of printers' wages, while referring exclusively to the newspaper side of the industry, could not fail to have a disturbing effect on the industry quite outside the newspaper world. It had taken many years of persistent and patient effort on the part of the workers and employers to build up organisations on both sides, so that collective bargaining might become possible and wages and working conditions could be fully discussed and regulated satisfactorily in the newspaper and printing industries. The organisation on both sides had been gradually improved and the machinery had, on the whole, worked smoothly. With the exception of one dispute which dislocated work in one area for a short period, there had been no serious differences during the past difficult ten years. The present dispute with the London Newspaper Proprietors' Association did not directly concern the Master Printers' Federation, but all trade unions and all employers' organisations were concerned if collective bargaining was made impossible or more difficult by the attitude of one man, however prominent, and the issue raised was a much bigger one than might appear on the surface.

The Master Printers' View.

SINCE writing the above we note that Col. J. R. Truscott, as president of the London Master Printers' Association, has written to the Press to put before the public the view which organised master printers take of Lord Northcliffe's action. "I was sorry to note," he writes, "that Lord Northcliffe and his associated newspapers had resigned from the Newspaper Proprietors' Association, because I had hoped that the days of collective bargaining had come to stay, it having been proved by experience the best method of arriving at fair settlements in the industrial world. It is further regretted that Lord Northcliffe's action should have occurred at the present moment, as it is likely to prejudice the issue in regard to a reduction in wages that is now being balloted upon amongst the various printing unions. It is true Lord Northcliffe points out that the general printer is in an entirely different category from the newspaper printer—first by reason of the very arduous and exacting nature of the latter's work, and, secondly, because the general printer has to face foreign competition, and at the moment

much work is going abroad with consequent lack of employment here owing to the high wages that prevail in the general printing trade. This important aspect of the question should not be lost sight of by your readers."

The "Daily Herald's" Position.

WITH the question of newspaper costs brought prominently into the limelight by Lord Northcliffe, special interest attaches to the current news as to the precarious state of the *Daily Herald's* finances. That this London daily has been on the verge of failure owing to the present-day difficulty of making a newspaper pay has been public knowledge for some time — its staff, in fact, has been under notice. It has, however, been saved from immediate collapse by its friends in the labour movement. The General Council of the Trade Union Congress and the National Executive of the Labour Party decided on Tuesday to guarantee the continuance of the *Daily Herald* for at least another six months. Meanwhile the question of the future of the paper is to be referred to the annual conference of the Labour Party at Edinburgh and the annual Trade Union Congress at Southport.

The Threat to Posters.

THE second reading in the House of Lords of the Advertisements Regulation (Amendment) Bill, brings again to the fore the danger to poster printers entailed in this Bill which gives large powers to local authorities to prohibit hoardings. The Federation of Master Printers is co-operating with the Billposters' Association in endeavouring to amend or defeat this Bill. Although it has passed its second reading in the Lords, it will certainly be subjected to a good deal of criticism in committee, and it will have to be introduced into the Commons. There is little probability of its being adopted as a Government measure, so that its chances of passing are small. Its progress will, however, be carefully watched by the printing trade.

Trade Boards Report.

THE recent report by Lord Cave's Committee on Trade Boards does not carry the matter much further. The effect, however, is to rebut the attacks on the system, or as a member of one of the boards put it, it is the "usual white-washing stunt of the Government." Mr. W. d'Lenny, the President of the Waste Paper Merchants' Association, judging from newspaper summaries of the reports, forms the opinion that, with the exception of the suggestion to speed up the routine of varying the rates, there is no particular recommendation that is of advantage to anybody. All the other points mentioned in the newspaper summaries are already in force. "We are where we were and we are expected to say, 'thank you,'" observed Mr. d'Lenny in conversation with a representative of the *British Colonial Printer and Stationer*.

Holidays in the Hand-Made Trade

A PROVISIONAL arrangement has been entered into between the Papermakers' Association of Employers of Carded Labour and the Original Society of Papermakers which provides for a cancellation of the old arrangement for holiday money and the substitution of a system of deferred pay, based on the number of weeks a man is working during the twelve months. According to the proposals which have yet to be ratified, a lump sum is to be paid to the workers at the time when the mill closes down. The amount is to be based on the wage of the job the man is engaged on at the time, and will fluctuate, of course, according to the cost of living under the sliding scale agreement.

THE Japanese market is reported to be understocked with paper, but fully supplied with dye-stuffs.

Personal.

LORD BURNHAM, as president of the Empire Press Union, presided over a meeting of the Dominion and Colonies and Indian Section of the Royal Society of Arts, at which Professor W. H. Eccles, F.R.S., vice-chairman of the Wireless Telegraphy Commission, spoke on the subject of Imperial wireless communication.

LORD BURNHAM said he did not think the broadcasting of news would be much of a danger to the Press as an alternative method of public information.

SIR JOHN LEIGH, who has been returned unopposed as Conservative member for Clapham, recently attracted considerable public attention by the purchase of the *Fall Mall Gazette* and *Globe*.

MR. J. MACLEHOSE, M.A., LL.D., visited Penrith on the 9th inst., thus completing his presidential tour of the twelve Alliances of the Federation of Master Printers.

LIEUT.-COL. J. R. TRUSCOTT, president of the London Master Printers' Association, attended a meeting of the Association of Master Printers of South-East London on Tuesday. Some interesting discussion, mostly of a private character, ensued on the subject of the wages negotiations and the position produced by the withdrawal of Lord Northcliffe's papers from the Newspaper Proprietors' Association.

MR. CHARLES FRANCIS is to address a meeting which has been arranged by the London District Committee of the Joint Industrial Council at Stationers' Hall on Friday the 10th inst., his subject being "Our Problems and our Responsibilities." The meeting is open to all the trade and will probably be the only occasion on which employers or workpeople will have an opportunity of hearing Mr. Francis in London.

MR. SISLEY HUDDLESTON has been appointed Paris correspondent of *The Times*.

MR. WALTER JOHN EVANS was entertained at luncheon on Thursday last at the New Metropole Hotel, S.W., on the occasion of his retirement after 28 years' service at Carmelite House. During a large part of that time he has been editor-in-chief of the *Evening News* and a director of the Associated Newspapers, Ltd.

LORD NORTHCLIFFE presided over a company which included the directors and heads of staff of the company and all its associated papermaking and publishing organisations, and in the course of his remarks reviewed his own association with the printing craft. "I knew how to set type," he said, "before I was seven. I have learned all sides of the newspaper business by practical experience. I can go down to-day to the machine-room and start and stop the machines. I can operate the linotype machine."

LORD NORTHCLIFFE handed to Mr. Evans as a personal gift from himself a handsome gold evening-dress watch, and Sir Andrew Caird presented to Mr. Evans a gift of plate subscribed by his colleagues, and said the *Evening News* had decided to make a present of the sum of £10,000 to Mr. Evans. The directors had further decided to give him a pension of £2,500 a year for the next 10 years, and afterwards for the remainder of his life, which they all hoped would be long, a pension of £1,000 a year.

MR. ST. LOE STRACHEY, the editor of the *Spectator*, is finishing his memoirs. They are to be published simultaneously here and in America.

ON the occasion of his departure from Cardiff in order to take up an appointment on the *Liverpool Post*, Mr. H. E. Beilby, a member of the *Western Mail* sub-editorial staff, was on Saturday at a farewell gathering presented with a gold signet ring, a pipe, etc., by his colleagues. The presentation was made by the news editor of the *Western Mail*, Mr. G. H. Sutton, and several other members of the *Western Mail* and *Evening Express* staffs added their tributes.

Mr. David G. Little.

Presentation on Leaving London.

Mr. David G. Little is leaving London to take up an appointment with the *Liverpool Daily Post*, after holding the appointments of Labour Secretary to the Federation of Master Printers and secretary to the Linotype Users' Association for just over three years.

Born at Linlithgow, Mr. Little was apprenticed as a compositor on the *Daily Review*, Edinburgh, and then worked on the *Scottish Leader*. He came south to Liverpool, being for ten years with the *Liverpool Mercury*, and, after amalgamation, fourteen years with the *Daily Post and Mercury*, Liverpool. He was for ten years president of the Liverpool Typographical Association and for six years a member of the Executive Council of the T.A. His knowledge of all matters connected with labour in the printing trade has been of great value in dealing with the many questions that have arisen during his tenure of office in London.

He will carry with him the best wishes of his many friends for continued success in his new sphere of work, with the hope that he will be blessed with good health for many years to enable him to do still further good work in the interests of the printing trade.

Tangible proof of his popularity was forthcoming at an informal gathering held last week at the offices of the Federation of Master Printers, 24, Holborn. As a mark of their affection and esteem, the staff of 24, Holborn, the secretaries of the Federation Alliances, Mr. F. L. Armstrong (secretary of the Newspaper Society), Mr. R. J. Lake (formerly director of the Federation) and Mr. F. S. Roberts (formerly labour secretary of the Federation), presented a gold Albert and pendant to Mr. Little and a silver chain bag to Mrs. Little, with an album which contained an illuminated title page, and in which personal letters from the donors were mounted. Mr. A. E. Goodwin, secretary of the Federation was unfortunately prevented by official duties from being present. In his absence the presentation to Mr. Little was made by Mr. A. Williamson and to Mrs. Little by Miss E. Mould. Mr. W. Whyte also spoke, and Mr. and Mrs. Little responded.

The New Postal Rates.

In the House of Commons last Thursday, Mr. Kellaway, on the Post Office Vote, reviewed the whole question of postal charges and in the course of his speech confirmed the reductions of charges as announced in our columns last week. Mr. Kellaway mentioned that the new postal rates in this country would come into operation on May 29th. He did not propose any reduction in the rates for the postage of parcels or newspapers.

In regard to the reduction of the printed paper rate the Postmaster-General said he hopes that the business community will help him by posting before 3.30 p.m. in London. The bad habit of posting late has much developed of recent years, and 25,000,000 out of 40,000,000 missives are posted after 5.30 p.m., or later. To make sure of being handled on the same day, papers with the halfpenny stamp must be posted by 3.30 p.m., or they may be held over; they will be dealt with at once, of course, if they have the penny stamp. As the hour of posting is largely a matter of habit, the Postmaster-General hopes that his appeal will not pass unheeded, and he also hopes that the unpatriotic practice of sending circulars abroad in bulk to be posted in foreign countries, where the exchange is much depreciated, for delivery in this country, will cease. It is estimated that this practice cost the revenue last year £15,000, out of a total from printed papers of £5,000,000.

In the course of the discussion, Mr. Foot put in a plea for the reduction of the newspaper rate. He said the farmer or the smallholder was absolutely dependent upon his newspaper for his news, and the raising of the postal rate on newspapers imposed a special hardship upon that class. He hoped that it might be possible for the Postmaster-General to go one step further and, at any rate, inform the House what cost would be involved by the alteration of the newspaper rate. He also urged a reduction in the parcel post rate, which had greatly affected the trade in Devonshire cream, which used to be sent in large quantities by post every week to London.

DIVIDENDS AND REPORTS.

WALL PAPER PREFERENCE DIVIDEND.—The directors of the Wall Paper Manufacturers announce that on May 31st they will pay the arrears of dividend on the 5 per cent. cumulative preference shares up to August 31st, 1921—namely, six months' dividend at 5 per cent. per annum. The report for the year to August 31st last showed a loss on trading of £878,610, and after payment of interim dividend on preference shares and taking in income-tax and contingencies reserve a debit balance remained of £557,203. The company had a very considerable claim for refund of excess profits duty.

NEW COMPANIES.

DOUGLAS PAPER Co., LTD.—Capital, £2,000 in £1 shares; paper bag merchants, stationers, dealers in printed and plain papers, stationery and paper making materials, etc. Private company. Subscribers: E. Douglas and V. C. Douglas. Directors appoint directors. Registered office: 10, Smithfield-market, Jamaica row, Birmingham.

SOUTHERN EQUIPMENT AND SUPPLIES Co., LTD.—Capital, £500 in 1,000 ordinary shares of 1s. each and 450 10 per cent. cumulative preference shares of £1 each; dealers in and manufacturers of all kinds of paper, paper bags and commodities, cardboard and other boxes, etc. Private company. Directors: T. A. Theelke and C. F. Bell. Registered office: 27, Queen's-road, Brighton, Sussex.

THOMAS AND NOBLE, LTD.—Capital, £2,000 in £1 shares; slitters, reelers and cutters of paper, fabrics, foil and other material, paper and pulp manufacturers, import and export merchants, shippers, shipping agents, carriers, wharfingers, waste paper dealers, etc. Private company. First directors: T. Thomas and A. J. Noble. Registered office: 44-46, Shard-road, Meeting House-lane, Peckham, S.E.15.

ADHESIVES, LTD.—Capital, £5,250 in 5,000 cumulative participating preference shares of £1 each and 5,000 ordinary shares of 1s. each; to acquire the business carried on at 7, Baldwin's-place, Gray's-inn-road, W.C., as the Col Wa-Glu Co.; to adopt an agreement with W. Noble and to carry on the business of importers and exporters of and dealers in glues, varnishes, paints and adhesive substances of all kinds, etc. Private company. Subscribers: W. A. Ford and G. E. T. Stebbing. First directors: W. Noble, E. S. King

and W. J. Bonnin. Registered office: "Bell House," 10 and 11, Cophthall-avenue, E.C.

EAGLE PRINTING WORKS (LINTON), LTD.—Capital £2,000, in £1 shares; to take over the business carried on by H. Titmarsh at Linton as the "Eagle Printing Works." Private company. First directors: H. Titmarsh and J. Siggs. Registered office: Linton, Cambs.

MACDONALD AND MARTIN, LTD.—Capital £120,000, in £1 shares; to acquire the business of newspaper proprietors and publishers carried on by T. L. Martin and R. S. Sligh as "Macdonald and Martin." Private company. First directors: T. L. Martin, R. S. Sligh and J. S. Macdonald. Registered office: 6, Essex-street, Strand, W.C.2.

A. R. GIBBON, LTD.—Capital £5,000, in £1 shares (2,000 cumulative preference); to take over the business of A. R. Gibbon, 24, Farringdon-road, E.C., and 8, Red Lion-yard, Warner-street, Clerkenwell, and to carry on the business of manufacturers of and dealers in printing inks, dry colours, varnishes, paints, enamels, and all materials used in printing, painting and decorating, etc. Private company. Subscribers: A. R. Gibbon and C. E. Gibbon. A. R. Gibbon is first director. Registered office: 24, Farringdon-road, E.C.

DIARY PUBLISHERS, LTD.—Capital £5,000, in £1 shares; to adopt an agreement between Straker and Crane's Diary Co., Ltd., Charles Straker and Sons, Ltd., and R. C. Welton, and to carry on the business of publishers, printers, etc. Private company. Directors: R. C. Welton and A. Widlake. Registered office: 206 and 207, City-road, E.C.1.

PHOTO PRINTING PAPER Co., LTD. (London)—Capital £500, in £1 shares; to acquire the business of drawing office stationers and printers carried on as the "Photo Printing Paper Co., by V. Niox, of 61, Marsham-street, Westminster, and to carry on the same and the business of photo printers, mounters, lithographers, printers and dealers in sensitised papers and other materials, etc. Private company. Subscribers: V. Niox and L. Componder. V. Niox is director.

GRIFFAST LOOSE LEAF Co., LTD.—Capital £1,000; manufacturers, sellers and distributors of business systems, loose leaf ledgers and all kinds of business books, etc. Private company. Permanent directors: Mrs. Eva M. Smith and H. G. Wells. Registered office: 45-7, Clerkenwell-green, E.C.

CAMBRIDGE CORRESPONDENCE COLLEGE, LTD.—Capital £3,000; to adopt an agreement with C. H. Stringer, P. J. Vinter and H. W. Hinchcliffe, and to carry on the business of teachers of languages, literature, science, art, mathematics, and all other subjects, printers, publishers, etc. Private company. Permanent directors: C. H. Stringer, P. J. Vinter (managing director), and H. W. Hinchcliffe. Registered office: Doughty House, 18, Doughty-street, W.C.

INTERSTATE ADVERTISING ORGANISATION, LTD.—Capital £2,000; to acquire the business carried on by C. H. Hicks at Premier House, 150, Southampton-row, W.C., as the Interstate Advertising Organisation, and to carry on the business of advertising agents, contractors, and consultants, etc. Private company. Subscribers: H. O. Fisher and Phyllis Wright. Registered office: Premier House, 150, Southampton-row, W.C.1.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

JAMES FORSHAW, LTD. (law stationers, etc., Liverpool).—Particulars of £900 debentures authorised December 20th, 1921; whole amount issued; charged on the company's undertaking and property, present and future

L. UPCOTT GILL AND SON, LTD.—Issue on April 4th, 1922, of £2,500 debentures part of a series already registered.

BRITANNIA FOLDING BOX Co., LTD.—Particulars of £7,000 debentures authorised April 25th, 1922; whole amount issued; charged on freehold land and building at Dacre-road, Old Ford, Poplar, and the company's undertaking and property, present and future, including uncalled capital.

CASTELL BROTHERS, LTD. (manufacturing stationers, etc.).—Land Registry Charge on 55, Clerkenwell-road, E.C., dated April 24th, 1922, to secure all moneys due or to become due from company to Barclays Bank.

PAPER AGENCIES, LTD. (Bristol).—Debenture dated April 24th, 1922, to secure £500, charged on the company's undertaking and property, including uncalled capital. Holder: H. V. Chappell, Three Queen's-lane, Bristol.

FORD PAPER WORKS, LTD.—Particulars of £6,000 debentures authorised April 6th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

PETERBOROUGH PRESS, LTD.—Satisfaction in full on January 3rd, 1922, of debentures dated March 28th, 1919, and January 25th, 1921, securing £2,000.

PLUMBE AND RICHARDSON, LTD. (printers, etc., Mansfield, Notts).—Particulars of £600 debentures authorised March 7th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

PLUMBE AND RICHARDSON, LTD. (printers, stationers, etc., Mansfield, Notts).—Satisfaction in full on April 10th, 1922, of first mortgage debentures dated February 2nd, 1917, securing £600.

GUNSTON, GREEN AND SIMPSON, LTD. (printers, publishers, etc., London).—Particulars of £1,500 debentures authorised April 24th, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled capital.

HERBERT REIACH, LTD. (publishers, printers, etc., Covent-garden, W.C.).—Issue on March 30th, 1922, of £1,000 debentures, part of a series already registered.

T. FISHER UNWIN, LTD.—Particulars of £10,000 debentures authorised April 25th, 1922; present issue £8,000, charged on the company's undertaking and property, present and future, including uncalled capital. These debentures rank as a first charge, the series created April 14th, 1915, being postponed to rank next after above debentures.

PARTINGTON'S KENT BILLPOSTING, LTD.—Satisfaction in full on March 10th, 1922, of mortgage dated May 4th, 1920, securing £700.

PICTORIAL PUBLICITY Co., LTD.—Particulars of £2,200 debentures authorised by resolutions of March 30th and 31st, 1922; whole amount issued; charged on the company's undertaking and property, present and future, including uncalled and unissued capital.

BANKRUPTCIES, etc.

Re **GEORGE ERNEST WHITEHOUSE** (formerly manufacturing stationers, 76, Hanover-street, Edinburgh).—This debtor attended before Mr. Registrar Mellor at the London Bankruptcy Court on May 2nd for public examination upon accounts showing liabilities £4,793 and assets "stocks and shares £1,000." Replying to Mr. Warren, official receiver, he stated that he started on his own account as above with a borrowed capital of £3,000, since repaid. In April, 1918, the business was taken over by a company formed for the purpose and styled "Ludgate, Ltd.," in which he received, as vendor, 4,160 preference and 5,000 ordinary shares of £1 each, all fully paid. He acted as chairman and managing director at a remuneration varying from £1,000 to £2,000 per

annum until May 9th, 1921, when the debenture holders appointed a receiver who took possession of the company's assets. Witness had since been without regular occupation, but had been engaged mainly on journalistic work, and in the publication of a monthly magazine called *Impressions*, which he had issued, intermittently, for several years past, but which had never paid its way. He attributed his insolvency to the failure of "Ludgate, Ltd.," to discharge a debt of £4,500 due to the petitioning creditor, for the payment of which he (debtor) had assumed responsibility. The examination was concluded.

Re DAVID DOMBROWSKI (trading as Davies, Lazarus and Co.), cardboard box manufacturer, 301, Commercial-road, and late of 261, Cambridge-road, E. The receiving order in this case was made on April 11th at the London Bankruptcy Court upon the petition of Thos. Goodall and Co., Ltd., and last week the first meeting of creditors was held before Mr. W. P. Bowyer, senior official receiver. According to the debtor's statement before the examiner, he was born in Warsaw and came to England in 1912. He obtained employment first as cutter and later as manager of a cardboard box factory, but in 1916 he started business on his own account at 35, Tenter-street, E., under the style of Davies, Lazarus and Co., with a capital of £200 lent by his wife. After a year's successful trading he moved to larger premises at 26, Great Eagle-street, and two years later to still larger premises at 261, Cambridge-road, E. Business continued good until the end of 1920, when, owing to a drop in prices, in some cases amounting to 75 per cent., profits disappeared and he began to lose money. In October, 1921, he consulted his solicitor with a view to transferring the business to a company, and on December 9th, 1921, "Davies, Lazarus and Co., Ltd." was incorporated with a nominal capital of £10,000. The purchase price to be paid for the business was agreed at £19,704, to be satisfied by the allotment of 3,000 ordinary shares and by payment of the outstanding liabilities of £16,704. The debtor attributed his insolvency to depression in trade and to the failure of the company to carry through the terms of the purchase agreement. The debtor has further stated that on September 7th, 1918, a fire occurred at his premises in Great Eagle-street, whereby stock to the value of £1,000 was destroyed. He received £520 from the insurance company in settlement of his claim. He suffered another fire in March, 1921, when stock to the value of £7,000 was destroyed at his stores in the railway arches, Birkbeck and Parliament-streets, Bethnal Green. In that case he accepted £6,700 in settlement of his claim.

The debtor returns his liabilities at £7,154 and the assets at £2,736. A resolution was passed for Mr. A. G. White, chartered accountant, 14, Old Jewry-chambers, E.C., to act as trustee, and wind up the estate with the assistance of the following committee of inspection, viz., Mr. Rd. Iago (John Dickinson and Co., Ltd.), Mr. Wm. Goodall (Thos. Goodall and Co., Ltd.), and Mr. W. H. Coon (James Spicer and Sons, Ltd.).

Camden Town Auxiliary Printers' PENSION CORPORATION.

On Saturday evening the Camden Town Printers' Philanthropic Society held the final concert for the season on behalf of the Printers' Pension, Almshouse and Orphan Asylum Corporation, at the "Royal Arms," Gaisford-street, Kentish Town. There was a large attendance, the chairmen for the evening being Messrs. C. McCarthy, F. J. Waller, E. O. Calcott, C. E. Nash, G. W. Newman and S. Pearce. There was a first-class programme arranged by the musical director (Mr. Calcott), Mr. T. C. Hooker acting as an efficient accompanist. The general arrangements in connection with the concert and throughout the season have been in the hands of Mr. S. Pearce (the hon. secretary), whose work is highly valued by the members.

At the close, Mr. W. A. Perkins (past president), announced that about £32 would be added to the funds as a result of the efforts of the gentlemen whose names appeared as chairmen on the programme for that evening, and he further understood from the secretary that he hoped to make the total returns for the past season reach £200. That was very gratifying, and the credit for the attainment not only belonged to the chairmen of the monthly concerts, but to the gentleman whom he (Mr. Perkins) had the honour of introducing to the Auxiliary as president two years ago (Mr. H. C. Bolton), and whom they were glad to see with them that night. There was also present the secretary of the Corporation (Mr. Joseph Mortimer), who was always welcome because of the keen interest he took in every movement likely to benefit the Institution. Mr. Mortimer did not perform the duties of his position in a perfunctory way, but showed that he had his heart in the work by supporting that and kindred auxiliaries. They were further honoured that night by the presence of their latest M.P. Mr. Naylor was an old personal friend of his, and at the same time an old political opponent, but he was sure those

present were pleased to know that they had so able a representative of their profession in the House of Commons.

Mr. H. C. Bolton (president of the Auxiliary) congratulated the Committee upon the success which had attended their efforts this year, and expressed the pride he felt to have been able to be of some little assistance. He trusted the Auxiliary would continue to progress, and do even more for the Corporation in the future than in the past.

Mr. Jos. Mortimer, O.B.E., referred to the fact that sitting near him was the son of a man who had been a wonderful worker on behalf of the Corporation. He meant Mr. Crespin, whose father—familiarily known to many of them as Bill Crespin—had left a record in the annals of their Institution which would remain for all time. Mr. Mortimer made a touching reference to the work as honorary secretary of the Auxiliary for many years of Mr. Harry Barnes, who had recently passed away; and then passed on to speak of the value which was placed by the Council on the work of organisations such as the Camden Town Auxiliary. The Corporation's family was a very large one, and the anxieties of the Council were considerably lessened through the readiness with which the working members of the trade came forward to help them in making provision for the old printer, the widows and the children of their comrades killed in the war. It was a pleasure to him (Mr. Mortimer) to see Mr. Naylor there. When Mr. Naylor was elected to the House of Commons he was not only glad because he was a member of their craft, but also because Mr. Naylor had proved himself in a number of ways a real friend of the Printers' Pension Corporation.

Mr. T. E. Naylor, M.P., asked the audience to take the remarks of Mr. Mortimer about himself with a grain of salt, as he was sure he did not deserve them. However, he was pleased to be present and to hear of the encouraging results of their season's work, and he hoped to meet them again at the garden party which he understood they intended to hold later in the season.

MESSRS. MARTIN AND CLARKE, wholesale paper merchants, 3, Joiners' Hall-buildings, Upper Thames-street, London, have issued their May stock and price list, printed on Purley Linen bond paper, for which they are the sole agents. Among the additions to the regular stocks is a good line of Drying Royle under the same heading as blottings. The list comprises a fine range of banks and bonds, copyings, manifolds and tissues, printings, writings, wrappings, etc.

Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

Lecture by Mr. G. A. Rutherford on the
Three-Colour Process.

There was the usual good attendance of members at the monthly meeting of the Association held on Tuesday of last week at St. Bride Institute, Bride-lane, E.C.4. The president (Mr. A. W. Hunt) was in the chair and the vice-president (Mr. H. Milton) ably supported. At the close of the brief routine business an interesting talk was given by Mr. G. A. Rutherford on the "Three-Colour Process," a subject, which, though many of those present were more closely identified with the trade as binders, provoked a useful and entertaining discussion.

The minutes of the last general meeting were read by the secretary, Mr. A. Cox, and confirmed.

The correspondence included letters from Mr. F. C. Peacock, thanking the Association for its donation to the Vellum Binders and Rulers' Pension; from Mr. Geo. Knight, on behalf of the Bookbinders' Cottage Homes, also conveying thanks for the Association's contribution to that Institution.

Arising out of the latter letter Mr. A. C. Ware proposed that the Association should grant a sum of three guineas as an annual subscription to the Bookbinders' Cottage Home. This was seconded but, Mr. C. Atkins, who, though fully in sympathy with the work of the Home, thought the proposition out of order, and that the matter should be left to the consideration of the annual meeting. The proposition was accordingly withdrawn.

The members next proceeded to discuss the venue for the annual outing to be held on July 3th, the two places particularly mentioned being Jackson's Millboard Mills and the Horton Kirby Paper Mills. After some discussion it was agreed that arrangements should be made for a visit to the latter mill, but failing this that another visit should be made to Jackson's Millboard Mill.

The stewards elected for the annual outing were Messrs. G. A. Eden, B. J. Sansom and H. Milton.

The president then called upon Mr. Rutherford for his lecture.

The Lecture.

Mr. Rutherford, dealing with the machine section of the trade, said he did not think that in all the various branches of the industry there was any other subject with such an absorbing interest as that of the three-colour process. There was such a feast of colour in relation to it and it was wonderful in many other ways and yet it was little known and understood.

The Proper Paper.

Referring first to the paper necessary to produce high-class work, Mr. Rutherford maintained that only high-grade paper should be used, because coating and finish were so conducive in bringing about fine work and light tones, and also the necessary softness. It was advisable when a three-colour job is to be undertaken, to have the paper sent immediately to the machine room, so that it might, so to speak, become acclimated to the atmosphere in which the job would be finally completed. On reaching the machine-room he thought that the reams should be stripped of their packing and stacked at least six inches above the floor, and that it was also advisable to select a place where light and air had free access. There was always an element of electricity in paper, but if precautions were adopted, Mr. Rutherford thought it possible to disperse to a minimum that electricity. If the machine-room was equipped to allow hanging, it was important not to neglect that method of maturing paper. He had found that if paper had only been hanging for twenty-four hours, a great deal of anxiety had been prevented.

The Work of the Pressman.

Having dealt with the question of handling in order to get the best merits out of the paper, the pressman now began his part. The plates, if a number were to be done, should be mounted on a board that should be tested to see that it was absolutely square and level. In regard to mounts, Mr. Rutherford said he had always found Parker's mounts to be reliable. The plates should be secured with only two rivets. It was essential that interlaying should have every attention, and it was a fact

that one hour underneath was worth two on top. When the plates were mounted it was advisable that they should be a shade below type-high to allow for interlaying. The next operation dealt with was the dressing or packing of the cylinder or platen, which of course should consist of a firm and taut surface.

Dealing with the process of making-ready, Mr. Rutherford advocated the making-ready of yellow plates with black ink. He was himself keen on this method and would not supervise a sheet unless his approval had been sought before the overlays were applied to see that the interlaying had been adequately done. Overlays should be cut from a fairly firm paper with a good printing surface so that they would yield a good aspect of the light, intermediate and heavy tones. He advised for this purpose the use of a three-ply sheet, light tones being cut away and the heavy ones increased. The correct method of cutting an overlay was to begin at the bottom right-hand corner and spread outwards and upwards over the sheet of paper. It was necessary always to keep a keen edge on the knife to ensure that the overlay is cut without a burr or drag on the cut-out portions of the sheet.

To Ensure Accurate Feeding.

Having adopted the methods of make ready applicable to each colour it is now necessary to apply the safeguards to obtain accurate feeding. To secure this the lay marks should be placed in the same place for each colour, and also the marks should be balanced for the paper to lie up against firmly, because when the fingers leave hold of the sheet there is a tendency for the paper to tilt. The smoothers by the lay marks should be poised so as to prevent the sheets springing upwards or backwards. The distributing inkers should roll lightly, firmly and evenly over the form, and the colour should be run up and set from the duct while distributing. Regarding interleaving, Mr. Rutherford strongly advised that it should not be done unless it was absolutely necessary. There was always a quantity of moisture in the paper, and interleaving would absorb a certain amount of it, which would consequently cause the register to be affected in the finished production.

Regarding the progressives of each working, pressmen were sometimes inclined to mix various makers' inks together. That, Mr. Rutherford thought, was a fatal mistake. It was better, he contended, that the colours to be used should be obtained from the block-makers.

Speaking of the scope of the tri-colour process, Mr. Rutherford said it was unlimited. It could be employed with equal success in the reproduction of old masters, water colour paintings, sea or landscape, Christmas cards, postcards, also for reproducing in facsimile the patterns of carpets, linoleums, cretonnes, illustrated catalogues, pottery, painted vases, animal and insect life, etc. Recently he was talking to a litho overseer, who had had a long experience of colour printing, and he incidentally presented him with a good specimen of the tri-colour process. Beyond that this gentleman admitted that it was a good specimen, he would not admit that this branch of letterpress printing was a serious competitor to lithography.

In concluding, Mr. Rutherford said that, given a good pressman, a good machine, good plates and good materials would bring tri-colour printing to the forefront, a position which it rightly deserved to occupy.

Discussion.

In opening a discussion Mr. A. G. Aves asked why it was better to prove the make-ready of the yellow by the black.

Mr. Rutherford, replying, said that the successful colour printer should have an education in colour schemes and effects. One got a better idea of the strength of the yellow tones by proving the make-ready in black.

Mr. W. F. Cribb remarked that it was sometimes averred that the three-colour process was not capable of securing a faithful reproduction.

Mr. Rutherford said the reason for that was because the subject was so little understood. He maintained that with letterpress three-colour work photographs could be most faithfully reproduced. It did not matter if a reduction had to be made from a double-demy to a large card, it was still possible to secure intensity of colours and softness of tones.

Mr. Sansom referred to the different effects produced on the surface of the paper by the offset lithographic method and that of the ordinary half-tone block, pointing out that

while it was possible to print well on the former with almost any class of paper it required a high-grade paper for the latter process. He also drew attention to the trouble caused by picking.

Mr. C. Atkins said as a poor binder he had not followed all Mr. Rutherford had said, but he had thoroughly enjoyed the lecture. It must not be forgotten, however, that the binder often made the work of the printer look more presentable before it got into the hands of the public.

Among others who contributed to the discussion were Messrs. E. F. Chibnell, A. Cox, G. J. Hellery, F. J. Ibbott, J. Lee, and A. C. Ware.

The president, after speaking briefly of the lasting effects of several examples of colour printing that he had met with, and the beautiful work which the colour printer was capable of executing, tendered the thanks of the meeting to Mr. Rutherford for his excellent lecture.

A vote of thanks to the chairman brought the meeting to a close.

Picture Post Cards and Postage.

SIR,—The Government has at last announced the reduction in the postage on picture post cards to a ½d., when bearing no writing excepting name, date, address of sender and addressee and a message not exceeding five words of courtesy or of a conventional character, and to 1d. with the correspondence unrestricted.

This welcome concession, to which your esteemed journal has contributed in no small measure, will naturally lead to a great revival in the use of picture post cards, and this the more so seeing that the agitation in favour of this reduction, extending considerably over twelve months, has given the picture post card an unprecedented publicity.

It is now up to the retailer to take advantage of this hard-won result and ensure for himself a constant, profitable and lasting trade by placing before the public a good and well selected stock of picture post cards, which will at once attract and encourage buying.

In this connection it is necessary to issue a note of warning! In the course of the long protracted controversy I naturally came across a large number of personages not only in the official world but also many public and private men, and time and again it was brought home to me that the high 1½d. rate of postage on picture post cards was not an altogether unmixing evil, as it had the effect of considerably reducing the circulation of the cheap, vulgar post card, not infrequently bordering on the indecent, which had come into vogue and pandered to the vicious taste.

Happily the production of such objectionable post cards was limited to but few firms who it is hoped will not resuscitate this deplorable style of post card, the exhibition of which in shop windows must naturally militate against the best interests and proper expansion of the picture post card trade. At the same time I would make a strong appeal to the retailer, absolutely to set his face against the re-introduction of all questionable post cards and only to purchase sound, meritorious and artistic subjects, of course not excluding wholesome humour, which is admittedly the salt of life. By their adopting this course, the hard-won postage battle for picture post cards will indeed prove a lasting victory.

Yours very faithfully,

ADOLPH TUCK,
Managing Director.

EXPORTING ELECTROS BY AEROPLANE.—A provincial firm of printers required a quantity of electros made and delivered in France at very short notice. Messrs. B. Dellagana and Co., Ltd., 11, Shoe-lane, E.C., made the electros and despatched them within a very few hours by the Instone Air Line Service, via Croydon, the blocks being delivered in Paris within a record time of the order being given. This is probably the first occasion on which an ordinary block order to a trade house of electrotypers has been exported in this manner.

STEREOTYPING

A Printers' Carnival and Ball.

Co-operative Printing Supply Festival.

It is always interesting to record the lighter side of the doings of those engaged in the printing and advertising trades, more especially when these serve to bring together employer and employee, inasmuch as this adds materially to the success of enterprise as well as to the happy relationship of all interested in business concerns.

On Saturday week the directors of the Co-operative Printing Supply, Ltd., and the companies associated therewith, namely Richmond Hill Printing Works, Bournemouth, the Barham Press, Handel-street, W.C., and the Rand Advertising and Sales Service, Ltd., entertained in a most sumptuous manner their employees and friends to tea at the Fusiliers' Hall, Handel-street, secured by kind permission of Col. W. R. Glover, C.M.G., D.S.O., T.D. Tea was followed by a concert, under the direction of Mr. J. A. Rowles, the secretary, Miss Webb, was the genius responsible for the fair. The concert party, known as the "Follettes," were, as amateurs, really good. Miss Rose Luff, Mr. Frank Hunt, Mr. Billy Warren, and Mr. Edwin Evison supplying the humorous items, whilst Mr. Tom Turner, Miss Eva Littlewood, Miss Ida Moores, and Miss Gladys Culley contributed to the more or less serious side of the programme. The company generally, however, was restless, anxiously waiting for the more boisterous proceedings to commence.

The hall was very prettily and tastefully decorated, coloured streamers and balloons hanging from the whole of the ceiling. Ranged on each side were various side-shows, starting with the well patronised houp-la stall, the Lancashire witch fortune-telling tent, and the ever-popular Lloyd Memorial Home lucky dip at the further end. The Indian telepathist, Varadachar Ras, was a great attraction; it was a most mystifying and astounding performance. Various other side-shows caused endless fun to both young and old. It was not until 9 p.m., however, that the fun broke out into the fulness of the true carnival spirit, when streamers, trumpets, balloons, comic headgear, and confetti were scattered from the balcony on the heads of the merry crowd below. Then—greeted with the uncontrollable laughter of onlookers, and in carnival and fancy costumes of every conceivable kind, a procession of some 200 persons paraded the hall, to enable the judges to select 17 of them to receive prizes,

the winner being a lady as an angel, whose wings were marvellously realistic. The costume of nearly everyone was both original and attractive; so much was this the case that it would be difficult either to give an adequate description or even to individualise. Prizes of exceptional value were

and ices were provided, and every person present received a suitable gift, with the compliments of the directors of the Co-operative Printing Supply, Ltd., suitably inscribed thereon. The following were the officials: President, Mr. P. Macnamara; vice-presidents, Messrs. H. Silverlock, J. Hopton, E. J. Mapp,

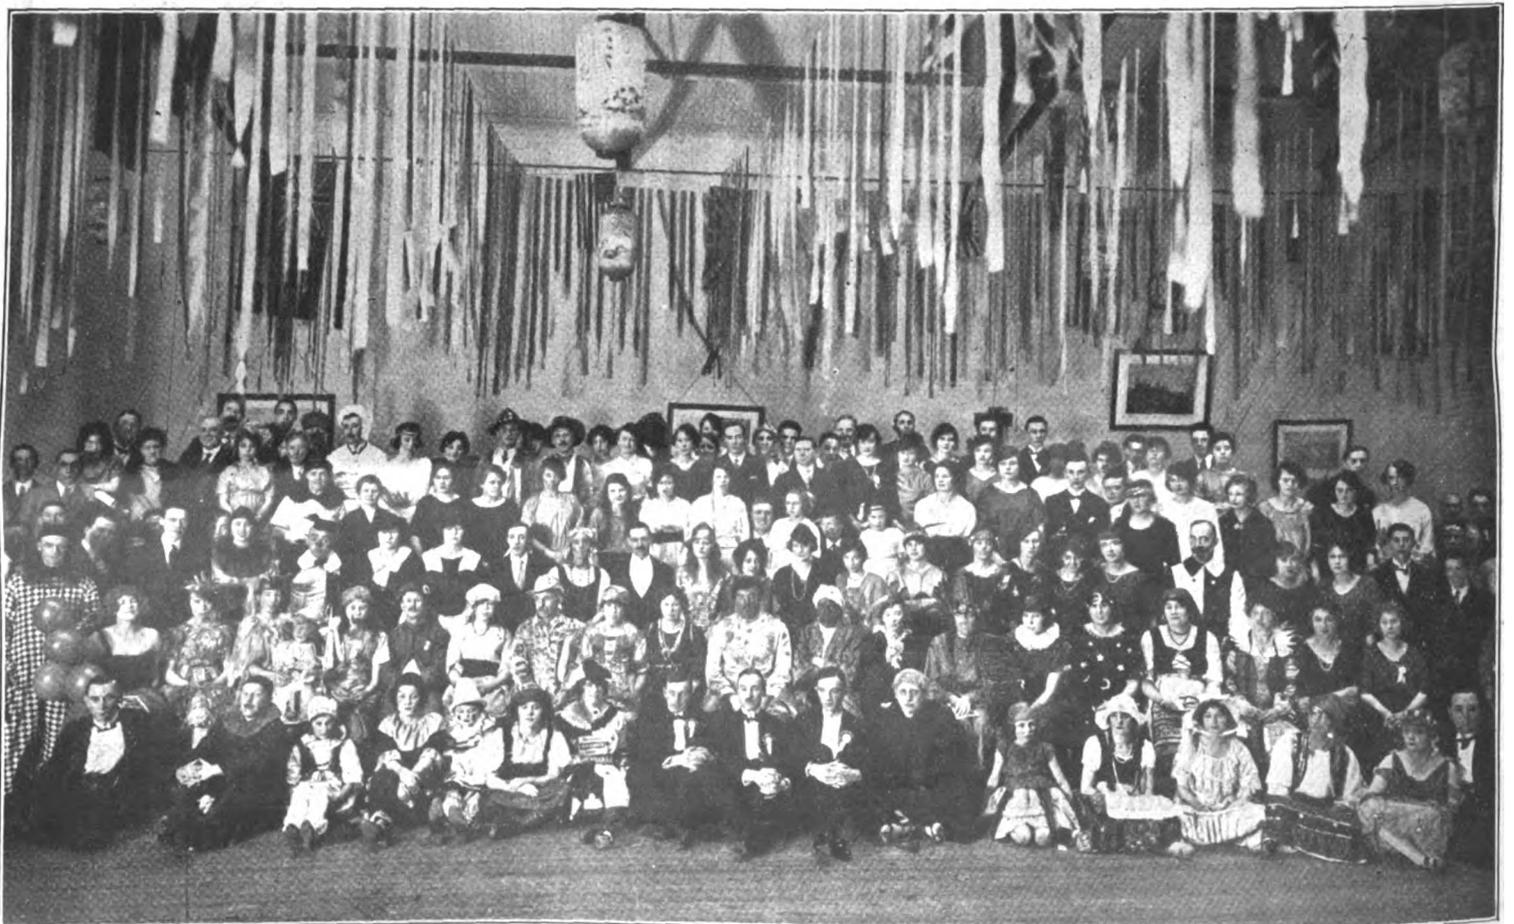

Some of the Fancy Dress Competitors.

given by Mrs. P. Macnamara, and the following gentlemen: Mr. E. Hopton, Mr. L. Fosh, Mr. E. J. Mapp, Mr. H. Silverlock, Mr. W. J. Rand, Mr. P. Macnamara, Mr. G. Macnamara, Messrs. W. and G. Foyle, and Messrs. R. T. Tanner and Co., Ltd. At 11 o'clock Mrs. P. Macnamara presented the prizes, the party breaking up at 11.30 p.m.

Throughout the evening light refreshments

W. J. Rand, G. Macnamara; musical arrangements under Messrs. J. A. Rowles, M.C. Sergeant Stimpson; stewards, the Misses Oten, Parker and Webb, Messrs. Briar, Law, Layzell, Marshall, Munden and Russell. Special mention should be made of the printing of the invitation card, which was tastefully arranged as it was unique in its appearance, whilst the programme was both

original and artistically produced—the three-colour blocks, fully up to the reputation of the Sun Engraving Co., being a contribution from this well-known firm, the art paper a gift from Messrs. R. T. Tanner and Co.—thereby swelling the proceeds resulting from the fun of the fair which the directors are generously giving to a printers' charity.

Mr. Charles Knights contributed the humorous cartoon used on the programme.

The prizewinners were the following—there being in each case two classes, one for ladies and one for gentlemen: 1st, Best Fancy Dress: Miss D. Easton—"Angel of Peace"; Mr. Phillips—"Cleopatra." 2nd, Cheapest and Best Fancy Dress: Miss Alice Cove—"Lotus Lilly" (Gibbs); Mr. Prose—"Moth Eton Boy." 3rd, Most Novel Fancy Dress: Mrs. Prowne—"Knut of the Ball"; Mr. Alderman—"Mrs. May." 4th, Representing Title of Well-known Book: Miss Irene Rand—"Nursery Rhymes"; Mr. Nockles and Mr. Symmons—"The Heavenly Twins." 5th, Well-known Advertised Commodity: Miss Munden—"Harlene"; Miss Pooley—"Black and White"; Mr. Munden—"Michelin Tyres"; Mr. Dell—"Black Cat." Spot Dance: Mr. and Mrs. Jameson. Ticket Prize: Miss Maude. There were also five consolation prizes.

Representatives of the leading daily newspapers, weekly journals and periodicals attended the carnival and many excellent commendatory reports have appeared in the leading dailies. The attendance reached nearly 600, and the great majority were in fancy dress.

Charity Sports Carnival and Ball.

To be held on Saturday May 20th.

The committee of the Football League and Charity Cups Competitions of the Printing and Allied Trade Charity Sports Association have been fortunate enough to secure the kind services of Mr. Philip Macnamara, Mr. W. J. Rand and other members of the Co-operative Printing Supply, Ltd., in repeating the splendid Carnival and Ball described and illustrated above. Tea will take place at 6 p.m., followed by the distribution of the cups and medals won during the year. The president, Mr. W. R. Masters, who has kindly promised to distribute the prizes on this occasion, will be supported by many well-known gentlemen connected with the trade. Those who heard the fine L.S.C. Band at the Printers' Exhibition will need no assurance that the jazz band supplied by them will be efficient and satisfactory. Prizes will be given for the best fancy dresses, and light refreshments provided during the evening, and a most enjoyable time is in store for those attending the function. The Carnival takes place at the Royal Fusiliers Hall (by kind permission of Colonel W. R. Glover, C.M.G., D.S.O., T.D.), Handel-street (near Judd-street), two minutes walk from Russell-square Tubestation, on Saturday, May 20th at 6 p.m. The tickets, including tea and light refreshments are 4s. 6d. each, and may be obtained from Mr. H. F. Parker, general secretary, 8, Albion-road, Wandsworth-road, S.W.8; Mr. G. H. Marks, Football hon. secretary, Fry's Metal Foundry, 42, Hollands-street, Blackfriars, S.E.1; or from Mr. V. Bowman, chairman of Football Committee, 21, Vicarage Park, Plumstead, S.E.18. The Committee hope that all who wish to promote the social side of the craft will come forward with their support on this occasion.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

CANADA.

A Toronto firm asks for names of English manufacturers of bond papers. (Reference, Office of High Commissioner of Canada, 19, Victoria-street, S.W.1.)

The Canadian manufacturers of a patented fibre wallboard invite inquiries from United Kingdom buyers. (Reference, Canadian Government Trade Commissioner, 73, Basinghall-street, E.C.2.)

British Photographic Papers.

New Exhibits at the Horticultural Hall.

British base papers are steadily making their way among the manufacturers of photographic materials. At the Photographic Fair held this week most, if not all, the exhibitors displaying photographic papers employ British materials for their purposes.

In the case of one particular firm a representative of the *British and Colonial Printer and Stationer* was informed that as the result of their co-operation with British manufacturers of the raw paper, they were using roughly half British and half French products. At one time, of course, it was entirely the imported paper that was used by the coating mills of this country. The war, however, demonstrated the danger of being dependent upon supplies from overseas, especially in connection with aerial photography. Accordingly, Wiggins, Teape and Co. and Alex. Pirie and Sons established mills at considerable cost and with meticulous care for the purpose of making base paper of the purity and quality required.

That they have met with success is admitted, and it was stated at the Fair this week that "if British papermakers have not quite reached the high standard in regard to surface which is necessary, they are making wonderful strides.

Thomas Illingworth and Co., Ltd., who have made a speciality of photographic papers, have two new lines on the market. Zona is described as the latest production of the Illingworth Photographic Paper Works at Park Royal, Willesden Junction. It is a chloro-bromide slow developing paper, specially made for professional photographers. The other new feature is the Collodion Self-Toning paper.

Messrs. John J. Griffin and Sons, Ltd., showed at the Fair papers and post cards manufactured at their paper factory at East Molesey, Surrey. Griffin's Noctona paper for amateurs is an improved and simplified gaslight paper.

The Autotype Co. make a speciality of their carbonyl process by which permanent carbon prints can be made direct from bromide prints and enlargements. This firm coat British base paper at their West Ealing works.

Pirie's base paper is employed for preparing the Kerotype "Honeycombe" Brand Transfer Paper, which is marketed by Criterion Plates, Paper, Films, Ltd., Birmingham. The paper enables beautiful transfers to be made to wood, opal, glass, silver plate and other materials and affords endless opportunities for decorative work.

Kosmos Photographics, Ltd., own the new gaslight paper Novex, which is described as a wonderful advance on anything which has been previously made in this category.

Other exhibitors of papers, cards, mounts, etc., were: Kodak, Ltd., Ilford, Ltd., the Platinotype Co., Amalgamated Photographic Materials, Ltd., the Leto Photo Materials Co., Ltd., Reginald E. Carter, Ltd., Elliott and Sons, Ltd., Gevaert, Ltd., Bean and Halliday (Leeds), Wellington and Ward, Iliffe and Sons, Ltd. (publications), and Jules de Gottal.

Sale of Printing Plant.

At a sale of printing plant, held at Leytonstone, last week, a demy-folio improved Albion press went for £5; a 21-inch hand lever diagonal paper cutting machine, on iron stand, for £13; a nearly new No. 1, 8 by 5 in. "Gem" platen machine, by T. C. Thompson and Son, fitted with treadle, for £15 15s.; a foolscap-folio "Victor" platen machine, by Forknall, for £36 10s.; and a double-demy Wharfedale printing machine, by W. Dawson and Sons, for £42 10s. A considerable quantity of type was sold at prices ranging from 2½d. to 3s. per lb.

FINSKA PAPPERSBRUKSFÖRENINGEN (the Finnish Paper Mill Association) have appointed Mr. Robert Hall, 60, Marchmont-road, Edinburgh, to act as sole agent for Scotland for their production of glazed and unglazed news-print. The seventeen news-print mills in the association have a yearly output of approximately 90,000 tons of news.

The Printing Trade and Postage Rates.

The Campaign against High Charges.—The Story of Twelve Months of Protest, and The Means Adopted to Obtain Redress.

By F. H. PEDGRIFT

(For many years business manager of "The Era").

It became known in May last that the Postmaster-General intended to increase postal rates. In the then state of trade and commerce, with increasing unemployment on every hand, the threatened increase in postal rates was considered by business men to be an egregious blunder. They foresaw the paralysing effect it would have on trade and commerce by restricting the use of publicity literature, "the life-blood of commerce," and the disastrous effect it would have on the unemployment problem. The correctness of these prophecies has been proved up to the hilt by the results which have since been manifested.

All industries are affected by high postal rates, but none so deeply as the printing and allied trades. The most important rate of all is the halfpenny rate on printed matter. This rate enables industrial firms to send out millions of catalogues, prospectuses, balance-sheets, circulars, price lists, invoices, statements, order forms, market reports, acknowledgment forms, mailing cards, etc. They are the oil which lubricates the wheels of commerce, and every printer in the kingdom is engaged in printing these. It was clear, therefore, that the printer would be hit, and that every industrial firm using publicity literature would receive a staggering blow.

With the knowledge of the effects the Post Office blunder would have on the printing industry particularly, and on users of printing as well as on unemployment generally, it was very natural to suppose that someone would rise to the occasion and take up the cudgels against this menace to trade and commerce.

It was Mr. W. H. Burchell, the governing director of the Caxton Press, Ltd., and hon. secretary of the Association of Master Printers of the London Central District, who at once commenced a vigorous protest campaign. Mr. Burchell has been connected with the printing industry for the past fifty years, and there is no subject affecting the welfare of the master printer and his employees with which he has not been identified. He has a name in the trade as an active, resolute man, always ready for prompt and vigorous action. For the Postmaster-General to threaten to raise by 100 per cent. the halfpenny postal rate on printed matter (the most important rate of all postal rates to the printer) was like showing a piece of red rag to a bull. Mr. Burchell very promptly prepared to charge, and this is how he set about it.

Printing Trade Circularised.

He sent out a notice to the whole of the printing trade, and to important industrial

firms. He headed the notice:—"A Bombshell," and it called attention to the fact that the printing trade was in jeopardy. "The bombshell which the P.M.G. has thrown into our midst must not be allowed to explode. The explosion is timed for June 13th, 1921, unless in the meantime the fuse is withdrawn." It continued: "Here is one simple instance of the effect it will have on the industry:—A printer has a monthly order to print 100,000 market reports; the present cost of postage is one halfpenny per ounce, equal to £208 6s. 8d. On the new rate after June 13th the cost will be £416 13s. 4d. What is the reasonable assumption of the action the trader will take in these circumstances? He will cut down the printing order by one-half."

Mr. Burchell also sent out a request to hundreds of industrial firms to sign a protest petition against the increase of postal charges. This petition was signed by 600 principals of leading industrial firms. This signed protest was duly presented to the P.M.G. at the House of Commons.

Mr. Burchell further convened a meeting which was held on June 6th, 1921, at Stationers' Hall. It was attended by leading representatives of the printing industry and commercial firms. The Right Hon. C. W. Bowerman, M.P., gave the meeting his support. A resolution was passed affirming (a) "That this special meeting of representative master printers held at Stationers' Hall, strongly protests against the action of the Postmaster-General in suggesting an increase in the postal rates for printed matter and postcards, and agrees to use every effort possible to prevent the suggestion being translated into actual fact, and that a copy of this resolution be sent to the Prime Minister and Mr. Kellaway, with a view to the proposals being withdrawn. (b) That a strong and influential deputation be appointed from this meeting to present personally to the Postmaster-General the views of the industry against the iniquitous imposts."

Following up this petition a campaign of protest in the Press was commenced. Every London newspaper inserted letters, leaders and paragraphs opposing the threatened increases. Members of Parliament were also approached, with the view to securing their opposition to the threatened increases.

The Fatal Day.

June 13th, 1921—a black-letter day to industry—arrived. It was the date on which the increased postal charges came into force. The opposing forces were not strong enough

to prevent the imposition. The time had been too short to effectively organise strong opposition. The Postmaster-General had his way!

Far from daunting Mr. Burchell, the rebuff served but to goad him on to fresh efforts. From June 13th, 1921, he has, by the courtesy of the Press kept up a running fire of protest against the effects of high postal charges. Members of the House of Lords and the House of Commons were approached by letter and interview. The Premier, the Chancellor of the Exchequer, members of the Cabinet and the Postmaster-General were all kept continuously advised of the disastrous effects the high postal charges were having on trade and commerce. Such a persistent and well-organised campaign could not fail to achieve results—and it did!

Mr. Burchell estimated that the increased charges meant a £500,000 weekly loss to Labour. The public repetition of this seems to have an effect on the Postmaster-General, for at a public dinner he said, "High postal rates are a crime against trade and commerce." At another public dinner he declared, "In comparison with the unemployment problem all other problems are as dust in the balance." This seemed to point to the conversion of the Postmaster-General, and later on it seemed clear that this conversion must have become complete when it was announced that the estimated falling-off in the nation's correspondence had amounted to 389,000,000 (three hundred and eighty-nine millions), this huge total being made up thus:

Printed matter	190,000,000
Letters	110,000,000
Post cards	77,000,000
Newspapers	12,000,000
	389,000,000

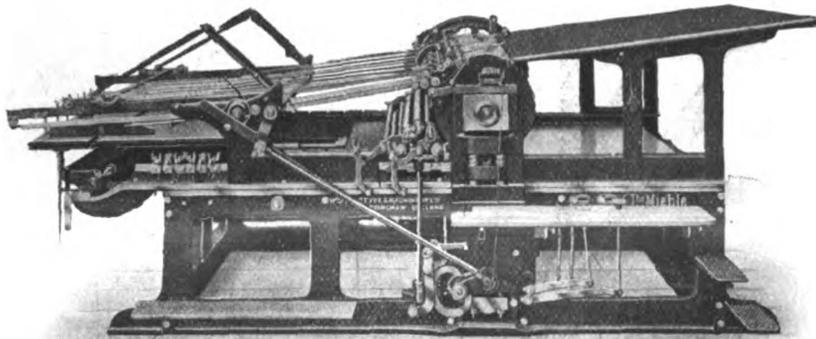

The immense loss to Labour which these decreases implied is obvious. Reckoning £500,000 a week for a period of twelve months, the total comes to twenty-six millions.

In a personal interview which Mr. Burchell had with the Postmaster-General all doubts of the latter's conversion were removed.

Twelve Months' Costly Experiment.

It is beyond comprehension why this costly experiment should have been allowed to drag on till Budget Day, May 1st, 1922. Mr. Burchell thinks that, directly the serious falling-off in the nation's correspondence became known, reductions should have been made at once. The increases were put up in a broken fiscal year, viz., June 13th, 1921. Therefore the reductions could as easily have

YOU can get into line with the best by installing a **MIEHLE** two-revolution press.

IT IS BUILT WITH A MICROMETER,
but does not need a micrometer to run it.

When you have a Miehle you will be able to print black and three-colour work equal in quality to the best produced by any other printers in the country—and good printing commands good prices.

The best advertisement for the Miehle is the Miehle. It has been the means of assisting many hundreds of printers to establish their businesses in the front rank, and what it has done for them it can do for you. The Miehle has, over and over again, proved that the best is the most profitable.

Shall we send full particulars?

The Miehle

been made at any time in a broken fiscal year.

Amongst those who have effectively protested against high postal charges should be mentioned Lord Blyth, who is a warm advocate for the return to the charge of one penny for letters. He has given, in the Press, interesting allusions to the late Sir Rowland Hill's scheme of the penny post, and told how "the great plan spread like wild fire through every country possessed of a postal system." Lord Blyth thinks that "if we instituted a world-wide penny post history would repeat itself." Then Sir Adolph Tuck has ably and successfully championed the cause of the picture post card industry, doing much to ensure the reduction in postal rates on post cards. Lord Southwark, the Right Hon. C. W. Bowerman, M.P., Sir Rowland Blades, M.P., Mr. T. E. Naylor, M.P., and many other members of Parliament have voiced their protests against high postal charges. Deputations to the Chancellor of the Exchequer and to the Postmaster-General have doubtless had much effect, and in these and other efforts the Federation of Master Printers, the trade unions and Chambers of Commerce—all have joined in the general protest.

For the re-introduction of the most important rate of all postal rates, the halfpenny postal rate on printed matter, upon which depends a vast amount of employment in the printing and allied trades, I am convinced that Mr. W. H. Burchell is mainly responsible. His twelve months' incessant protest campaign in the Press, and his unanswerable representation to members of the House of Lords, the Premier, the Chancellor of the Exchequer, Members of the Cabinet, every Member of the House of Commons and to Mr. Kellaway have at last borne fruit.

Relief at Last!

The life-blood of commerce, publicity literature, will now, no doubt, be stimulated into active circulation. Huge publicity schemes will be let loose, yielding employment to the workers of the printing industry and increased revenue to the Post Office, even causing greater employment in the Post Office itself. As already stated, the Postmaster-General himself is converted to this belief.

The letter and reply quoted below were largely circulated as far back as November last, in the London and provincial papers. Mr. W. H. Burchell is very proud of the important results this achieved. He thinks that the pressure brought to bear on every Member of Parliament in the Kingdom had the effect of influencing the Government to listen to the protests from members who had been urged by their constituents to take up the matter. He urged that all industrial firms and master printers throughout the United Kingdom should adopt a similar course, and get the correspondence reproduced in their local newspapers. The following is a copy of the letter sent by Mr. Burchell to his local Member of Parliament (Lieut.-Colonel Sir W. R. Greene, Bart., M.P., Member for North Hackney): "As one of your constituents, I beg to ask, in the interests of trade and commerce generally, the printing industry, and unemployment, that you will personally approach the Postmaster-General with the view of urging upon him the immediate necessity of re-establishing the halfpenny postal rate on printed matter, against the abolition of which there has been such an outcry in the kingdom."

Mr. Raymond Greene's reply, dated House of Commons, November 10th, 1921, was as follows: "I have received your letter and enclosure with regard to halfpenny postage. No one feels more strongly than I do on the subject of cheap postage as an incentive to trade, and I have always been opposed to the principle of attempting to raise revenue by increasing the postal rates. I am taking up the matter very strongly with the Postmaster-General, and am glad to know that in doing so I have the support of so influential a body as the Association on whose behalf you write."

Power of the Press.

For the invaluable assistance the Press has afforded to the postal protest campaign, letters of thanks on behalf of the printing industry were sent to all those papers who have helped. Such a letter from Mr. Burchell to the *British and Colonial Printer* was cited in an article on the reduction of the postal rates in the May 4th issue of this journal. He is now being inundated with congratulations on the successful result of his postal campaign. Amongst the correspondents are Members of Parliament, leading industrial firms, secretaries of associations and private persons.

Although a certain highly-placed official has attempted to discount the value of an "eleventh hour campaign" organised for the purpose of presenting a petition for a larger decrease in income-tax, yet Mr. Burchell is of opinion that the power of the Press in rousing public opinion on subjects affecting the welfare of the subject is unrivalled and, if persistently employed, at the proper time, commands success. Mr. Burchell states this with the experience he has gained in the success of his recent postal protest campaign, for he believes that, without the publicity which the Press affords, but little could have been accomplished.

Coming Postal Reductions.

Instead of resting after his laborious campaign, Mr. Burchell says he is now out for further reductions, say:—1d. for letters, ½d. for post cards, and ¾d. for two ounces of printed matter.

In regard to these further steps in the direction of national prosperity, Mr. Burchell says, as he has continually been saying of the concessions now agreed to, Why not do it now?"

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

CANADA.

A Toronto firm of manufacturers of printing inks, who are also wholesalers of chemicals, dry colours, etc., desire to obtain the representation of United Kingdom manufacturers of iron perchloride, zinc oxide, alums (special), drugs, heavy chemicals, dry colours, dyestuffs, varnishes, and merchants of gums and shellacs. The manager of the firm's chemical department is leaving Canada in May to visit this country, and firms interested can be furnished with his address in London. (Reference No 489.)

Wages in the Paper Trade.

Negotiating Committees Arrive at an Agreement.

A meeting of the Executive Council of the Employers' Federation of Papermakers and representatives of the National Union of Printing and Paper Workers and of the Amalgamated Society of Papermakers was held at the offices of the Papermakers' Association on Friday the 5th inst., further to discuss the employers' proposed National Agreement No. 3. Mr. C. R. Seddon, president for the employers, occupied the chair, with Mr. G. Harraway, president of the N.U.P.B.M.R.P.W., who led for the unions, in the vice-chair.

It had been understood that the employers would have been furnished with the result of the ballot taken among the union members on the employers' proposals, but, as Mr. Harraway explained, it had not been possible to do this owing to sufficient time not being available. No details of the ballot result were given at the conference, but the vice-chairman indicated that there was a large majority against the proposed terms. The chief objection, he added, had reference to the extension of hours and the elimination of the provision for holidays.

Some discussion took place on the points of difference, and each side consulted in private. Eventually Mr. Seddon, after conferring with his colleagues, put forward a suggestion with regard to hours which met with acceptance on the part of the unions, and it was agreed that the respective secretaries should meet immediately to prepare a final agreement for ratification. The agreement will operate as from May 4th, and the first reduction under the scheme will take effect on June 1st.

Mr. Harraway expressed the satisfaction of himself and his colleagues that the conference had been able to come to an agreement which would avert any rupture in the paper trade. He confessed that neither the members nor himself saw a way out of the difficulty until the suggestion came from the chairman of the Employers' Federation which threw a bridge across the chasm which divided them into two separate camps. He moved a cordial vote of thanks to Mr. Seddon for his valuable services in the chair.

Mr. A. Fowler, general secretary of the Amalgamated Society of Papermakers, in seconding, remarked that Mr. Seddon had the warm respect of both sides, and he had earned the gratitude of all who were concerned with the welfare of the industry.

Mr. Seddon, in reply, was glad to think they had reached an amicable settlement following upon negotiations which had represented a very hard task for both sides.

The clauses of the agreement provide for wage adjustments according to the variations in the cost of living and for minimum hourly rates, an arrangement which should ensure peace in the paper industry.

The pulp and paper industry of Canada is beginning to show improvement. Several companies are contracting for various mills output. The Provincial Paper Mills, Ltd., have placed an issue of \$600,000 on the market, and this was followed by an issue of \$1,374,000 bonds by the Wayagamack Pulp and Paper Co.

Trade Notes.

ON the occasion of the visit of the King and Queen of England, the Belgian Press Association on Wednesday evening entertained journalists from London to a great banquet.

FEDERATION ANNUAL MEETING.—Invitations have now been issued to every member of the Federation to be at Glasgow from June 3rd to June 9th for the annual meeting and costing congress of the Federation. We hear there has been a good response, there being a large number of applicants for accommodation, so that all who intend to go to Scotland should not delay sending in their forms. The Reception Committee are determined to make the Glasgow gathering in every way a success, and in view of the many serious problems now confronting the trade, the importance of the occasion can scarcely be exaggerated.

S. WALES MASTER PRINTERS.—The retiring president, Mr. R. S. Johns, of Newport, presided at the annual meeting of the South Wales and Monmouthshire Master Printers Alliance, held at the Park Hotel, Cardiff, on Monday, when officers for the ensuing year were appointed as follows:—President, Mr. W. C. Short, Cardiff; vice-presidents, Messrs. Walter Spurrell, Carmarthen; and G. S. Evans, Tonypany; hon. treasurer, Mr. G. T. Wright, Newport; hon. auditor, Mr. J. M. Thomas, Cardiff. A number of matters concerning the trade were discussed and the Alliance, which has sent several deputations to the Postmaster-General on the subject, took to itself some of the credit for bringing about a reduction in postal rates. Later the newly elected president entertained the large gathering to tea.

A RESOLUTION welcoming the new tax reductions was passed on Friday at a meeting of the Council of the London Chamber of Commerce. The Postmaster-General was also congratulated on the reductions in telephone rates and postal charges, and the restoration of Sunday collections, "as being a step towards the return to the fullest facilities, and the pre-war scale of charges in regard to postal and telephonic matters, without which no complete revival in trade can be effected."

THE Leicester Chamber of Commerce report in respect of the paper box trade: The requirements of the hosiery manufacturers and the makers up are providing plenty of orders for the box-making trade, but the requirements of the footwear manufacturers are considerably below the average for the time of year. Spinners' and elastic web manufacturers' demands are bordering on the normal, while there is practically no business at all being done with the engineers.

AT the last meeting of the Stepney Metropolitan Borough Council, Messrs. Vail and Co., Farringdon-road, London, secured the printing contract for three years at £5,481, less 12½ per cent. The following were the other tenderers, the local firms being for parts of the contract only:—Carpenter and Simpson, 26, Mile-end-road, E.1; Thos. De la Rue and Co., Ltd., 110, Bunhill-row, E.C.; Thomas and Sons, Ltd., 36, Queen-street, E.C.4; James Truscott and Son, Ltd., Suffolk-lane, E.C.4; Mr. A. Walters, 302, Mile-end-road, E.1; Waterlow and Sons, Ltd., Birch-in-lane, E.C.; Thos. Winn and Son, 20, Spital-square, E.1.

THE Cardiff Guardians are inviting tenders for the printing of the Year Book. The last day for tenders is Saturday, May 20th, to Mr. R. Stephenson, the clerk, at the Union Offices, 11, Park-place, Cardiff.

ARRANGEMENTS are to be made whereby those persons who have in their possession twopenny stamps on the date on which the 1½d. postage comes into operation receive on demand at a post office the cash or other stamps equivalent of the same.

AT the Press Club on Saturday night the annual ladies' dinner was revived, and a very successful gathering was presided over by Mr. William H. Lock, the chairman of the club.

THE Newspaper Press Fund will benefit to the extent of £3,500 as a result of Tuesday's brilliant matinee—attended by the King and Queen—at Drury Lane Theatre.

MADAME TAMAR KARSAVINA will distribute the prizes at the "Tango Ball" at Princes today (Thursday) the proceeds of which will be handed to Lord Leverhulme for the Newspaper Press Fund.

THE latest addition to the plant of the *Aberdeen Free Press* is a new rotary magazine press, specially designed by the Northern Works, South Shields, for the production of the *Fishing News* and *Scottish Poultry News*. It prints in two colours and folds and stitches the papers and can print any size of magazine up to 80 pages.

AT a meeting in Aberdeen last week, Mr. R. G. Mann, proprietor of the *Scottish Chronicle*, handed over to the Bishop of Glasgow and Galloway a cheque for £76, being the latest instalment of the Million Shilling Fund organised by the *Chronicle* to help the congested and understaffed Diocese of Glasgow. To date a sum of over £7,844 has been raised for this purpose through the newspaper.

AT the sale of the Burdett-Coutts library at Sotheby's the famous First Folio Shakespeare known as the Daniel Folio was bought by Dr. Rosenbach, the American dealer, for the record price of £8,600. Dr. Rosenbach bought also the Sheldon First Folio—No. 20 in Sir Sidney Lee's census—for £5,400.

SPEAKING at the annual dinner of the Associated Wholesale Newsagents at the Hotel Cecil last week, Sir William Berry, responding to the toast of "The Proprietors and Publishers," said he did not think that Lord Northcliffe had been fair in his recent criticism of his fellow proprietors. The days of inflation must be followed by the days of deflation, and it was idle for newspaper proprietors to imagine that theirs was the only profession in the country which was not going to suffer such a reduction.

THE death is announced at Stirling of Mr. Eneas Mackay, the well-known Scottish publisher.

THE death has occurred, in his 84th year, of Mr. Edward Vaughan Morgan, the last survivor of Morgan Brothers, the pioneers of trade journalism.

THE death occurred in London on Monday night of Sir Leslie Ward, the celebrated caricaturist, perhaps better known as "Spy."

THE death has occurred of Mr. Frederick Moir Bussey, a well-known journalist. He was one of the pioneers of the halfpenny morning newspapers, being at one time associated with the late Mr. Kennedy Jones.

MR. DAVID CULROSS, who for over sixty years held unbroken association with Messrs. McCorquodale and Co., printers and stationers, St. Thomas-street, S.E., entering the firm as an office boy and becoming a director twenty years ago, who died on November 29th, aged 86 years, left property of the value of £32,559.

Trade Union Matters.

MR. T. A. DAVIES, the newly elected president of the National Union of Journalists, has promised to address the Nottingham branch of the union on May 27th. This will be Mr. Davies' first official function as president of the union.

AT a special general meeting of the members of the Coventry branch of the Typographical Association the question of establishing a Printing Guild was discussed. Addresses were delivered, in which the principles of the Guild movement were explained. A resolution, which was carried unanimously, stated that, "having heard enunciated the principles and objects of the Guild movement and their application to the printing industry, this meeting decides to elect a Provisional Printing Guild Committee to inquire into the possibilities of establishing a Guild in Coventry."

THE half-yearly conference of the Northern Group of the Typographical Association is to be held at Middlesbrough during August.

THE newly-appointed officials of the Home Counties and South-Eastern Group of the T.A. are: G. W. Chuter (Reading) president, T. E. Smith (Ipswich) vice-president; Council: F. Summerfield (Watford), L. P. Bristow (Aldershot), W. F. Kensett (Letchworth), H. Portch (Tonbridge), S. R. Smith (Brighton), W. N. Fitch (Redhill), A. M. C. Simmons (Uxbridge), E. J. Mannings (Norwich).

Master Printers and the Posting of Notices.

Important Decision at London Master Printers' Association Annual Meeting.

At the annual general meeting of the London Master Printers' Association held at noon on Tuesday in Stationer's Hall, Lieut.-Col. Truscott presided over a good attendance of members. The ordinary business was despatched as quickly as possible so that the meeting might resolve itself into a special general meeting, to discuss the question of wage negotiations.

Financial Statement and Report.

The hon. treasurer, Mr. J. H. Williams, presented the financial statement for the period March 26th, 1921, to March 25th, 1922, which showed that the finances of the Association were in a satisfactory condition and was unanimously approved.

The annual report for the year was already in the hands of members and was taken as read. It showed an increase of membership to 1,100 at March 25th last, and detailed the many useful activities of the Association's year.

The Chairman, in moving the adoption of the report, thanked Dr. MacLehose for the great courtesy he had shown to London members during the year, and expressed thanks also to Mr. R. A. Austen-Leigh for the two years' hard work he had put in as L.M.P.A. president.

On the motion of the treasurer, Mr. Williams, it was agreed that the subscription for the year 1922 to 1923 be on the basis of one half-penny in the £ of wages paid, subject to deductions for amounts exceeding £50,000, £100,000 and £150,000 respectively, with a minimum of £1 is. and a maximum of £500; the subscription to include the Alliance contribution to the Master Printers' Federation.

Mr. W. H. Burchell drew attention to the amount of the subscription to the Federation and asked whether this was fair to London.

The treasurer pointed out that they were bound by the rules of the Federation and had to act in conjunction with the other Alliances.

On Mr. Burchell's further pressing the point, the treasurer suggested that Mr. Burchell should attend the annual meeting of the Federation and try to get the rule amended.

On the motion of Mr. Williams the Association's auditors Messrs. A. C. Roberts, Wright and Co. were re-elected.

An amendment to Rule 15 (re composition of council) was agreed to in order that the Council might henceforth include a representative of each trade section of the Association.

Mr. R. A. Austen-Leigh Thanked.

On the motion of Mr. Spring, a very cordial vote of thanks was passed to Mr. R. A. Austen-Leigh for his two years' service as president, in which he had ungrudgingly devoted his time and talents to the interests of the Association.

Mr. R. A. Austen-Leigh briefly responded, expressing the satisfaction he had had in the work of the presidency, which, he said, he had occupied in a rather strenuous period. He had been glad to serve them, but glad also when Col. Truscott had been prevailed upon to be the new president. He expressed his willingness to give the new president all the support he could while he was in office.

This concluded the business of the annual general meeting, and the secretary, Mr. W. Whyte, then read the notice convening the special general meeting.

Strong Action re Wage Reduction.

The chairman reminded members of the special general meeting held on March 27th when it was decided that, failing a settlement of the wages question by the Joint Industrial Council, another general meeting should be held before action could be taken involving the posting of notices. This, he said, was the second general meeting which had been desired. He outlined the progress of the negotiations from the date of the last general meeting up to the taking of the present ballot on the question of the 15s. reduction, and went on to say that, in order that they might be prepared in every way, a ballot paper had been issued to L.M.P.A. members, and he was pleased to report that the result had been

surprisingly good—the majority in favour of posting notices if requested to do so being no less than three times greater than in the ballot taken last September. (Applause.) It was absolutely imperative that they should be firm on this occasion and he accordingly moved that "If the results of the coming ballots by the unions are adverse, this meeting recommends the members to post notices of reductions in wages whenever so instructed by the Federation Council." He called upon Mr. R. Gordon Brew, of Messrs. McCorquodale and Co., Ltd., to second the resolution.

Mr. Brew, on behalf of Messrs. McCorquodale and Co., Ltd., accordingly seconded the resolution, amid applause.

The president of the Federation, Mr. J. MacLehose, M.A., LL.D., next addressed the meeting at the request of the chairman, and went into detail as to the attitude of the various unions towards the present wage reduction proposals. His remarks indicated a somewhat varied attitude amongst the unions, some showing very little tendency to accept the proposals, whilst others were likely to accept. He assured the meeting, however, that if master printers showed that they were in earnest and were prepared to put up notices and keep them up, he had not the least doubt that they would be successful from one end of the country to the other.

Mr. Burchell asked for information with regard to the periodical houses and newspapers.

Dr. MacLehose replied that the Newspaper Society expected to be in a position at Monday's meeting of the Federation Labour Committee to give very detailed information as to the amount of support that would be forthcoming from their members.

The Chairman then put the resolution re the posting of notices, and this was unanimously carried.

Special Committee to be Formed.

Sir Wm. Waterlow then put forward a proposal "that if and when instructions are issued by the Federation Council to our members to post notices, we then in London set up a standing committee to meet daily with a very small quorum, say a quorum of three, to consider any matters arising out of these instructions." He explained that his intention was that if at least three members of the council, or other persons selected, were available daily at 24, Holborn, then that committee could deal with any houses which did not carry out the Federation's instructions. He went on to urge that master printers had a good case. In justice to their customers as well as in justice to those they employed they must do something to bring the cost of printing down to a more economic basis, as the present high cost of their product was not only driving work abroad but preventing many advertising schemes being carried out.

Mr. A. Langley seconded, and Sir Wm. Waterlow's resolution was carried unanimously, it being agreed that the council be left to appoint the committee.

Mr. Spring raised the question of managers' and overseers' notices, and asked what was the custom of the trade.

The Chairman replied that as a general rule foremen received one month's notice, but undoubtedly many houses made their own arrangements at the time when they took the foremen on. Some houses gave only a fortnight's notice, whilst others gave as much as three months. It was a matter that depended entirely upon the practice of the individual house.

The eighty second annual dinner of the Newspaper Society was held in London on Wednesday night last week, Mr. Valentine Knapp, president, occupying the chair. Sir James Owen, president-elect, gave "The Houses of Parliament." The Attorney-General responded. Lord Riddell, proposing "The Newspaper Society," said that during the past year it had been born again. It was never more powerful. Millions read every day what the members of the Society had to say, and its influence upon public opinion could not be over-estimated.

Printing and Kindred Trades FEDERATION.

The Blackpool Conference.

About 80 delegates, representing 23 unions and 200,000 members, attended the annual conference of the Administrative Council of the Printing and Kindred Trades' Federation of the United Kingdom, held in the Council Chamber, at the Town Hall, Blackpool. The conference was opened on Tuesday of last week by a civic reception, and extended until Thursday. The chair was occupied by the Rt. Hon. C. W. Bowerman, M.P., who was supported by Mr. A. E. Holmes, the general secretary of the Federation.

The Mayor (Councillor D. Dickinson) in extending a hearty welcome to the delegates, said they were associated with the printing trade, which was a very ancient one, and probably one of the most ancient trades in the world. It was a very important trade, and the country was influenced very largely by what they read in the Press. They had in their Council Chamber four stained-glass windows, which were at one time very beautiful. They would notice that one of them was associated with the printing trade, for it represented the first printing press that was ever set up in this country.

Mr. C. W. Bowerman, M.P., in reply, said they thanked the Mayor very sincerely for giving them the opportunity of assembling in Blackpool's charming Council Chamber. He was inclined to think that whoever was responsible for the stained-glass window must have had a premonition that the typographical bodies would eventually meet in that Chamber. Referring to the Mayor's references to theirs being an ancient profession, Mr. Bowerman said at one time (he was not speaking of every section assembled there that day) the compositors—if his friends would allow him to discriminate for a moment—he understood had a right to be presented at Court and wear swords. (Loud laughter.) He well remembered many years ago, in the office of a paper called *Bell's Messenger*, he was told on fairly reliable authority that one of the Court swords that used to belong to a compositor was then being used as a poker. (Laughter.) On behalf of the delegates he thanked the Mayor and the members of the Council very sincerely for giving them the privilege of meeting in that delightful Council Chamber. (Cheers.)

The conference then adjourned, and in the afternoon the delegates had a delightful motor coach outing to Grange-over-Sands, and there inspected the fine convalescent home run under the auspices of the Workers' Club and Institute Union.

During the next days' proceedings the question of the *Daily Herald* came up for consideration, and after a long discussion a resolution was passed expressing regret that the constitution of the Federation did not permit of any grant from its funds; and also congratulating those responsible upon their decision to maintain the *Herald* for a period of six months. The resolution also requested those societies which had decided to make no contribution to the support of the journal to ballot their members again on the matter.

The election of officers for the ensuing year resulted as follows: Mr. C. W. Bowerman, M.P., president; and Messrs. G. Isaacs, vice-president; H. Skinner, treasurer; and A. E. Holmes, general secretary. Executive Committee, elected on ballot, were: Mr. T. E. Naylor, M.P., and Messrs. R. Kneale, T. G. Newland, J. D. French, R. Watson, W. C. Warren, S. F. Crampin, and Mrs. A. Bridge.

Two resolutions were also put on the question of the 44-hour week. Similar resolutions had been discussed at the annual conference last year, and it was then decided that the time was not opportune to press for the establishment of a 44-hour week. It was considered that the arguments used then still applied, but it was considered advisable that the purpose of the resolutions should not be lost sight of.

The resolutions were amended so as to embody this view and were carried in this form.

A new Welsh periodical has made its appearance, namely, *Y Llenor* (meaning the *Literateur*), a quarterly journal edited by Professor W. J. Gruffydd, and published by the Educational Publishing Co., Ltd., Cardiff. The first number is a well-printed volume of 80 pages.

What Can be Posted for a Halfpenny.

SIR,—May I, through the courtesy of your columns, inform your readers of the possibilities of the $\frac{1}{2}$ d. Postal Rate which comes into force on Monday, May 29th. Those who look ahead, are making their arrangements in advance. Orders for millions of halfpenny stamps have already been placed with the Postmaster-General.

Orders for printing, in connection with huge Publicity Schemes, are in hand, they are being got ready for "The Great Day," Monday, May 29th, 1922. On that day there will be let loose such an avalanche of letters, post-cards and publicity literature, that it bids fair to overwhelm the Post Office staff.

In order to catch the tide at its flood, business firms should note, that for their correspondence to be cleared on the day of presentation, it should be posted before 3.30 p.m. It is not generally known what a varied extent of correspondence the Halfpenny Rate covers. It will carry any of the following:—

- 8 page Catalogue (size 14 by 9 $\frac{1}{2}$ in.)
- 16 page Catalogue (size 10 $\frac{1}{2}$ by 8 $\frac{1}{2}$ in.)
- 16 page Catalogue (size 9 $\frac{1}{2}$ by 7 in.)
- 24 page Catalogue (size 8 by 5 $\frac{1}{2}$ in.)
- 32 page Catalogue (size 8 $\frac{1}{2}$ by 4 $\frac{1}{2}$ in.)
- 36 page Catalogue (size 7 $\frac{1}{2}$ by 4 $\frac{1}{2}$ in.)

The above catalogues can be enclosed in envelopes or wrappers and can be printed on a highly-finished super-calendered paper fit to receive the best produced half-tone illustrations.

The little halfpenny rate enables industrial firms to send out millions of prospectuses, balance sheets, circulars, price lists, invoices, statements, order forms, market reports, acknowledgment forms (imitation typewriter circulars, if handed to the Post Office in lots of not less than 20 copies). It also allows of a mailing card, i.e., a printed matter card, minimum size 3 $\frac{1}{2}$ by 5 $\frac{1}{2}$ in. up to a maximum size of 12 by 24 in. This latter size forms a gigantic communication. A birthday or picture postcard, etc., containing five words of greeting, the date, name and address of sender also addressee may be sent for one halfpenny.

It is a very common practice amongst industrial firms to neglect to use the full weight to which the postal charge entitles them. They would do well to remember that while it is a good thing to throw one's weight about it is not wise to throw one's postage weight away. Live firms will see that full postal weight is secured by enclosing with all their communications "snowball advertising" such as "publicity envelope enclosures" afford. Great output of publicity literature during the current Fiscal Year 1922-23 ending on March 31st, 1923, will help the business of industrial firms, increase postal revenue and enable the Postmaster-General to carry out his intention of making further reductions in postal charges—probably by making the letter post 1d., the postcard rate $\frac{3}{4}$ d. and giving two ounces for $\frac{3}{4}$ d. (printed matter rate).

Yours, etc.,

W. H. BURCHELL,
Governing Director
The Caxton Press, Ltd.,
Hon. Secretary the Association of
Master Printers (London Central
Districts).

13 and 15, Leather-lane, E.C.1.

At a meeting of the Printing Trades' War Memorial Committee on Saturday afternoon last, Mr. C. J. Drummond, J.P., presiding, the balance-sheet of income and expenditure was presented. This showed that the cost of erecting the memorial wing to the Caxton Home, including furniture and incidental expenses, had reached £10,150, of which sum £700 had been expended on the very fine memorial screen. Donations to the fund amounted to £7,750, £400 had been loaned by Caxton Home, and £2,000 advanced by bankers. The Committee formally handed the memorial wing over to the trustees of the Caxton Home, who undertook its maintenance as a Printing Trades' War Memorial. Donations towards the liquidation of the debt of £2,000 will be appreciated.

DURING March paper companies increased their nominal capital by £213,000 and printing and publishing companies by £84,500.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

	Three Lines	s.	d.

THURSDAY, MAY 18, 1922.

Wage Reduction: Position Serious.

THE results of the ballot now being taken by all the unions will, we understand, be known at the headquarters of the Federation of Master Printers to-day (Thursday) but no statement is likely to be issued until after the meeting of the Employers' Labour Committee on Monday. As we go to press, however, we learn that the London Society of Compositors has rejected the employers' proposals by a majority of over ten to one, the figures being: For acceptance, 945; against acceptance, 9,783. There are indications that the proposals will be rejected by other unions also, so that the position is evidently very serious. In view of the employers' considered conclusion that a reduction of wages is essential, it looks as if there is no alternative but for them to post notices announcing the reductions they think necessary. A stoppage of work, however, would be most unfortunate at the present time, when there is some indication of a general trade revival, and trouble in the printing industry would not only be disastrous to the trade itself but would have an adverse influence upon the prosperity of the whole country.

National Settlement of Paper Trade Wages.

A SPLENDID piece of work was performed by the representatives of employers and employed in the British paper trade a week or so ago, when an agreement was reached on the questions of wages and conditions in the paper trade. It may be said that both sides have been guided by considerations for the welfare of the industry and of those dependent upon its activities. Neither side could have afforded any rupture at the present time, the workpeople less than their employers. A happy aspect of the concluded agreement is that the manufacturers have shown no desire to press the full advantage which present conditions of industry afforded them, while on the part of the unions everything has been done that was possible in the interests of the members. Accordingly, the good relations which have hitherto existed between the two parties to the paper industry continue, and there can be no impediment to any revival in trade which may come along.

Although the terms of the National Agreement No. 3 presents some difference from its predecessor, there will be very little if any alteration in practice. The desire to treat employees in the paper mills of this country as sensible human beings will be increased by the fortunate conclusion reached by the negotiations.

The Cost of Living Basis.

IT is an important part of the paper trade agreement to have got accepted the cost of living basis for adjusting wages. Given an understanding as to the minimum rates and the percentage at which these should stand above pre-war wages, there is no difficulty in arriving at the intermediate grades. The adoption of this principle surely spells a long period of peace in the paper industry, and the manner in which a settlement was reached during the recent negotiations indicates that both sides desire that work shall continue in the mills, so far as the market will permit, without interruption.

Postal Rates and Mr. Burchell.

IN granting space in this issue to a contributor's somewhat extensive résumé of the history of the agitation for the reduction of postal rates—and particularly of the part played therein by Mr. W. H. Burchell, the energetic secretary of the Association of Master Printers of the Central London District—we have no wish to claim that our contributor represents the course of events and the agencies at work in precisely the correct perspective. In this connection readers will note with interest the remarks made upon the subject by the president of the Federation of Master Printers at Saturday's luncheon of the Home Counties Alliance (reported this week). We think, however, that an inside view of the postal campaign from Mr. Burchell's standpoint will be of general interest, and we venture to suggest that if only a few employing printers would devote to each movement affecting our craft's welfare the enthusiastic generosity of time and money which Mr. Burchell has devoted to the subject of postal rates, substantial benefits might thereby accrue to every member of the printing and allied trades.

The Paper Market.

SPECIAL offers are being issued on every hand, even by papermakers whose ordinary practice never embraced anything but the standard line at the standard price. Some remarkably low prices are quoted and we have seen pure S.C.'s at 3d., foreign writings at 2½d., account book azures at 4d., flints in double crown at 16s. We understand by the way that there is an advance in certain grades of coated and surface papers, chiefly Belgian productions. There is a firm tendency with strawboards and orders are being placed very freely at the moment.

Competition in Paper.

THERE has been a downward tendency in the price of tub-sized papers recently and lists to hand from several quarters show a drop of 1d. and 1½d. per lb. It is usually the smaller mills that are first out with the announcement, but once the lead is set, others must follow suit. In almost all the named papers every maker has an equivalent quality to his competitors, and there is a constant striving for supremacy and the consumers' favour. An odd farthing turns the scale one way or the other, hence the keenness. There was a time, pre-war, when two or three papers held first position by virtue of their watermark. To-day there is little to choose between qualities, and watermarks count for next to nothing when there is an advantage in price on one side. Competition will bring prices down to the danger line and then watermarks will play a bigger part in deciding the destination of orders.

Personal.

SIR JAMES OWEN, who was last week elected president of the Newspaper Society, is editor and managing director of the *Western Times* Company, and received his knighthood in 1918.

WHEN Mr. H. Seymour Berry, J.P., one of the directors of the *Western Mail*, Cardiff, and other publishing firms, returns from France in a few days' time, he will be met by a deputation representing the Liberal and Conservative parties at Merthyr, and be invited to stand as the Coalition candidate for Parliament at the next election.

MR. W. A. WOODLEY, managing director of the *Somerset County Gazette* and the *Bridgewater Mercury*, has been elected president of the South-Western Federation of Newspaper Owners.

MR. SYDNEY WALTER, C.B.E., the well-known writer on public affairs, has been elected to the directorate of the *Yorkshire Evening News* (Leeds).

MR. G. M. BRUMWELL has been appointed associate editor of *The Times*.

DR. HAROLD WILLIAMS has been appointed foreign editor of *The Times*.

AT a meeting of the Newport Corporation congratulations were extended to one of the members, Mr. C. T. Clissitt, circulation manager of the *Western Mail*, on the occasion of his silver wedding.

ON Tuesday Mr. William Stebbing, who was for nearly 30 years on the staff of *The Times* as leader writer and second in command to Delane as editor, celebrated his 91st birthday.

DR. ARTHUR SHADWELL, the well known authority on social, industrial and economic questions, has accepted the editorship of the *Democrat*.

MR. DUNCAN KEATS delivered an interesting lecture on Tuesday evening at the monthly meeting of the Electrotypers and Stereotypers Managers and Overseers' Association at St. Bride Institute. He spoke chiefly on one or two of the older and lesser known kinds of printing plates.

AMONGST the well-known Americans now staying in London is Mr. Herbert Pulitzer, proprietor of the *New York World*, who is staying at the Berkeley.

ON the occasion of the presentation of a gold watch to Mr. J. P. Haworth, who is leaving Spring Vale Paper Mill, Darwen, to take up the position of works manager of the Star Paper Mill, Feniscowles, warm appreciation was expressed of Mr. Haworth's services, covering a period of 31 years.

THE watch, which was presented by Mr. Eli Kirkham, a director, bore the following inscription: "Presented to J. P. Haworth, Esq., by the Directors and Officials of the Darwen Paper Mill Co., Ltd., and the employees of Spring Vale Paper Mill, on relinquishing his position as manager."

MR. R. GILROY, chairman of the Northern Committee of the Papermakers' Association, has been re-elected chairman of the Rishton District Council.

DR. HUGH P. BAKER, Executive Secretary of the American Paper and Pulp Association, will spend eight weeks in Europe this summer studying the paper industry, particularly in Scandinavia, with reference to its bearing on the future of the industry in America. He will sail for Scandinavia on June 10th.

PARTICULAR attention will be paid to the condition of the paper industry in Finland and Czecho-Slovakia, and Dr. Baker's trip will take him as well to Sweden, Norway and Germany, with shorter stays in other countries of Europe.

War Memorial at Colchester.

An impressive ceremony took place at the Colchester branch of Spottiswoode, Ballantyne and Co., Ltd., on Monday, May 1st, when a memorial tablet erected by the directors to perpetuate the memory of those men employed at The Hythe works who fell in the Great War, was unveiled by Mrs. Austen-Leigh. The dedication service, which was conducted by the Rev. Canon Brunwin-Hales, M.A., Rural Dean, was attended by Mrs. and Mr. Austen-Leigh (chairman of the company), Mr. R. W. Hanson (director), Mr. M. E. Impey, Mr. R. Affleck (general manager), Mr. W. H. White (Colchester manager), and the whole of the staff. Following the Lord's Prayer and the singing of "O God, our help in ages past," Mr. Austen-Leigh delivered a short address, in the course of which he dwelt upon the solemn purpose of the gathering. He recalled the early days of the war and the repeated calls for more and ever more men, noting with pride the noble response made by men in every walk of life. The call came to their house at Colchester, and from all departments they went—from composing and machine-rooms, warehouse, foundry, and clerical offices.

The Memorial Tablet.

"I often think," he added, "as I walk through the works now, how little those men here pursuing the various peaceful avocations connected with our trade could ever have imagined that they would be called to fight—some in France, some in Gallipoli, some in Mesopotamia. And in making these remarks, of course I allude to all who went, to those who will never be with us again and those who returned. To all of them I desire to say, on behalf of everyone here, we thank you. From this office 108 men went to fight, from our parent office in London 248, and from Eton 19—375 in all. We have already placed a tablet in London to commemorate the twenty-six men who laid down their lives from there. This memorial is dedicated to the seventeen men who went from here and did not return, as a witness to their bravery and as an example to coming generations. For what they did for us we can never be sufficiently grateful. They made the supreme sacrifice, and by so doing helped us then to escape the unspeakable horrors of invasion, and enabled us to live here in safety now. And to you who are sitting near me, the relatives of those who have fallen, I would say that we here can in some sense realise what you have gone through. We know you have given of your best and dearest—you have given those who were in their youth and had all those high hopes of the future that are inseparable from that period of life. You have given them, and they have met with the most glorious of deaths. May we not hope it is well with them? We trust it may be some satisfaction to you

to see their names engraved on this tablet. But not only is this memorial to commemorate the glorious dead—it stands now and will stand for ever as a reminder to the younger generation of what those who worked here before them in 1914 did—how they answered the call of duty as it came to them, and in saying this I refer to both the living and the dead."

Mrs. Austen-Leigh then unveiled the tablet, which was solemnly dedicated by Canon Brunwin-Hales, who recited the names of the Glorious Seventeen. This was followed by the "Last Post," sounded by buglers of the Leinster Regiment. The imposing tablet, which is constructed of alabaster framed in Norwegian green marble, was surrounded by many beautiful wreaths from relatives of the fallen, friends in the house, and others.

Mr. Alfred Harris.

We have to record, with deep regret, the passing of Mr. Alfred Harris, director of Wass, Pritchard and Co., Ltd., the Romney Press, Ltd., and the Mechanical Typesetters, Ltd., of 85, Fenchurch-street, E.C., on Tuesday the 9th inst., at Debben House, Loughton, after a prolonged illness. The late Mr. Alfred Harris was in partnership with his brother, Mr. Leonard Harris, trading as L. and A. Harris, printers and stationers, at 94, Leadenhall-street, from 1898. Their works were removed to a new and enlarged factory in 1905 at St. Ann's-road, South Tottenham, and in January, 1918, the firm amalgamated with the Romney Press, Ltd., at 85, Fenchurch-street, E.C. Mr. Harris took a very keen interest in his craft, and was an active committee-man of the Central London Districts Master Printers' Association. Mr. Harris was also managing director of C. Nestle and Co., Ltd., of South Molton-street, W., and Dover-street, W. He had travelled considerably, having twice been round the world, and several times to America and Canada. He was a Freemason and a member of the National Liberal Club and Royal Colonial Institute. During the war he was an active member of the City of London branch of the British Red Cross Society. He will be much missed by a large circle of friends, who held him in very high regard.

The Stationer's Company's
EXAMINATIONS.

An inspiring and interesting sight was witnessed at Stationer's Hall during the past week, when some 500 progressive workers employed in the various branches of the printing industry submitted themselves for examination in the theory and practice of their respective crafts.

The examinations are set and adjudicated upon by representatives of the Worshipful Company of Stationers and the London Printing Trades, the tests set embracing the following sections:—Paper, composing, machine, lithography, binding, stereo and electro, reading, printing ink, order clerks, costing, estimating, printers' assistants. The candidates were students from the most go-ahead technical schools in London, including St. Bride Printing School, Camberwell School of Arts and Crafts, and Battersea Polytechnic. These institutes are closely identified with the trades they represent, and it is a hopeful sign for the future of the printing industry that so many workers are eager to obtain the diplomas awarded on the results of these annual technical tests.

THE CHARLES FRANCIS PRESS.—From Mr Charles Francis, of New York—to an interview with whom we devoted a special article last week—we learn that the figure we quoted of \$500,000 as the value of the annual output of the Press was supplied to us inadvertently, that being the value several years ago but now wide of the mark as the output to-day equals \$1,500,000. By the way, to-morrow, the 19th, is the date when Mr. Francis is due to lecture at Stationers' Hall, at 6.30, under the auspices of the London District Committee of the Joint Industrial Council, his subject being "Our Problems and Our Responsibilities."

DIVIDENDS AND REPORTS.

LANSTON MONOTYPE CORPORATION.—Interim dividend of 2 per cent. for half-year; same as a year ago.

F. REDDAWAY AND CO., LTD.—No dividends are being paid for 1921.

PORRITTS AND SPENCER, LTD.—Porritys and Spencer announce dividend of 5 per cent. for the year, carrying forward £22,223, against £21,376 brought in.

NEW COMPANIES.

TAYLOR AND CO. (HULL), LTD.—Capital £6,000, in £1 shares; to carry on the business of manufacturers of and dealers in wool, cotton, silk, linen, leather, paper and similar substances, etc. Private company. Subscribers: W. Taylor and G. St. G. Wheeley. Registered office: 4, Albion-street, Hull.

POTTEN, BABER AND MURRAY, LTD. (Bristol).—Capital £3,000, in £1 shares; to carry on the business of stationers, printers, lithographers, stereotypers, electrotypers, photographic printers, engravers, etc. Private company. Permanent directors: E. Potten, E. H. Baber and H. E. Murray.

ARTHUR HEATH AND CO., LTD.—Capital £6,000, in 5,900 5 per cent. cumulative preferred ordinary shares of £1 each and 100 deferred ordinary shares of £1 each; to carry on the business of paper agents and export merchants, etc. Private company. First directors: A. Heath and E. H. Cooper. Registered office: 91, Queen Victoria-street, E.C.4.

METROPOLITAN ADVERTISING CO., LTD.—Capital £1,000, in £1 shares; to take over the business carried on by W. H. Spencer at 30, Gerrard-street, W., as the "Metropolitan Advertising Co.," and to carry on the business of advertising agents, specialists, etc. Private company. First directors: W. H. Spencer and H. Wolfensohn. Registered office: 144, Wardour-street, W.1.

MECHANICAL AIDS, LTD. (London).—Capital £1,000, in £1 shares; to carry on the business of manufacturers, buyers, sellers, repairers and maintainers of machines and labour-saving devices in residences, offices, etc. Private company. Subscribers: W. V. Weber and P. F. Masters.

PARAMOUNT PRESS, LTD.—Capital, £200, in £1 shares; to carry on the business of litho-

graphers, letterpress, commercial and general printers, publishers, advertising agents, etc. Private company. First directors: A. J. H. Knights and L. W. Dalton. Registered office: 16, Carlisle street, Soho, W.1.

LION PUBLISHING CO., LTD.—Capital £5,000 in £1 shares; to take the racing journal known as the *Sporting World*, carried on by E. F. H. Briggs at 5, Fetter-lane, E.C., and to acquire from the said vendor the benefit of an agreement between himself and J. Nicol whereby the right was granted to publish upon the terms of paying to the said J. Nicol a royalty of 10 per cent. on each volume sold by the *Sporting World Racing Guide*. Private company. First directors: E. F. H. Briggs, J. Nicol and E. H. Wells. Registered office: 5, Fetter-lane, E.C.

HARDWARE TRADES DIRECTORY, LTD.—Capital £500, in £1 shares; to take over the business carried on by C. W. Horton, of 19-21, Regent-street, S.W.1, as the "Hardware Trades Directory." Private company. First directors: C. W. Horton and G. Thomas. Registered office: 19-21, Regent-street, Pall Mall, S.W.1.

ARCADIAN PUBLISHING CO., LTD.—Capital £5,000, in 3,000 "A" preference shares and 1,000 "B" preference shares of £1 each, and 20,000 ordinary shares of 1s. each; to acquire from C. H. Parsons, of 6, Colliergate, Bradford, certain copyrights, music, songs, and printing plates, to print, publish and sell music, songs, books, periodicals, etc. Private company. First directors: C. H. Parsons and L. H. Parsons. Registered office: Albion House, New Oxford-street, W.C.1.

JACKSON, HARTLEY AND JACKSON (1922), LTD.—Capital £4,000, in £1 shares; to acquire the business now or formerly carried on at 120, Middlesex-street, Bishopsgate, by Jackson, Hartley and Jackson, Ltd., and to carry on the business of wholesale and retail paper merchants, printers, bagmakers, manufacturers of, and dealers in papers, printing inks, bronze powders, stationery, etc. Private company. First directors: J. Lindner, J. Hopton, P. C. Squire and P. F. Money.

BLICK TIME RECORDERS, LTD.—Capital £5,000, in £1 shares; to carry on the business of importers, exporters, and manufacturers of, and dealers in, time recorders, multi-copiers, typewriters, office and library equipment and supplies, etc. Private company. First directors: J. G. Rimington, Matilda I. Rimington, F. G. Marquiss and J. H. Forster. Registered office: 174, Gray's-inn-road, W.C.1.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

PANORA, LTD.—First and 2nd mortgage debentures, both dated April 19th, 1922, to secure £1,000 each, charged on the company's undertaking and property, present and future, including uncalled capital.

JOHN HEYWOOD, LTD., printers, London and Manchester.—Mortgage dated April 26th, 1922, to secure £8,000, charged on certain land and premises in Pendleton, Lancs.

MILL 439, LTD., paper manufacturers, etc., London.—Particulars of £5,000 debentures authorised November 17th, 1922, whole amount issued; charged on the company's property, present and future, including uncalled capital.

SPOTTISWOODE BALLANTYNE AND CO., LTD.—Trust deed dated April 20th, 1922, to secure £34,000 3rd mortgage debentures, charged on certain freehold lands and hereditaments in Greenstead, Colchester, and the company's other assets, present and future, including uncalled capital (subject to £43,000 1st and £60,500 2nd mortgage debentures).

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

A. Bland and J. Dabell, paper stock merchants, 21, Irwell-chambers, Fazakerley-street, Liverpool, under the style of A. Bland; so far as concerns A. Bland. J. H. Neal and A. C. Nelson, printers, at Barston-street, Leicester, under the style of Neal, Nelson and Co.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

Edward Gittins, 15, Knoll-road, Bexley, Kent, journalist, May 12th.

RECEIVING ORDER RESCINDED.

Marmaduke Valentine Smith, formerly 14a, Clerkenwell-green, newspaper proprietor, April 27th. It appears to the Court that all the debts of the debtor have been paid in full.

W. H. Bowyer, Ltd.

Paper Manufacturers' Petition.

On the petition of John Dickinson and Co., Ltd., paper manufacturers, creditors, Mr. Justice Astbury, in the companies winding-up court on Tuesday, made an order for the compulsory winding up of W. H. Bowyer, Ltd. Counsel for the petitioning creditors said the company had issued debentures, and on April 19th a receiver was appointed who had taken possession of the whole property of the company. In these circumstances counsel asked for the order.

Associated Paper Mills, Ltd.

The report of the Associated Paper Mills, covering the period from July 23rd, 1920 (the date of incorporation), to August 31st, 1921, issued on Monday, intimates that the company has completed the acquisition of the whole of the share capital of Edward Collins and Sons, Glasgow, and the whole of the assets and undertaking of Henry and Leigh Slater, of Manchester and Bollington, including that company's holding in the Société Franco-Anglais de Papiers Spéciaux, of Eragny, near Paris.

The trading results of the two companies, it is stated, continued satisfactory until about September, 1920, when a very heavy drop in the value of raw materials commenced, together with an almost complete stagnation of trade, which factors account entirely for the unsatisfactory result. Since the date of the balance-sheet a considerable improvement in trade has taken place. The profit for the period was £16,517, before reserving for excess profits duty and other taxation, an appeal having been lodged in respect of the former. Interim dividends were paid on the preference shares on January 1st and July 1st, 1921, amounting to £26,273, thus leaving a debit balance on profit and loss of £9,756.

MESSRS. JAMES SPICER AND SONS, LTD., are sending out a neat little wallet containing specimens of some of their standard stocks of cards, boards and tags. Two pockets in the stout cover contain the samples and price list in a decidedly handy form.

Home Counties Master Printers.

Red-Letter Day in the History of the Alliance.

Further lustre was added on Saturday to the name which the Home Counties Master Printers' Alliance has made for itself in the direction of the successful organisation of social functions. On the occasion of the Alliance's annual meeting members were asked to bring their ladies with them, and the day's proceedings included a visit to the Tower of London and to St. Paul's Cathedral, luncheon at Stationers' Hall, the day concluding with reception and tea at the Mansion House by invitation of the Lord Mayor and Lady Mayoress.

At the business meeting, held at Stationers' Hall at 11.15, Mr. David Greenhill, the president, was in the chair for the first part of the proceedings and the large gathering included not only a big representation of the Home Counties organisation but also a number of visitors, among whom were Mr. J. MacLehose, M.A., LL.D. (president of the Federation of Master Printers), Mr. R. A. Austen Leigh (vice-president of the Federation), Mr. A. E. Goodwin (secretary of the Federation) and Mr. Chas. Francis, of New York.

A Successful Year's Work.

An able résumé of the past year's activities was presented by the alliance secretary, Mr. Percy D. Michael, on behalf of the executive. His report laid much stress on the amount of attention that had been occupied by the question of wages, it being remarked that the year was especially noticeable in that for the first time in history wages had been reduced in the printing trade. An outline was given of the course of the wages movement up to the present time, and acknowledgment was made of the services on Federation Labour Committees of the Alliance's representatives, Mr. A. Bennett, Mr. J. Crowlesmith, Mr. F. Dangerfield, Mr. J. H. Hobbs and Mr. H. H. Potts. Reference was made to the efforts of the Alliance to get the Federation rules amended so as to do away with the block vote in Federation affairs. The effective efforts of the Organisation and Propaganda Committee in the preparation of leaflets, etc., were put on record, and mention was made of the very successful group meetings held during September and October at Newport (I.O.W.), Reading, Tunbridge Wells, and Bedford, all of which outings (as reported at the time in our pages) were specially interesting and pleasurable. The direct result of the meeting at Bedford was the resuscitation of the Association there. The membership of the Alliance now stands at 350. The report went on to make mention of the services rendered by the members of the Alliance to the Printers' Pension Corporation and in connection with various matters of importance to the trade including the rating of machinery, the formation of District Committees of the Joint Industrial Council and efforts to obtain a revision of the postal rates, the local Associations having been active in the matter in many ways, so that members of the Home Counties Alliance claimed to have taken a full share in bringing about the welcome reduction of postal rates recently announced. Members were reminded of the many services they can obtain from the Alliance office, and an announcement was made as to special arrangements that had been come to in regard to workman's compensation insurance for members. Appreciation was expressed of the assistance rendered by Federation officials, especially Mr. Goodwin, Mr. Williamson, and Mr. Little, and in acknowledging the services of the Alliance officers the report made special mention of Mr. David Greenhill, president; Mr. Guilford, the treasurer; Mr. Bennett, past-president; and Mr. Oxley, the chairman.

The adoption of the report was cordially moved by Mr. Strange, who remarked upon the substantial achievements made during the year, and said they owed a great debt of gratitude to all those who had given their time and ability to the work of the Alliance. The report was duly seconded and adopted.

The treasurer, Mr. T. J. S. Guilford, then presented the financial statement, which showed an increase of income and a healthy state of the Alliance's finances. The financial statement was unanimously approved, and on the proposition of the treasurer, it was agreed that in future third-class travelling fare should be paid for members of the executive

in respect of attendances at meetings on behalf of the Alliance.

Election of Officers.

The election of officers was the next business.

The retiring president proposed Mr. G. Soundy Unwin as his successor. In doing so, Mr. Greenhill made very appreciative reference to the great amount of assistance given him during the year by Mr. Bennett, past president. Mr. Unwin was unanimously elected, and took the chair. He moved a very hearty vote of thanks to Mr. Greenhill for his services as president, which had involved the expenditure of much time and effort. The vote was accorded with enthusiasm.

Mr. S. F. Oxley was re-elected chairman and Major W. H. Barrell, O.B.E., vice-chairman. Major Barrell, in acknowledging his election, expressed it as his ambition to see master printers and their men acting as comrades in commerce, without any barriers of strife between them.

Mr. T. J. S. Guilford was re-appointed hon. treasurer.

As auditors Messrs. A. C. Roberts, Wright and Co. were re-elected.

Other business transacted included the sanctioning of a vote of £21 to the Printers' Pension Corporation and the fixing of the Alliance subscription.

Trade Matters Discussed.

The formal business having been concluded, Dr. MacLehose was asked to address the meeting. On behalf of the Federation, Dr. MacLehose expressed appreciation of the valuable services rendered by representatives of the Home Counties Alliance, and went on to address members privately on the subject of wages.

Mr. R. A. Austen-Leigh also spoke, making very appreciative personal reference to several of the Alliance's officers.

Mr. Albert Bennett then addressed the meeting, specially urging members to make greater use of the Alliance and the Federation.

The last speaker was Mr. A. E. Goodwin, who, in response to a call from the chair, touched on various matters of trade interest. He stressed the need for the maintenance of fair prices, and drew attention to the prevalence of the mistaken idea that municipalities and local authorities can save huge sums to the ratepayers by opening stores or establishing printing plants. Those who had had experience of municipal contracts would know, he said, that in view of the keen competition for this work, there was no room for further economy. He asked members to report to 24, Holborn any attempts at municipal trading that might be made.

The Luncheon.

The luncheon which followed was a very pleasant function, the Lord Mayor and Lady Mayoress being the principal guests, with Mr. Greenhill in the chair. Among those present were: Mrs. Greenhill, the Mayor and Mayoress of Portsmouth, the Ex-Mayors and Ex-Mayoresses of Bedford, Tunbridge Wells and Reading, Sir A. R. and Lady Holbrook, Dr. J. MacLehose (president of the Federation of Master Printers and Allied Trades of the United Kingdom) and Mrs. MacLehose, Mr. R. A. Austen-Leigh (senior vice-president of the Federation) and Mrs. Austen-Leigh, Mr. S. F. Oxley, Mr. G. Soundy Unwin, Mr. T. J. S. Guilford, Mr. A. Bennett, Mr. H. H. Potts, Major W. H. Barrell, Mr. W. Blake, Mr. A. L. Strange, Mr. R. J. Byland, Mr. G. T. Hunt, Mr. C. F. Jennings, Mr. H. Clegg, Mr. H. A. Richardson, Mr. B. Phillips-Denham, Mr. F. Dangerfield, Mr. F. R. Carling, Mr. C. Francis (New York), Mr. W. C. Rendle, Mr. H. Stalker, Mr. L. B. Mackay, and others, with the secretary, Mr. Percy D. Michael. Most of the gentlemen were accompanied by ladies.

The toast of "Our Most Distinguished Guests, the Right Hon. the Lord Mayor and Lady Mayoress," was happily proposed by Mr. Albert Bennett, who mentioned the fact that in the present Lord Mayor they had one who was not only a printer and stationer but an author and publisher as well.

Lord Mayor and the Trade.

The Lord Mayor, in responding, said that it was about 50 years ago when he first sought to be of assistance to printers and stationers, and since then he had been in close touch with many friends in the industry throughout the Kingdom. In addition to his own business he had been able to devote some attention to public work, and this had resulted in his holding his present position as Lord Mayor. This had not been accomplished without work, and he wished to impress upon the younger men present that without hard work

no man could succeed. He had always worked hard, in his earlier life often 16 hours a day and now he often worked as many as 16 hours a day as Lord Mayor.

The toast of "The Federation of Master Printers" was proposed by Mr. G. Soundy Unwin, who coupled with it the name of the president of the Federation. He referred to the growth achieved since the Federation's establishment, and stressed the need for all master printers to join the organisation. He went on to pay a very high tribute of appreciation to the work Dr. MacLehose had been doing for the trade, and mentioned that the president had now visited every Alliance in the Kingdom.

Federation President's Speech.

Dr. MacLehose, in responding, said he would always remember with gratitude the extremely loyal support he had received throughout the country. In proceeding to refer to some of the Federation's activities he mentioned the efforts made for securing a reduction of the postal rates, and said they had seen within the last few months what the Federation had been able to do in bringing adequate information and possible influence to bear on the Government with regard to the question of postal rates. Their representatives had been most considerably treated by the Postmaster-General, and he felt that but for the Federation it would have been impossible to collect the information which he ventured to say had something to do with the first step in the alteration of the rates for printed matter and postcards, which vitally affected the whole industry. Then, in regard to railway rates, the whole trade had benefited by the combined effort put into operation at 24, Holborn. Work was also being done at the present moment in connection with the Safeguarding of Industries Act, the Advertisements Regulation Act and the Emergency Marks Act. He paid a tribute to the value of the work accomplished by the secretaries and their staffs at 24, Holborn. Referring to the outlook generally, he said he believed there was no need to despair. He thought the country could go forward with hope and confidence, as he found on many sides that labour problems were being regarded in a reasonable and fair-minded way. Of this he had special evidence when he attended recently an industrial court under the Joint Industrial Council.

Mr. R. A. Austen-Leigh gave the toast of "The Home Counties Master Printers' Alliance," which he did in his customary interesting and witty fashion. He made appreciative reference to the work of Mr. Greenhill as the Alliance president, and also intimated that much of the success attained was due to the Alliance's indefatigable and indeed irrepressible secretary.

Fitting response was made by the chairman, Mr. Greenhill, who, in the course of his remarks, referred to the presence among them of Mr. Chas. Francis, of New York, and his daughter, Mrs. Fitch. He said that he had had the pleasure some years ago of going to the States and had found that the hospitality and brotherly feeling exhibited to the British visitor by printers in the States were simply beyond praise. He hoped that wherever their American friends went, printers would give them a most cordial reception.

Later in the afternoon, the visit to St. Paul's Cathedral, where the party were granted exceptional facilities for inspection, proved immensely interesting, and a very successful day was brought to a happy conclusion at the Mansion House, the party being most graciously received and entertained to tea by the Lord Mayor and Lady Mayoress.

MR. E. G. ARNOLD AND CARDIFF PRINTERS.

—Mr. E. G. Arnold, of Leeds, ex-president of the Federation of Master Printers, who has been visiting Cardiff, said in relation to the state of the printing trade in that city:—"Returning after several years' absence, it is noticeable how the printing trade and printing trade affairs have increased and developed in Cardiff. The number of firms of considerable magnitude and repute is greatly in excess of former years. Their machinery, plant, and equipment are of the most modern type; and the activity of this output is worthy of the finest traditions and usage of British typography at its best. The Cardiff Master Printers' Association struck me as being an immensely alert body of business men.

Two women wore smart-looking paper hats in Kingsway last week to show that the material was in no way affected by the rain. The hats are sold at 5s. each.

Master Printers of the Central London DISTRICTS.

Annual Meeting of the Association.

The annual general meeting of the Association of Master Printers of the London Central Districts was held at Stationers' Hall on Friday, the president, Mr. J. D. McAra being in the chair.

After the dispatch of preliminary business, the chairman expressed the Association's congratulations to Mr. Burchell on the success of his campaign for the reduction of postal rates. He recognised that other agencies had been at work, but Mr. Burchell had put in indefatigable work and shown amazing pertinacity. The Association owed a debt of gratitude to him for his efforts. He thought it unfair that the expense of this propaganda work should fall on Mr. Burchell's shoulders, and it was therefore proposed that at the next executive meeting a recommendation should go forward to headquarters. He moved a resolution expressing the meeting's thanks to Mr. Burchell for his efforts, and asking that the Association's deep appreciation of his untiring labour for the benefit of the craft be recorded on the minutes.

Mr. Oscar C. Griffith seconded, and the resolution was carried unanimously.

The report for the period March 25th, 1921, to March 25th, 1922, mentioned that this year members had had fewer opportunities of coming together. Several important meetings had, however, been held in the course of the year, and 30 firms had been added to the Central Districts membership, the total number of which was now very near the 500 mark.

The treasurer's report showed a satisfactory state of the Association's finance, there being a substantial balance in hand. Both reports were cordially adopted.

The chairman drew attention to Rule 9 of the Branch, and said it was suggested that a modification might be made to change the words "vice-president" into "vice-presidents" and "hon. sec." into "hon. secs." A plurality of these officers would, on the one hand, provide wider scope in the election of the president and also give some assistance to Mr. Burchell in his secretarial work.

Mr. Crowlesmith asked whether it was understood that the senior vice-president for the time being would succeed, all being well, to the position of president.

The chairman having replied that this was understood, the motion was agreed to.

Election of Officers.

The next business was the election of the Association's officers for the forthcoming year and this business was expeditiously carried out, the Association's existing president, vice-president, hon. secretary and hon. treasurer receiving hearty thanks for their past services.

Mr. J. D. McAra was re-elected president. For the vice-presidency Mr. Oscar C. Griffith was re-elected, and as additional vice-presidents Messrs. George Eaton Hart and R. A. Austen-Leigh were chosen. Mr. Crowlesmith was re-elected hon. treasurer, and Mr. W. H. Burchell and Mr. W. J. Boyle as joint secretaries. The hon. auditor, Mr. C. Clifford Bliss, A.C.A., was re-elected, as were also the Association's hon. solicitors, Messrs. Hays, Rough-ton and Dunn.

The following twenty-seven members were then elected to the committee, leaving three to be co-opted at the committee's first meeting: Messrs. Arthur Bonner (Bonner and Co.), H. Basil Cahusac (Solicitors' Law Stationery Society, Ltd.), Ernest W. Carter (W. Speaight and Sons, Ltd.), W. Charles (Charles and Sons), J. S. Crowther, J.P., H. R. Danford (H. R. Danford and Sons, Ltd.), Ernest H. Diprose (Diprose, Bateman and Co.), William Ede (Ede and Townsend, Ltd.), J. S. Elias (Odhams Press, Ltd.), H. J. Forder (Harrison, Jehring and Co., Ltd.), A. F. Fosh (Fosh and Cross, Ltd.), H. J. Goss (H. J. Goss and Co., Ltd.), Sir Cecil Harrison, K.B.E. (Harrison and Sons), Mr. W. Howard Hazell, J.P. (Hazell, Watson and Viney, Ltd.), Lieut.-Col. B. L. Hooper (Charles Hooper and Co., Ltd), Messrs. S. J. Jarden (Geo. Barber), C. H. Lea (Williams, Lea and Co., Ltd.), E. Macintosh (Wyman and Sons, Ltd.), D. G. Milne (Cassell and Co., Ltd.), Charles Palmer (Eyre and Spottiswoode, Ltd.), O. G. Poulson (Warrington and Co.), Hartley Straker (Straker Bros., Ltd.), Lieut.-Col. J. R. Truscott (Jas. Truscott and Son, Ltd.), Messrs. Edward Unwin, sen, (Unwin Bros., Ltd.), Harold W. Walbrook (Walbrook and Co., Ltd.), F. W. White (F. W.

White, Ltd.), A. Willmott (Willmott and Sons, Ltd.), and George Witherby (Witherby and Co.).

The chairman announced with very great regret that he had that day learned that Mr. Alfred Harris, of the Romney Press, had passed away. The hon. secretary was sending a wreath for the funeral—of which action he thought all members would approve. He moved that the secretary be instructed to send a letter of condolence to the bereaved family. Mr. Harris had been a sincere and energetic worker for the Association.

Mr. R. A. Austen-Leigh seconded the motion, expressing his regret at hearing the news, and the motion was carried unanimously.

The Wages Movement.

The formal business of the evening having been concluded, the chairman announced that the president of the L.M.P.A., Lieut.-Col. J. R. Truscott, had been unable to come to address the meeting as had been anticipated, but had sent Mr. A. Langley, the vice-president of the L.M.P.A., in his stead.

Mr. Langley thereupon delivered an energetic address, basing his remarks upon a phrase which Col. Truscott had used in asking him to attend the meeting as deputy—"Keep the flag flying." After referring briefly to the wages negotiations he laid some stress on the question of competition by wholesale houses and urged members to respond to the appeal from headquarters for assistance in putting the case for the printer against this unfair competition, of which he mentioned a very striking example.

Mr. R. A. Austen-Leigh was then asked to speak, and in response addressed the meeting briefly on the subject of the wages negotiations.

The chairman afterwards called upon Mr. Burchell, who, in the course of his remarks, gave the meeting an interesting *résumé* of his efforts in connection with the campaign for reduced postage.

Mr. Langley added to the many congratulations Mr. Burchell had received already by conveying the hearty thanks of the West and North-West London Master Printers' Association for Mr. Burchell's efforts, which he said were very much appreciated by their membership.

The meeting closed with a vote of thanks to the president, Mr. McAra, moved by Mr. Griffith and seconded by Mr. Burchell, satisfaction being expressed that the Association would continue to have Mr. McAra's services in the chair.

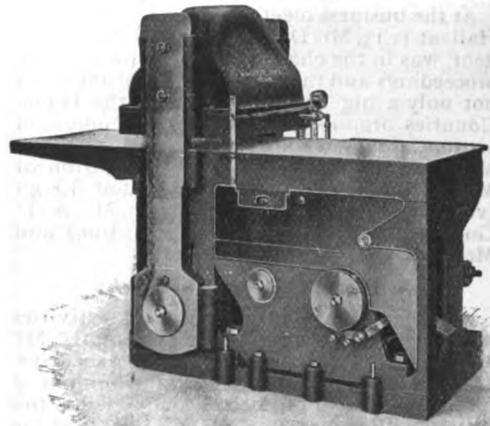

The "Photo-Tone" Stereo Process.

It has been the practice since the introduction of the various modern colour printing processes to have the necessary plates reproduced from the originals by means of electrotyping, as the cheaper and quicker process of stereotyping has not, in most cases, been capable of producing results of the very finest quality. To remedy this, and to provide a stereotyping plant that would reproduce plates equal to any that could be made by electrotyping, has been the aim of Messrs. William J. Light and Co., Ltd., 127, Fenchurch-street, London, E.C.3, and with the assistance of several practical printers they have succeeded in evolving and placing on the market a stereo flog rendering it possible to reproduce the finest half-tones, three and four colour prints, etc., as quickly as an ordinary stereo. The matrix can be produced in from three to five minutes, and then as many casts as may be required, curved or flat, can be produced. The matrices have the important advantage that, even where a great many casts are made, they still retain their accuracy, a feature that is of the greatest importance in fine colour printing. Thus plates may be reproduced quickly and economically, even from the very finest originals.

In conjunction with Winkler, Fallert and Co., a complete plant has been devised, and the following brief description of how the process is worked should interest our readers. The method is called "Light's Photo-tone" Stereo Process, and is carried out as follows: After moistening, the flog is placed on the form, then covered with felt, and a suitable number of sheets of moulding paper are placed in the press, which is put into operation. The head of the press is lowered in a horizontal position, and on reaching the desired point of pressure it is automatically put out of gear, so that matrix, type, etc., remain together under reduced pressure.

Both the upper and lower press plates, either together or separately, can be heated by steam or electrically, and, in order to thoroughly dry the matrix as quickly as possible, a patented suction system is provided, which operates as follows: Together with the press, a vacuum pump driven by a small motor is put into operation, and quickly sucks off the moisture and vapours through a large number of hollow suction plugs, so that an absolutely uniform, dry matrix is obtained, which can be used at once for casting. The press is then put into operation again until the head reaches its original raised position. The finished matrix is removed from the form, and does not even need to be chalked.

The matrix has the property of retaining its original size, even after a large number

The WINKLER AUTOMATIC MOULDING PRESS

for Fine Art & Newspaper Moulds.
Electric or Steam-Heated—for Dry or Wet Flog.

of plates have been cast, so that an extremely accurate register is obtained, which is of the greatest importance for multi-colour printing.

The presses are constructed in two different types, one of which is designed for cold and the other for both hot and cold moulding. The latter is used where picture, catalogues or illustrated magazines are printed, or where hot moulding is required for any other reason, whilst the former is for newspaper work with or without illustrations, where time is an important factor. When it is desired to produce pictures of fine screen, the moulding of the matrix should be effected by the hot process.

The production of the plate, including the moulding, casting, finishing and nickeling of the matrix takes about 30 minutes. If it is taken into consideration that on such a plate various pictures, descriptive matter, etc., can appear, every expert will at once understand what an enormous saving is obtained, and, indeed, even in printing, because a well-adjusted stereo plate of this kind gives much better results than combinations of type and electros, quite apart from the extremely tedious picking of the type provided with many printing blocks, which can never be entirely avoided. A further important factor in this "photo-tone" stereo process is the fact that, when the plate becomes defective whilst in use, it can be replaced at once, whereas hitherto the machine had to be stopped until a new block or electro was finished, and because this sometimes took several days, the type, etc., had to be removed entirely. The finished matrices can be placed aside and kept for later editions, so that re-composition of type is saved unless, of course, alterations are required. From wood blocks separately, or in connection with catalogue matter, excellent matrices can also be made.

The new process is meeting with much appreciation on the Continent, and installations have now been made in several large English offices.

Raphael House,

CITY, LONDON,

MAY, 1922.

TO OUR FRIENDS THROUGHOUT THE WORLD.

A nother year is added to our lengthy Art Service, and for the fifty-sixth year in succession we place our latest annual collection of Art productions on the markets of the World.

Never have we given more tangible proof of the efficient manner in which we are carrying on the **World's Art Service**. Never have we been more confident of the universal acclamation with which this, our latest effort in the furtherance of Art in all its forms will be received by the great Public all the world over.

How thoroughly and successfully every taste has been provided for, is at once evidenced by an inspection of our immense range of CHRISTMAS and NEW YEAR CARDS, CALENDARS, BLOCK CALENDARS, POST-CARDS, GIFT BOOKS, TOY BOOKS, PAINTING BOOKS, PICTURES, ART NOVELTIES, etc., etc., each in turn contributing to an **Art Service** without parallel in the history of the World, and made possible only by years of careful study and unrivalled experience.

Among the 3,000 and more designs of which the General Christmas Card Collection is composed and which embodies every popular and artistic style of design and reproduction, stand out a number of series either on account of exceptional novelty, sterling merit or well-earned popularity.

These, in addition to the hosts of our other popular styles of Christmas and New Year Cards, and our absolutely unprecedented lines of Calendars, Toy Books, Gift Books, Panoramas, etc., etc., all represented in a wonderful range of entirely new designs, thoroughly justify their claim to the **World's Art Service**.

L'Envoi True to the ideals that have ever guided us in our labours, we have, we trust, once again acquitted ourselves in a manner worthy of our great Public and of ourselves.

The confidence that begets success has been due in no little measure to the loyalty we have been privileged to enjoy these many years from our thousands of friends, upon whose encouraging support we feel sure we may continue to rely in the happy carrying on of the **World's Art Service**.

Very faithfully yours,

Raphael Tuck Sons

Should you experience any difficulty in seeing our complete collection, please communicate with us.

Make a Good Impression!

An unrivalled experience and technical knowledge enable Lorilleux & Bolton, Ltd., to produce Printing Inks of the first quality for the latest processes and with the greatest range of tints, colours, consistencies and drying properties.

New Designs in Greeting Cards.

Messrs. Raphael Tuck and Sons' Fine Collection.

Once again—for the 56th year in succession—the trade is being notified that Messrs. Raphael Tuck and Sons, Ltd., have completed the compilation of a new series of greeting cards and other art productions for which the house of Tuck is world famous. After an inspection of the bewildering variety of admirable designs which they are able to show at Raphael House we are quite ready to share the firm's own conviction that, high as have been their achievements in previous years, this year's new examples reach a level higher still. So thorough has been Messrs. Raphael Tuck's investigation of the resources of the printing trade in the production of art subjects, that a selection of Tuck samples forms an excellent object lesson to the student of printing technology. A wonderfully wide range of different processes are represented in the new collection. One

the cards is often such has to lend itself specially to such a purpose.

The new Christmas and New Year cards—which comprise something over 3,000 designs, ranging in price from 7s. to 1d. retail—are headed once more by handsome examples prepared specially for members of the Royal family. This year again Messrs. Tuck have

practical utility is thus added to their ornamental service. One notices again the very striking "Broderie D'Art" series with designs worked in silk, also the popular "Hand-Printed Facsimile," "Colour Facsimile," "Oil Facsim" and "Oilette" series, as well as other attractive lines too numerous to mention.

A good point about Messrs. Tuck's greeting cards is the careful and tasteful choice made of greetings, quotations, and verses, a matter which is of great importance in satisfying public requirements.

The Christmas and New Year cards are accompanied by a new and extensive selection of calendars, birthday postcards, Easter and condolence cards, wedding stationery, menus, etc., which, together with gift books, pictures, toy items and many other lines, go to make up the very impressive group of art products which Messrs. Tuck designate the "World's Art Service."

It will be remembered that last year, despite pessimistic talk in some quarters of the slump in the greeting card habit, Messrs. Raphael Tuck and Sons were able to announce record sales for their productions. This year Christmas cards, picture postcards and the like will

NO. 4060. RAPHAEL TUCK & SONS, LTD.

the honour to produce cards for the King and Queen, Queen Alexandra, the Prince of Wales and Princess Mary. Very beautiful these Royal cards are, and replicas of them are available, at various prices, for sale to the public.

Among the wide variety of greeting cards included it is difficult to single out particular classes, but we have no doubt that the new "Golden Filigree" series, which has the rich effect that its name suggests, will be very popular, while the "Art Moderne," the "Flora," and the "Bluebird" series can also be relied on to achieve success. A strong feature once more is the "Pot Pourri" series, in which is utilised Messrs. Tuck's patent method of including in the card fragrant flower petals which impart a delicate perfume; this has already made these cards extremely popular with the fair sex. Among the various new designs in this series the "Duplex Pot Pourri" is an outstanding example, embodying a further Tuck patent, according to which an extra fold is given to the card so as to make it capable of standing on a table, and as each card carries a calendar

RAPHAEL TUCK & SONS LTD. 4030

experience a welcome relief from the heavy handicap imposed upon them of late by the high postal rates. Taking this important factor into consideration—in combination with the factor of quality, which counts for so much in ensuring success—we think it would be safe to predict that this year's sales will reach figures which will put even last year's record into the shade.

RAPHAEL TUCK & SONS LTD. 4037

notices particularly the delightful effects which are now being achieved by the use of photogravure in colours, whilst litho-offset has also some work of outstanding merit to its credit, both these processes being utilised for the production of pictures which might easily be mistaken for the artists' originals. Indeed, many Tuck cards are worthy of being framed for wall decoration, and the design of

New Inventions.

Printing Cylinders.

In an invention patented by Mr. G. W. Mascord, printing cylinders of the kind provided with dovetail or undercut longitudinal ribs to receive a plurality of intaglio or other printing plates, have these ribs slightly tapered along their longitudinal edges, so that the printing plates with correspondingly formed edges or grooves may be wedged tightly in position. A continuous periphery may be obtained by forming the ribs of the same height as the thickness of the printing plates, or the ribs of these may meet over the tops of the ribs to provide a continuous printing surface. The cylinders are also provided with end clamps for securing the plates in position, and with screw actuated levers for releasing them. As shown the cylinder *a* is adapted to receive two sets of four printing plates *a*¹, *a*², *a*³, *a*⁴, by means of the dovetail longitudinal ribs *c*, and a circumferential rib *d*, which may be dovetail, undercut, or plain,

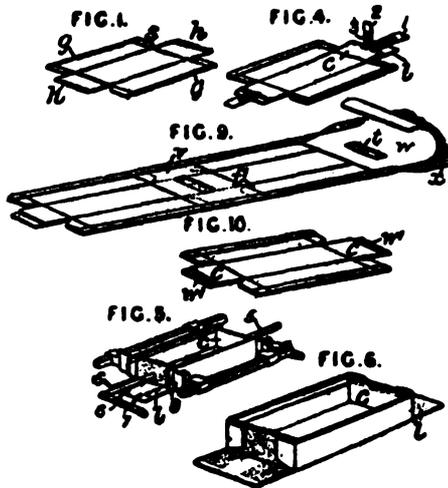

the longitudinal ribs *c* being tapered, as shown in Fig. 1. The plates are clamped tight up against the rib *d* by segmental clamps *e* mounted on the end plates *f* of the cylinder. The clamps are carried by screw studs *h*, guided by pins *g* passing through holes in the end plates *f*, and are shaped at *e*¹ to engage the bevelled or vertical edges of the printing plates, the screw studs *h* being fitted with milled headed clamping nuts *i* and locking nuts *j*. Four plate releasing devices are mounted on the cylinder, one for each pair of plates *a*¹, *a*², opposed in line, as shown in Fig. 3. Each device comprises a lever *m* projecting through a slot in the periphery of the cylinder *a* into a dovetail or other recess formed between the meeting edges of the plates *a*¹, *a*², the inner end of the lever *m* being forked to engage pins on a nut working on a nut threaded portion *l* of a rod *k* mounted in bearings in the cylinder end plates *f*. By rotating the rod *k* by means of the heads *n* in one or other direction, either of the plates *a*¹, *a*² may be moved outwardly and released from the wedging action of the ribs *c*. The latter may be shaped as shown in Figs. 4 and 5, and of a height to be continuous with the surface of the printing plates, or as shown in Fig. 6, wherein the edges of the printing plates meet over the ribs to produce a continuous printing surface. The longitudinal grooves may be disposed laterally or centrally with respect to the plates or in any other position.

Paper Boxes.

Under a patent by Mr. H. B. Smith covered paper or like boxes are made up either from separately cut body and cover blanks subsequently connected together by adhesive, or from continuous strips or webs of body and cover material which are caused to adhere together and are subsequently cut into blanks. The boxes are assembled around plungers or formers of the requisite shape, which are not illustrated. According to the first or "blank" method, a body blank *s*, Fig. 1, appropriately cut and scored and coated entirely on the underside and along the parts *g*, *h* of the upper surface with adhesive, is placed upon and caused to adhere to a similarly shaped cover blank, as shown in Fig. 4, the central parts of the box end wing *c* being, however, spaced away from the cover blank by the

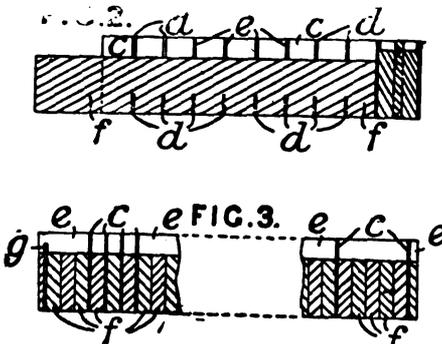

interposition of separators *i*. The marginal edges of the cover side wings, which are wider than those of the body, are folded over on to the coated parts *g*. By gripping means *2*, *3* the end wings *c* are lifted up away from contact with the cover blank and are maintained in position by rods *5*, Fig. 5, or other means, the cover end wings *l* being held down by means such as fingers *6*. The covered side wings are next folded up and their corner laps turned in by fingers *8* and caused to adhere to the end wings *c*, producing the appearance shown in Fig. 6. The cover end

wings *l*, which have been coated with adhesive by "by offsetting" from the body blank, are finally turned upwardly and inwardly over the end wing *c* to complete the box. In the second or "web" method of assembly, strips *w*, Fig. 9, of body material and *x* of cover are fed from rolls, one surface, conveniently the upper surface of the cover web, being coated with adhesive. The body web before assembly with the cover is perforated with spaced rectangular aperture *t* and may be creased or scored as at *f*¹, although the creasing, etc., may be done after assembly of the webs. As the webs advance from the rolls they are caused to adhere and the marginal edges of the cover, which is wider than the body web, are turned over on to the latter. Portions *v* indicated by dotted lines, are next cut from the united webs, leaving the box-forming elements connected only by cover material, further severances of which mid-way between the elements result in a series of covered blanks, as shown in Fig. 10. These blanks differ from those in Fig. 4 in that the marginal parts *w*¹ of the cover end wings are coated with adhesive whilst the adhesive coating *h* of the body end wings in Fig. 1 is lacking. The composite blank is set up as described above in connection with Figs. 1 to 6.

Type-High Rules.

According to an invention by Mr. J. E. Barber, type-high rules *c* are provided with narrow rectangular slots *d* to receive rules *e* of less than type height, which run at right angles to the rules *c*, and are supported with

their upper edges of type height on spacing pieces *f*. The rules *c* are preferably slotted on both edges. Slotted carrier or strengthening rules *g*, Fig. 3, of less than type height may be used where necessary.

"Fryotype" Melting Pot

SAVES LABOUR.

SAVES MONEY.

A "Fryotype" Melting Pot is not a luxury; it is a necessity. It is not an expense; it is an economy. Nearly 200 Printers have installed these Melting Pots during the past 12 months, and while you are reading this they are saving labour, time, gas and metal.

Send for descriptive folder and learn how you, too, can save money.

The Older Kinds of Printing Plates.

Notes on Points of Advantage possessed by
Illustrative Processes now Largely Displaced.

By DUNCAN KEATS.

Though the older kinds of printing plates are now displaced by those produced by the mechanical and more speedy methods, they are nevertheless capable of giving results which arrest attention by the very beauty of their effect—a beauty which is rarely attained and never surpassed by the methods obtained in these strenuous days of production.

The Three Processes Described.

All processes of printing are based on one of three methods: the relief, the intaglio or the planographic.

In the first the ink-bearing portions are raised above the surrounding and supporting surface proper. This is that principle on which plates for the use of letterpress printing are produced, comprising woodcuts, line, Bunday, half-tone (inclusive of three and four-colour processes) and also electrotypes and stereotypes. One characteristic of this principle, and possibly its chief limitation, is that all the gradation from the lightest to the darkest of tones must be rendered by the size of the printing area alone, since the film of ink deposited is actually of the same thickness over the whole surface of the print.

In the second method—the intaglio—the portions for holding ink are channelled out below the surrounding surface of the plate, so that an impression being pulled from such a plate the ink will appear raised to different heights of relief upon the paper, consistent to the varying depths to which different parts of the plate may have been cut or etched. Thus the actual quantity of ink lifted from these incisions must play a very important part in obtaining density as distinct from the mere area of surface covered. Plates produced after this manner include copper and steel engravings or etchings; mezzo and aquatints, photogravure and also its modern adaptation which has had such a great future predicted for it—mechanical gravure—which is so frequently referred to as "gravure" or "intaglio."

The third principle involved is that known as the planographic method, wherein the natural antipathy which grease and water bear to one another is made full use of. It is the underlying principle of all lithographic work to-day, whether flat-bed, rotary or offset.

Development of the Processes.

This last method is of comparatively recent discovery, having been introduced about the first year of the 19th Century, while the two other methods can justly lay claim to great antiquity.

Résumé of lecture delivered before the Electrotypers and Stereotypers Overseers' Association.

The intaglio principle was freely used by many great painters to duplicate some of their masterpieces, and is now accepted to have been first requisitioned by the printing craft about the middle of the 15th century, nearly 500 years ago. Those early printers acquired a knowledge of it from the goldsmiths, who after engraving some ornament or article of jewellery used to fill in the parts cut away with a black wax or colour and impress it on a piece of skin or paper in order to preserve the design for future use. Occasionally the black enamel showed up the design to better advantage, and might be deemed an early mode of advertising their wares smartly. The intaglio plate was usually prepared by one of two broad methods, known as "engraved" or "etched." In the case of the etched plate, a polished sheet of copper was coated with a thin layer of either beeswax, white wax, or similar substance, to form what was termed their etching ground. This ground work was then given a fine black surface—not in a black-leading shop by either the wet or dry process, but by the more primitive method of inverting it over lighted wax tapers.

Upon the plate thus prepared the design was sketched with etching needles of various sizes; these, passing through the wax, laid bare the copper, which, by shining out in strong contrast against the dense blackness of the remainder, rendered the progress of the work easily discernible. After the drawing had been completed, and the back of the plate protected by varnishing it over, it was placed in an earthenware bath containing an acid which possessed the power to eat away the exposed parts of the copper. Certain places, as flesh tints and fine lines in sky or water, would be required to print very light, while the shadows must be deep and dense. This was accomplished by what is termed stopping out; the plate for this purpose being periodically removed from the bath, and as each tone is bitten to its proper depth is painted over with a protective coating, which prevents any further action of the acid upon it. After being fully etched, both wax ground and varnish resist would be thoroughly cleaned off, when the plate would be ready for the press.

The actual printing from same was carried out on a copperplate press, similar to the one used by lithographic students in the schools when pulling their transfers for certain classes of work even to-day. It is entirely a manual operation, a semi-solid ink being first applied to the whole surface of the plate, then rubbed off with a rag, and finally cleaned with some powdered chalk and the ball of the hand, except where it has entered the etched lines. The inked plate, with a sheet of moistened

paper upon it, is laid upon the bed of the press, and trundled between the rollers after the manner of a mangle.

Beauty of Old Intaglio Printing.

If you will examine prints that were pulled from etched plates, you will agree, I am sure, with that great master of etchings, namely, Whistler, who said their real beauty lay in the fact that "they tell so much with so few lines." They certainly possess the power of conveying a maximum of effect, with a degree of easy freedom which is in marked contrast to the next method—that of engraving the design into the copper.

A print from an engraved plate is more precise, and of a formal severe appearance; in this method the design is lightly sketched on the copper surface, and afterwards cut into it with tools known as "burins" or "gravers." When engraving, the handle rests against the palm of the hand, with the fingers laid lightly on the tool for guidance purposes alone, the graver can then easily be pushed forward over and into the metal in a very accurate manner. This process is obviously a much slower one than that of etching, but imparts a crisp clean result which gives it its distinctive features.

Many plates are referred to as steel engravings, when often they are copper subjected to a steel facing bath in order to enable a greater number of impressions to be struck. Both etching and engraving were sometimes happily used in combination to obtain some desired effect.

One other and more modern intaglio process, introduced after the advent of photography, is that of hand photogravure; prints by this process most nearly resemble a photograph. In this instance the camera is requisitioned in order to obtain the design for transference to the copper plate, which has previously been dusted over to obtain a granular effect. The actual etching and printing is carried out in a very similar manner to that already outlined.

Modern mechanical gravure, that latest of processes to be harnessed to our commercial needs, has for its foundation the same underlying principles as hand gravure, but with the addition of a very fine screen; this is of a regular pattern somewhat akin to the everyday half-tone. It is necessary for such to obtain a suitable ground work in the plate or cylinder which will take up and hold a liquid ink on a machine that must of necessity travel at a high speed.

The Woodcut.

To deal next with a few printing plates made by the relief method, the earliest was without doubt a woodcut. Its actual inventor is of very doubtful identity. Rumour gives the

LINOTYPE AND MACHINERY LIMITED, 9 KINGSWAY, LONDON.

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES:

- 1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading.
- 2.—It occupies a space of only six feet on the run, and is quite noiseless.
- 3.—The power required is such a small amount that it can be driven from any existing shafting.
- 4.—Centres of any kind or width can be worked on the machine.
- 5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day.
- 6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills.

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., *Engineers,* Myrtle Road Works, Brentwood, ESSEX

credit to a Chinaman who is believed to have introduced it to that ancient civilisation many years prior to the commencement of our own era.

The first undisputed record of the woodcut being used for illustration purposes gives the date as 1423, after which many books, called "block books," were produced, having each page, containing both illustration and text, cut from the single piece of wood.

Wood engraving offered a much cheaper means of illustrating books than any of the earlier intaglio processes, one very distinct advantage being that, when made type high, it could be assembled in a forme with the text matter, and printed simultaneously. In fact, the history of wood engraving is practically a history of book illustration up to approximately 1880, when it commenced to recede from the premier position in favour of its successors—the photo-mechanical processes of line and half-tone plates. Many of the early colour prints were produced solely from woodcuts, in these instances a separate block was cut for each colour and printed after the manner of a flat tint, various means being observed to obtain the necessary register. Some possess exceptional artistic merit and will compare with any production from the modern printing plate.

This particular phase of the art was most assiduously cultivated by the Japanese. The zenith, however, of this work was attained by English workers when that great master of engraving and blending of colour, Geo. Baxter, took out a patent for his colour-printing methods. He combined the intaglio and relief processes, printing his outline from an intaglio plate and fitting the various colours, printed from wood blocks, into it. Even in his letterpress some colours are of a matt appearance, whilst others contain a large percentage of oil and varnish, this happy combination still further enhancing their effectiveness.

Litho-Relief Process.

One other rare plate which should be touched upon is one which, if inadvertently damaged, would take a great deal of knocking up from the back and retouching the plate, namely, the use of an engraved lithographic stone. This, being a true relief surface, can be, and has been, printed on a letterpress machine.

The last-named process denotes a stage in the evolution which took place between the invention of lithography and the chemical manner of its application as we know it today, namely, printing from truly planographic surfaces.

The "Klipto" Loose-leaf Binder.

A short time ago Mr. George A. Bennett, of Australia, designed a loose-leaf book which has caused a big stir in the loose-leaf world. This book is known as the "Klipto," and it claims to embody all the advantages possessed by other loose-leaf books, and in addition, to have special features of its own.

The device consists primarily of a "renewable-leaf" binder, which is made so as to cover any desired size and ruling of sheets, and which, while permitting leaves to be inserted or extracted in ten seconds, secures and locks them as effectively as they would be in a sewn volume, and allows them also to be put away in a safe or strong-room just as ordinary books would be.

The patent lock, which permits the free use and arrangement of the sheets, also allows the office manager or accountant, if, and when necessary, to maintain absolute control by means of a key; while an ingenious double lock meets any requirements of privacy. The patent clip gives as effectual a check against tampering with or extracting sheets as would be afforded by any form of permanent binding, and the whole system is so adaptable that the transition of existing records can be instantaneously made to the "Klipto" binders. These covers last for seven years, and are made to fit the existing sheets, which are adapted thereto at trifling cost, and without any necessity for re-writing. The only further expense is in buying or printing fresh sheets as required. All metal bars, posts and other projections are done away with in this system, and the "Klipto" binders can, therefore, be handled just as ordinary books and without any damage to other covers with which they may be brought in contact.

Mr. Bennett will shortly be on a visit to this country, but, in the meantime, inquiries may be addressed to him at the "Klipto" Loose-leaf Manufacturing Co., Ltd., 220, Leedesdorff-street, San Francisco, California.

London Master Printers' Association

The Past Year's Work Reviewed.

The following is the full text of the annual report by the Council of the L.M.P.A. for the year 1921-1922:—

"The organisation of the London area has been considerably extended in the course of the year. This is chiefly due to the ever-increasing activities of the District Associations, which have already done so much for the craft in London, and it is noted that the appointment of an additional organiser has already had excellent results, the membership on March 25th last being 1,100, composed of union, open and non-federated union houses.

"The principal feature of the past twelve months has been the effort of the L.M.P.A., in conjunction with the Master Printers' Federation, to relieve the depression which has existed for so long in the trade owing to the high cost of production with the result of serious unemployment, and with this end in view negotiations were opened in May last by the Master Printers' Federation with the various unions, the result of meetings extending over a period of five months being a general reduction of 7s. 6d. for men and 3s. for women. Unfortunately the amount of support received from members generally was not sufficient to make this reduction universal with the result that three unions accepted only a 5s. reduction for men, and it is regrettable in the interests of the London trade that two of these were operating in the London area only and have therefore been effective in imposing a further handicap on the London printer who has to compete with the Provinces for general work. It is hoped by the Council that the present negotiations for a further reduction, which is imperatively necessary if there is to be any likelihood of the trade resuming its normal position, will have sufficient support from the members to ensure a more substantial and universal reduction on this occasion.

"Negotiations extending over a long period have taken place with the London Society of Compositors with the result that an agreement was reached on the linotype and hand composition sections of the piece scales in September last, but, unfortunately, owing to the refusal of the Society to give effect to the employers' right of choice on the question of piece or 'stab,' the operation of the linotype scale has been retarded and further negotiations are impending in the hope of a settlement being reached. The hand piece section also has given rise to some dissatisfaction and it is proposed to have further conferences with the London Society of Compositors on this and also on the monotype section, which has yet to be agreed.

"By agreement with the same Society, the overtime limit per month was reduced from 32 hours to 24, the Society in return conceding a special rate for regular night shifts.

"The London District Committee of the Joint Industrial Council, under the able chairmanship of Mr. F. A. Davies, of the London Society of Compositors, has met on several occasions chiefly to mediate in disputes between employers and employed, and the Committee in this way has already been of considerable service to the trade, with the prospect of even better help in the future.

"The monthly luncheon series was greatly interrupted by the prolonged wages negotiations, but opportunity was found on three occasions to call members together to listen to addresses on the wages position and to an inspiring appeal from Mr. Nuttall, of the Ministry of Labour Training Department, on behalf of disabled soldiers and sailors seeking admission to the trade.

"On the personal side, mention may be made of the popular baronetcy conferred on Sir G. Rowland Blades by His Majesty in connection with the New Year Honours, also of the great success of the Printers' Pension Anniversary Festival under the chairmanship of Sir William Waterlow, when a record amount for an ordinary year was reached. It was also a satisfaction to the Association that a member of one of its firms, in the person of Alderman Sir John Baddeley, was elected Lord Mayor of the City of London.

"On the resignation of Mr. R. A. Austen-Leigh from the presidency of the Association on February 16th, the Council was successful in securing for the vacancy, Lieut.-Col. J. R. Truscott, of Jas. Truscott and Son, Ltd., and at the same meeting they expressed warm appreciation of the services rendered by Mr.

R. A. Austen-Leigh during his two years of office.

"The twentieth annual dinner of the Association on March 29th was a pronounced success, both for the large number who attended and the distinguished company who accepted the Council's invitation, also for the high standard of speeches delivered on that occasion.

"The bad debt recovery section is still being largely taken advantage of by the members of the Association, the total amount recovered on their behalf being now over £2,000 at a total expense to the members concerned of under £60.

"The forthcoming reduction of the injurious postal rates is a great satisfaction to the trade generally, and in this connection mention should be made of the services rendered by Lord Southwark and Mr. W. H. Burchell, the hon. secretary of the Central Districts Branch.

"The accounts for the year are highly satisfactory considering the period of depression through which the members are passing and these will, as usual, be open to the inspection of members at 24, Holborn, after the annual meeting."

The Amalgamated Press, Ltd.

Capital Reconstruction Scheme.

Shareholders in the Amalgamated Press, Ltd., have received particulars of an important scheme of capital reconstruction, the object of which is to bring the share capital into a closer relation to the assets and earning capacity of the company than exists at present. The scheme will provide for the creation and issue of seven per cent. preference shares in place of the present five per cent. preference shares.

The capital of the new company, which it is intended to register under the title of the Amalgamated Press (1922), Ltd., will consist of £3,800,000, divided into 1,000,000 seven per cent. cumulative preference shares of £1 each and 2,800,000 ordinary shares of £1 each.

The new company will take over on July 1st, 1922, as a going concern the business carried on by the Amalgamated Press, Ltd., together with the goodwill and copyrights and the assets of that company (subject to its liabilities), except 2,038,281 eight per cent. cumulative preference shares of the Anglo-Newfoundland Development Co., Ltd., of \$1 each, £339,714 of five per cent. cumulative preference shares of the Imperial Paper Mills, Ltd., and sums to cover interest, etc., on the existing preference shares to June 30th, 1922, from which date the preference shares in the proposed new company will rank for dividend; and a sum of 2s. per share on the ordinary shares and the expenses of the reconstruction.

The assets to be acquired by the new company, in addition to the copyright of the periodicals published, will comprise considerable freehold and leasehold property, plant and machinery, a large majority of the ordinary shares in the Imperial Paper Mills, Ltd., the shares in divers subsidiary companies, and debts and cash substantially exceeding liabilities taken over.

The scheme provides for the allotment to the holders of the five per cent. preference shares in this company of one fully-paid seven per cent. cumulative preference share in the new company for every preference share in the old company, and to each of the ordinary shareholders of four fully-paid £1 ordinary shares of the new company for every £1 ordinary share held in this company, and a sum of 2s. a share in cash.

The shares in the Anglo-Newfoundland Development Co., Ltd., and in the Imperial Paper Mills, Ltd., retained by the liquidator will be distributed among the holders of the ordinary shares. The distribution will amount to one five per cent. preference share of 10s. each in the Imperial Paper Mills, Ltd., and three eight per cent. preference shares of \$1 each in the Anglo-Newfoundland Development Co., Ltd., for each ordinary share in this company.

There will thus be left for future issue by the new company 450,000 seven per cent. preference shares and 82,292 ordinary shares, the proceeds of which the directors may utilise for the purpose of acquiring interest in other enterprises or generally for the purposes of the company.

In order to carry through the scheme an extraordinary general meeting will be held to pass a special resolution for liquidation of the present company.

STEREOTYPING

Peace and Prosperity for Printers.

Mr. Charles Francis of New York has a Straight Talk with Printing Trade Employers and Employed.

Talking in a frank, informal fashion, Mr. Charles Francis certainly succeeded in "getting it across" to his English audience when on Friday last he addressed London printers on "Our Problems and Our Responsibilities." The fine evening offered a strong counter-attraction, but the meeting—held under the auspices of the London District Committee of the Joint Industrial Council—drew to Stationers' Hall a very fair audience, amongst which one noticed some of the foremost representatives both of the employers' organisation and of the trade unions. The address itself and the piquant but friendly discussion that followed served equally to bring home once again the big advantages which yet remain to be reaped for the printing trade in the direction of a fuller realisation of the community of interests of employers and employed.

In the unavoidable absence of Mr. F. A. Davies (chairman London District Committee of the J.I.C. and assistant secretary of the London Society of Compositors) the chair was taken by Mr. R. A. Austen-Leigh (London employers' representative J.I.C., and vice-president Federation of Master Printers).

Introducing Mr. Francis, once a member of London Society of Compositors and now the head of one of the largest printing establishments in New York, Mr. Austen-Leigh told a little of the interesting story of Mr. Francis's life work and achievements—to which a special article was devoted in our issue of May 11th. He mentioned that Mr. Francis had taken very great interest in endeavouring to promote co-operation between employers and employed in the States, and in his efforts in this direction had founded the Printers' League of America and also the National Joint Conference Council which closely resembles our own Joint Industrial Council. The problems of the United States and of this country were very similar, and Mr. Francis's remarks would therefore be followed—especially at this particular time—with great interest.

Greatness of the Printing Craft.

Mr. Francis commenced by saying that he thought the greatness of the printing business was not fully appreciated. He felt it was the greatest business under the sun. It was not only the "art preservative of all arts": it was also the business preservative of all businesses, because businesses in general could not be carried on without printing. The invention of printing had multiplied inventions immensely, and to-day the Press was a most powerful influence for good or ill. If the Press were more conciliatory—if it taught peace instead of war—we should have a different world.

Proceeding to deal with printers' problems of the present day, Mr. Francis remarked that 50 years ago a boy was taken into the printing trade and made into a printer; to-day he was taken into the trade and made into a specialist. How to make the boy a printer was one of our problems.

Negotiations Between Employers and Unions.

Another problem, and one of the greatest, was the question of the organisation of the printing industry and the attainment of improved means of communication between employers and employed. The organisation of the employees in trade unions, said Mr. Francis, compelled the employers to organise, and this organisation of both sides had greatly simplified the conduct of negotiations. Though the employers were first organised in antagonism to the unions, this had since changed, and after twenty years the trade was realising that the problems of both sides were the same problems. The common problem for all was to stabilise the printing trade so that each person engaged in the industry, employer or employee, should get a fair proportion of what he was earning.

The difficulty with the trade unions was that they did not agree amongst themselves and they lacked confidence in their leaders. The one word that was going to pull the printing industry out of its difficulties was that word "confidence." As soon as a union

leader stood up for a certain course of action, some one commenced to suspect him, whether he deserved suspicion or not. If union members would put confidence in their leaders they would make better men of them.

A point in which British printers had progressed further than Americans, said Mr. Francis, was the standardisation of wages and working conditions. In this respect we had the advantage of compactness of territory. It was very difficult to correlate widely separate districts in a country one end of which was three thousand miles from the other end.

Going on to stress the need for friendly relationship between the unions and the employers, the speaker pointed out the loss of wealth to both sides caused by a stoppage of work. The present struggle in America over the 44-hour week had already cost about \$50,000,000, and it was not through yet.

"I don't want people who work for me," said Mr. Francis, "the only people I want are those who work with me." He added that he found he was paying about 50 per cent. of his income to the employee; therefore the employee was a half partner with him in business.

Talking to a Trade Union.

In promoting peaceful negotiation a great deal of selfishness had to be got rid of. This could be done by means of the Joint Industrial Council. A point about the arrangements in this country that he did not like was the fact that one could not here get a personal talk with a trade union, but only with the representatives of a trade union. If the employer could have a talk with the union itself, it was very much better for the union's representatives, very much better for the union, and very much better for the employer. He did not know whether the unions had a sufficient number of mass meetings here to make this practicable, but he remembered a trade mass meeting held nearly fifty years ago in Cannon-street at which 4,000 were present, so a mass meeting could be held if it was wanted.

After remarking that we were now coming to a period of industrial democracy, and that the standard of living to-day was very much better than fifty years ago, Mr. Francis said they must continue to raise the standard, as they wanted intelligent men in the printing business. To attract the best kind of apprentices, American printers had agreed to raise the apprenticeship wages, starting an apprentice at about one-third the journeyman's rate and bringing his wages up to about 80 per cent. when he was finishing his time.

The speaker went on to tell something of the origination and growth of the New York School of Printers' Apprentices, with which he himself had much to do.

Seeing that the printing trade had the most intelligent class of workmen, and should have the most intelligent class of employers, the responsibilities were great. The printing industry should lead all organisations in the substitution of peace for war. If the economic conditions were properly studied and friendly relations maintained between employers and employed in the printing trade, an object lesson would be provided that would make for the good of industry in general.

Discussion.

In throwing the meeting open for questions and discussion, Mr. Austen-Leigh expressed appreciation of the spirit of Mr. Francis's address and, speaking for the employers at any rate, said that the address had given food for thought.

In reply to a questioner, Mr. Francis repeated that 50 per cent. of the earnings of his firm goes in wages to employees.

The questioner suggested that this would still leave a fair profit.

Mr. Francis agreed that he had, in fact, made a fair profit, but added that whether or not this could be done depended on the nature of the business.

Another member of the audience, who said he belonged to the process branch of the trade, remarked that employers had said that if

wages reached a proportion of 40 per cent., the firm would be working on the wrong side.

Mr. Francis replied that in some cases even 30 per cent. might be too much, especially if the firm were not selling labour as the principal item, but were dealing largely in stationery, etc., as well.

Mr. George Isaacs (trade union representative J.I.C.; secretary National Society of Operative Printers and Assistants), commented upon Mr. Francis's suggestion that employers should be able to address trade unions directly. He claimed to be one who had insisted upon the need for an annual convention of the Joint Industrial Council. He believed that if the rank and file of the employers and of the trade unions could hear the leaders arguing their case, each party would realise that there was more on the other fellow's side than they had hitherto imagined. Mr. Isaacs graphically expressed the consternation that would have prevailed among trade unionists if at Blackpool the previous week, Dr. MacLehose and Mr. Goodwin had been allowed to sit through all the proceedings of the annual administrative conference of the Printing and Allied Trades Federation. He believed, however, that if they could get to the point of sharing each other's counsels, it would be to the good of the trade. It was due to the good spirit the unions met with from the other side that the Joint Industrial Council had got as far as it had. The spirit of co-operation was already germinating. If Mr. Francis had encouraged its growth, they were much indebted to him. He proposed a hearty vote of thanks to Mr. Francis for his address.

Mr. George Eaton Hart (managing director, St. Clement's Press), seconding the motion, said he had been for thirty years endeavouring towards the spirit of conciliation that Mr. Francis had advocated. He thought the Joint Industrial Council should go a step further, and arrange for settlement of disputes by arbitration. Mr. Hart said that, when in New York, he had had the great pleasure of going over Mr. Francis's establishment, and it did one's heart good to hear the people in Mr. Francis's employ speak of their worthy chief. He went on to tell more of the excellent work done by the New York School of Printers' Apprentices, to which Mr. Francis had referred. He stressed particularly the arrangements made for the higher education of the boys before they went to the technical school.

Employers' Profits.

Mr. A.E. Holmes (joint secretary, Joint Industrial Council; secretary, Printing and Kindred Trades' Federation of the U.K.) cordially supported the vote of thanks, and in the course of an interesting speech indicated the many ways in which the Joint Industrial Council was endeavouring to promote the welfare of the industry. With regard to the proposal that employers should be allowed to address workpeople's councils or union meetings, Mr. Holmes said he would not object, provided the same facilities were accorded trade union representatives to address the employers. He added that until the workmen knew the costs of the job, knew the profits, and so understood the whole of the conditions, it was impossible for them to place that confidence in the employers' statements which possibly they deserved. The Federation Costing System had been adopted by the unions themselves. All they wanted now was to give the workman a better idea of what the actual costs were, so that he would be able to realise that the wages he received were a fair proportion of the profits of the industry. That, he said, would come in time. Both sides were realising now that they were parts of the same industry. A stoppage of work was a waste of time, a waste of money, and a waste of very good feeling. He believed the Joint Industrial Council, properly explored and exploited, would be the means, without arbitration, of bringing the two sides together in such a manner as to avoid strife.

The vote of thanks having been cordially carried, the meeting closed with a brief reply from Mr. Francis.

MR. FRANCIS FRANKLIN BRIDGEWATER, of Uplands, Church Hill, Merstham, Surrey, managing director of Amalgamated Trade Publications, editor of the *Draper's Record* and *Men's Wear*, formerly managing director of the *Financial Times*, who died March 17th last, aged 46 years, left £9,882 net £5,445.

The late Mr. Samuel Richardson Blundstone, consulting engineer, for many years editor of the *Railway Engineer*, who died on February 12th last, aged 63 years, left estate of the gross value of £19,334, with net personalty £18,955.

GUILD OF
Press Correctors, Literary & Pensions
SOCIETY.

Printers and Advertising Men.

At the forty-fifth quarterly meeting of the above-named Society held at the "Clachan," Mitre-court, Temple, E.C., on the 25th ult., a paper entitled "Publicity Purveyors and Printers' Pitfalls" was read by Mr. T. G. Brown (Odhams Press, Ltd.) of which the following is a résumé:—

When a contributor or an editor has recovered from the apoplectic fit occasioned by the sight of some maltreatment of his manuscript, he generally dictates a communication which must test the heat-resisting powers of both typewriter and typist. On receipt of this missive, in nine cases out of ten, the manager breathes something soft and soothing about the reader. No matter what the outcome of the "inquest," it nearly always happens that the first kick is administered to the reading department. I think it will be agreed that, whether you eventually prove a kick to be unjustly administered or not, it hurts just the same. Some months ago you were patient enough to listen to some remarks of mine dealing with errors on the literary side. To-night I propose to say a few words about one of the greatest bugbears of the present-day printer. I refer to the careless advertiser—the man who simply slings a few sentences together, grabs up the sheets, bundles them off to the advertisement department of the paper he has chosen as his medium, and calls it "copy."

The "Expert" Ad-Designer.

You are all familiar with the advertisements designed by the "expert." These usually consist of a futurist sort of drawing smothered in hieroglyphics, and known as the "lay-out"—sometimes it nearly lays me out!—which is accompanied by the copy to fill the various spaces indicated on it. My own experience has been that the *tout ensemble* is generally somewhat "curate's egg" like. What I mean is that if the copy is decipherable and well composed it almost falls into the province of a criminal investigator to place the various paragraphs with any degree of certainty; and on the other hand, if the lay-out has been prepared by a budding R.A. the accompanying manuscript requires a second sight expert to decode the message.

I have always marvelled, especially when I think of the stiff prices paid for advertising space nowadays, at the nonchalant and slipshod manner in which our experts prepare their copy. The carelessness in writing most obscure technical terms is enough to make even a signwriter weep; and the curiously shaped figures set a reader's mind wandering from his work at all sorts of tangents.

A thought which will no doubt flash across most minds is, "Why not have all advertisement copy typewritten?" Gentlemen, shun the product of the peroxide haired, one-fingered rubber out as you would a job in Sanskrit! Typed advertising matter usually lands the reader on the rocks of important words omitted and of misspelled names. True, on more than one occasion I have seen apparently perfect specimens of the typist's work, and I hope you will not think I am complaining unduly if I tell you that some of these betrayed comical indifference as to the advertiser's name or address—or both!

The passed proof is generally another example of cryptic marking. Figures are corrected by signs that lead one to think the object is to induce the printer to make a serious blunder. Recently I handled a proof in which a vital number was altered in two places; the figure 2 resembled a "tick" run riot, and only the context revealed that a 2 was what was wanted. I say that, had that been a single-figure alteration, say in a price, it might have been missed. No doubt the expert would have been very annoyed if his correction had been misread, but it would have served him right. I have seen a "dele" mark and a figure 8 which could only be told apart by a very close scrutiny.

Next time you receive one of these interesting documents (if you are not racing for press when it arrives, or you do not have to re-read the whole thing because the type faces did not suit—despite the lay-out!) examine it closely. Generally, impressed on it by a rubber stamp, apparently made in the 'sixties, is a communication headed "Passed for Press."

Before I obtained a perfect specimen, I imagined it continued: "if you have deciphered our diabolical copy, made what corrections you think are necessary to remove the impression that the advertiser is a lunatic, and generally done the job for us." One day, however, I saw one that had evidently been stamped by one of Sandow's pupils, for I could read the words. It was to this effect: "Passed for press subject to corrections hereon, and being read for literals and compared with the original copy. Not responsible for printers' errors." The italics are mine.

I regret to say that I have not followed legal reports carefully enough to enable me to tell you whether this specious attempt to make the printer liable for any misprint that may occur, regardless of who the real offender may be, carries any weight, but there it is.

The "Miscellaneous" Advertiser.

From the expert I pass on to the advertiser in the "miscellaneous" columns. He generally perpetrates his own publicity. You know him well. He carefully selects the smallest scrap of writing material he can find—a piece of a disused paper bag or the back of an envelope for preference, the dirtier the better. This fragment he adorns with a few scratches, spills the ink over it, licks up the blot, puts the result into an envelope with remittance, sends it off, and—expects to see it printed correctly. I often wonder how many times he forgets to address it to the office of the newspaper. If he does so as frequently as he omits to put his own name and address on his copy, the Post Office must be, to use an Army phrase, "quids in"! If he were not blind to his shortcomings it would not be so terribly annoying, but let his name be misspelled, his fearful figures in prices or address be misinterpreted, or one of his invented terms be incorrectly printed, and he proceeds to "raise Cain" all round. He has a knack of expecting the appearance of what he "meant to write." One gentleman, I heard, paid a return fare from Mitcham or somewhere to see if he could not get someone into hot water because there was an error in the name of the street he lived in. This particular announcement cost exactly one shilling and was a particularly vile specimen!

I think the only way to call the wickedly careless small advertiser to account would be for the advertisement manager to return all manuscript that he himself is unable to read. He could do this quite easily and without the revenue suffering, for most smalls are prepaid. But he knows errors are negligible when the thousands of advertisements handled weekly are taken into consideration. Consequently, everything is "bunged to the printer," and the result left to Providence and our old friend "the two-em-rule reader."

I know that the dishonest small advertiser tries to catch the advertisement department in order to get his announcement for less than the legitimate charge. Does the big man designedly make it easy for the printer to trip with visions of free insertions or rebates on the horizon? This question has been put to me many a time by readers. I am afraid I cannot express an opinion. Perhaps advertisement managers could if they would. I can only give you my personal experience. About 20 years ago the "sharp" agent existed. I worked for one! He had numerous ways of collecting what he called "bunce," probably they were legitimate in one sense of the word. But he was certainly *très moutarde* when it came to claiming for short space after casting and so on. But I rarely recollect any of this unearned-increment-gathering being undertaken at the request of a client. Possibly I did not know everything there was to be known. If there is nothing new under the sun, it is quite likely also that there is no game too old to be worked, and I will ask you to let me leave it at that. In all probability, if you think my effort worth discussing, some amongst you will enlighten me in due course.

An engrossing discussion followed, and the proceedings closed with a vote of thanks to the author.

The death took place last week of Mr. Thomas Richard Dain, who served the *Manchester Guardian* for 63 years. Mr. Dain was in his eightieth year. He began his service with the *Manchester Guardian* in 1857 as an apprentice in the composing room, being then 14 years old. He worked as a compositor for a couple of years after his time of apprenticeship was up, and then he was transferred to the counting-house. After some years of work as a clerk he was appointed cashier, and held that post for 40 years, retiring in 1920.

Printers' Managers and Overseers
ASSOCIATION.

Liverpool Centre's Social.

A social gathering of the members of the Liverpool Centre of the Printers' Managers and Overseers' Association took place in Liverpool, on the 13th inst., and proved an unqualified success. The day was occupied in excursions and sightseeing, and in the evening the company dined at the Midland Adelphi Hotel. The Centres represented on this occasion were London, Liverpool, Manchester, Yorkshire, Birmingham, the Midlands, Leicester, and the West of England, the attendance, including the ladies, numbering nearly 250.

Mr. Harry R. Caldwell (president) and the Executive Committee of the Liverpool Centre had made admirable arrangements for the enjoyment of their guests, with the result that the carefully prepared programme passed off without a hitch.

The members were welcomed in the morning by the Lord Mayor of Liverpool (Alderman Charles H. Rutherford), at the Town Hall, and in the afternoon there was a civic reception at the Wallasey Town Hall, where the Mayor (Alderman Quinn) received the visitors.

Mr. Caldwell presided over the dinner in the evening, which was largely attended.

Mr. J. C. Coppock (joint vice-president of the Federation of Master Printers of Great Britain) gave the toast of the evening, and alluded to the necessity of the various sections of their trade getting together. This, he pointed out, would prove to be better for the industry as a whole. The fact that they had representatives present of the employers, of the managers, and the overseers of printing works, as well as a great trade union of workmen, showed that there was not much the matter with their industry (applause). The two great ideas in connection with their association were mutual improvement and social intercourse. They were, moreover, intermediaries between the employers and the rank and file in the industry, and carried out their work in the best possible way (hear, hear).

Mr. S. M. Bateman (president of the Association), in reply, said they were out to be a recognised factor in the printing trade. They had been a progressive association, and were an intermediary body in the industry. They had a right to be consulted when any settlement of disputes was to be made (hear, hear). They had also a right to be represented on the Whitley Council (hear, hear).

The chairman gave the toast of "The Visitors" in a graceful little speech, and this was responded to by Mr. H. A. Bethell. During the evening an excellent musical entertainment was given by "The Duds," a popular band of entertainers.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

C. E. Watts, W. R. Hadler and E. Prime, photographic process engravers, Colchester, under style of Essex Process Engraving Co. H. R. Hall and F. Thompson, general advertisers, Preston, Brighton. R. S. Howard, D. M. S. Hitchins, P. P. Scott and A. Barnett, publishers, 22, Henrietta-street, Strand, under the style of the Screen Publications.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

H. B. Cutting, 3, Pelham-road, Immingham, lately trading as the H.B.C. Advertising Service.

MR. EDWARD HULLINGER, the United Press correspondent in Moscow, has been expelled by the Soviet authorities, and has arrived at Riga. He came into conflict with the Soviet Censor.

Electrotypers and Stereotypers
MANAGERS & OVERSEERS' ASSOCIATION

Monthly Meeting.

Mr. A. Chadwell occupied the chair at the usual monthly meeting of the Association held on Tuesday of last week at St. Bride Institute, Bride-lane, E.C.4. There was a fair attendance of members, whose attention during the greater portion of the evening was taken up by an entertaining and instructive lecture given by Mr. Duncan Keats on "Some Old-Time Printing Plates." The lecturer had got together for inspection a very comprehensive collection of various kinds of ancient and modern printing plates, which proved most interesting.

The secretary having read the minutes of the last monthly meeting—which were confirmed—Mr. Chadwell stated that he had that morning attended the first meeting of the Governing Board of the new technical school, over which Lord Riddell had presided. The meeting was thoroughly representative of the various sections of the trade. Their own particular branch of it was represented by Mr. W. Warren and a member of the trade shop masters, Mr. C. S. Yeates, both of whom were elected to a seat on the Board. With regard to the position of their own Association he understood that so far as present arrangements went, they had been asked to come to some understanding with the Bookbinders' Overseers, so as to have one representative for the two Associations. However, it was agreed, should the L.C.C. approve of the proposal to enlarge the Governing Body that they be asked to co-opt a representative from the Association which was not directly represented.

Discussion then took place on the amount previously voted by the Association to the new technical school, namely £5 for five years, and the feeling generally expressed was that the sum was not sufficient.

Mr. W. M. Forsyth then moved that a further sum of £5 10s. for five years be granted.

This was seconded by Mr. H. Filkins and unanimously carried.

Mr. Chadwell next called on Mr. Keats for his lecture—reported on the first page of this issue.

At the conclusion of the lecture several questions were put to Mr. Keats, who replied in a very able manner.

Mr. W. H. Longley, in moving a vote of thanks, referred to Baxter's plates, which he described as the finest examples of colour printing extant, and said it was a great pity that we could not re-discover the secret of their success.

The vote of thanks was seconded by Mr. A. Latimer, who spoke of the need there was of the plate-maker and the machine-minder getting together to discuss their difficulties.

Mr. Keats briefly replied and the meeting then came to a close.

Undertakers' Damages Against
PRINTERS.

At the Manchester Assizes, Civil Court, last week, Messrs. Wood and Sons' Carriage Co., Ltd., Manchester, were the plaintiffs in an action against Messrs. King and Hutchings, Ltd., printers, publishers and newspaper proprietors, Uxbridge, to recover damages for false statements.

Council for the plaintiffs said the question for the Judge in this case was what amount of damages the plaintiff company were entitled to receive from the defendants for the publication of which they complained. The plaintiffs had carried on business for many years in Manchester as carriage proprietors. The business for many years was very successful, but in 1920 things became different, and the plaintiffs found it necessary to offer a portion of their stock for sale. Later it was determined to dispose of the business as a going concern, but no offers were received. The defendants were the proprietors of a publication called the *Undertakers' Journal*, and the plaintiffs complained that they published articles in their paper which stated that the plaintiffs had gone out of business and had ceased to supply funeral carriages and requisites. By that publication the plaintiffs alleged that they were injured in their credit and reputation and in their business.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

	Three Lines	s.	d.
Agencies	3	0	
Situations Wanted	1	6	
Situations Vacant	3	0	
Machinery for Sale and Wanted	3	0	
Businesses for Sale and Wanted	3	0	
Shares for Sale and Wanted	3	0	
Partnerships and Investments	3	0	

Three Insertions Charged as Two.

The following are the rates for Advertisements classified as under:—

	Per Line	s.	d.
Sales by Auction	2	0	
Tenders	2	0	
Patents for Sale	2	0	
Legal and Financial Announcements	2	0	

Replies may be addressed to Box Numbers, Office of the "British and Colonial Printer and Stationer," 58, Shoe Lane, London, E.C.4 for which a fee of 6d. is charged to cover postage of replies.

Cheques and Post Office Orders to be crossed and made payable to STONHILL & GILLIS.

Telegrams: Stonhill. Fleet, London.
 Telephone: 8407 City.

Situations Vacant.

A LONDON Manufacturing Stationers are requiring the services of a REPRESENTATIVE with an established connection, either in London or the Provinces, to sell Lithograph and Letterpress Work, Duplicate Books, Printed Paper Bags and General Stationery; good sound commission, no expenses; a good opportunity where a change is contemplated.—Write, in strict confidence, giving amount of turnover and district.—Box 13940.

COMMERCIAL ARTIST.—A large firm of Printers have a vacancy in their Studio for competent ARTIST-ASSISTANT; must be good at Lettering and Figure Work, able to prepare Original Lay-outs; knowledge of Type Faces and Type Display essential. Write, stating age, experience.—Box 13939.

COMPOSITOR.—Wanted a smart, capable, young man to take charge of Book Department in country house; used to Casting Off MSS. and Clicking Bookwork; good terms to competent man.—State experience and wages required, to Box 13950.

MACHINE MINDER.—Experienced in Centurette and other Presses, must be reliable, steady worker; permanency for good man; Wandsworth district.—Reply, stating age, experience and wages required, to Box 13951.

PRINTER'S PRESS READER wanted for East Anglia; state age and experience.—Apply, Box 13936.

PRINTING.—REPRESENTATIVE required for well-known London and Country firm, well equipped for Fine Printing.—Write particulars, in confidence, Box 13937.

TRAVELLER, with connection, wanted, for Process and General Engraving Business; good position for energetic man.—Full particulars and terms, to Box 13938.

Situations Wanted.

BINDER and MARBLER (Soc.), young, seeks situation; Colours or Inks.—Apply, Box 13943.

COMPOSITOR (T.U.) requires situation on Piece; used to Trade Papers and Tabular Work; quick, clean; 5 years' war service; age 30; good references.—Box 13945.

ENGINEER'S DRAUGHTSMAN, internal combustion, etc., car experience, desires Position where artistic talent would be of service; ability for advert. lay-out and commercial art.—Address Box 13952.

For the defence the writing of the articles complained of was admitted. The defendants had stated in their paper that they had made a mistake and had paid into court 25 guineas which they said fairly represented any damages that had been sustained by the plaintiffs. Mr. A. T. Story, the editor of the *Undertakers' Journal*, said they had not the slightest feeling against the plaintiffs, and,

ENGINEER, NEWS PRESSMAN, qualified to take full charge as Manager in all departments; used to high-speed, up-to-date Rotaries, Auto-Plate Machinery, Stereotyping, Matrix and Half-Tone Production; accept position home or abroad; live man; steady; good references.—Box 13910.

LETTERPRESS OVERSEER (32) desires change, present position 5 years (12 hands); Charge Composing, Machine and Warehouse; Estimator, thoroughly practical; C. and G. Certificates.—Box 13930.

MACHINE MINDER (Miehles), Single, Twin or Trip Tandem Machines, well up in best class Work, Black and White and Colour Process, desirous of change; single, and with good references; Cross Feeder knowledge, etc.; society.—Box 13931.

PUBLISHERS' BINDER (middle age) seeks situation (Town or Country); good all-round; publishers' requirements and big output a speciality; could organise department.—Box 13942.

YOUNG MAN (20), expert Shorthand, knowledge Economics, Literary, seeks Journalistic opening.—Box 13941.

Machinery for Sale.

FOR SALE.—An ALL-SIZE MARINONI PERFECTING WEB PRESS, to print a sheet 40 by 50 in.; minimum cut 22 in. and by 1/2 in. up to a maximum of 40 in.; width of web 40 in.; speed 4,000 to 5,000 per hour; open delivery; in good running condition.

A DRUM-CYLINDER FLAT BED PRESS by Messrs. Hoe and Co.; will print a sheet 40 by 60 in.; pyramidal inking; speed 1,200 per hour; in excellent condition.—Full particulars and prices from Temple Press, Ltd., 7-15, Rosebery-avenue, London, E.C.1. 13919

SECOND-HAND LINOTYPE for sale; Model No. 1 converted in 1915 to Model No. 4 Pattern with regard to Vice and Jaws; Double-letter Machine, Universal Mould from Nonpareil to Pica, equipped with Two Magazines and Two Sets of Matrices; completely overhauled and remodelled in 1915, and has been very little used since.—Offers should be sent to Box 13954.

Financial.

PUBLISHER will take interest in Printing Firm; Plant must be capable of Printing High-class Magazine Work.—Box 13948.

YOUNG GENTLEMAN, with capital from £1,000 to £1,500 to INVEST, and anxious to enter business, will find an opening as WORKING DIRECTOR with old-established Printing House in Yorkshire.—Write, in first instance, Box 13946.

Business for Sale.

BOOKBINDING BUSINESS, with Stationery and Fancy, for disposal; Market Town South England; suit working Bookbinder.—Write, Box 13947.

Miscellaneous.

COLONIAL NEWSPAPER CUTTINGS, dealing with the Paper, Printing, Stationery and Allied Trades, are wanted by Advertiser.—Communicate, stating terms, to Box 13882.

ENVELOPES wanted—Quarter million required, 5 1/2 in. by 3 1/2 in., Manila or Tinted would do.—Samples to Manager, 115, Pancras-road, N.W. 13949

WANTED, THREE or FOUR-COLOUR BLOCKS (Odd or Series), suitable for Wall Calendars, size about 6 by 8 in.—Price and colour-proof, to L. F. De Vos and Co., 37, Canal de l'Anidon, Antwerp. 13953

BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12 in. long) in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4

WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe Lane, London, E.C.4

indeed, it was not probable that they would write anything derogatory of their advertisers, who had included the plaintiffs for many years. An apology was written and inserted.

The Judge, in finding in favour of the plaintiffs, said the 25 guineas paid into court was insufficient to meet the case. He gave judgment for £200 damages.

Representatives throughout the United Kingdom and also in Australia, New Zealand, India, South Africa, United States, South America, Canada, etc.

THURSDAY, MAY 25, 1922.

The Wages Position.

THE expected decision of the employers to post notices of wage reduction has now been made. A well-attended meeting of the Labour Committee of the Federation of Master Printers and the Newspaper Society was held on Monday, when, we understand, the results of all the union ballots on the employers' proposals were laid before the meeting, showing that the employers' proposals had been rejected by all the unions operating in England and Wales, but that the proposals in Scotland had been accepted. A request was put forward by the representatives of the unions which had recommended acceptance of the terms for a meeting with the employers on the following day (Tuesday). With regard to this meeting, the following statement was issued to the Press on Tuesday afternoon: "A conference was held between the Labour Committee of the Federation of Master Printers and the Newspaper Society and representatives of the trade unions who have been acting together in the wages negotiations. The employers stated that it had been decided to instruct their members to post notices on June 12th to the effect that wages would be reduced by the amounts which had been submitted to the unions for ballot. It was understood that if a request were put forward by all the unions connected with the Printing and Kindred Trades' Federation for a conference, the employers would agree to this, but the employers are not prepared to defer or alter their present plans." We understand that the Employers' Federation has now notified all its members that as it does not appear possible to reach a settlement by agreement with all the unions, notices be posted on June 12th intimating that the reduction must operate in the week ending July 1st.

The Ballot Results.

The Scottish printing trade workers were, as above mentioned, alone in accepting the employers' proposals. The majority in favour was 919, the total voting being 8,573. The figures of the London Society of Compositors' ten-to-one rejection we gave last week. The Typographical Association reports the result

of its ballot as follows:—In favour of acceptance, 1,989; against acceptance, 20,819; majority against, 18,830. The Lithographers, Litho Artists, and Stereotypers also report overwhelming majorities for rejection. The London Machine Managers voted 5 to 1 against, the London Correctors, 8 to 1. A combined vote of 3 to 1 against was given by the group of unions comprising the London Machine Rulers, London Platen Binders, London Litho Music Printers, Binders, Paper Workers, N.S.O.P. and A., and the Society of Women.

The New Postal Rates.

THE return to cheaper postal rates comes into force, as foreshadowed, next week. On Sunday the night collection of letters will be restored, and on Monday the reduction in rates—including the printed matter rate—comes into force. The printed matter rate is subject to the proviso that posting shall be done by a specified time. In London the latest time will be 3.30 p.m.; the same time limit will probably be enforced in all large centres. Other districts will fix their own time to suit local convenience. The object of the time limit is to get bulk postages of this kind cleared before the evening postal rush begins. In the statement which has been so widely circulated pointing out the quantity of matter which can be sent under the reduced printed matter rate, certain examples were given as to the number of pages of certain sizes which would go to the permitted weights. This has led, we hear, to inquiries being made at the offices of the Federation of Master Printers as to whether there were restrictions as to size and number of pages permitted. The fact is, of course, there are no new regulations as to sizes of packages, the cost of postage per ounce of weight being the feature of the alteration.

Big Increase in Paper Imports.

THE receipts of paper and cardboard, etc., into the United Kingdom last month were 113.7 per cent. over those for April last year, the respective totals being 708,822 cwts. and 331,596 cwts. The total value (c.i.f.) of the imports for the month was £785,203, an increase of £112,680, or 16.7 per cent., compared with a year ago, and a decrease of £1,319,917, or 62.6 per cent., against the corresponding month of 1920. The big advance in paper imports that took place in the month of April, of course, influenced the receipts for the four months, the arrivals during that period amounting to 2,790,355 cwts., an increase of 1,113,796, or 66.4 per cent., contrasted with last year. The large increase recorded is mainly accounted for by the greatly augmented supplies received of all three of the principal items comprising the imports of paper. For instance, during January-April packings and wrappings amounted to 850,264 cwts. (30.4 per cent. of the total), and show an increase of 514,679 cwts. compared with the corresponding period of last year; strawboards, 803,013 cwts. (28.7 per cent.), an increase of 315,665 cwts.; and printings and writings, 743,409 cwts. (26.6 per cent.), an increase of 172,400 cwts. Regarding the countries of supply, an outstanding feature is exhibited by the large arrivals of packings and wrappings from Sweden. These, amounting to no less than 272,560 cwts., not only represent 32 per cent. of the total quantity received, but show a substantial increase over the previous year of 176,464 cwts. The next country on the list is Norway, with 182,346 cwts. (21.4 per cent.), with an increase to her credit of 128,801 cwts. Those from Germany reached 150,649 cwts. (17.7 per cent.), and show an increase over the amount received a year ago of 80,781 cwts. Supplies from Finland amounted to 97,442 cwts., against 45,029 cwts. last year; whilst those received from Canada, 28,567 cwts., though not bulking very largely, feature satisfactorily compared with the 7,359 cwts. sent during January-April a year ago.

Personal.

VISCOUNTESS BURNHAM has consented to act as president of the Society of Women Journalists during the coming year.

MR. J. GOMER BERRY, who was accompanied by Mrs. Gomer Berry, formally opened on Saturday afternoon, the fine sports ground near Harrow, which Sir William E. Berry, Bart., and himself have presented for the pleasure and physical well-being of those employed in the various undertakings forming the combine.

THE formalities over, a bouquet was presented to Mrs. Gomer Berry by Miss Macgregor on behalf of the members of the club. A vote of thanks to Mr. Berry was also proposed by Mr. G. Eaton Hart (St. Clements Press), and seconded by Mr. W. Will (*Daily Graphic*).

MR. EDWARD GLOVER, manager of the General Printing Department of Messrs. E. Hulton and Co., Manchester, was, at a dinner at the Midland Hotel, Manchester, on Thursday last, presented by Sir Edward Hulton with a silver rosebowl on the completion of 40 years' service with the firm.

MR. J. CROWLESMITH, J.P., of Messrs. Hazell, Watson and Viney, proposed the principal toast when the President of the Wesleyan Conference, the Rev. J. Alfred Sharp, was entertained to luncheon last week at the Holborn Restaurant by the First London Synod of the Wesleyan Methodist Church.

SIR NORVAL HELME'S daughter, Mrs. Edith Mary Crossley, widow of the late Captain E. Crossley, was married on Thursday to the Rev. Benjamin Gregory, editor of the *Methodist Times*.

CONGRATULATIONS to Mr. Alderman H. W. Keay, J.P., director of the Publishers' Circular Co., on his election once again as Mayor of Eastbourne.

ALDERMAN BURMAN, of the firm of Burman and Cooper, printers of Birmingham, has been placed on the Commission of the Peace for that city.

MR. FREDERIC HARRISON, the veteran author-journalist, who is now over 90 years of age, spoke with great vigour and directness when he was entertained to luncheon at the National Liberal Club on Thursday.

MR. EDGAR WHITE, who lately gave up the editorship of the *Era* to join the Moss Empires' Press Department, has been presented by his former staff with a massive silver cigar box and silver cigarette-case as an expression of their collective best wishes.

MR. WALTER TERRY is now acting editor of the *Era*, and Mr. D. Cameron Forester managing editor.

MISS CLARA LYLES, of Wallington, Surrey, has won a scholarship worth 1,500 dollars at the Columbia School of Journalism.

In connection with the Spicer amalgamation, it is interesting to recall the long service which some of the present directors of Spicer Bros. have given to the firm.

MR. P. W. KENNETT and Mr. J. T. Steele have both been with the business for 35 years; Mr. A. N. Brady has 34 years to his credit, for 25 years of which he represented the firm in Australia.

MR. W. OLIVER, another of the directors, has a record of 14 years.

MR. STEELE, by the way, is the first and only secretary of Spicer Bros. He was originally a journalist, and as a boy in 1882 he edited, published and printed his first magazine in Whitehaven, "The Boys' Amuser," followed the next year by "Idle Moments," which he and his brother set up and printed themselves, besides supplying the illustrations.

The Art and Craft of Printing.

Lecture by Mr. Chas. T. Jacobi.

Mr. Chas. T. Jacobi lectured last Thursday before the Gilbert White Fellowship at White-lands College, Chelsea, and took as his subject "The Art and Craft of Printing—with Special Reference to Printing contemporary with Gilbert White." Mr. Jacobi divided his lecture into three main divisions, dealing first with the question of what constitutes an ideal book, then treating of printers contemporary with Gilbert White during the eighteenth century, and finally showing and explaining lantern slides relative to the subject of the lecture.

In regard to the designing of books, the good points to aim at were said to be briefly as follows: That the type is of good design and of a readable size, with due regard to the size of the book; that the printed page is of correct shape, with fair margins and the printed area of the page proportionate to that of the leaf of paper; that it be free from errors and in dense black ink that will not fade, on a paper that is neither too thick nor too thin, and which is of a close, firm and even texture. Papers that are thick are clumsy to handle, and those very thin are troublesome to turn over in the bound volume. As with type, so the substance of paper should in some respects be regulated according to the size of the volume, a folio or quarto volume requiring a somewhat thicker paper than that necessary for an octavo or smaller work. Advice was also given as to the design of title-pages and the use of rubrication.

In speaking of printers contemporary with Gilbert White—who was born in 1720 and died at the age of 73 in 1793—Mr. Jacobi had some interesting information to give about John Baskett (the printer of the "Vinegar" Bible), John Barber (Lord Mayor of London and for a time King's Printer), William Bowyer, senior (some of whose work was printed from type made from punches cut by Robert Andrews, the typefounder, who took over the business of Joseph Moxon, author of "Mechanick Exercises"), William Bowyer, junior, Samuel Richardson (better known as author, though also a printer of note), Henry Samson Woodfall (Master of the Stationers' Company in 1797), John Baskerville (the famous typefounder), Horace Walpole, Chas. Whittingham ("the Uncle," founder of the Chiswick Press), William Ged (the inventor of stereotyping), William Caslon (the celebrated typefounder).

Among those printers who produced some of the early editions of Gilbert White's classic "Natural History of Selborne," were mentioned Thomas Bewsey, Thomas Curzon Hansard (author of "Typographia," 1825), James Ballantyne (of Edinburgh, whose business was later incorporated in that of Spottiswoode, Ballantyne and Co., Ltd.), and Charles Whittingham (the Uncle).

The lecture concluded with the showing of some 50 or so slides, exhibiting the various processes of cutting the punches and striking the matrices for typefoundings, together with the methods employed in typesetting and printing, there being shown also various samples of printing—the lecture being thus brought to an interesting and instructive conclusion.

Paper Wanted for Egypt.

The Superintendent of the Government Press, Bulaq, Cairo, invites tenders for the supply of writing paper for certificates, strong writing paper for registers and books (also coloured), Bristol boards coloured and for covers, paper for file covers, cream-wove paper for forms (also coloured), millboard, and gummed paper required for the year 1922-3.

A copy of the conditions of tender, specifications, and samples may be seen by United Kingdom firms on application to the Department of Overseas Trade (Room 42), 35, Old Queen-street, London, S.W.1.

TENDERS INVITED.—Tenders will be received by the Superintendent, Government Press, Bulaq, Cairo, up to June 24th, for the supply of binding cloth and roller composition.

Book-Production Shown by Cinema.

An Interesting Film.

Through the enterprise of the Society of Bookmen an interesting cinema film illustrating every process in the making of a book, from the receipt of the author's manuscript to the despatch of the finished volumes, was shown to a numerous audience, which included many authors, at Australia House on Tuesday evening. The film, which was explained by Mr. Cecil Clay, consisted of two parts, one taken at Messrs. Doubleday's and Page's establishment in New York, and the other at the works of Messrs. James Burn and Co., Esher. The British and American methods were therefore illustrated at their highest stage of completeness. Viscount Burnham, who presided, observed, with regard to the American establishment, that the late Dr. Page, the American Ambassador in this country, was associated with it throughout the whole of his business life, and he attributed its admirable physical and social conditions to his personal influence and great sense of responsibility to those who worked under him and for him. An element of humour was supplied in the exhibition by the introduction into the English film of Mr. George Robey as an amateur bookmaker.

After the exhibition there was a short discussion, in which Mr. Clay answered a number of questions. He said that in the use of mechanical appliances for the production of books this country is not behind America, although for special and local reasons hand binding is more frequently adopted here than in America. He admitted a complaint amongst American producers that they were often faced with the difficulty of finding customers for their products. If American book-covers were sometimes defective, and misprints frequent, as compared with English productions, it might possibly be attributable to the more mechanical methods adopted, and the standardisation of the work in America. To the statement of an author that an edition de luxe of an American volume costing \$10 was "disgracefully printed," Mr. Clay made the reply that publishers generally would say that, on the whole, the English production was on a higher plane than the American production. He further expressed the opinion that there was a larger reading public in America than here, and that since the war there had been a slight deterioration in the work done, in both countries, largely owing to the use of inferior material. That failing was, however, gradually being got over.

Printer's Heroic Death.

Amongst those who showed supreme heroism on the occasion of the sinking of the P. and O. liner "Egypt" off Ushant on Saturday, was the ship's printer, Mr. George W. Jenner.

It is stated that Mr. Jenner, who left a wife and child at Dover, had a lifebelt and was about to jump into the sea when he came across a terrified woman passenger appealing for help.

Jenner gave her the lifebelt, saying, simply: "I cannot swim, madam, but take it." This act of heroism cost him his life.

Mr. Jenner had worked on local newspapers. In the South African War and the European War Mr. Jenner was amongst the first to volunteer. He served in South Africa with a volunteer active service company, and was voted the honorary freedom of Dover for that service. On being demobilised after the Great War he learned linotype operating. He became printer in the "Egypt" a few months ago, and was making his second voyage on the ship. He leaves a widow and two sons, the elder of whom is a wireless operator on a liner.

LEEDS PRINTERS' SPORTS DAY.—The Printing Trades' Sports held at Leeds last year were such a success that it has been decided to make "Leeds Printers' Sports Day" an annual event. Saturday, July 8th, is the date fixed for this year, and a strong working committee, under the chairmanship of Mr. Frank Petty, has been appointed. The Headingley grounds have again been secured, and every effort will be made to beat last year's figures, when £100 was handed over to various printers' benevolent institutions.

Spicers, Limited.

Amalgamation of Two Noted Paper Houses.

Official announcement is made of the proposed amalgamation of the two well-known paper firms of Spicer Bros., Ltd., and James Spicer and Sons, Ltd. Rumours of the fusion have been in the air for some time, but the formalities to be gone through are considerable. The terms of the agreement have to be submitted to the shareholders of both companies for approval, and meetings of the shareholders of Spicer Bros., Ltd., have been called.

The amalgamation will be effected by a transfer of the business of James Spicer and Sons to Spicer Bros. To carry out the scheme the capital of Spicer Bros. will be increased.

Spicer Bros. has an issued capital of £600,000 in £10 shares, divided into £250,000 ordinary and £350,000 five per cent. cumulative preference shares.

The authorised capital of James Spicer and Sons is £450,000 in £10 shares, £300,000 being five per cent. cumulative preference, having a priority also as regards capital of any arrears of dividend, and £150,000 ordinary. £261,550 of preference and all the ordinary have been allotted.

All the present directors of James Spicer and Sons will join the board of the amalgamated company (together with the present directors of Spicer Bros.), Sir Albert Spicer becoming chairman, Mr. H. G. Spicer deputy-chairman, and Sir Howard Spicer vice-chairman. Mr. H. G. Spicer and Sir Howard Spicer will be the two managing directors. The amalgamated company will be called **Spicers, Ltd.**

The object of the fusion, of course, is to effect economies in operation and to consolidate the two businesses. It is interesting to recall that originally the two firms were one, and the present joining of forces is a return to the single entity.

The original firm had its origin on August 4th, 1796, when John Edward Spicer, to quote

his own phrase, "entered on Alton Mill." A London directory of 1839 shows that John E. Spicer and Sons, wholesale stationers, occupied the premises of 18½, New Bridge-street, now part of the site of Blackfriars House, which will be the headquarters of the newly-amalgamated company. The sons who had a share in the original concern were James, William Revell, and Henry Spicer. Subsequently there arose a dispute among the partners about the bringing in of younger sons, with the result that the partnership was dissolved in 1865, James Spicer breaking away and forming the firm of James Spicer and Sons, in Upper Thames-street. The two remaining partners re-formed the business in New Bridge-street, under the style of Spicer Bros. Wm. Revell Spicer had two sons whom he brought into the business—Wm. Gage Spicer and Augustin Spicer. Henry Spicer also had two sons, Henry Spicer, junr., who was afterwards M.P. for Islington, and Edward Spicer, the father of the present Mr. Henry Gage Spicer. Mr. H. G. Spicer is the only Spicer remaining in the business of Spicer Bros., and, as already mentioned, he becomes deputy chairman.

Sir Albert Spicer, it is interesting to note, is the only remaining member of the family who was connected with the business when the split occurred in 1865, and under his chairmanship the re-amalgamation will be put into operation.

The extensive premises in Upper Thames-street, with the valuable water frontage, will be retained, forming valuable accommodation for storage purposes, while some of the heads of departments of James Spicer and Sons will, we understand, ultimately join the board.

Trade Notes.

THE agreement (detailed on page 350) between the Employers' Federation of Paper-makers and the unions in the industry has been formally ratified.

THE SPICER FUSION.—A special meeting, which was held on Tuesday of Spicer Brothers, sanctioned the proposed amalgamation of the company with James Spicer and Sons, Ltd., as from August 1st, 1921.

NEWSPAPER SHARES.—It is reported that a block of deferred shares of £1 each in the Associated Newspapers, Ltd., the proprietors of the *Daily Mail*, the *Evening News*, and the *Weekly Dispatch*, are being offered for sale at £3 10s. per share.

POST CARDS AND PRINTED MATTER POSTAGE.—Sir Adolph Tuck informs us that he has been in communication with the Postmaster-General and he is able to state that the Postmaster-General has now given his official sanction to the retention of the words "Post Card" or "Picture Post Card" in connection with the ½d. postage, and that the wording "Printed Paper," which has hitherto been insisted upon for the lower rate of postage on picture post cards, is not necessary in future. This is a valuable concession and completes the boon of the ½d. postage for picture post cards.

F.M.P. ANNUAL MEETING.—Every member of the Federation of Master Printers has now received the agenda for the annual meeting at Glasgow a fortnight hence together with a neatly printed copy of the cost congress programme (produced by the Lanston Monotype Corporation). There is promise of a record attendance, and any who wish to be present should not delay further in making application.

NORTH WALES PRINTERS.—An interesting meeting of the North Wales Master Printers' Alliance at Llandudno on Saturday last was presided over by Mr. A. E. Harrison, who was re-elected to the presidential chair. Mr. J. C. Coppock and Mr. A. E. Goodwin explained the position of the wages negotiations.

TRADE JOURNAL POSTAGE.—The distinction drawn between monthly and fortnightly and weekly periodicals in the matter of postal charges was the subject of a protest meeting held at the Institute of Journalists, Tudor-street, on Friday. It was pointed out by Mr. S. J. Sewell, hon. secretary of the London district of the Institute of Journalists, that at the present time the rates for a weekly trade paper were 1d. for 6 ozs., and afterwards ½d. for 6 ozs., while those applying to a trade journal issued fortnightly or monthly were 1d. for 2 ozs. and afterwards ½d. for 2 ozs. It was possible, he said, to print and post abroad a paper at a considerably lower cost than if it were done by British labour and posted in England. A position such as that was not only foolish, but unfair to the monthly and fortnightly trade papers. A resolution protesting against the present rates and calling for their revision was carried unanimously.

PRINTERS WIN LAWSUIT.—In the King's Bench Division on Monday Messrs. Burrup, Mathieson and Sprague, Ltd., manufacturing stationers, printers and lithographers, Throgmorton-street, E.C., claimed from Mr. Noel Pemberton Billing the sum of £381 10s. 2d. for work done and goods supplied in connection with two games, described as "Col. Bogey" and "Stymie," which the defendant was proposing to put on the market at Christmas. Defendant had paid £25 into Court in settlement of all claims, and denied liability for the balance. Plaintiffs alleged that the defendant asked them for an estimate for 25,000 books of cards, 25,000 coloured maps and 10,000 boxes required for the games, and instructed them to prepare with all speed the necessary sketches, etc. His instructions were carried out, as were certain alterations he orally suggested. At his request they purchased a quantity of linen for the maps, and cut this up to the required sizes. Then the defendant decided not to proceed further with the games, and instructed them not to proceed, and the linen was left on their hands. The defence was that the boxes were not in accordance with the instructions given, and that the plaintiffs, on their own initiative and without his knowledge or approval, purchased the linen in anticipation of an order which he never gave. Judgment was given by Mr. Justice Darling on Tuesday in favour of Messrs. Burrup, Mathieson and Sprague for the whole amount claimed.

THERE is much consternation amongst a certain proportion of Fleet-street printers on account of a threat to close the oldest "pub" in the Street of Ink, namely, the Old Crown, in Crown-court (also known as McGrath's). A petition, containing the names of many printers, is being submitted to the licensing justices.

LETTER-FRANKING PRINTING MACHINE.—The Postmaster-General has announced the authorisation of the Pitney-Bowes postage meter, a device to supersede postage stamps. Its method is to print "post marks" directly on to letters in the offices of the firms dispatching them. Postage is paid through a meter, which is taken to the Post Office at intervals. This meter locks when the amount of postage for which it has been set is exhausted. A machine will be installed in the Prudential Assurance offices very soon. It seals letters as well as stamps them.

LAST week's number of *Great Thoughts* is a special one in honour of the 2,000th issue, and contains, in addition to many attractive features, some interesting details of the magazine's history from the time of its foundation in 1884.

ENTRIES for the London Press Golfing Society's foursome tournament, for the silver salver and mementos presented by Sir George Sutton, the first two rounds of which will be played at Coombe Hill, on May 30th, have closed with a total of 22 teams.

THE funeral took place last week of Mr. Harry Whitehorn, of Palmers Green, who was a well-known journalist. Mr. Whitehorn began his working life as a compositor and was for long a member of the *Daily News* staff.

Trade Union Matters.

THE London Printing and Kindred Trades Federation are calling a special meeting this week to discuss the position arising out of the wages position. One of the principal items to be considered will be the desirability of bringing about a federated movement.

"T.A." AND ENGINEERS' DISPUTE.—Mr. J. D. French, the president of the Typographical Association has reported to the Executive Council of the Association that he had been approached by representatives of the Engineers' Union with a view to inducing Typographical Association members to refuse to print news reflecting on the engineers during the dispute. Mr. French stated that he had suggested to the engineers' representatives that the matter should be referred to the Printing and Kindred Trades Federation.

THE Leeds Typographical Society, at its quarterly delegate meeting, decided to reduce the present levy of 1s. 3d. per week on all fully employed members in aid of the special branch unemployment fund to 6d. per week on members earning more than 80s., and to 3d. per week on members earning between 70s. and 80s. The fund now shows a balance in hand of about £400.

THE South Wales and Monmouthshire branch of the National Union of Journalists has decided to mark the election of one of its members, Mr. T. A. Davies (*South Wales News*, Cardiff), as president of the National Union by making a presentation to him at a reunion of the members to be held in June. Mr. Davies has been a tower of strength to the union in South Wales and for many years served as the secretary of the branch.

Overseers and Notices.

SIR,—In your report of the general meeting of the London Master Printers' Association at Stationers' Hall last week, I notice that a statement at the meeting contained a slight inaccuracy as regards the term of notice due to an overseer. It has long been the custom of the trade and recognised by the Courts that an overseer is entitled to give or receive one month's notice.

Yours, etc.,

E. W. WHITTLE,
 General Secretary, Printers Managers
 and Overseers' Association.
 May 23rd, 1922.

John Dickinson and Co., Ltd.

At the recent annual meeting of the shareholders, held at 65, Old Bailey, E.C., the chairman (Mr. Henry Godfrey) reviewed the state of trade during the past year, and in view of the unprecedented conditions, he considered the result of trading—a net profit of £44,715—as favourable.

He mentioned that the ordinary share capital of the company was increased in April last year by the creation of £50,000 employees' shares, and up to December 31st, 1921, £6,383 of such shares had been issued. An increasing interest is being displayed in this scheme, and it is anticipated that it will still further conduce to the excellent relationship which exists with the employees of the company.

In the course of further remarks the chairman said: "Everything possible has been done to entirely clear up the past extraordinary period in order that it should have no prejudicial effect on the present and future trading. This can be regarded as past history. Nearly all sections of our manufacturing are working full time, and the present output, even under the still somewhat depressed conditions, is considerably in excess of any pre-war records, and the increased facilities are capable of meeting a much increased demand. The vital importance of the export trade of this country is so well recognised that no comments I can make are requisite, but I may state that the very special attention and consideration of your directors continue to be directed to this subject. I have myself recently spent several months in Australia and New Zealand, and a brief period in India, and one special result of the investigations I have conducted has been a closer understanding of local conditions and possibilities. A well-defined and progressive policy in connection with our overseas branches is in course of establishment, which it is felt must prove to be beneficial to the future interests of this company."

A dividend of 7½ per cent. was paid on the ordinary shares, and the balance carried forward amounts to £94,117.

The Hydroloid Process.

A new treatment of paper and boards has been brought to our notice by Messrs. Hydroloid Ltd., of 30, Walbrook, E.C.4. From samples of various kinds inspected by us there certainly seems to be a wide field in which their preparation will prove of value. The Hydroloid process, as it is called, can be used for any class of paper or board and produces greater strength in all materials, apart from its water and oil proofing qualities.

The company is devoting its attention in the first instance to water and oilproof kraft and wrapping papers, a new type of ivory board, also writing and ledger papers. The first of these will compete with all classes of pitch paper, and especially papers for export packing, tyre-wrapping, etc. The ivory board is produced with a surface equal to a first grade linen pulp board at a competitive price. The writing and ledger papers have also exceptional strength and a firm writing surface. We have inspected samples of paper which certainly are of exceptional strength, and should be found of special value for loose-leaf ledgers. A waterproof writing and ledger paper is a distinct novelty, and with the extra strength obtained, should prove of interest to foreign correspondents in those places where paper is subject to drastic treatment. Also as a parchment effect can be produced its introduction for legal work should not long be delayed.

There are, doubtless, from information imparted to us, numerous other products that will be manufactured by the company as soon as business is established with the lines already mentioned, and we shall have pleasure in drawing our readers' attention to these as they are developed.

It only remains to mention that Messrs. Alex. Pirie and Sons, Ltd., of London and Aberdeen, are the prime movers in this undertaking.

PRINTED books exported during the first four months of the year amounted to 71,719 cwt. (of the value of £864,075), as against 105,132 cwt. (£1,240,007) in the corresponding period of last year, and 74,731 cwt. (£952,279) in 1920 (four months).

DIVIDENDS AND REPORTS.

KELLNER-PARTINGTON PAPER PULP Co., LTD.—A dividend is announced of 15 per cent. free of tax, for past year, carrying forward £99,805.

ASSOCIATED PAPER MILLS, LTD.—Presiding at the adjourned first annual general meeting of the Associated Paper Mills, Ltd., at Manchester last week, Mr. H. S. L. Slater (the chairman) reviewed the position of the company. He mentioned that one of the most formidable problems they had had to grapple with was the position of their forward contracts for raw materials. Their Glasgow concern for the past six months had been and was still very busy, while the Slater business seemed gradually to be improving. In Glasgow and in Bollington they were about to begin the manufacture of photographic base paper, the plant for which was nearly completed at their Glasgow mill, and was actually completed at Bollington Mill. They were expecting great things from this new department and hoped to be able to begin the actual manufacture within two months.

NEW COMPANIES.

GORDON GOODMAN, LTD.—Capital, £5,000 in £1 shares; to carry on the business of stationers, printers, paper, paper bag, account book and box-makers, etc. Private company. First directors: N. Gordon and Mrs. R. Gordon. Registered office: Osborne-street, Rochdale-road, Manchester.

First directors: P. T. Pratt and F. Harper. Registered office: 105, Great Hamp-ton-street, Birmingham.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfaction registered pursuant to Section 97 of the same Act. (The registration of Satisfaction is not compulsory).

ELLIOT AND MCFARLANE, LTD. (newspaper proprietors and publishers, Westcliff-on-Sea).—Debenture dated May 8th, 1922, to secure £300, charged on the company's undertaking

and property, including uncalled capital. Holder: Mrs. G. M. Barker, 158, Brightwell-avenue, Westcliff-on-Sea.

GEO. J. POORE AND Co., LTD. (stationers, printers, etc., Liverpool).—Particulars of £2,500 debentures, authorised April 6th, 1922; present issue £800, charged on the company's undertaking and property, present and future, including uncalled capital.

NORTHAMPTON MERCURY Co., LTD.—Satisfaction to the extent of £100 on May 9th, 1922, of debentures dated December 23rd, 1911, securing £1,500.

SMYTH HORNE, LTD. (bookbinding, printing, mechanical and general engineers, London).—Satisfaction to the extent of £2,000 on April 21st, 1922, of debentures dated November 1st, 1919, securing £23,000.

LONDON CITY AND MIDLAND PAPER STOCK Co., LTD. (Brixton, S.W.9).—Particulars of £3,000 debentures authorised April 21st, 1922; whole amount issued, charged on the company's undertaking and property, present and future, including uncalled capital.

PREMIER PRESS, LTD.—Mortgage and Land Registry Charge on certain properties in Southwark dated May 8th, 1922, to secure £8,500. Holders: Norwich Union Life Insurance Society.

ROSCOW AND Co., LTD. (paper bag manufacturers and paper merchants, etc.).—Trust deed dated May 3rd, 1922, to secure £8,000 debenture stock, charged on certain land and premises in Radcliffe, Lancs, and the company's undertaking and property, present and future, including uncalled capital. Holder: W. Olive, 84, Cross lane, Radcliffe, near Manchester.

BANKRUPTCIES, etc.

Re F. J. W. LEANEY, wholesale newsagent, 9 and 10, St. Bride's-avenue, Ludgate-circus, E.C. The public examination of this debtor was held last week at the London Bankruptcy Court, the accounts showing liabilities £1,497 against assets £18. In the course of his evidence the debtor stated that he commenced business in 1906, and in October, 1917, he transferred it to a company registered as "Leaney's Ltd.," of which he acted as managing director at a salary of £6 6s. a week. Whilst acting in that capacity he personally guaranteed a debt of that company, for which judgment was obtained against him. In June, 1918, he purchased a business at 69, Devons-road, Bow, for £60, and continued it under management until October, 1920, when he sold it for £250. Witness attributed his failure to his having guaranteed debts for which he received no consideration. The examination was concluded.

Trade in Printing Type.

British printing type exported during the first four months of the present year amounted in quantity to 67 tons (of the value f.o.b. of £22,184). This figure compares with 132 tons (£45,117) in the corresponding four months of last year and 83 tons (£20,869) during January-April, 1920.

The receipts of printing type into the United Kingdom during January-April of the present year reached 16 tons (of the value c.i.f. of £4,559) against 11 tons (£4,366) in 1921 and 7 tons (£2,430) in the corresponding period of 1920.

SELLS, LTD., have been appointed sole advertising agents for the Buff Book, issued by authority of the Postmaster General and published by the Business Telephone Directories, Ltd., 25, Laurence-lane, E.C. It has a circulation of 150,000 copies, twice yearly.

Wages in the Paper Trade.

National Agreement No. 3.

The National Agreement No. 3, which was approved by a joint negotiating committee comprising representatives of the Employers Federation of Papermakers, the Amalgamated Society of Papermakers and the National Union of Printing, etc., and Paper Workers, has now been finally drafted.

There are one or two important changes in the new agreement, which bears the date of May 4th, 1922.

The first clause embodies the settlement which was reached in regard to "hours for shift workers" in paper mills, and reads as follows:—

"In mills on three shifts, the working week for shift workers shall be 132 hours, i.e., an average of 44 hours per person per week, and by mutual agreement between the employer and employees the following extra hours may be worked, namely:—4 hours at time and a-quarter, and a further two hours at time and a-half.

"Without prejudice to the foregoing clause any firm may temporarily, owing to an emergency or exceptional conditions, run their mill an additional number of hours per week, providing the consent of the District Boards of the Federation and the Unions concerned is previously obtained. Such hours shall be paid for at the overtime rate provided in this agreement."

The only alteration in the classification of adult males refers to general labourers, who are given a special paragraph in Clause 7, which is quoted subsequently.

Wages Adjustment.

A sliding scale in regard to wages for paper-making and paper coating is definitely established, together with minimum hourly rates. Thus the industry will automatically adjust its wage rates until zero is reached. Intervals of 15 points are specified from the cost of living figure of 85, and with each drop of 15 points reductions of 1d. or a fraction of a penny come into force on and from the first day of the month next but one following the month in which the Board of Trade index figure is published. If after any reduction has taken place the index figure rises above the specified figure, corresponding increases in wages are provided for.

Minimum hourly rates are fixed in the agreement "for mills on the three-shift system for shift workers and for the 48-hour week for day workers." With the cost of living at 85, the minimum rates are:—

Papermaking.—Class 1, shift, 1s. 6d.
Papercoating.—Class 1, shift, 1s. 4d.; class 1, day, 1s. 2½d.

Papermaking and Paper Coating.—Class 2, shift, 1s. 3d.; class 2, day, 1s. 1½d.; class 3, shift, 1s. 1½d.; class 3, day, 1s. 1½d.

As the index figure falls each 15 points, the minimum rates also decline by a penny or a fraction of a penny.

Clause 7 also provides: "The rate for general labourers shall be class 3 rate, except in exceptionally situated rural mills. In these mills the rate shall be subject to arrangement between the unions and the District Board."

The war time provision of the old agreement, relating to juniors doing the work of adults, is eliminated, being no longer necessary.

As to small one machine brown mills in Scotland, the rates of wages are to be subject

to special agreement between the unions and the District Board.

The Agreement is signed by Mr. A. E. Holmes (secretary, Printing and Kindred Trades Federation), Mr. Geo. Harraway, Mr. T. G. Newland and Mr. Wm. Ross (National Union of Printing, etc., and Paper Workers), Mr. A. Fowler (Amalgamated Society of Papermakers), and Mr. John L. Merchant general secretary, Employers' Federation of Papermakers).

New Inventions.

Lithographic Printing Machines.

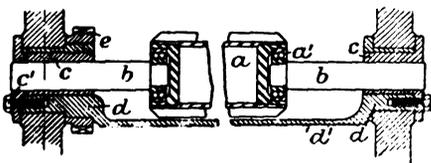

This invention relates to a method whereby in a lithographic printing machine, the printing plate and inking and damping surfaces are mounted upon an oscillating cylinder and co-operate respectively with an impression or offset roller, and inking and damping rollers. As shown, the cylinder A formed by end discs connected by segments H, I, L is oscillated by means of a gear-wheel A² and a toothed quadrant C having an arm D² connected by a link E to a crank pin E¹ extending between a pair of gear wheels E² driven by a pinion E³ on power shaft E⁴. The segments H, I, L carry respectively the print-

ing plate, and inking and damping surfaces. Ink is transferred from a fountain roller M¹ to the inking surface by a messenger roller M² actuated by a cam N through linkage N¹, N², N³ and the ink is distributed upon the inking surface by rollers K and then transferred to the plate-inking rollers L¹. The plate damping rollers L² receive their supply from the damping surface on the segment L. In the machine shown, the printing plate makes an impression on a rubber blanket on a cylinder F which transfers the impression to the paper passing between it and an impression cylinder G. The cylinders F, G are geared together and the cylinder F is driven intermittently in one direction by a pawl or catch from a gear loose on one end of the shaft F² and engaging a gear on the shaft A¹ of the cylinder A. The other end of the shaft F² has a gear which is driven from a gear on the shaft A¹ but has a few teeth cut away so that when the driving pawl of the cylinder F is disconnected this cylinder may remain at rest.—The patentees are Messrs. W. Ratcliff and H. Wallace.

Inking Mechanism.

In an invention patented by Messrs. J. H. Butler and T. E. Phythian the feed roller spindle of inking mechanism for printing machines is carried by eccentric bushes mounted within eccentric bearings, by

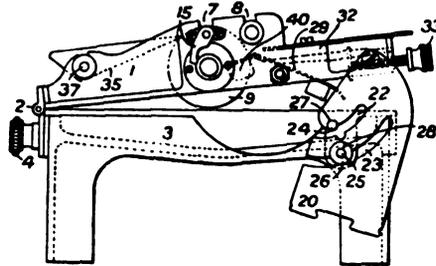

rotating which the feed roller is caused to make contact alternately with the fountain roller and distributing drum. As shown, the feed roller a is mounted by means of ball bearings a¹ upon end spindles b, which are

carried in eccentric bushes c mounted in eccentric bearings d supported by a suitable carrying frame. The bushes c may be secured by means of screws c¹, in particular angular adjustment with reference to the bearings d. The latter may be connected by a transverse plate d¹ and rotated by means of a gear wheel e carried by one of the bearings, or each bearing may be provided with a driven gear wheel.

Label Gumming Machines.

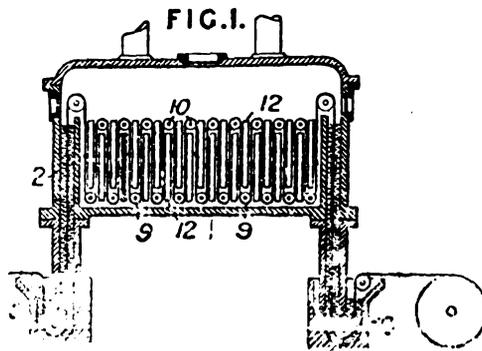

In a device for gumming labels, etc., having a feeding roller, a gumming roller, etc., mounted on a hinged frame above a gum trough into which the gumming roller dips, means are provided for supporting the hinged frame in an inclined position; special arrangements of the scraper plate that regulates the amount of gum on the gumming roller and for receiving the labels from the gumming roller are also described. The hinged frame 1 is secured to the base 3 of the machine carrying the gum trough by hing plates 2 and thumb-screws 4,

and is provided with hinged plates 20 having slots 22, 23 which pass over studs 24, 25 on the base and are formed with recesses 27, 28 which can engage with the studs 24, 25 to hold the frame 1 in an inclined position. A screw 26 is also provided for clamping the plates 20. The scraper plate 29 is pivoted and weighted so as to move away from the gumming roller 9 towards which it is pressed by a rod 32 actuated by a screw 33. Stop plates 40 are arranged at the ends of the roller 9 between the spindle of the roller and the plate 29 to prevent splashing. From the roller 9 the gummed label passes on to the edges of a number of plates 35 loosely mounted on a rod 37 so as to rest against the roller 9 and separated by distance pieces. The roller 9 and the feeding roller are mounted in slots 7, 8 in the frame 1 and a pawl 15 is provided to prevent them from running backwards. The invention is patented by Messrs. C. Siddons, W. C. Kirkwood, and E. W. Haines.

Drying Paper.

On this subject, a further British patent has been granted to Mr. O. Minton. Paper or other material in sheet form is dried *in vacuo* by radiant heat from electrically heated or glowing elements; the material may be under little or no tension. Fig. 1 shows a vacuum chamber 2 into and from which the web of

material is passed through liquid seals 3, 4, for which in a modification in a single seal is substituted. Within the chamber, the paper, etc., passes over and under rollers 10, 9, and is heated by electric coils, etc., 12 located between the loops of material.

DIRECTORY.

A Notable Bookbinding Centenary.

A Hundred Years Ago this Year, a London Binder made the First Application of Cloth as a Bookbinding Material.

The present year marks the centenary of a very important new development in book-binding evolution, the year 1822 having been the date of the appearance of the first book bound in cloth. That development, fraught with big consequences for the binding industry, came about in quiet, unadvertised fashion, and there seems now no documentary evidence which can establish beyond question the claim of any particular book to be the first to make its bow to the world bound in the new material. It seems clear, however, that this far-reaching innovation was introduced by a London binder, namely, Mr. Archibald Leighton, junr., and that the book which has the best claim to be the first cloth bound volume is Moule's "Bibliotheca Heraldica."

Mr. Archibald Leighton, junr., was the son of the Mr. Archibald Leighton who came from Aberdeen and established himself as a master bookbinder in London in 1767, and when the father died (in 1784) Mr. Archibald Leighton, junr., succeeded to the control of the business, and it was under his direction that experiments were made which culminated in the production of the cloth-bound "Bibliotheca Heraldica" in 1822. We are informed by Mr. Robert Leighton — grandson of Archibald Leighton, junr., and a partner of the present-day firm of Leighton, Son and Hodge, Ltd., of 16, New-street-square, E.C.4 — that his father, Robert Leighton (1822-1886) not only maintained that the above mentioned "Bibliotheca Heraldica" was the first book to be bound in cloth, but moreover had in his possession a copy of that book which bore on the flyleaf an autograph statement to that effect signed by Mr. Archibald Leighton, junr.

We are able to publish herewith (by the courtesy of our esteemed contemporary, the *Publishers' Circular*), a portrait of this Mr. Archibald Leighton, who, we think, deserves to be held in honoured memory by the trade which has made such wide spread exploitation of the innovation with which his name is associated.

How important this innovation was can be realised when it is remembered that at that time practically the only choice of binding materials lay between leather and paper. The price of leather binding was, of course, prohibitive in the case of cheap editions, and though other materials, notably silk and satin are known to have been used, there was here also a big obstacle in the matter of expense. Thus publishers' editions were ordinarily in paper boards, and were consequently lacking in durability, it being customary to substitute a leather binding if a good-wearing volume was required.

It was under Mr. Archibald Leighton's supervision also that, about 1832, when cloth for bindings was coming into general use, another

innovation was made which was little less important than the other, and was essential to the complete popularity of the cloth-bound

silk, or the like. The modification of book-cloth so as to permit of gold-blocking directly on to the cloth binding added immensely to

Mr. Archibald Leighton, who introduced Cloth for Bookbinding.

book. The earlier cloth-bound volumes had their titles attached by adhesive, the titles being printed or blocked on labels of paper,

the prestige of the new covering material, and this discovery also was made by experiment in the Leighton bindery. The date of

LM Two-Colour Offset.

THIS press has five cylinders—two large diameter plate cylinders, two transfer cylinders, and one impression cylinder—arranged in the form of a pyramid with the impression cylinder at the top. The first colour is printed from the cylinder at the front of the machine, and the second from the cylinder under the feed board at the back. The plate cylinders make only one revolution to each impression, and are mounted in rigid bearings. The transfer cylinders are two revolution, and are adjustable for pressure. An important point concerning these cylinders is that they are adjustable independently of each other, obviating any necessity for underlaying should one colour require a little more pressure than the other. This effects a considerable saving of time when making ready.

The impression cylinder rests centrally between the two transfer cylinders and is also adjustable for pressure. This cylinder also makes two revolutions; it takes the sheet when off impression, falls to print, and rises and delivers the sheet on its second revolution. It will be noted that the sheet is not transferred from one cylinder to another during the printing operations, and as a result clean printing in perfect register is obtained.

The first colour damping mechanism is situated over the upper part of the plate cylinder and consists of two plate damping rollers, two intermediate vibrating brass rollers, a feed roller, and a water fountain roller. The inking mechanism consists of five plate inking rollers, two geared steel vibrators, one steel rider, two transfer rollers, one ductor roller, three distributing rollers with three steel riders, and a large vibrating drum. The amount of vibration of the ink drum and vibrator rollers can easily be varied between the maximum vibration and zero. The ink fountain and a portion of the rollers are built on a carriage, which can be rolled out of the way when desired.

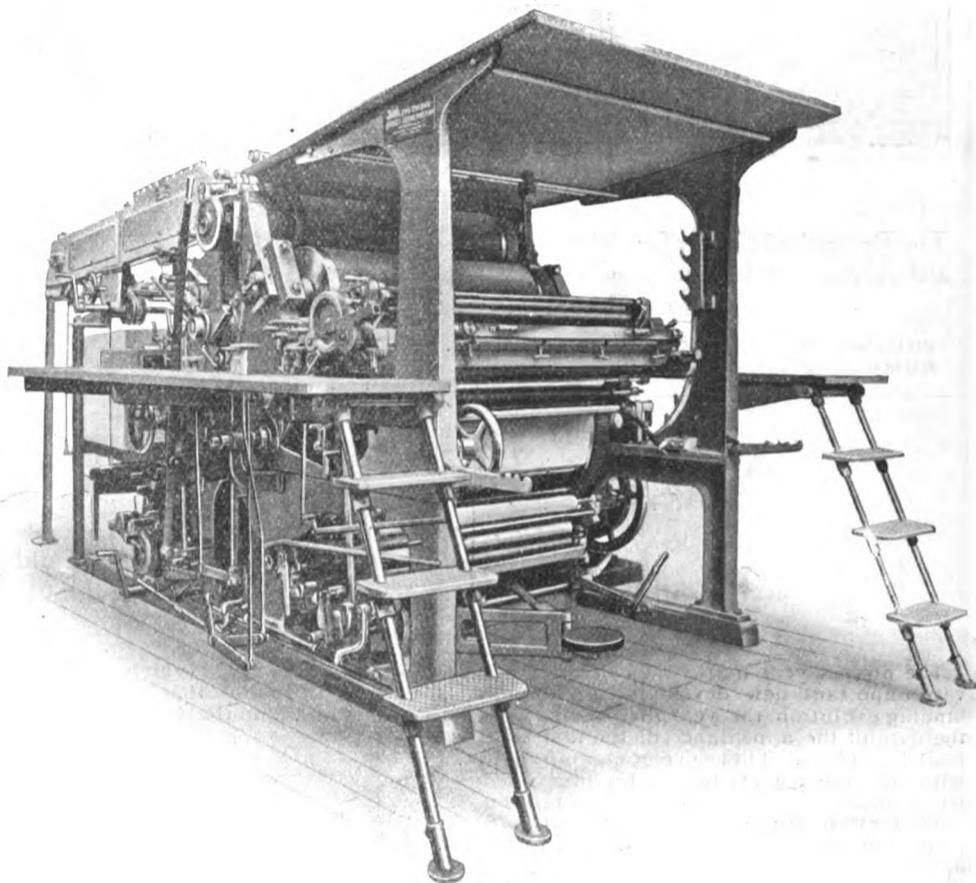

The second colour damping and inking arrangements are similar to the first, but with the positions reversed, the damping motion being at the bottom and the inking at the top of the cylinder.

The complete separation of the two damping and inking arrangements enables a larger area of plate to be exposed for examination—a decided advantage that is fully appreciated by users. Yellow and black, a delicate tint and bronze blue, or any other extreme combinations of colour, can be printed on this press without fear of one colour affecting the other, thus broadening the scope of the machine beyond the narrow limits of printing in two shades of the same colour, such as pink and red, light and dark blue, and so on. Another important advantage due to these independent mechanisms is that each plate can be supplied with the precise amount of water which the nature of the work demands. Further, one plate can be covered with fine half tone work and the other with heavy solid matter.

Special attention has been made to the provision of devices for quickly and accurately bringing the two plate cylinders into register with each other. For example, assuming that the first plate has been set to its correct position in the usual way and it is found that the second plate is on the slant gripper ways, a special plate-twisting clamp arrangement will speedily put this right. If the plate requires moving bodily, either forwards or backwards, it is only necessary to slacken off the screws in the cylinder end; and

then by a worm and wheel device the cylinder can be moved in the direction required, and the cylinder screws fastened again. The means of adjustment for the side lay of a plate consists of a spindle operated by means of a screw with fine threads. In this way the whole cylinder is moved bodily, ball-thrust washers making the adjustment an easy matter.

The delivery on the LM Two-Colour Press has many distinct advantages. It is an extended chain and pile delivery which delivers the sheet printed side up. It is an ideal arrangement for use in combination with an automatic feeder. It enables the sheets to be delivered on to a board ready for removal in bulk by truck without disturbing the sheets. The piling of the sheets in this way gives the printed matter time to dry, and not only dispenses with the usual labour required to move the sheets from a delivery board every half hour or so, but avoids the possibility of work being spoiled through smudging of the ink.

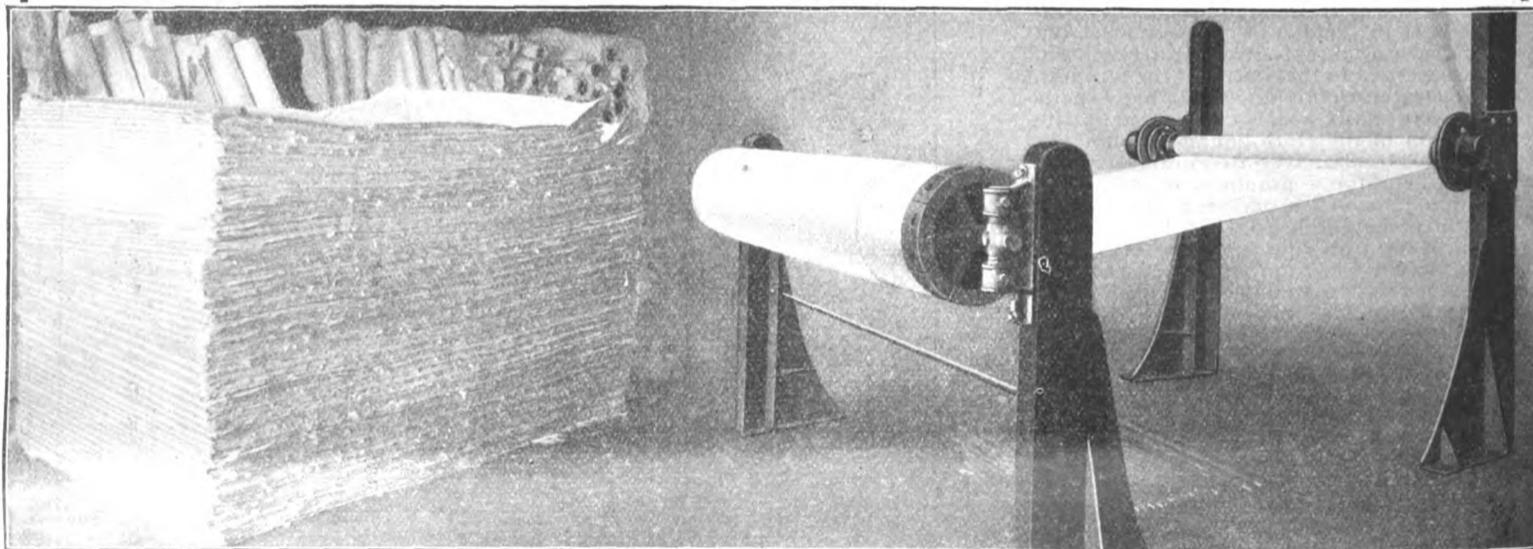

Linotype and Machinery Ltd.

9 Kingsway, London, W.C.

Members of the Association of British Manufacturers of Machinery for the Printing and Allied Trades

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES:

- 1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading.
- 2.—It occupies a space of only six feet on the run, and is quite noiseless.
- 3.—The power required is such a small amount that it can be driven from any existing shafting.
- 4.—Centres of any kind or width can be worked on the machine.
- 5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day.
- 6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills.

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., Engineers, Myrtle Road Works, Brentwood, ESSEX

this latter innovation is registered in striking fashion in an edition which the firm had under way at the time of the discovery. Volumes I. and II. of the octavo edition of "Byron's Life and Letters" (1832) were turned out in cloth boards, with the old gold-blocked title labels attached by adhesive. Then came the introduction of direct gold-blocking, and accordingly the later volumes of this same edition have the title gold-blocked directly on the cloth binding.

Thus the name of Archibald Leighton has double claim to special note in bookbinding annals. The chief claim, however, is that connected with the introduction of book-cloth. It is therefore fitting that, in the year that marks the centenary of the use of this material, binders everywhere should give a grateful thought to the enterprise of this pioneer of a century past.

British India Duties.

Notification No. 1,798, issued by the Department of Commerce of the Government of India on April 1st last, specifies the valuations which have been fixed by the Governor-General in Council for the purpose of levying Customs Duties on goods imported into and exported from British India. Notifications No. 7,191, of December 17th, 1921, and No. 898, of February 18th, 1922, are superseded by the present Notification.

Tariff No. 104 includes books, printed, including covers for printed books, maps, charts, and plans, proofs, music and manuscripts, which are free.

Tariff No. 123, of goods subject to an *ad valorem* duty of 2½ per cent., comprises printing and lithographing material, namely, presses, type, ink, aluminium lithographic plates, brass rules, composing sticks, chases, imposing tables and lithographic stones, stereo blocks, wood blocks, half-tone blocks, electrotype blocks, roller moulds, roller frames and stocks, roller composition, standing screw and hot presses, perforating machines, gold-blocking presses, galley presses, proof presses, arming presses, copperplate printing presses, rolling presses, ruling machines, ruling penmaking machines, lead and

rule cutters, typesetting machines, typesetting and casting machines, rule bending machines, rule mitring, bronzing machines, leads, wooden and metal quoins, shooting sticks and galleys, stereotyping apparatus, metal furniture, paper folding machines and paging machines, but excluding paper.

Under Tariff No. 124, prints, engravings and pictures, including photographs and picture post cards, are subject to an *ad valorem* duty of 30 per cent.

Tariff No. 93 comprises trade catalogues and advertising circulars imported by packet, book or parcel post, which are free.

The Tariff valuation is *ad valorem*, and the duty 15 per cent. in respect of Tariff No. 94, which reads: Paper and articles made of paper and papier mache, pasteboard, mill-board and cardboard, all sorts, and stationery, including ruled or printed forms and account and manuscript books, drawing and copy books, labels, advertising circulars, sheet or card almanacs, and calendars, Christmas, Easter and other cards, including cards in booklet form; including also waste paper and old newspapers for packing, except old newspapers in bales; but excluding trade catalogues and advertising circulars imported by packet, book or parcel post. (See No. 93).

Old newspapers in bales have a tariff valuation of 10 Rs. per cwt. and the duty is 15 per cent.

THE SPICER AMALGAMATION.—The special meeting which was held on Tuesday of Spicer Bros. sanctioned the proposed amalgamation of the company with James Spicer and Sons, Ltd., as from August 1st, 1921, and the increase of the capital of Spicer Bros. to £1,150,000 by the creation of 30,000 new 5 per cent. cumulative preference shares of £10 each, and 25,000 new ordinary shares of £10 each, the whole of which are to be issued to the shareholders of James Spicer and Sons, Ltd., credited as fully paid. The increase of capital proposed for the purpose of exchanging for James Spicer shares allows of an equal exchange for the 30,000 preference shares of James Spicer and Sons, and the giving of five ordinary shares for every three ordinary shares in James Spicers, whose ordinary share-capital consists of 15,000 ordinary shares of £10 each.

New Stamp-Printing Processes.

A world-wide increase in the consumption of postage stamps, says the *Times*, has led to numerous experiments with a view to speeding up production, and at the same time raising the standard of execution, as a safeguard against the increasing activity of the counterfeiter. One of the most notable innovations in stamp printing has been the use of the rotary press. Of American origin, it is gradually being adopted by stamp printing establishments all over the world.

Until recent years, postage stamps were invariably printed on the old flat-bed type of press, with a comparatively restricted output. The modern rotary machine combines in a single process the four operations of printing, gumming, perforating, and checking the finished sheets of stamps, which it delivers in bundles like newspapers. An electrically operated printing machine of this type, known as the "Chambon," has recently been installed by the French Government stamp atelier on the Boulevard Brune, Paris. It is claimed that not only is the impression carried out more rapidly by the new process, but that the results obtained are superior in finish to those given by the old flat-bed method. The Royal Mint at Madrid is also about to instal new machinery for printing Spanish postage stamps.

Considerable extension in the use of the line-engraved process of stamp printing may result from the invention by Mr. George U. Rose, jun., of the United States Bureau of Engraving and Printing, Washington, of a system of manufacturing, by an electrotype method, plates that compare in strength and durability with the hardened steel plates now universally employed in the production of recess printed stamps, and at a much lower cost. Supplies of the current U.S. postage stamps of the .S.A. have already been printed experimentally from Rose plates, and it is officially declared that the impressions are indistinguishable from those of the regular line engraved printings. Doubtless, however, some point of distinction will reveal itself to the discerning eye of the ever-watchful philatelist.

BINDERS TO THE PRINTING TRADE.

PRINTERS who have the facilities for folding, sewing and casing up, can be supplied with cases made in Leather, Rexine, Pluviusin, Imitation Leather, Cloth, or any other material, blocked or embossed in Gold, Imitation Gold, White or Coloured Foil Leaf, ink in any colours.

Our staff consists of more than 300 capable workers, provided with the most up-to-date machinery

Trade Notes.

ATTENDANCE at the annual conference of the Federation of Master Printers at Glasgow this week-end promises to be phenomenal. More applications have been received, we understand, than in any previous year. Over sixty master printers are expecting to be travelling from London, whilst overseas visitors from America and India at any rate will be present.

AMONG the proposals made by an economy committee appointed by the Glamorgan County Council in order to ascertain whether it is possible to reduce administrative costs, is one that fresh tenders for all printing be asked for at the first favourable opportunity.

THE business of Messrs. Charles Goodall and Sons, Ltd., playing card makers, has been taken over by Messrs. Thomas De la Rue and Co., Ltd, printers. Negotiations for the amalgamation began about November last, and were referred to at the time in these columns. Messrs. De La Rue will now do at Bunhill-row all the printing formerly done by Messrs. Goodall. The show-rooms in St. Bride-street, E.C., represent both firms.

GOVERNMENT PRINTING COSTS.—Since the adoption of the policy of making Stationery Office publications pay for themselves, some startlingly high charges have come into vogue. The latest is the 2s. 6d. charged for the 30-page Government Report on Poplar.

THE formation of the proposed recreation Guild of the Printing and Kindred Trades in the Rochdale district is now an accomplished fact, and during the week the various office teams have met in the first rounds of a bowling tournament. Next week cricket will be on the programme.

Success attended the carnival and ball held by the Football League and Charity Cups Competition Committee of the Printing and Allied Trades Charity Sports Association at the Royal Fusiliers' Hall on the 20th ult., when the L.S.C. Jazz Band won many compliments.

EVENING CLASSES.—"Printing Practice," "Advanced Letterpress Printing," "Photographic Enlarging," and "Papermaking and Paper Testing" are the subjects of lecture series started by the Manchester College of Technology for students at evening classes during the summer.

A MEMORIAL bed, dedicated to the memory of the late Mr. A. Chris. Fowler, of New Union-street, E.C., and his son, Private C. R. Fowler (Hon. Artillery Corps), who fell in the war, was opened by Mrs. A. C. Fowler, on Saturday last, at the Caxton Convalescent Home, Limpsfield, in the presence of members of the family and employees of the firm, by whose subscription the bed was endowed.

At a meeting of the City of London Licensing Compensation Authority at the Guildhall last week, Sir James Roll presiding, the case came up of "The Crown," 1, Crown court, Fleet-street, the renewal of the license of which was opposed on the ground of redundancy. The usefulness of the house to certain printing establishments in the neighbourhood was stressed, but after consideration Sir James Roll intimated that the magistrates had decided that they were unable to renew the license of "The Crown."

THE prize of 100 guineas offered for the best poster design submitted in connection with the Hospitals London Appeal has been awarded to Mr. F. H. Ball, Hillcrest, Haywood-road, Mapperley, Nottingham. Nearly 300 designs were sent in. Mr. Ball is a "free lance" artist.

THE case of Hulton v. *The Times* Publishing Co. was settled last week before the Lord Chief Justice, in the King's Bench Division. Sir Edward Hulton had instituted libel proceedings in respect of an article in *The Times* referring to Sir Edward's racehorse Scrumptious. *The Times* having undertaken to indemnify plaintiff in all the costs, and having made plain that no reflection on the conduct or honour of Sir Edward Hulton was intended, the record was withdrawn.

THE *Western Mail* staff and the staff at its Tudor General Printing Works, Cardiff, have sent £10 to the Sir Arthur Pearson Memorial Fund.

AN enjoyable day at Hampton Court was spent on Saturday by the *Daily News* process department and members of the art department. Luncheon was served at the "Castle" Hotel, Mr. F. Taylor being in the chair. After lunch and a short address from the father of the chapel (Mr. W. Faunch), the party went for an excursion on the river.

THE *Star* circulation department journeyed by road to Brighton on Saturday for their annual gathering, under the chairmanship of Mr. G. H. Belson, *Star* circulation manager, supported by Mr. H. Murch, staff superintendent, and Mr. S. Bradshaw, assistant circulation manager.

AN English novelist, in a communication to the Press, complains that the English writer of popular fiction is being slowly "starved out." An increasing number of American novels, he points out, are taken up by English publishers, who buy them cheaply in the form of "sheets," already printed in U.S.A., producing in this country merely the title-page and binding. According to the views of several British publishers, this opinion is an exaggerated one, and it is pointed out that British authors have a profitable market in America.

THE death has taken place at Colchester of Mr. Wm. White, junr., only son of Mr. W. H. White, manager of Messrs. Spottiswoode, Ballantyne and Co.'s Colchester printing works.

MR. JOHN LOCKWOOD, head of the firm of Messrs. Joseph Lockwood and Son, printers and stationers, Shudehill, Manchester, has died at Withington, at the age of 76.

ONE of the best known journalists in South Wales, in which he had been resident for 29 years, has passed away in the person of Mr. A. F. Lowry, of Neath. Mr. Lowry was taken ill with a heart attack while at work and expired with dramatic suddenness. He had represented the *Western Mail* and *Evening Express* at Neath for many years.

DEATH OF LOCAL "T.A." TRUSTEE.—During the past week the death occurred of Mr. F. Butterworth at the age of 63. He had worked at the "Rochdale Observer" office as maker-up for over 41 years, and had been a trustee of the local branch of the Typographical Association for nearly 20 years. He has been in failing health for some time, but worked until about two months ago.

THE death took place suddenly on Tuesday, at the age of 31, of Mr. Samuel Benton, an

employee in the stereotyping foundry of the *South Wales Echo*, Cardiff.

MR. WILLIAM MILES, formerly manager of the *Financial News* and a well-known figure on the business side of journalism, died suddenly on the golf links on May 20th. The remains were cremated at Norwood Cemetery, and the funeral was attended by a large number of Masonic as well as personal friends and relations. Mr. Miles was a Past Master and for many years secretary of the Chaucer Lodge, a Past First Principal of the Gallery and Chaucer Chapters, and a Past Master of the Savage Club Mark Lodge.

MR. JOHN FOORD, one of the best known of American journalists and formerly editor of the *New York Times*, died recently at the Emergency Hospital at Washington in consequence of a motor-car accident. Mr. Foord, who was 78 years of age, had given his long life to the service of journalism. Born in Perthshire in 1844, he obtained his early education in Dundee, and soon came to London to serve his apprenticeship in Fleet-street, where he remained at work till 1869, when he went to New York.

WILLS.—Mr. Archibald McLay, Cardiff, printer and stationer, who died February 19th, aged 59, left £6,393; Mr. William Foster, printer, of Bingley and Bradford, left £3,284.

MR. THOMAS HUNT, of Reading, bookseller and stationer (died Jan. 18th), left £21,746.

THE will of Mr. R. H. Dyer, printer, Bridgend, who died on December 11th last, has been proved at the gross value of £4,605.

THE late Mr. Alexander McPherson, Palmer's-green, N., retired fancy box maker, late of Playhouse-yard, E.C., who died January 29th, aged 81, left £4,006.

PARSONS AND WHITTEMORE, INC.—Capital \$100,000, in \$100 shares. Incorporated in the State of New York to manufacture, export, import, and deal in paper, pulp and kindred commodities. British address, 27, Buckingham-gate, S.W.1, where H. Doherty is authorised to accept service of process and notices on behalf of the company.

THE general strike in Rome was terminated on Friday, and the publication of newspapers has been resumed.

THE visit of the Prince of Wales to Japan was made the occasion of special and enterprising developments on the part of the Japanese Press in Tokyo and other cities. The *Osaka Mainichi* celebrated the landing of the Prince by publishing the first number of a permanent English daily edition which, despite the language in which it is printed, is announced as "a real Japanese paper, owned, controlled, and edited by Japanese representing the real sentiment of the Japanese people."

Wages in the Printing Trade.

Manifesto by Federation of Master Printers.

The following is the text of a leaflet which is being issued from 24, Holborn under the heading "To All Workers in the Printing Trade":—

For some time there has been, and there still is, very great unemployment in the industry, and the employers consider the main reason for this is that buyers cannot afford to pay the present high prices for printing. No real improvement in trade can be expected until there is a substantial decrease in the cost of production. Every means of lessening the cost has been examined, and economies have been effected, but employers are convinced that lower wages are essential in order to be able to quote prices that will induce business.

The serious unemployment is shown by the number of persons drawing unemployment pay on April 24th, 1922 (the latest figures available):—

	Wholly Unemployed.		Partially Unemployed.	
	Males.	Females.	Males.	Females.
Printing, Publishing, and Bookbinding...	10,788	5,343	1,101	1,171
Manufctd. Stationery	1,927	3,792	496	2,775

There is, in addition, a very large number of persons working short time or who are not eligible for unemployment pay, and the real state of unemployment is much worse than the above figures show.

WORK LOST TO THE PRINTING TRADE.—Orders for direct advertising by catalogues, booklets and the like are stopped, much work is being produced by duplicating machines and typewriters, and many orders are being sent abroad. When customers become accustomed to do without printing, or to using different processes, or to sending their work abroad, it is extremely difficult to regain the trade. It is essential that the trade should do something to improve the present position, and wages are the principal part of the cost of printing.

INCREASE IN THE COST OF LIVING IS LESS THAN HALF THE FIGURE OF EIGHTEEN MONTHS AGO.—The cost of living in November, 1920, was 176 per cent. above the cost of living in July, 1914. In May, 1922, the increase had dropped to 81 per cent. above the cost of living in 1914, i.e., the increase in the cost of living was less than half what it was eighteen months ago.

THE AVERAGE REDUCTION IN ALL TRADES IS 22S. 6D. PER WEEK.—The employees in other trades have recognised the necessity of reducing wages to a far greater extent than in the printing trade. The *Labour Gazette* shows that between January 1st, 1921, and April 30th, 1922, the wages of about 7,000,000 workpeople (including women) were reduced by £1,900,000, which equals an average reduction of 22s. 6d. per person per week. The printing trade figures are included in the above, but the reduction in wages in the printing trade, taking the maximum figures, has been only 7s. 6d. per week per man and 3s. per week per woman. If the workpeople in the printing trade had accepted the employers' offer of 15s. reduction, spread over nine months, with the proviso that there should be no further reduction in 1923, the total reduction would only equal the reduction already in force among the 7,000,000 workpeople throughout the country; whereas the remainder of the workpeople in the country may have considerable further reductions in the next eighteen months.

REDUCTION OF WAGES BY AGREEMENT IN OTHER TRADES.—In other trades the reductions have, in most cases, been settled by common consent, as the employees realised it was impossible to maintain wages at the high level in the last few months. Settlements were made in 302 cases in April, 1922, affecting 3,500,000 workpeople, and in only 16 cases, involving 5,000 workpeople, did any dispute arise which caused stoppage of work.

PRINTERS' WAGES ARE MUCH HIGHER NOW THAN IN 1919, WHEN THE COST OF LIVING WAS 110 PER CENT. ABOVE PRE-WAR.—The following table shows the wages of a member of the Typographical Association in Grades 1 and 6 in May, 1919, and now:—

	Weekly Wages.	
	Grade 1.	Grade 6.
May, 1919 (date of National Agreement)...	£3 15 0	£3 0 0
May, 1922...	4 10 0	3 15 0

75s. and 60s. were considered reasonable wages when the National Agreement was made and when the cost of living index figure

was 110. Now that the cost of living has dropped to 81, a big reduction in 90s. or 75s. can be made, and the workman will still be better off than he was in 1919. The same argument applies with equal force in all grades and branches of the trade.

THE EMPLOYERS' ORIGINAL OFFER INCLUDED NO REDUCTION IN WAGES FOR TWELVE MONTHS AFTER JANUARY 7TH NEXT YEAR.—The employers were willing to agree that there should be no further reduction in wages between January 7th and December 31st, 1923. This was a very valuable concession. No matter how much the cost of living might drop, or what reductions in wages might take place in other trades, the employers were willing to guarantee that if the 15s. reduction, spread over nine months, were accepted, the wages should remain the same for the following twelve months.

MANY TRADE UNION LEADERS AND WORKERS APPROVED THE PROPOSED REDUCTION OF 15S.—The leaders of seven unions, whose members are a very large proportion of the workers in the industry, recommended their members to accept the reduction. They would not have agreed to any such proposal unless they thought it was in the best interests of their members. In Scotland the 15s. reduction has been accepted by a ballot of the compositors, machine minders, binders, rulers, paper workers, etc. It will be greatly to the advantage of the employers and employed if the reduction be made a National one. If sectional settlements be made there will disturbance of trade, which is harmful to both sides.

LOWER COSTS ENCOURAGE PRINTING, AND MORE PRINTING MEANS MORE EMPLOYMENT.—Master printers desire that the reduced costs due to the proposed reduction in wages should be passed on to the consumers of printing, as they believe that lower costs will stimulate the demand for printing and create more employment to keep the machines at work. Other trades have recognised the necessity for lowering wages and costs, and the printing trade must meet the situation in the same way.

State of Employment.

Employment in the paper, printing and bookbinding trades continued bad generally during April—reports the *Labour Gazette*. A good deal of short time was worked in all sections.

The percentage of workpeople unemployed in the printing, publishing and bookbinding trades, as indicated by the unemployment books lodged at Employment Exchanges, was 77 at April 24th, as compared with 76 at March 27th.

With letterpress printers employment was generally slack in London, and with some classes it was worse than in March. Overtime was worked, however, by compositors and readers in certain offices. In the provinces employment remained generally slack, but a slight improvement was reported from certain centres, including Hull, Nottingham, Derby and Glasgow. In the lithographic printing trade employment continued bad, and much short time was worked, although in the case of lithographic artists an improvement was reported in London and at Manchester. Of over 6,700 workpeople employed in the letterpress and lithographic printing trades covered by returns received by the Department, 30 per cent. were working short time and losing, on an average, 8 hours each per week.

Employment in the bookbinding trade continued bad, and a decline on the previous month was reported in London. Of over 3,600 workpeople concerning whom returns were received, 43 per cent. were working, on an average, 9½ hours per week short of full time.

Out of 76,735 members of printing trade unions reporting, 65 per cent. were unemployed at the end of April, as compared with 6 per cent. at the end of March, and 75 per cent. at the end of April last year—showing an increase of 0.5 on the previous month, but a decrease of 1.0 on a year before. Of 14,711 bookbinding union members the figures for April and March, 1922, and April, 1921, were respectively 10.4, 11.4 and 10.3 per cent. representing a decrease of 1.0 per cent. on the month and an increase of 0.1 on the year.

SIGNOR PEROTTI, chief editor of the Milan paper *Secolo* committed suicide early on Saturday. He was aged 42, and had a brilliant career.

PRINTERS AND Manchester Chamber of Commerce.

At the Manchester Chamber of Commerce last Thursday afternoon a number of members of the Chamber interested in the printing and allied trades attended the first meeting of a newly formed printing trades sub-section of the Chamber.

The President of the Chamber, Mr. W. Clare Lees, who took the chair, welcomed the members of the printing and allied trades on the first occasion on which they met, as an integral part of the organisation of the Chamber of Commerce.

Mr. William Johnson, president of the Manchester and Salford Association of Master Printers, Lithographers, and Bookbinders, thanked the President on behalf of the trade for his cordial welcome, and expressed the conviction that the trade would greatly benefit by this link, with the Manchester Chamber of Commerce.

Mr. H. A. Bethel, who is president of the Lancashire and Cheshire Alliance of Printers, endorsed this view.

The members elected Mr. William Johnson to be chairman of the sub-section at the Chamber and Mr. G. White was nominated as hon. secretary. The following were elected as an executive committee:—Mr. William Johnson (chairman), Mr. H. L. Birdsall, Mr. John Sever, Mr. J. C. B. Percy, Mr. F. Rickitt, Mr. H. Vick, Mr. L. T. Foulkes, Mr. H. Eva, Mr. G. Brearley, Mr. Standerwick, and Mr. H. A. Bethel.

A discussion took place in regard to the Rating of Machinery Bill now before the House of Commons, and a resolution was adopted unanimously, the meeting expressing the hope that the Chamber of Commerce would continue to do all possible to support the bill, which affected the interests of the printing trade to a degree probably greater than that of any other industry.

Lloyd's Periodicals.

New Company Formed.

The portion of the business of the United Newspapers (1918), Ltd., known as "Lloyd's Periodicals," comprising all the publications other than the *Daily Chronicle* and *Lloyd's News*, has been acquired by the United Press, Ltd., which will continue to conduct the business from St. Bride's House, E.C.

The new company has been registered with a capital of £125,000, and the chairman is Mr. M. Crombie Steedman, a well-known West African merchant. According to particulars filed at Somerset House, the United Press was registered on May 20th as a private company, with a nominal capital of £125,000 in £1 shares (85,000 ordinary and 40,000 preferred participating). The objects are: To adopt an agreement with M. C. Steedman and H. Corbett, of St. Bride's House, Salisbury-square, E.C., and to carry on the business of proprietors of newspapers, magazines and other periodicals.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

W. F. Alderman and G. W. Gait, printers, 40 and 42, Great Western-road, London, under style of the Express Printing Co.

THURSDAY, JUNE 1, 1922.

The Wages Dispute.

LITTLE immediate change seems likely in the wages situation, though if some common policy could be formulated by the various unions concerned advantage could then be taken of the employers' offer that they were prepared to re-open negotiations if requested so to do by all the unions in the National Printing and Kindred Trades Federation. We understand that a meeting of the unions will be held to-morrow (Friday) to consider the possibility of united action in the matter. The meetings of the Federation of Master Printers in Glasgow from Saturday next to Friday the 9th inst. create what we feel is a somewhat unfortunate situation, the absence of most of the Federation officials making it very difficult for further steps to be made in the wages movement until next week is over—and that will bring us practically up to the critical date of June 12th, when the notices are due to be posted. There seems a good deal of the *laissez-faire* spirit in the trade just now, and we only hope that events will justify the optimistic view that the present crisis will be peaceably surmounted like so many crises that have preceded it. The posting of notices, however, will not be likely to sweeten relationships, and we could have wished to see some definite promise of renewed negotiations before the 12th. Another factor that may not be without importance is the fact that Scottish employers have already posted notices of wage reduction for the litho printers, who declined to participate in any but a national settlement and so were not included in the agreement made by other Scottish unions to accept the employers' terms.

Cheaper Postage Begins!

WITH the introduction of the reduced postal rates on Monday, the Post Office experienced the anticipated boom in postings. The huge figure of 70 per cent. is given as the official estimate of the over-all increase in postal traffic occasioned by the fall in charges. Monday's postings in the South-West London district actually figured at 150 per cent. above

normal, whilst at Mount Pleasant the special postings—printed papers and circulars—numbered five times more than usual on a Monday. It is obvious that the boon of cheaper postage will mean a big increase of business to the trades connected with print and paper. Advertising contractors spent a very busy day on Monday. The Amalgamated Publicity Services sent out 250,000 circulars, and are sending out 250,000 each day this week, whereas their average during busy periods has been 50,000 since the cheap postal facilities were abolished. The first day of cheaper postage no doubt gave figures beyond the average, but we think the printing trade can safely congratulate itself that one of the obstacles to direct advertising schemes is now overcome.

Book Jackets and Libel Law.

A POINT of interest to printers as well as to authors and publishers is raised in the action brought by Mr. Sydney A. Moseley author of "The Much Chosen Race?" who, in the Chancery Division on Friday, applied for an interlocutory injunction, pending the trial of the action, to restrain Messrs. Stanley Paul and Co., the publishers, from issuing the book with a "jacket" which he had not sanctioned, and to which he objected. Counsel said the jacket consisted of a highly-coloured picture of a Jewish pedlar, with three hats on his head, and slung on his shoulders a tray containing toy pigs. The pedlar was winking. It did not represent any person referred to, or any of the opinions or ideas expressed in the book. Mr. Justice Sargant, in giving judgment, said it was impossible to describe in too strong terms the exceptional vulgarity and offensiveness of the cover, and that the author should have it associated with his name, in the prominent way it was proposed to associate it, without his consent, was a perfectly scandalous state of things. He would grant the injunction in the terms asked until the trial of the action. The trial of the action will now be awaited with interest. The case not only touches the question of the scope of those agreements between author and publisher which leave "details" to be settled by the publisher, but it seems to indicate the possibility of a book's jacket constituting a libel upon the author—which is a point of importance to the printers of book jackets.

The Downfall of Bottomley.

A BRILLIANT publicist and the creator of many sensations, Mr. Horatio Bottomley has provided in his downfall the greatest sensation with which his name has been associated. After the disclosures in the protracted and sensational trial, the sentence of seven years' penal servitude will probably not take many people by surprise. It is, however, a distressing finish to the career of a man obviously endowed with remarkable talents. His journalistic achievements alone are sufficient evidence of his ability, and when his great capacities in other directions are added thereto one is left appalled at the contrast between this ignoble climax and the high honours that might have been his had his powers been devoted to genuine public service instead of, as they evidently were, to fraud.

Paper Standardisation.

WHERE has standardisation gone to? The only real approach to the subject is the Paper-makers' Customs' contribution of the 500 sheet ream and the private efforts of enterprising wholesalers to introduce grammes per square metre classification and board substances in points. We hear of printers in certain districts forming co-operative buying societies. Perhaps this development will afford opportunities which are lacking elsewhere. At the moment we will say nothing further than this about collective buying, a policy which has more than one side for discussion.

Personal.

VISCOUNT BIRKENHEAD (the Lord Chancellor), speaking at the Parliamentary Press Gallery dinner on Friday night, said his associations with the Press Gallery were of the most friendly character.

LORD HEWART (the Lord Chief Justice), responding on the same occasion to the toast of his health proposed by Mr. Montague Smith, said the happiest days of his life were the days he spent in the Press Gallery. It was true, he remarked, that he would not have been Lord Chief Justice if it had not been for the Press Gallery.

VISCOUNT ULLSWATER, late Speaker of the House of Commons, was entertained at luncheon on Monday at the Café Royal, Regent-street, by the Foreign Press Association in London. M. J. de Marillac (*Journal de Paris*) presided.

SIR GEORGE ROWLAND BLADES, BART., M.P., chairman of Messrs. Blades, East and Blades, Ltd., was among those who attended the King's levée on Monday.

SIR ALEXANDER JEANS, the managing director of the *Liverpool Daily Post and Mercury*, the *Liverpool Echo*, and the *Liverpool Weekly Post*, completed last week the fiftieth year of his association with these papers.

In celebration of the event he entertained the members of the literary staff and the heads of all departments to dinner at the Liverpool Exchange Station Hotel on Saturday, and for the printing and commercial staffs he arranged a charabanc tour from Birkenhead to Llangollen, North Wales, where he entertained them to dinner and tea.

A FEATURE of the dinner was the presentation on behalf of the whole of the employees to Sir Alexander Jeans, as a token of their affectionate regard, of a handsome silver salver suitably inscribed, accompanied with a souvenir of the occasion for Miss Jeans, in the form of a gold bracelet, set with amethysts and pearls.

AMONG the congratulations received by Sir Alexander Jeans were messages from the National Society of Operative Printers and Assistants; the Press Association and the Liverpool Press Club.

MR. RANDOLPH HEARST, the American newspaper proprietor, arrived at Southampton on Monday evening and motored to London, where he is staying at the Savoy Hotel. He says he is here for family reasons.

MR. T. P. O'CONNOR, M.P., was entertained to luncheon by the Stationers' Company on Wednesday of last week and had some plain-spoken remarks to make about the imperfect qualifications of many present day members of Parliament.

MR. WILLIAM CAMPBELL HARVEY is taking up the editorship and proprietorship of the *Argyleshire Advertiser* in succession to the late Mr. Robert Mackenzie.

MR. A. WILLIAMSON, F.C.W.A., secretary of the Federation Cost and Charges Committee, lectured on Monday at the Birmingham Efficiency Exhibition on "Costing as an Aid to Efficiency in Industry."

MR. WILLIAM THAW, on the completion of 56 years' service in Messrs. Bemrose and Sons' binding department at Derby, has been made the recipient of a presentation.

ON the occasion of his departure to take up a post on the *Birmingham Evening Despatch*, Mr. Joe Thomas, sports sub-editor on the *South Wales Echo*, was on Saturday presented with a suitably inscribed suit case by his colleagues.

MR. JAMES HILL, formerly with Messrs. Corke, Sons and Co., has joined the Anglo-Norse Paper Agencies, Ltd., and is representing them in London.

Trade Union Matters.

TYPOGRAPHICAL UNIONS' WAGES TACTICS.—A striking protest reaches us from a trade union reader who desires to remain anonymous under the pseudonym of "Federationist." He writes: "As one who has interested himself in the affairs of the local federation of printing trade unions to which I am attached, I feel bound to direct the attention of your readers to the peculiar position that is being taken up by members of the typographical unions who are active in the affairs of local federations. Some weeks since, a circular was received by my local federation, and presumably by others throughout the country, calling upon us to hold mass meetings of the members of the printing and kindred trades unions with a view to resisting any reduction in wages. I am now surprised to find that, although the typographical members appear to be anxious to stir up a strong opposition to the acceptance of wage reductions, they are nevertheless refusing to co-operate with the other unions in the present wages movement. Surely it is only half a policy to talk of resisting and at the same time refuse to co-operate; it would be so much easier to resist in a united body than as separate entities. The present policy appears to be to induce kindred societies to resist, and then leave them in the lurch to effect what settlement they can, whilst the typographical section makes a satisfactory separate settlement for itself."

OVERTIME RESTRICTION.—Eight hours per week as the maximum amount of overtime has been decided upon by the Glasgow branch of the National Society of Operative Printers and Assistants. The decision was carried by a large majority.

NATIONAL NEWS AND OPERATORS' GUILD.—The annual delegate meeting of the National News and Operators' Guild was held at the Exchange Hotel, Manchester, on Saturday, when representatives attended from all areas of the Typographical Association. The questions brought forward included the admission to the guild of linotype operators in jobbing establishments; extra pay for news workers called upon to work on Saturday afternoons for evening papers; the claim for the old 12½ per cent. standard above ordinary rates for operators in place of the flat rates in operation under the National Wage Agreement; the claim for a half-day off per week for day newspaper workers and one night off per fortnight for night workers; and extra remuneration for night workers on the basis of 25 per cent. above day rates. The most important topic was that of wages in view of the existing negotiations for a reduction of 15s., and resolutions were passed as to the action to be taken by the guild in the event of the notice for reduction being posted in news offices.

A FINE PRINTING SUPPLEMENT.—Of quite outstanding merit is the special Printing Supplement which the *Manchester Guardian* issued on Tuesday of last week. Well-designed and perfectly printed, this 16-page pamphlet of about demy folio size is not only of interest to the general reader but will be read with avidity by printers also, for it contains much well-informed, useful and curious matter on subjects relating to the printing craft. The introductory article explains that this supplement "seeks to give First Aid to those about to use good printing. It endeavours to stimulate taste in typography as well as to inform on matters of printing procedure." Other articles are: "An Outline of Printing History," "Advertising and Print," "The History of Printing Types," "The Buyer and his Print," "A Short Dictionary of Printing Terms," "Decoration in Printing," and "The Modern Movement in Illustration." These will be found by the general reader to give him many useful sign-points towards making wiser use of the printer's services; we think the "First Aid" intended is very effectively given. The issue is "arranged, designed and produced at the Cloister Press, Heaton Mersey, Manchester." The text is monotype set, in a handsome old style face. The first page, printed in black with title in red, bears a large illustration showing a "Miehle machine in operation at the Cloister Press."

The latest issue of the *Print Collector's Quarterly* (J. M. Dent and Sons, Ltd.), contains articles on the work of the Carracci, Paul Renouard, the Barbizon School and Muirhead Bone.

London Continuation Schools.

London Day Continuation Schools are to go. A deputation has waited upon Mr. Fisher, Minister of Education, asking, in accordance with a resolution of the L.C.C., that the Council should be relieved of its statutory obligations in regard to day continuation schools.

Mr. Fisher, in reply, said that although the schools were of the greatest moral and social benefit the return, so far as intellectual advantages were concerned, was not commensurate with the expenditure, in view of the fact that the scheme had now been, unfortunately, limited to one age group—from 14 to 15 years of age. As compared with a two years' scheme, much more than half the value was lost. The schools were not in operation outside London, and the taxpayer was making a considerable payment for the sole advantage of London. Though he greatly regretted the educational sacrifice which might be involved, he was disposed to think that he had no alternative but to fall in with the suggestion of the deputation, and seek Parliamentary sanction to release London from its statutory obligations in connection with the schools.

Day Continuation Schools.

SIR,—With reference to my previous remarks and condemnation of the above, my brother printers would doubtless like to know that it was stated at the L.C.C. on Tuesday, May 23rd, that the Education Committee had not yet come to a decision regarding children who did not attend the Day Continuation Schools, but that meanwhile no parents were being summoned in respect of their children's non-attendance. So there the matter remains for the present.

The following dialogue suggests the futility of these schools:—

Employer.—Do you attend the Day Continuation School?

Boy.—Yes, sir.

E.—How many scholars are there in your school?

B.—Between forty and fifty, sir.

E.—Did you go to school yesterday?

B.—Yes, sir.

E.—How many scholars were present?

B.—Five, sir.

E.—How many teachers were there?

B.—Three, sir.

Oh for the "Geddes axe"!

Yours faithfully,

W. H. BURCHELL.

(Governing Director the Caxton Press, Ltd., Hon. Sec. Association of Master Printers of the London Central District.)

Amalgamated Press Reconstruction.

An extraordinary general meeting of the Amalgamated Press, Ltd., was held on Monday, to approve resolutions for voluntarily winding up the company with a view to the adoption of a scheme of reconstruction, the object of which is to bring the share capital of the company to an amount which will bear a closer relation to its assets and earning capacity. The capital of the new company will amount to £3,800,000 divided into shares of £1 each, of which 1,000,000 will be seven per cent. cumulative preference shares, in place of the old five per cent. preference shares, and 2,800,000 ordinary shares. The chairman, Sir George Sutton, stated that the scheme had received the support of 71 per cent. of the entire capital of the company. The board was largely influenced in drawing up the scheme by the strongly expressed opinion of shareholders, who urged that the members' holdings should be divided into shares of less value than at present. This was being done by the scheme. The reconstructed company would be well equipped with liquid assets and the management was to be retained intact, so that the continuity of the business would be undisturbed. The resolutions were carried unanimously without discussion.

The Bookbinder.

Notes and News.

Wages Settlement Wanted.

The chief concern at the moment is the prospect of trouble in the trade over the matter of wages. Despite the decision to ballot, which carried with it at least a prospect of acceptance, the men's unions have turned down the Federation proposals completely. The position is undoubtedly serious, and unless the extreme rank and file on both sides is kept well in check, we shall speedily be facing a condition of affairs similar to that which prevails in the engineering world. That there will have to be a wage reduction is agreed by both sides. Naturally the men wish to postpone it as long as they can, and they are doing so very well. But while these questions are in the air, a considerable volume of trade is held up and generally the industry is unsettled. No good purpose is served by willfully prolonging negotiations, although there may be temporary gain on one side. What the industry wants is a reasonable arrangement which will hit neither side badly, but above all it needs a quick settlement.

The Abnormal State of Trade.

Bookbinding orders of any magnitude have been scarce of late. There is nothing like the quantity of books being used that there would be if trade was running in its normal groove. The large users are refraining from ordering except under compulsion, and even then the orders are stringently cut down both in quantity and quality. In many cases full leather bindings are being replaced by half basil and full buckram. Paper is being treated very ruthlessly in some quarters. We have seen recent specifications where low grade account book paper has taken the place of hand-made, and where a 4½d. E.S. azure was substituted for a 1s. per lb. quality. In the zeal for economy some users are exercising little thought. Later they will realise that mistakes have been made and we shall get back to normal practice.

Bulky Loose-Leaf Books.

In the loose-leaf world thong ledgers and binders are having a spell of popularity as a favoured competitor to the rigid metal post principle. The thong has much to recommend it, chiefly the fact that it approaches the ordinary bound book in its main essentials. It certainly has flexibility, but to accommodate the thongs it usually has a clumsy bulk. Our own objection to loose-leaf ledgers and binders in general is that they are heavy, clumsy and awkward to manipulate. It is nothing unusual to see two or three clerks struggling to master the opening of a mere binder. On the whole, there seems to be an opportunity for a really simple loose-leaf book which will combine flexibility with ease of manipulation and which will not tax the strength of a girl clerk to handle. Some of the loose-leaf contrivances we see have more the character of a super-dread-nought than an account book.

Market for Materials.

The market for bookbinding materials keeps very steady. There has been an advance in the price of strawboards brought about by the scarcity on this side and the heavy sale of raw material over in Holland, where the central countries of Europe have entered into large contracts for straw to be used as animal fodder. Evidently it pays the Dutch makers better to dispose of their material in the raw rather than turn it into strawboard. Within recent days the price of unlined strawboard has advanced from £7 per ton to £9 per ton for light weights, with £1 5s. per ton extra for heavy weights and the usual extras for lining, etc.

Gold Leaf.

Gold leaf is quoted 52s. per 1,000 leaves for 3¼ in. by 3¼ in. in 10,000 lots, and 63s. 6d. per 1,000 for 4 in. by 3¼ in. English goldleaf is figured at 72s. per 1,000.

Board Prices.

Boxboards are quoted £16 per ton carriage forward; white wood pulp boards, £16 per ton forward; glazed leather boards, £17 10s. per ton; common grey millboards, £20 per ton; black millboards, £28 per ton; hand-made boards, £38 per ton.

Leathers.

Leathers remain firm in price—basils ranging from 7d. to 10d. per square foot; skivers, 4½d. to 7d.; rough moroccos, 9d. and 10d. per foot; rough calf, 1s. 2d. to 1s. 6d.; fair calf, 1s. 9d.; pigskins, 1s. 3d. to 1s. 9d.; anglos, 1s. 9d.; H.G. goats, 2s. to 2s. 3d.

Glues and a Patent Glue Pot.

Glue has receded a little, and there is keen competition among agents. Fine Scotch glue is quoted £44 per ton; pure skin glue, £49 per ton; powdered glue, £60 per ton; finest hide glue, £62 per ton. Channon's patent glue is claimed to be the best and most economical that can be used; to-day's price is 80s. per cwt. What we are chiefly interested in is the patent glue pot which this firm has produced, and which merely requires starting with boiling water in order to produce liquid glue in ten minutes. The present method of gas-burning is certainly wasteful, for the chief expense is incurred in heating up the pan. Modern water boilers have superseded iron kettles in the canteen, and it is about time that new ideas began to find their way into our binderies.

Cheaper Materials Demanded.

Sewing threads, tapes, calicoes, bookcloths, buckrams, and fabrics generally are unaltered in price. There is no immediate sign of reduction, but we should strongly advise restricted buying. The prices current are not in keeping with the standard of cost generally, and until the manufacturers realise that other industries are endeavouring to keep in line with accepted cost of living figures the only mode of procedure is to withhold orders.

Degenerate Bookbinding of the Present Day.

It would be an easy matter, no doubt, to collect from certain publishers and buyers of books some very severe criticisms of the average bookbindings turned out at the present day. Unquestionably there is a lot of deplorably low-quality stuff placed upon the market. The chief plea which can be put forward in defence of this class of bookbinding is the sound one that a cheap binding which will at any rate temporarily protect the printer's work is better than no binding at all. With costs at the high level of recent years—from which there has not yet occurred an adequate descent—it has not been possible to combine durability of workmanship with a price sufficiently low to ensure a market for the finished product. This was, of course, notoriously the case during the War, when shortage of materials was added to soaring costs. We believe, however, that there is to-day a well-established movement in the reverse direction, and that the trade is now endeavouring to make a return to the substantial workmanship that is a treasured tradition of British bookbinding.

American Bindings Censured.

To criticise all American bookbinding indiscriminately would be as unfair as to criticise all British bindery work without distinguishing between widely varying classes of outputs, but we believe neverthe-

less that, on the whole, the prevalence of badly bound editions on the market is much more noticeable in the United States than in this country. We have come across some very scathing condemnations of recent American bindery work, and have noted, even in the case of books produced in good materials and at substantial prices, that sewing has been faulty, the general ensemble rough-and-ready in appearance, and that there has been a lack of those qualities which chiefly appeal to hand and eye in a well-bound volume. Striking evidence to this same effect is contained in the recently-issued annual report of the Grand Rapids (U.S.A.) Public Library. The Librarian does not mince matters as to bindery degeneracy. He writes:—"The general bookbinding situation, especially for new books, is the worst I have known in my whole library experience. In a previous report I referred to the fact that some books have to be repaired or rebound after going into circulation only once or twice on account of the poor quality of the binding as they come from the publishers. This, however, is not the only trouble we are having in this connection, for in the assembling of the printed sections of the books for binding there are an extraordinary number of mistakes being made, duplicating certain sections, leaving out others, etc., so that the books come to us imperfect. The other day

the Library received 11 copies of a popular reference book which is used at most of the Branch Libraries. Seven of these had to be returned because of missing pages due to faulty work in the establishment where the books were bound. The situation is such that it is necessary for the Library to examine carefully or collate every reference work that comes to us. It is the rarest thing that we get a considerable number of volumes now that come to us perfect, because of the indifferent work done in the publishers' binderies."

Contrast with Older Craftsmanship.

What a contrast such hustled, slipshod bindery products make with the work of the craftsmen of other days! On the one hand we have a present-day volume which becomes delapidated after the first or second reading; on the other hand we have for example the "Textus Sancti Cuthberti" still extant in the British Museum, bound by the Durham monk, Bilfred, A.D. 720! One cannot but admire the leisured care and lavish expenditure put into bookbindings in ages past, though one recognises that for present-day publishers' work such bindings would be quite unsuitable for the purpose in view, so that a comparison is unreasonable. Yet the binding which breaks down in the course of the first or second perusal of the volume which it is meant to

DIVIDENDS AND REPORTS.

HAZELL, WATSON AND VINEY.—Net profit for year ended March 31st, 1922, after providing for all expenses and taxes, was £30,170, plus £17,761 brought in, making £47,931, less debenture interest (less tax) £382. Preference share dividend (less tax) £4,200. Directors propose dividend, free of tax, of 7½ per cent. on ordinary and employees' shares fully-paid on April 1st, 1921, and proportionate dividend at same rate on shares not fully-paid on that date, carrying forward £22,379. Further fall in prices of paper and other materials occurred, and all stocks were written down to market prices at March 31st last.

ODHAM'S PRESS.—The second annual report of Odham's Press shows a net profit for 1921 of £148,668, which, with £24,819 brought in, makes £173,487. Interim dividends absorbed £44,571, managers' and directors' percentages of profit £22,800, provision for corporation profits tax and income-tax, less excess profits duty adjustments, £3,542, underwriting commission on new issues £26,062, and reserve in respect of copyrights' expenditure £30,000, leaving £46,511. The directors recommend a final dividend of 3 per cent., making 8 per cent. for the year on the ordinary shares, less tax, carrying forward £21,118. During the year the directors have purchased the issued share capital (less 20 shares) of Dean and Son, Ltd., the proprietors of Debrett's Peerage and kindred publications. The balance-sheet shows an expenditure in consideration to Mr. Bottomley, under agreement dated December 19th, 1921, for the determination of his service agreement as editor of *John Bull* and editorial adviser to the company and in commutation of his remuneration as provided therein of £25,000.

A. B. FLEMING AND CO.—For year ended April 30th, 1922, net profit of this Edinburgh firm of printing ink and chemical manufacturers was £30,846, which includes £7,933 brought forward. Directors recommend placing to general reserve (making same £50,000) £3,000; dividend of 15 per cent., of which 5 per cent. (actual) was paid November last, £18,000; balance forward, £9,846. Dividend previous year the same. Company's holdings in Government stocks now total £30,000 (nominal) at cost of £25,850.

STAR PAPER MILL, FINISWOWLES, BLACKBURN.—Interim dividend of 6d. per share, less tax, equal to 5 per cent.

LIMITED liability companies increased their nominal capital in April by £2,765,402, paper being represented by £500,000, and printing and publishing by £17,000.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

S. W. PARTRIDGE AND CO., LTD. (booksellers, etc., London).—Satisfaction in full on May 8th, 1922, of mortgage dated July 23rd, 1920, securing £6,000.

HUTSON BROTHERS, LTD. (printers of pictorial post cards, publishers and stationers, etc., London).—Particulars of £6,000 debentures authorised April 28th, 1922; charged on the company's undertaking and property, present and future, including uncalled capital; amount of present issue, £3,980.

MOORE'S MODERN METHODS, LTD. (general merchants, agents, stationers, printers, etc., London).—Satisfaction in full on May 15th, 1922 (a) of debenture dated November 17th, 1911, securing £2,000, and (b) of debentures dated March 8th, 1912, securing £2,000.

MOORE'S MODERN METHODS, LTD. (stationers, etc.).—Particulars of £12,000 debentures authorised March 20th, and covered by trust deed dated May 15th, 1922; whole amount issued; charged on company's undertaking and property, including any uncalled capital and premises in St. Bride-street and Farringdon-street, E.C. Trustees: G. B. Brooks and W. H. Chantrey.

LINDENMEYR AND JOHNSON PAPER CO., LTD.—Satisfaction to the extent of £8,000 on various dates from June 27th, 1921, to April 12th, 1922, of debentures dated September 30th, 1920, securing £20,000.

B. WINSTONE AND SONS, LTD. (printing ink manufacturers, London).—Satisfaction in full on May 9th, 1922, of mortgage dated January 19th, 1917, securing £4,500.

MORGAN REEVE CO., LTD. (advertisers, printers, etc., London).—Particulars of £5,000 debentures authorised February 8th, 1922; charged on the company's undertaking and property, present and future, including uncalled capital; whole amount issued.

CARIBONUM CO., LTD.—Satisfaction in full on April 7th, 1922 (a) of mortgage or charge dated January 21st, 1920, affecting freehold land at Alperton and Sudbury, securing all moneys due or to become due from the company to bankers; and (b) of mortgage or charge dated August 22nd, 1918, securing all moneys due or to become due from the company to bankers.

Stationers' Social Society.

Horsburgh Cup Competition.

In every way successful was the golf competition for the Horsburgh Cup which was played off on May 18th, at Purley under the auspices of the Stationers' Social Society. Considerable interest is evinced in this annual event, not only because it affords an agreeable day on the golf course, but also for the reason that it enables members to associate together under pleasant social conditions, thus carrying out the excellent object of the Society. As usual, the arrangements were carefully planned and everything passed off very smoothly. Charabancs conveyed the visitors from Charing Cross, and the run-down to Purley and back again was not the least enjoyable part of the programme, while the luncheons in the club house were also delightful.

Thirty-eight players took out cards and play was of an interesting order. The arrangements were for a 36-hole stroke competition for the Horsburgh Cup. In addition there were sweeps for morning and afternoon, two-thirds going to the player with the best score and one-third to the runner up on each occasion.

The cup was won by Mr. T. C. Bailie, with a total score for the day of 189, less 28 = 161. The first sweep in the morning went to the same player with 93, less 14 = 79. Mr. W. Sommerville secured the second place, his score being 95, less 14 = 81.

Equally interesting was the play in the

afternoon, when the first sweep went to Mr. W. Sommerville for exactly the same score as he registered in the morning—95, less 14 = 81. There was a tie for the second prize between Mr. W. J. Whyte and Mr. T. C. Bailie. Mr. Whyte's score was 93, less 11 = 82 and Mr. Bailie's 96, less 14 = 82. The sweep was accordingly divided.

Mr. Lionel Savory, the president of the Society, played round the course with the ex-president, Mr. P. W. Kennett, and at the conclusion of the competition he handed the cup to Mr. Bailie, though the formal presentation will be made on the occasion of the Society's autumn dinner. In handing over the cup, Mr. Savory congratulated the winner on his success, and spoke of the happy effect such gatherings had in promoting good feeling among the members of the Society and of the paper trade.

A replica of the cup will, we understand, be presented by Mr John A. Kidd to the winner, the Horsburgh Cup itself being an annual trophy.

There were two regrettable absentees on Thursday, Mr. W. Horsburgh was unfortunately unwell, while Mr. J. W. S. Johnston was prevented being present by the illness of his brother, which unhappily terminated fatally.

The Bowls Competition.

Arrangements have been made to hold the Bowls Competition for the Woollacott Cup on Wednesday, June 14th, at New Malden. Mr. Lionel Savory, the president of the Stationers' Social Society, has offered to present a replica of the cup to the winner.

Play commences at 10.30 a.m. and frequent trains leave Waterloo for New Malden.

Paper Trade Golfing Society.

Arrangements are proceeding rapidly in connection with the formation of the Paper Trade Golfing Society. The intention is that golf meetings shall be held each year, for which cups and other prizes will be offered. Team matches will also be arranged, and it will be the endeavour of the committee to see that as many members as possible take part in these games.

By these methods it is hoped to draw closer together the various sections of the British paper trade, and the committee hopes that houses will persuade as many of their members as possible to join.

The proposal is to have as soon as possible a general meeting, followed by a dinner, and on the following day the first golf meeting for all members of the society.

A further meeting of the Formation Committee was held on May 15th, it being then reported that already between 60 and 70 applications for membership had been received, and it is hoped at a very early date to announce full details with regard to the society.

In the meantime, all who desire to apply for membership of the society are requested to communicate at once with the hon. secretary of the Paper Trade Golfing Society, Mr. R. G. Harvey Greenham, 11, King's Bench-walk, Temple, E.C.4, from whom full particulars can be obtained.

"PERSEVERANZA," the oldest Italian journal, has ceased publication.

New Inventions.

Ruling Machines.

Under an invention by Messrs. F. Hinterdorfer and J. Rona, in ruling machines the parts of the sheet to be left unruled are covered up by means of one or more strips of adjustable width which are revolved in a circle. As shown, the invention is applied to a machine in which sheets fed in at 3, Fig. 2, are carried by a travelling band 1 and cords 2 between a ruling roll 6; or pens, and a roller 7 and are finally delivered at 5. The shaft 13 of the roll 6 is mounted in slots 12 in supports 11 loosely mounted on a hollow shaft 19, Fig. 1, and is carried by rock arms 14 spring pressed

for feeding single sheets to a printing or folding machine, comprises one or more pile tables A each associated with a feeding arm F and a gripper B for transferring the top sheet of the pile to a conveyer D. In the apparatus shown, the sets of feeding arms and grippers are operated by a common rock shaft M, the grippers being carried by rods N, and the feeding arms being mounted in rocking guides F² and connected by chains F¹ to arms L on the rock shaft. The grippers are provided with one or more spring pressed pivoted jaws B¹ having cams P for engaging rollers or abutments R, J. The tables A are inclined

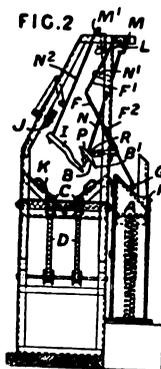

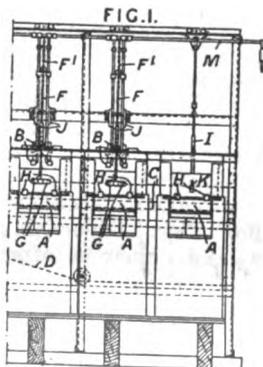

against a screw stop 17. The roll 6 is inked by a roller 8 supplied from a well 10 by a suction cloth 9. The parts of the sheet to be left unruled are covered by strips 29 having straight or curved edges or fitted with stencils. These strips are fixed to dove-tail blocks 28 carried in grooves 27 in disks 26 one of which is keyed to the shaft 19, the other being loosely mounted thereon and adjustable to tension the strips by a nut 30. As shown in Fig. 5, each strip may be in two parts 29, 29^a separately adjustable whereby the effective width may be varied. The shaft 19 has a flange 21 adjustably secured by bolts 23 to the flange 20 of a main driving shaft 18, a pointer on the latter flange and a scale on the former indicating the adjustment. In order to prevent the supports 11 from rotating and yet allow the strips 29 to pass, a member 35 is provided vertically slidable in guides 36 and raised against the action of a spring by a cam 38 engaging a roller 39. Hooked ends 34 are also provided on the member 35 engaging in turn slots 33 in the top and bottom respectively of one of the disks 11. Set off rollers 53, 54, Fig. 2, are provided for absorbing the ink collecting on the strips 29. A comb 45, Fig. 2, is raised periodically to allow a sheet to pass by a projection 51 on one of the disks 26 engaging the end 50 of a bell crank 49 connected to a slotted member 46 carrying the comb, a spring returning the latter and a stop 52 limiting the swing of the lever 49. Pens clamped between jaws, one of which is fixed to the lever 14, may be used in place of the roll 6. The roller 7 is driven from a wheel 40 on the main shaft 18 through gears carried by a swing arm, the wheel 44 on the shaft of the roller 7 being changed to vary the speed of the web 1 in accordance with the size of the sheet.

Gathering and Feeding Sheets.

An invention patented by Mr. H. J. Gilmore, refers to apparatus for gathering folded sheets and feeding them to a stitching machine, or

and springs supported, and the feeding arms have rubbers G engaging the top sheet. When the grippers move forwards, the jaws are opened by the abutments R, and the rubbers push the top sheet of each pile into the jaws. During the rearwards movement of the grippers, the jaws close and pass the folded sheets over shoes I which open the sheets; the abutments J thereupon open the jaws, and the sheets drop on to the conveyor. The shoes are car-

ried by rods N¹, which are pivoted at M¹ and are in the path of projections N¹ on the rods N. The rubbers G descend during the rearwards movement of the grippers, and move the underlying sheet into contact with registering stops H. The conveyor works in a trough C formed beyond the stitching machine with a narrowed part for closing the stitched sheets. The trough is provided with registering stops K, and the conveyor is preferably provided with registering spikes. The trough may be replaced by a saddle.

A BILL has been passed by the Reichstag according the same copyright protection to American authors as is given to Germans by the United States.

Master Printers Meet at Glasgow.

Record Gatherings Distinguish the Twenty-Second Annual Conference of the Employers' Federation.

The numerical growth in the membership of the Federation of Master Printers and the increasing importance of this organisation have been duly indicated by this week's impressive series of functions in Glasgow, where printers from all parts of the country have met to confer upon matters affecting the printing industry.

Big Feat of Organisation.

The long programme of events commenced with a reception on Saturday evening by the Executive Board of the Scottish Alliance, and extends right to Friday of this week. Monday was occupied by an important all-day cost congress, concluding with a civic reception and ball in the City Chambers by invitation of the Right Hon. the Lord Provost (Thomas Paxton LL.D.), the magistrates and councillors of the city of Glasgow. On Tuesday came the Federation annual meeting, held in the large hall of the Grand Hotel, with the Federation annual dinner in the evening in St. Andrew's Hall. Wednesday to Friday are allocated to sight-seeing, motor and steamer excursions among some of the finest Scottish scenery, and other forms of recreation, events being arranged with both Edinburgh and Glasgow as centres. Special arrangements were made to ensure that the week should be thoroughly enjoyable for the many ladies present. The outings for ladies included some delightful motor excursions to Loch Lomond and district.

The whole of the proceedings gave evidence of the very thorough way in which the organisers made all possible arrangements for the success of every item planned. The conference was, in fact, a big organising feat, the successful carrying out of which reflects great credit upon those responsible. Special mention must be made of the admirable specimens of printing distributed by the committee. The official programme (printed by Messrs. Aird and Coghill, Ltd.), was excellent both in design and execution, whilst the booklet descriptive of Glasgow and the trip down the Clyde (printed by Messrs. Robert MacLehose and Co., Ltd.), was also a fine piece of craftsmanship, making a very acceptable souvenir of the occasion.

A Strenuous Year.

The conference was held this year after twelve months of special stress, as was indicated in the annual report of the Federation Council presented to the annual meeting on Tuesday. The report, in part, was as follows:—

"No year in the history of the Federation has been so full of problems and difficulties as the year 1921-22. The last annual meet-

ing at Scarborough was held at a time when the industrial sky was clouded, and so far as the printing world is concerned the outlook at this moment is by no means promising.

"The Labour Committee, and particularly the members of the National Wage Basis Committee, have had a very strenuous time, and there has been scarcely a week without a meeting. For the first time in the history of the printing industry—at any rate since the industry was organised—negotiations were carried through which resulted in a reduction of wages of all workers in the industry."

The report next proceeds to summarise the wages negotiations which led to the reduction of wages towards the end of last year, and the present negotiations up to the rejection of the employers' proposals by ballot of the trade unions. It then continues as follows:—

"The resignation of Lord Northcliffe from the London Newspaper Proprietors' Association at a critical stage in their wages negotiations, and his subsequent action, added to the difficulties of the Federation Labour Committee.

"The Federation is now faced with a serious situation.

"Many other questions—re-grading of towns, classification of machines, employment of women as readers, demarcation of labour, holiday queries—have also been before the Labour Committee.

Costing Committee.

"In reviewing the work of the Costing Committee, the first point to note is the generous help that has been given in many directions by members of the Federation who realise the importance of scientific costing methods. Whilst it is not possible to bring the names of everyone into this report, the work of Messrs. Chappell and Pole in touring the South-Western Alliance deserves special mention.

"The Costing Committee has held several important meetings and the attendance has been satisfactory, particularly when it is remembered that some members have to travel long distances for this meeting only. The chairman (Mr. W. Howard Hazell) has devoted a great deal of time to Costing matters, apart from presiding over the meetings of the Committee. The Federation President and Vice-Presidents have also given valuable support.

"Meetings for Costing purposes have been held in most of the Alliances, but there has been a slight falling off in the demand for the professional services of the staff. This, however, has given an opportunity for testing the usefulness of a systematic canvass in several towns. Nearly 350 separate visits have been

paid to Associations in all parts of the country, 860 calls have been made, over 100 installations and revisions have received attention, and 72 meetings have been attended by members of the staff. It can be stated with confidence that the proportion of firms now working the system fully is greater than at any other period.

"In addition to the all-the-year-round classes held at the St. Bride School, London (which continue to be successful), Leeds, Manchester, Glasgow, and Edinburgh have maintained interest in costing by classes during the winter session. Lectures have been given at several of the schools of arts and crafts, and to trades union organisations and accountants' societies. The classes for training costing clerks in the working of the Federation system have again been conducted by the staff in several towns.

"The Joint Industrial Council has adopted the Federation Cost System as the system to be used under its constitution.

"The revision of printing schedules for public bodies is now part of the work of the Costing Department, and this development should have an important bearing on public contracts. Estimating for members has been valuable in substantiating prices, and many appreciative letters have been received. A nominal fee only is charged for this specialised work. Fees for services rendered amounted to £1,525, and sales of publications, costing forms, etc., reached a total of £965. The expenses totalled £2,860, and it was necessary to draw on the Federation funds for £370.

Railway Rates.

"Valuable work was done by the special committee set up to study the railway companies' proposals, for revising the classification of rates and the general conditions of traffic. Objections were framed, and finally discussed with representatives of the railway companies, and in the main the Federation objections were upheld, and the proposals to place 'printed matter' in a higher class than it is at present were defeated. Efforts are being put forth at the moment to prevent certain alterations to the standard conditions being adopted which are decidedly inimical to our industry. The printing industry is greatly indebted to the chairman of this committee, Mr. E. G. Arnold, and also to the Federation President, whose skilful advocacy of the Federation case before the railway representatives was most impressive. The committee is pleased to report that, acting with the Federation of British Industries to secure a general reduction of rates, it has recently secured a reduction of 50 per cent. in the charges for carting and delivery.

MODEL 14 LINOTYPE

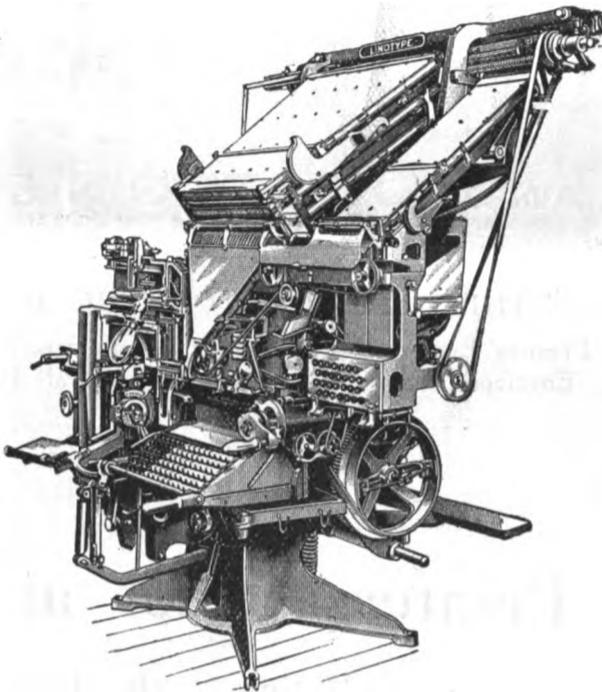

FOR SPEED AND FLEXIBILITY

Two - Pitch Distributor Screw

returns the matrices to the magazines twice as fast as on the earlier models

Three Regular Magazines

can be changed from one to another in a few seconds

Auxiliary Magazine

Postal Rates.

"The increases in postal rates were stoutly resisted on every occasion, and particularly the last increase, which came at a most inopportune time, when the printing industry was already in a depressed condition. By repeated deputations to the Postmaster-General, persistent and wise publicity, and by soliciting the aid of other influential organisations, not forgetting the invaluable assistance rendered through the Joint Industrial Council by the trade union leaders, pressure was brought to bear that has eventually secured a reduction of the printed matter and post card rate, which cannot fail to benefit all sections of the industry. Further concessions will continue to be pressed for as suitable opportunities occur.

Municipal and Government Printing.

"The necessity for reducing the expenditure of the local and national authorities has been pressed in the most insistent manner, and printers, in common with all other tax payers and ratepayers, have associated themselves with this demand. The Federation has pointed out repeatedly that real economy might be effected by closing the State Printing Works and throwing open all printing work for the Government to public tender. Efforts to prevent the extension of the existing printing plant and stores at Newcastle and the establishment of one at Cardiff and elsewhere have been remarkably successful, thanks to the alert action of the members of the local associations, promptly supported from headquarters."

Legislation Affecting Printing Industry.

"During the year several Bills were introduced which are of special interest to the printing industry.

"A Bill to Amend the Merchandise Marks Act was issued a few weeks ago, and is being carefully scrutinised to see that its provisions will effectively enable the buyers of printing to know whether printing is produced in this country or not. The Rating of Machinery Bill (supported by the Machinery Users' Association, to which our Federation is affiliated), has passed its second reading, and if it goes through its other stages it will be a very useful measure. A Bill to amend the Advertisements Regulation Act has been introduced into the House of Lords and recently passed through the Committee stage, although it was strongly opposed by Lord Southwark (the son of the late Sir Joseph Causton), who pointed out that ample powers were already in the hands of local authorities to protect "beauty spots and historic monuments," but that the real purpose of the promoters of this Bill was to abolish the use of posters everywhere. The progress of this measure in the House of Commons will be carefully watched. The amendment of the Workmen's Compensation Act, the National Health and Unemployment Insurance Act, and other measures have also been before the Council for consideration. Any attempt to secure the imposition of a duty on foreign imports of paper will be strenuously opposed.

Other Federation Activities.

"The Joint Industrial Council has provided opportunities for discussing important questions of common interest. The Health Committee issued a series of useful leaflets and posters and is about to publish a memorandum on lead poisoning and to investigate any dangers to health caused by the use of bronze powder. The report of the Apprenticeship Committee has been subjected to careful criticism, and proposals relating to the problem of unemployment have also been considered. The Conciliation Committee has been useful in several instances in suggesting the means for settling several local disputes, and the Council itself has been of service in providing a judicial atmosphere in which disputes of a national character have been studied and enabled steps to be taken to deal with them.

"The visits of our vice-president, Mr R. A. Austen-Leigh, to the conferences of the Master Printers of France last July at Lille and that of the Master Printers of Belgium at Antwerp in October were very much appreciated by our continental friends.

"The visits paid by our president to every alliance and many associations have been greatly appreciated, and have contributed not a little to the growth of good comradeship and to confidence in the Federation, which is a marked feature of the year. With untiring energy and unexampled tact and patience the president has presided over innumerable meetings and conferences. He has devoted

himself to his duties in this difficult year in such a whole-hearted way as to have called forth a spirit of loyalty and readiness to serve the industry from every member of the Council.

"The two vice-presidents have rendered yeoman service at headquarters and in visiting many alliances and associations.

"Meetings in London and of the alliances have been far more numerous than usual, and many have been unavoidably called at short notice, but the attendance at the Council and all Committee meetings reflects great credit on the members, and indicates the keen interest taken in the work, and that the Council fully realises its responsibility.

"The finances of the Federation are in a sounder condition than they have been for many years. The growth of the work done at 24 Holborn made it necessary to appoint an assistant secretary and to take additional office accommodation. The Federation is greatly indebted to its treasurer, Mr. E. Unwin, and assistant treasurer, Lt.-Col. H. Rivers Fletcher, for the time given to their responsible duties."

(Other news of the Glasgow proceedings appears on another page.)

The Paper Trade Golfing Society.

We are now able to give further particulars with regard to the above Society, in which already nearly one hundred members have become enrolled.

Officers.

The following gentlemen have accepted the position of office bearers for the first year:—President: Mr. Frank Lloyd; vice-presidents: The Rt. Hon. Sir Albert Spicer, Bart., Sir T. Vansittart Bowater, Bart., Sir Frederick Becker, Mr. W. Leonard Tod, J.P., Mr. Stanley Cousins, Mr. H. Godfrey and Mr. Lionel Savory; captain, Mr. A. Dykes Spicer; hon. treasurer, Mr. E. H. Raynham; hon. auditor, Mr. W. Oliver; and hon. secretary, Mr. R. G. Harvey Greenham.

The subscriptions for the first year have been fixed as follows:—Playing members residing or carrying on business in the home counties, £1 1s.; country playing members residing or carrying on business outside the home counties (entitling them to the full privileges of the Society), 5s.; non-playing members in any district, 5s.

It has been agreed that the following shall be treated as separate districts: the home counties, the north of England, the west of England, and Scotland, and with this end in view it has been decided to approach the Lancashire Paper Trade Golfing Society, with a view to their members joining the Paper Trade Golfing Society at the subscription payable by country members, viz., 5s. each, in return for which all such members will, of course, receive notice of, and can take part in, all the matches, annual meetings, etc., wherever held, and will be entitled to full membership of this society.

Any golfing society already in existence can, of course, preserve its separate entity, but it is hoped that all will combine in the general representation of the trade as members of the Paper Trade Golfing Society.

General Meeting and Dinner.

The first general meeting of the society will be held at the Connaught Rooms, Great Queen-street, W.C.2, at 6.30 p.m., on Tuesday, June 27th, to be followed by the inaugural dinner, to which the following gentlemen have been invited to be the guests of the society: Lord Riddell, Sir Frank Newnes, Bart., Sir Herbert Morgan, K.B.E., Mr. Bernard Darwin, etc. The committee trust that members will make a point of being present at the general meeting and the dinner, and it is hoped that they will extend invitations to their friends to be their guests at the dinner.

First Golfing Meeting.

On the following day (June 28th) the first golf meeting of the society will be held at Addington. In the morning, a medal round will be played for a cup, kindly presented by the president (to be competed for annually), and in the afternoon a foursomes competition will take place.

All members of firms desirous of joining the society, and those wishing to attend the inaugural dinner and first golf meeting should communicate before Tuesday, June 13th, with the hon. secretary, Mr. R. G. Harvey Greenham, 11, King's Bench-walk, Temple, E.C.4.

Florence Book Fair.

British Trade Represented.

On May 7th the Duke of Genoa, in the presence of the English, French, Spanish, American, and other ambassadors, opened in Florence the first International Book Fair since that held at Leipzig in 1914. The world-wide contributions, the inclusive nature of the exhibits, and the unrivalled charm of the locality rendered it of especial interest, says a correspondent of the *Daily Telegraph*. The main exhibition, that of modern books, is held in the Royal stable of the Pitti Palace, which was made over to the nation by the King some years ago. The exhibition of old books, of decorators and illustrators of books, and the history of book-binding is being held in the Pitti Palace itself, where the exhibition of 17th and 18th century art, recently opened by the King is simultaneously being held, while minor exhibitions, but not the least interesting, such as that of photography as applied to books, and the popular education of children and adults by book and cinematograph, will be held in the beautiful Palazzo Monfinito—the name speaks for itself—in the Via del Proconsolo, in the centre of the town.

The great task of organising the exhibition has been carried out by the head of the Florentine publishing house of Bemporad, who, in spite of many difficulties inherent to such enterprises in present times, has gathered together the chief publishers and printing houses of all countries to assist him, and in some cases officials from abroad are attending personally; for instance, the director of the National Library of Rio de Janeiro.

The Royal stables have been converted into a truly regal hostelry for the books of all nations. Most of the rooms have been decorated by Italian artists, but the French have adorned their own section, and the Germans have provided mural hangings illustrating the art and craft of printing and bookmaking. England and Spain are housed in the same hall, of beautiful proportions and most tasteful adornment, while the United States have a small adjoining room with walls and ceiling richly frescoed in gold. The Italian section, naturally the largest of all, has four printing presses, which are to be seen in action. The Fair, intelligently studied, will provide in itself a liberal education.

All the exhibits will be on sale (except some of the antique and historical specimens), with the proviso that any book sold and despatched during the exhibitions must be replaced by a facsimile. Each country is sending of its best, and not the least interesting will be the collection of illustrated Japanese books, while the addition of many examples of rich and curious old bindings and autographs make the exhibition a complete story of the history of the book.

The furnishing of the British section has been directly encouraged by the Ambassador, who has (it is said after some effort and urging) interested English publishers in the enterprise. It would have been a calamity indeed were England not to have been well represented when all other nations are so readily, one may say eagerly, showing of their best. This is the kind of propaganda which should never be neglected, and the Germans, for example, are showing in the present instance how well they are aware of it. Our book production compares favourably with that of any other nation. Fortunately we shall not be unworthily represented in this latest pacific "battle of the books."

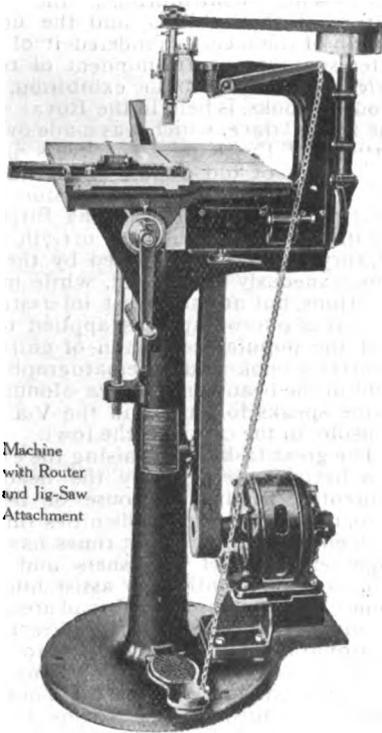

MESSRS. MARTIN AND CLARKE'S price list for June makes a speciality of thin papers, and there are added some new stock lines in cream laid and cream wove banks. New sizes are included in white copying papers, which have become a very popular line.

THE PRICE OF PRINT.—Printing always was the highest item in the cost of producing books, and the cost of printing is still 200 per cent. more than before the war. Nothing more remarkable than the steady rise in the cost of printing and the wages of the printer has been seen in our metropolis. He may have been underpaid in the past; but for various reasons he is now better off than most young clerks and the great body of ministers of religion. It is not surprising in circumstances like these that books should be priced higher than they ever have been, because the cost of production is so overwhelming.—*Daily Telegraph*.

The F.M.P. Glasgow Conference.

North Again!—A Personal Impression.

"It's a far cry to Lochow," runs the slogan of my clan, but it's a further cry from London to Glasgow, so it was just as well for the London and district pilgrims that they had experience last year of the long journey north to Scarborough to prepare them for this year's outing of the Federation of Master Printers. On the other hand, so excellent were the arrangements that the railway journey, to those who were able to travel on Friday morning, was quite a pleasant experience, and by no means tedious, even if there were no junction this time to give some city a chance to emulate the fine hospitality we received at York last year. It was noticeable how excited the younger members of the party grew as we neared the Border, and how disappointed they were to find that even the vegetation was the same colour on the Scots as on the English side; there were no mud huts to be seen, not even a savage in kilts! After that it was no surprise to find that Glasgow looked not unlike Manchester, only more so, and without the awful cobbles. The disappointment was completed by a vain search next day for a red-haired Scotsman wearing kilts!

A Cordial Welcome.

Saturday was devoted mainly to looking out for and welcoming the later arrivals, and it was here one felt that the best work of the Federation and the Alliances lies; for there is no finer result of the best organisation than the creation of friendships between neighbours who used to be, perhaps, bitter, and certainly suspicious competitors, and linking these up again with craftsmen in all other districts through the national body.

The reception by the Scottish Alliance at night was a fine climax, and there was great enthusiasm when it was announced that nearly 800 of the invitations to Glasgow had been accepted—easily a record. A kindly welcoming speech by the president of the Scottish Alliance—Mr. Robert Wilson—supplemented with his usual grace by Dr. MacLehose, set all at their ease, and the musical programme was all the more appreciated on account of the excellent vocal and instrumental contributions by master printers themselves.

Master Printers at Church.

Sunday saw a "trek" to the historic cathedral which is much more impressive inside than outside, especially as the adjacent streets do not enhance the beauty of those buildings which, without being habitations, are doomed to spend their days midst dwellings which can hardly be called homes. The Federation was strongly represented on the "agenda," the lessons being read by the distinguished president himself—his red robes giving a much-needed touch of colour to the rather sombre building, whilst his calm and dignified demeanour was such as one associates with his submission of wage proposals to the union leaders at conferences, when the risk of interruption is of course greater. The service generally was no more pure Scotch than the national beverage is nowadays, but no doubt the English Church flavouring made it all the more acceptable to the bulk of the visitors. As usual the "collection" was celebrated with due solemnity—reminiscent of the response by master printers generally to the annual appeal for subscriptions. Fortunately for Scotland's traditional respect for the Sabbath, the afternoon weather made it inadvisable to indulge in the various excursions suggested so naughtily in the programme for the day.

English freedom re-asserted itself in the fine concert at night which (officially, at any rate) ended the day's enjoyment. W. W.

ANY printer visitor to the United States in September will be welcome at the Annual Convention of the International Association of Printing House Craftsmen, at Boston, Massachusetts, August 28th to September 2nd, when an exhibition and educational exposition will be held.

We have received a most attractive folder from the United Typothetae of America School of Printing, whose 8th annual summer course begins June 14th and closes July 29th. The session consists of intensive instruction, and is organised particularly for the benefit of those who find it difficult to get away from their work at other and busier times.

Glasgow Welcomes the Printers.

Tribute by "Glasgow Herald."

Mention is made on another page of the civic reception and ball arranged in Glasgow in honour of the Federation of Master Printers. The *Glasgow Herald*, in a cordial reference to the visit of the Federation, draws special attention to the services which the Federation has rendered to the community in connection with the campaign for reduced postal rates. Under the caption "Printers and Postage," the following leaderette appeared in Monday's *Glasgow Herald* :—

"For its prominent and persistent and successful travail in inducing Mr. Kellaway to grant reductions on postal rates, the Federation of Master Printers of the United Kingdom should have a warm welcome to Glasgow, where its members have arrived for its annual meetings. The losses inflicted alike upon the Post Office and upon the British printing industry by rates that made it immensely profitable to send circulars to the Continent to be printed and posted gave the Federation a very strong case. But officialdom is difficult to move, and much energy was needed to compel the Postmaster-General to take the necessary action. The Master Printers were fortunate in having as their president at such a time Mr. James MacLehose, LL.D., of the Glasgow University Press, who with his colleagues conducted a vigorous propaganda in the country, and by interviews impressed upon the Postmaster and the Chancellor of the Exchequer the necessity for the reduction which has now been conceded. We all want to get back to the penny postage as soon as possible, but the time is not ripe just yet for a further agitation towards that ideal. When the trend of events shows that pressure can again be effectively applied, the Federation may be trusted to give the screw a compelling turn. In the meantime Dr. MacLehose and his colleagues may feel that they have honestly earned the recreation which forms such an imposing part of the programme for the meeting. And they will go forward to the consideration of the numerous problems vitally affecting the printing industry with the more confidence that they have been so successful in inducing Mr. Kellaway to mitigate one of its heaviest burdens."

Printing and Letter File Making.

Claim in City Court.

In the Mayor's and City of London Court, on May 26th, before Mr. Registrar Dell, a claim was made by C. W. Cave and Co., bank and office fitting specialists, 56, Gresham-street, E.C., against Mr. C. G. Woodham, printer and folding-box manufacturer, Cole-raine Works, Tottenham, for £4 4s. 11d. for goods supplied. The claim was admitted, but the defendant raised a counter-claim for £4 15s. for material supplied and printing work done. Of the amount of the counter-claim the plaintiffs admitted the sum of £1.

Joseph Racine, traveller for the defendant, said he took an order for the supply of 1,000 letter headings according to sample submitted. They had supplied 250 letter headings when they were told to hold the order up. They had also carried out some experimental work in making letter files for the plaintiffs. They had produced several patterns of letter files which were approved but they never got beyond the experimental stage.

Christopher Ellis, plaintiffs' manager, gave evidence in answer to the counter-claim, and said the printing of the letter headings by the defendant was badly done and it was not a good clear type as the sample submitted. He had never told the defendant's witness they approved the printing. With regard to the letter files, an order was placed with them but they could get nothing until the plaintiffs had to cancel the order.

In answer to the Registrar the defendant's witness said if an order was carried through they would stand the racket of the cost of making experiments.

The Registrar found that the defendant's claim for printing failed, and that there was no agreement made out for the plaintiffs to pay for the cost of producing the pattern letter files. Judgment was entered for the plaintiffs on the claim with costs and for the defendant on the counter-claim for the £1 admitted.

Federation Office-Bearers.

Election Postponed.

We understand that it was decided at the annual meeting of the Federation of Master Printers, on Tuesday, that the election of officers should be postponed until July, the present office-bearers to continue in office until then.

German Paper Duties.

In virtue of a Law of April 8th, and an Ordinance of the same date issued to give effect to the Law, the Customs duties on the following articles imported into Germany have been increased as from May 1st. The rates of duty quoted are expressed in "gold" marks, and when duties are paid in paper currency 60 paper marks must be paid for each "gold" mark.

Multi-coloured paper, including paper coated with chalk, white lead or similar materials or with metal impressions; lacquered paper; paper covered with mica scales or glass, pounce (*Streupulver*) or wool dust; paper provided with painted, applied or galvanoplastic metallic coating, and gilt or silver edged paper, raised from 10 to 20 gold marks per 100 kilos.

Wall-paper and borders for wall-paper of all kinds, from 24 to 48 per 100 kilos.

Photographic paper, from 10 to 20 per 100 kilos.

Letter paper, letter cards, and letter envelopes in paper, cardboard or wooden boxes (stationery cases): In boxes wholly or partly covered with leather or textile wares wholly or partly of silk, or trimmed with such materials, from 35 to 70 per 100 kilos. In other boxes, from 22 to 44 per 100 kilos.

Albums: Wholly or partly covered with leather or textile wares of all kinds or trimmed with such materials, or combined with celluloid or similar moulding materials, from 8 to 16 per 100 kilos. Other, from 4 to 8 per 100 kilos.

NOTE.—Albums, covers, portfolios and similar articles wherein books, duty-free papers, music, calendars, cards, music paper ("Musikalien") or pictures are slipped, shall be taxed separately.

Manufactures of paper, cardboard, carton-pierre, wood pulp, cellulose, vulcanised fibre, papier-maché, so far as they are not included in the foregoing, also hardened paper wares: Not combined with other materials, or simply combined with wood or iron: Of the papers specified (picture paper, border paper, open-stamped paper, etc.), or wholly or partly covered with such paper; articles provided with applied, painted or galvanoplastic metallic coating, or with metal impression and finely painted wares; articles pressed or otherwise formed of papier-maché, also hardened paper wares, lacquered or varnished; lamp shades, lanterns and other fine or fancy articles (except flowers), from 30 to 60 per 100 kilos.

Flowers (blossoms, petals and buds), from 100 to 200 per 100 kilos.

Other manufacture, from 15 to 30 per 100 kilos.

Combined (or wholly or partly covered) with yarns or textile wares of all kinds, with wax wares, finely moulded with semi-precious stones, mother-of-pearl, ivory, celluloid or similar moulding materials or gilt or silvered common metals; embroideries on paper or cardboard, from 70 to 140 per 100 kilos.

Combined with materials other than those already mentioned, so far as they do not become liable to higher rates of duty by reason of such combination, from 24 to 48 per 100 kilos.

THOMAS PROSSER, of Aberdare, a young man described as an advertising agent, appeared before the Merthyr magistrates last week on three charges of obtaining money by false pretences. Introducing himself as a representative of the Welsh Counties Advertising Association, defendant secured payments for advertisements in a Church year book, which he said he was bringing out. Detective sergeant Lewis stated that he had made every inquiry in Merthyr, and no such firm existed as the Welsh Counties Advertising Association. Defendant, who pleaded not guilty, was committed for trial at the Merthyr Quarter Sessions, the magistrates allowing bail.

How a Small Printer Benefits by the Use of the Federation Costing System.

By JOHN D. WISE (Wise and Co.),

President of the South-West London Master Printers' Association; Member of the Alliance (London) Council; Member of the Federation Council, etc.

For addressing my remarks to the small printers, when there are so many big printers present, I make no apology. I believe that the majority of the members of this Federation are what we should call "little men," and I would remind you that some of the greatest men in history have been little men.

As we look back over the centuries, and more especially the last hundred years, we see the wonderful development, by applied science in the *mode* of production, but not until recently have we seen any successful attempt to apply science to the *cost* of production.

Capital Invested.

When considering the adoption of the Cost Finding System, I saw, on Form No. 1, "Capital Invested £2,000," and, on reference to the pamphlet, I read: "You know the total capital in your business." That was just what I did not know, for the total capital includes plant, stock, work in hand, and, in some cases buildings, and liquid capital, that is, *cash*, represented by the amount owing to one less the amount one owes, and the bank balance. I was well acquainted with all but the most important—the value of my plant—and I saw that knowledge was vital to the system. I also saw that its *real utility* was its *real value*.

To ascertain my total capital I decided to have a professional valuation made, but, before doing so, I determined to put my "house in order." I turned out all such worn-out, obsolete and unused type as I felt it safe to, and replaced this old type with a beautiful series of new letter. All old leads, broken metal furniture, etc., we had re-cast at a cost of a few pence per pound. I also turned out an old cylinder which had not been used for some years, and other obsolete plant, and with such, and only a small cash payment, purchased a modern machine, which shows a higher average of working hours per week than any other machine in the office. Then, I had the valuation made, and was able to arrive at my total capital.

From my yearly summary I was able to ascertain my departmental expenses and overhead charges, but not until I had kept a record of productive time, and value of production, for a sufficiently long period, could I arrive at my own hourly costs.

Hourly Costs.

Every printer should ascertain his own hourly costs. Those published are only a guide. Unless you know your hourly costs you are working in the dark. They are the foundation on which you build, and if the foundation is not true, the whole fabric may collapse.

It is a mistake to think that low hourly costs will in themselves mean low cost of production. If we all worked on the same hourly rates, the cost of production would undoubtedly vary, and between some offices vary considerably. The cost of production is influenced not only by the hourly rates, but also by the value of the production obtained in the hour. The Costing System will show you the class of work you can handle most efficiently. Cultivate that work and specialise on it. The Costing System cannot increase costs, neither will it of itself reduce costs. A clock will indicate the time, but it cannot compel you to make good use of that time. The System will indicate where waste is taking place and where savings can be effected, but it cannot compel you to effect those savings.

An Enemy to Waste.

If we could put an end to all waste to-day, we could put an end to all poverty to-morrow. The Costing System's message is "Waste Not!" You cannot waste an hour or a pound without increasing cost. The System will show, before putting in new machinery, whether the maximum is being produced by the old.

The Costing System shows that by making a rough lay-out, and suggesting the series

Paper read before the Cost Congress at Glasgow on Monday.

and sizes of type to be used, 25 per cent. or more is saved in composition on some jobs, with the result that the work more nearly reaches one's standard.

Have a good standard and try to be efficient. Do not confuse efficiency with being up-to-date. To be up-to-date is often only to follow the most extravagant. The efficiency that is within our reach, is gained by using the best we have in the best possible way. The best way is the straightforward way—the simplest way.

The Paper Record shows the value of the paper stock used each week, and it also shows that often a ream of expensive paper has been bought when a few quires would have sufficed. To be over-stocked increases your costs and ties up capital.

You may say that the Costing System does not stop competition. That is not its purpose, but it will show you the lowest price at which it would be profitable to accept a job.

It may be said that by basing hourly rates and percentages on a previous record of expenses, is there any guarantee that the actual current cost of a job is recovered. The Weekly Analysis will show you. It is a barometer and it must be consulted. It must, however, always be borne in mind that the average turnover must be maintained, or your hourly rates and percentages will not cover costs. The risk of fluctuations and depression in trade we all suffer from, whether we work on the Costing System or not, but the System will help you to decrease your expenses when there is a decrease in trade, but, of course, not in the same ratio.

Before I adopted the Costing System I thought that I provided a percentage for depreciation, but it never materialised. So I insured my life for a sum payable in fifteen years, and five years later I obtained another policy, payable in ten years. They both matured at about the same time a few years ago. That was the first depreciation allowance I ever handled.

My next point is one that applies to all, whether they work on the Costing System or not, and that is: *Your liquid capital should equal at least one-third of your total capital*, that is to say, if your total capital, including plant and stock, is £3,000, your liquid capital should not be less than £1,000. It is because we small men have generally overlooked this fact that we are still small men. Many of us started with very little capital, and that little we put all into plant, and ever since every available pound has gone the same way. As long as we continue in this course we shall ever remain poor. Let us try to build up a good balance, either on our books or at the bank.

The personal attention and concentration which a small printer must give to his business is so great that he should not unnecessarily incur financial anxiety.

Danger of Over-Equipment.

Over-equipment is one of the greatest incentives to price-cutting. Do not let us increase it! Every man likes to see all the wheels go round; then, do not have too many wheels.

Do not think I am opposed to growth. I am not, but I prefer slow growth, because it is more sturdy, and a larger plant is no good to me unless it bears a corresponding increase of fruit. I believe in hard-pruning, cutting out the dead wood—the unprofitable work. By such treatment a small plant may be made to yield its maximum of profitable work. A small plant engaged on profitable work is of more value than a larger plant producing unprofitable work, and it is not always the big jobs that yield the greater profit.

I know the value of the Federation Costing System because I have proved it. While it reduced the volume of my work it has increased its value. It has given me greater pleasure in that work and greater profit from it, besides enabling me to pay the full standard rates of wages. Therefore, can you wonder that in gratitude and sincerity I advocate its adoption?

From the inception of this Federation the presidential chair has been occupied by men who adorn the craft, men whom we honour and trust, and, under their presidency, chaos has been reduced to order; but, among all the benefits which we have received from the Federation, there is none greater than the Costing System.

And it is a witness to the spirit of true brotherhood which animates the Federation, that I, a small printer, have been given the opportunity of addressing you this afternoon.

A Visit to the Printers' Paradise.

American Printer Meets Caxton and Others.

A very extraordinary and interesting experience—we learn from the "News-Letter" of the American Institute of Graphic Arts—recently befell the Institute's well-known president, Mr. Frederic W. Goudy, art director of the Lanston Monotype Machine Co., of Philadelphia. Mr. Goudy—so he informed his colleagues of the Institute—had the extreme good fortune some little time ago to meet with a spirit from the Printers' Paradise who conducted him back to the City of Crafts, where live the worthy printers of the past.

Mr. Goudy evidently reported his experience in vivid style, and by the aid of excellent slides projected by stereopticon enabled his hearers to identify names of famous printers with some of the best examples of their work.

Upon arrival in the City, Mr. Goudy was allowed to witness a meeting of the Printers' Court which meets to discuss and record in a great book the names of the next who are to be privileged to join that select company.

The chief occupation of these learned and honoured printers is to discuss their own achievements of the past and to comment upon the merits of the modern ways that have so changed the art since their day upon earth.

The Governor of the Court proved to be Arnold Pannartz, who with Conrad Sweynheim was a disciple of Fust, and first demonstrated the new art of printing to the monk Clement by printing before his eyes a page of Augustine's "De Civitate Dei." Clement was so astonished that he could not believe that the printed words would not disappear as quickly as they had come, and exclaimed, "My sons, you carry here the very wings of knowledge."

The Councillors of the Governor were also famous printers, numbering among them Waldvogel of Avignon, France, who claimed the invention of printing, but with only records in the archives preserved to sustain his claim, there being no direct evidence of his printed works. Other members were Laurens Coster of Haarlem, and two Germans, Fust and Schoeffer who affirmed their long maintained claim that it was they who had invented printing from movable types and not Gutenberg, toward whom they scowled darkly, even after the passage of nearly five hundred years!

Mr. Goudy is used to sitting among the elect, and therefore did not hesitate to ask questions of William Caxton who happened to sit next to him. Caxton obligingly pointed out Mentelen of Strasburg, Zainer of Ulm and Zel from Cologne; also Arnold Hoernen who was the first to number his printed pages.

When the Court was called to order many others answered to their names, including Joannes de Spira who brought his Cicero which he printed in 1469, also Nicolas Jenson and Aldus Manutius, the latter showing his Virgilius set in a type said to be copied from the writing of Petrarch.

Another who had printed from types resembling his own handwriting was Colard Mansion, after whose letters were copied those of Caxton. One easily distinguished was Christopher Plantin, who through many trials had carried on his work at Antwerp until killed while mistaken for another. His finest work, the "Royal Polyglot" was proudly shown.

In strange contrast of costume were William Morris and Theodore De Vinne who were also present, and whose works were not overshadowed by any of their predecessors.

The work of the court which followed was the proposal of new names for their illustrious ranks. Over many of these proposals, Mr. Goudy drew a veil, for his own name was in the list and he is not lacking in modesty.

Binding Cloth, etc., for Egypt.

His Majesty's Acting Consul at Cairo (Mr. M. Kelham) reports that tenders are invited for the supply of black binding, cloth and roller composition by the Egyptian Government Press, Bulaq, Cairo, for a period ending in March, 1923.

Tenders will be received by the Superintendent, Government Press, up to noon, June 24th, 1922, and will remain in force for 15 days from that date. Tenders must be submitted on the schedule attached to the conditions of contract and in double sealed envelopes with the object of the tender indicated thereon, the outer sealed cover being addressed to the Superintendent, Government Press, Bulaq, Cairo. Quotations are required to be made for each article according to the number, weights and measurements stated in the specification (i.e., per kilogramme, etc.), in Egyptian currency (i.e., in £E and millimes), including free delivery into the stores of the Government Press at Bulaq, plus Customs duty; the prices are also to include the cases of packing materials. A tender deposit or letter of guarantee is required, and samples must be submitted with the tenders.

Representation by an authorised agent resident in Egypt is essential. To United Kingdom firms not represented there, the Department of Overseas Trade will be pleased to suggest the names of firms with branches in Cairo who may be prepared to handle tenders on behalf of third parties.

A copy of the general conditions of tender, specification and form of tender, as well as samples of the two classes of black binding cloth, can be inspected by United Kingdom firms interested, on application to the Department of Overseas Trade (Room 45), 35, Old Queen-street, S.W.1. A second set of the documents is available for firms in the provinces unable to arrange for their inspection in London. (Ref. 8204/FE/TC).

Replies may be addressed to Box Numbers. Office of the "British and Colonial Printer and Stationer," 58, Shoe Lane, London, E.C.4 for which a fee of 8d. is charged to cover postage of replies.

Cheques and Post Office Orders to be crossed and made payable to STONHILL & GILLIS.

Telegrams: Stonhill, Fleet, London.

Telephone: 8407 City.

Situations Vacant.

A LONDON Manufacturing Stationers are requiring the services of a REPRESENTATIVE with an established connection, either in London or the Provinces, to sell Lithograph and Letterpress Work, Duplicate Books, Printed Paper Bags and General Stationery; good sound commission, no expenses; a good opportunity where a change is contemplated.—Write, in strict confidence, giving amount of turnover and district.—Box 13940.

COMMERCIAL ARTIST.—A large firm of Printers have a vacancy in their Studio for competent ARTIST-ASSISTANT; must be good at Lettering and Figure Work, able to prepare Original Lay-outs; knowledge of Type Faces and Type Display essential. Write, stating age, experience.—Box 13939.

COMPOSITOR.—Wanted a smart, capable, young man to take charge of Book Department in country house; used to Casting Off MSS. and Clicking Bookwork; good terms to competent man.—State experience and wages required, to Box 13950.

FIRST-CLASS DUTCH HOUSE dealing in Paper and Boards is open to engage TWO TRAVELLERS, one for London and Midlands, and the other for the North; must have good connections; three months' trial given.—Write, stating age, experience and terms, to Box 13955.

MACHINE MINDER.—Experienced in Centurette and other Presses, must be reliable, steady worker; permanency for good man; Wandsworth district.—Reply, stating age, experience and wages required, to Box 13951.

PRINTER'S PRESS READER wanted for East Anglia; state age and experience.—Apply, Box 13930.

PRINTING.—REPRESENTATIVE required for well-known London and Country firm, well equipped for Fine Printing.—Write particulars, in confidence, Box 13937.

TRAVELLER, with connection, wanted, for Process and General Engraving Business; good position for energetic man.—Full particulars and terms, to Box 13938.

Situations Wanted.

BINDER and MARBLER (Soc.), young, seeks situation; Colours or Inks.—Apply, Box 13943.

- Intertype Corporation. Line stops for typographical composing machines. 172,290.
- Johnson, W. A. Loose-leaf binders. 180,156.
- Johnston, T. R. Rotary intaglio or photo gravure printing machines. 180,218.
- Mergenthaler Linotype Co. Keyboard locking devices for typographical composing machines. 165,727.

COMPOSITOR (T.U.) requires situation on Piece; used to Trade Papers and Tabular Work; quick, clean; 5 years' war service; age 30; good references.—Box 13945.

ENGINEER'S DRAUGHTSMAN, internal combustion, etc., car experience, desires Position where artistic talent would be of service; ability for advert. lay-out and commercial art.—Address Box 13952.

LETTERPRESS OVERSEER (32) desires change, present position 5 years (12 hands); Charge Composing, Machine and Warehouse; Estimator, thoroughly practical; C. and G. Certificates.—Box 13930.

MACHINE MINDER (Miehles), Single, Twin or Trip Tandem Machines, well up in best class Work, Black and White and Colour Process, desirous of change; single, and with good references; Cross Feeder knowledge, etc.; society.—Box 13931.

PUBLISHERS' BINDER (middle age) seeks situation (Town or Country); good all-round; publishers' requirements and big output a speciality; could organise department.—Box 13942.

YOUNG MAN (20), expert Shorthand, knowledge Economics, Literary, seeks Journalistic opening.—Box 13941.

Machinery for Sale.

FOR SALE.—An ALL-SIZE MARINONI PERFECTING WEB PRESS, to print a sheet 40 by 50 in.; minimum cut 22 in. and by 1/4-in. up to a maximum of 40 in.; width of web 40 in.; speed 4,000 to 5,000 per hour; open delivery; in good running condition.

A DRUM-CYLINDER FLAT BED PRESS by Messrs. Hoe and Co.; will print a sheet 40 by 60 in.; pyramidal inking; speed 1,200 per hour; in excellent condition.—Full particulars and prices from Temple Press, Ltd., 7-15, Rosebery-avenue, London, E.C.1. 13919

FOR SALE, ONE 14-in. PATENT SILVER-LOCK TABLE BRONZING MACHINE; maker, Gadsby, London; price £25.—For further particulars apply, Cadbury Bros., Ltd., Engineers' Office, Bourville. 13956

SECOND-HAND LINOTYPE for sale; Model No. 1 converted in 1915 to Model No. 4 Pattern with regard to Vice and Jaws; Double-letter Machine, Universal Mould from Nonpareil to Pica, equipped with Two Magazines and Two Sets of Matrices; completely overhauled and remodelled in 1915, and has been very little used since.—Offers should be sent to Box 13954.

Financial.

YOUNG GENTLEMAN, with capital from £1,000 to £1,500 to INVEST, and anxious to enter business, will find an opening as WORKING DIRECTOR with old-established Printing House in Yorkshire.—Write, in first instance, Box 13946.

Business for Sale.

BOOKBINDING BUSINESS, with Stationery and Fancy, for disposal; Market Town South England; suit working Bookbinder.—Write, Box 13947.

Miscellaneous.

COLONIAL NEWSPAPER CUTTINGS, dealing with the Paper, Printing, Stationery and Allied Trades, are wanted by Advertiser.—Communicate, stating terms, to Box 13882.

WANTED, THREE or FOUR-COLOUR BLOCKS (Odd or Series), suitable for Wall Calendars, size about 6 by 8 in.—Price and colour-proof, to L. F. De Vos and Co., 37, Canal de l'Anidon, Antwerp. 13953

BUCHANAN'S EQUIVALENT WEIGHT CALCULATOR. A Time-saving Pocket Companion for Papermakers and Paper Users. Standard size (12-in. long) in boxwood; £2 2s.—Stonhill and Gillis, Publishers, 58, Shoe-lane, London, E.C.4.

WASTE PAPER: ITS RECOVERY AND RE-MANUFACTURE. By James Strachan. A Fund of Information; price 12s. 6d.—Stonhill and Gillis, Publishers, 58, Shoe Lane, London, E.C.4.

THURSDAY, JUNE 8, 1922.
The F.M.P. Conference.

TO SCARBOROUGH last year, Cardiff the year before, Blackpool in 1919, and now away north to Glasgow for this year's gatherings—it is clear that the Federation of Master Printers makes good use of the widespread character of its domain in choosing a venue for its annual conference. The choice of Glasgow—Scotland's greatest industrial centre, but situated within easy reach of beautiful and characteristic Scottish scenery—is particularly happy at the present time, as it is from Glasgow that the Federation gets its very able and highly respected president, Mr. James MacLehose, M.A., LL.D. Having to go to press when reports of only a part of the proceedings have reached us, we are unable this week to cover the whole of the week's functions, and must postpone to next week the completion of our record. It is already clear, however, that the twenty-second annual gathering of the Federation is proving a most successful one, and the whole industry must derive benefit from the important trade discussions and the helpful social amenities comprised in the well-organised Glasgow Conference of 1922.

Wages and Trade Union Policy.

THERE seems now little likelihood that any further step of importance will be made in regard to wages in the printing trade before the date—June 12th—when master printers are recommended by their Federation to post notices of wage reduction. Some hopes were held that the conference of union representatives which met in London on Friday to discuss the possibility of joint action by all the unions in the trade might have some outcome that would ease the situation. We learn, however, that no immediate results were forthcoming: the meeting was a well-attended and very interesting one, but the upshot of the discussion was a decision to adjourn the meeting until June 15th. The position is now very regrettable in view of the harm which must accrue from anything of the nature of a strike or lock-out.

Postal Restrictions on Printed Matter.

THERE appears to be some misunderstanding with regard to the restrictions as to the time for posting printed matter and post cards. Instructions have been issued that printed matter must be posted before 3.30 p.m., but it should be understood that if such postings are delayed until after 3.30 the articles will not be surcharged: the point is merely that they stand a chance of being delayed until next day. The attention of the Postmaster-General has been called to the inconvenience of posting proofs, advice notes, invoices, etc., separately from the ordinary correspondence. We understand the Federation of Master Printers is taking the matter up, and we hope it may be found practicable to alter the postal regulations so as to obviate the need for posting printed matter at special times.

Printing from the Continent.

AN interesting question was asked in the House of Commons the other day by Mr. Bowerman as to the Board of Trade having given the names of German printers to a firm of horticulturalists and seedsmen in this country who are now having a quarterly publication in photogravure printed in Germany. The reply given by the Board of Trade was not reassuring, and Mr. Bowerman pressed that steps should be taken to see that at any rate a German imprint appeared on such publications in future. The Board of Trade undertook to make further inquiries. It seems obvious that the compulsory use of an imprint, as suggested, is a reasonable and necessary safeguard at the present time. The advantages conferred on Continental printers by the depreciated exchange are accidental and unfair, and since the loyalty of British traders to one another is one of the main bulwarks that prevent the dumping here of German printing, it would be but common sense and common justice on the part of our authorities to arrange that buyers of imported print should know what they are buying.

State Printing Charges.

SEVERAL questions have been asked recently in the House of Commons regarding the high prices that are now being charged to the public for official publications, these prices being now in some instances treble the previous figure. It may be only a coincidence, but is it not somewhat remarkable that these serious advances in price should be made at a time when many of these publications are being printed at the State Printing Office at Harrow?

Railway Rates.

AN investigation into the incidence of railway and freight rates, undertaken by the Papermakers' Association, has revealed striking facts. To send a ton of news-print from Lancashire to London by rail costs 50s. 10d. But an equivalent ton of "news" can be dispatched from Christiania to London for 25s., and from Helsingfors to London for 35s. Again, 76s. is the rail charge for conveying a ton of "news" from the Thames to Glasgow, whereas from Christiania to Glasgow the cost is 40s., and from Helsingfors to Glasgow 36s. These figures represent authoritative information, obtained from the shipping companies. Thus on freight alone Finnish paper has an advantage to the extent of something like a farthing a pound, which makes all the difference in quoting prices. It is even cheaper to send paper from Helsingfors to Cardiff than from London to Cardiff. This quite apart from the question of exchange and other conditions which ease the burden of the foreign manufacturer. Railway rates are an intricate problem, no doubt, but why foreign paper can be handled by the railway companies for what seems next to nothing is a mystery which the lay mind cannot grasp. In any event, there appear to be good

grounds for the contention of British paper-makers that railway rates should be lowered, and accordingly representations are being made to the authorities concerned that the rates should be reduced to 50 per cent. above pre-war levels.

Freight Discrimination.

BRITISH manufacturers have many grievances, and not the least concerns freights, both on the railway and on the seas. The charges for shipment to Australia is a matter which appears to require attention, since it is stated that goods can be shipped from Swedish, German and Dutch ports at rates from 10 to 12½ per cent. below those charged by the British conference lines. The Australian market at the present time, from the paper point of view, presents many difficulties, but the handicap thus indicated, added to the exchange advantage enjoyed by German goods, will make the British manufacturer's position in the Australian market very insecure after August 1st, when, as we are reminded by *The Times* (Trade Supplement), trade with Germany will be resumed. It is an old-standing grievance that foreign goods have preferential treatment over British products, not only on the high seas, but on the railways in this country, and it is high time that the selfish aspect of the question should be put aside in favour of more liberal treatment for British goods.

Strawboard Prices.

STRAWBOARDS have advanced nearly £2 per ton within the last week or so. According to what we are told, the Dutch makers have contracted to sell a big amount of straw to the Central countries for use as fodder at a price which ensures a much better return than could be secured by making and selling strawboards. There is even a comparative scarcity of strawboards in this country, and at last it looks as though the merchants and agents on this side will find it possible to recover some of their lost ground. For over eighteen months past the wrapping and board sections of the trade have been up against conditions which were simply impossible. In both sections prices are hardening; and if experience counts for anything, we should now expect to see an improved demand.

Other Boards.

TO-DAY'S quotations for unlined strawboard are £9 per ton up to 1½lb., £1 5s. per ton extra for heavier weights. Boxboards are figured at £16 per ton, carriage forward, white wood-pulp boards at the same price, glazed leather boards £17 10s. per ton, black machine millboards £28 per ton, hand-made millboards £38 per ton.

Kraft Strength.

Good business is being done in kraft paper. The market is strengthening in every direction and something almost in the nature of a boom is foreshadowed. A general improvement in trade is no doubt the precursor of this demand, which is an interesting symptom of revival in the general paper trade. It is not only in this country that kraft is improving; overseas markets are also placing orders. In this connection the American Consul at Kobe reports that kraft paper, which was formerly imported into Japan in large quantities from the States, is now coming from Canada and Europe. At the same time we have evidence of kraft activity in Germany. A recent visitor to that country found that the market for kraft paper was in favour of the sellers. German firms, according to the same testimony, were swamped with orders, sufficient to take care of their entire output for some time to come. The demand for the kraft paper was so great that it was a difficult proposition even to obtain quotations, and liberal margins of profit were allowed on the orders obtained in order to take care of any possible fluctuation in exchange rates.

Personal.

LORD RIDDELL, Lord Marshall, Sir Owen Seaman and Lieut.-Col. J. R. Truscott are among those who are to act as stewards when Mr. Samuel Samuel, M.P., presides at the festival dinner in aid of the Royal Hospital and Home for Incurables, Putney, on June 15th, at the Hotel Victoria, Northumberland-avenue.

LORD BEAVERBROOK is stated to be interested in a new company with a capital of £600,000, which has been formed in Canada to erect pulp and paper mills near Prince George, British Columbia. The proposed plant will have a capacity of 150 tons of pulp per day, but the scheme is not yet definitely settled.

AMONGST the new Knights whose names appeared in the King's Birthday Honours list, is Mr. Edward M. Iliffe, C.B.E., director of Iliffe and Sons, publishers.

LIEUT.-COL. A. H. BURGOYNE, M.P., who is also amongst the new Knights included in the Birthday Honours list, has written much upon naval questions, and founded the "Navy League Annual" in 1907, which he edited for seven years.

OTHER new Knights include Mr. Maurice Low, for services rendered at Washington in connection with the Press; and Mr. Robert S. Gardiner, chief proprietor of *The Near East*.

MR. T. G. GRAHAM, the Grand Master Elect of the Independent Order of Oddfellows, Manchester Unity, is a prominent journalist. He was on the staff of the *Scarborough News*, and from there went as leader writer to the *Sheffield Independent*. He also edited the *Weekly Independent* before coming to London to join the editorial staff at Newspaper House.

MR. PERCY J. MOSS, sporting editor of the *Daily Mirror*, has completed 25 years in the service of Lord Northcliffe and Lord Rothermere.

MR. WATER T. SMITH, formerly editor of the *Govan Express*, has been adopted as Liberal candidate for the Camlachie Division of Glasgow at the next Parliamentary election.

MR. M. L. LANCASTER, representative of a Birmingham printing firm, has been elected an Alderman of the Birmingham City Council.

MR. WILLIAM FOX, formerly a compositor in Lincoln, has established his claim as heir to the valuable Northorpe Hall Estate, in Lincolnshire.

MR. A. T. ROUTLEFF, who has been on the staff of the Hillingdon Press (now King and Hutchings) for about 22 years, is leaving that firm to start business on his own account under the style of Alfred Routleff and Co., commercial printers, manufacturing stationers and paper merchants at Uxbridge.

MR. C. R. SEDDON, the president of the Employers' Federation of Papermakers, will preside at the annual meeting of that body in Manchester on Friday, June 23rd.

ARRANGEMENTS are being made for those members of the Federation who so desire to spend the week end at Windermere.

MR. RANDOLPH HEARST, the American newspaper proprietor, left London on Tuesday for Paris, and is to tour Europe.

MR. BORGVALL, of the Sundsvall wood pulp and board mills, Sweden, is on a visit to the United Kingdom. The sale of the company's boards in this country is in the hands of Messrs. Felber, Jucker and Co., Ltd.

MR. A. M. HUESTIS, a well-known paper man in Canada, during an extended visit to Great Britain and the Continent found many papermakers in England unemployed but Swedish kraft mills and coated paper plants in Germany very active.

Day Continuation Schools.

The fate of London's day continuation schools was again discussed at the meeting last week of the Education Committee of the London County Council.

On a report regarding the deputation from the Committee that waited on the President of the Board of Education to ask relief from carrying on the schools, Dr. Stewart Headlam said the result would be to destroy a valuable work for the benefit of 50 per cent. of the boys and girls who left the day schools. There was still a possibility that the House of Commons might take a wiser view and save the schools.

Mr. T. Gautrey wondered if an answer could be given to Mr. Fisher's final words, "If the Government sought Parliamentary sanction and London were released from a statutory obligation, could not their schools be preserved on a voluntary basis?"

Canon Swallow thought there was an opening for voluntary effort.

Election Adverts. Sued For.

In the Mayor's and City of London Court, on June 1st, before Mr. Registrar Dell, a claim was made by Messrs. W. H. and L. Collingridge, Aldersgate-street, proprietors of the *City Press*, against Isidore H. W. Abrahams, cap manufacturer, for £2 2s. 6d. advertisements inserted. The defendant was a candidate for the position of Common Councilman for the ward of Portsoken, and on July 20th an advertisement, his election address, was inserted for which the plaintiffs charged £1 2s. 6d. and on September 17th another order for an advertisement was given the defendant limiting the price on this occasion to £1. Both advertisements were inserted and now the defendant paid £1 into Court with costs on that amount and disputed the balance. The Registrar said that the defendant in forwarding his election address to the plaintiffs had requested them to "please insert" and being, as he stated, a careful business man, must know that such things had to be paid for. He (the Registrar) did not think the amount charged for the first advertisement was an unreasonable amount and plaintiffs were entitled to recover. The defendant admitted the amount for the second advertisement. Judgment for the plaintiffs for £1 3s. 6d. beyond the amount paid into Court.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

A Nutting, W. Nutting and E. E. Owens, printers and stationers, 18, Newington-causeway, and 68a and 70a, Choumert-road, Peckham, London, under the style of Nutting and Owens.

N. Gordon, F. Goodman (widow) and A. Gordon (widow), cardboard box manufacturers and paper and twine merchants, at Rugby Works, Osborne-street, Rochdale-road, Manchester, under the style of C. Goodman.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

B. Astill, 26, Mowbray-street, and J. F. Astill, 24, Lower Parliament street, trading as Astill Brothers, at 24, Lower Parliament-street, Nottingham, paper stainers.

The first round in the "Knock-out" Golf Competition organised by the Stationers' Social Society has been completed, the following being the winners: Messrs. P. W. Kennett, C. E. Higgins, J. S. M. Stewart, J. W. S. Johnston, Lewis Winn, G. W. Smart, A. E. Brown, and W. Sommerville. The second round is now in progress and will be concluded by June 14th.

DIVIDENDS AND REPORTS.

ASSOCIATED NEWSPAPERS.—Report states that profit, after deducting income and corporation profits taxes, pension fund, depreciation, etc., for year to March 31st, was £224,122. Total dividends for the year amounted to £179,500, of which the 5 per cent. preference and the 7 per cent. ordinary, held by the public, call for £64,900, leaving £132,000 as dividend, free of tax, on 750,000 deferred shares privately held, equivalent to about 25½ per cent., subject to tax. Previous year net profit was £104,464.

KELLNER-PARTINGTON PAPER PULP CO., LTD.—Gross profit of Kellner - Partington Paper Pulp Co., Ltd., for year to August 31st, 1921, was £219,880, plus £83,410 brought in, making £303,290. Debenture interest, etc., absorbs £39,439. Preference dividend, £27,500; dividend of 15 per cent., free of tax, for year, carrying forward, subject to taxation, £99,805.

THOMAS OWEN AND CO.—Report of Thomas Owen and Co. for year ended March 31st, 1922, states that results have been disappointing owing to great drop in values of stock and slackness of trade. Taking all circumstances into consideration, and in view of there being ample reserves, directors have felt justified in transferring sufficient sum from general reserve to enable payment to be made of year's dividend on six per cent. preference shares and one of 5 per cent., less tax, on ordinary shares, and this they recommend. There is credit balance of £3,062, plus £21,106 brought forward, making £24,169. Dividends now proposed will absorb £13,500 and leave £4,669 to be carried forward.

NEW COMPANIES.

G. OWEN WILTSHIRE AND CO., LTD.—Capital £5,000, in £1 shares; to take over the business of wholesale paper and paper bag factors, printers, general and fancy stationers, etc., carried on at 9, Caroline-row, King-square, Bristol, as "G. Owen Wiltshire and Co." Private company. First directors: G. O. Wiltshire and W. O. Wiltshire. Registered office: 9, Caroline-row, King-square, Bristol.

BENFLEET AND CANVEY PUBLISHING AND TRADING CO., LTD.—Capital £1,000, in £1 shares; to adopt an agreement with R. W. Turk, and to carry on the business of printers

and publishers of newspapers, books and magazines, stationers, advertising agents, etc. Private company. First directors: R. W. Turk, H. Oliver, P. J. Bowling and H. W. Littler.

M. ANDREWS AND CO., LTD.—Capital £1,000, in £1 shares; to take over the business of a wholesale stationer carried on by Margaret E. E. Andrews, at 134, Salisbury-square, Fleet-street, E.C., as "M. Andrews," and to carry on the business of printers, paper bag manufacturers and agents, paper manufacturers, Christmas card manufacturers and agents, etc. Private company. Directors: Margaret E. E. Andrews and H. H. Penn. Registered office: 134, Salisbury-square, Fleet-street, E.C.4.

SALES PUBLICITY (LONDON), LTD.—Capital £1,000, in £1 shares; advertising agents, advertisement contractors and designers, magazine and newspaper proprietors, etc. Private company. Subscribers: L. J. Humphrey and H. V. Young. First directors by subscribers.

R. TURNER, LTD. (LONDON).—Capital £6,000, in £1 shares; manufacturers and repairers of and dealers in machinery and machines of all kinds, including needles, thread, wire, paper, cardboard, glue, envelopes, gummed wrappers, india rubber, aniline dyes, ink, etc. Private company. Subscribers: R. Turner and F. W. Braune. Subscribers appoint directors.

ASHBY-NOLA, LTD.—Capital £1,000, in £1 shares; commercial and art photographers, cinematographers, catalogue illustrators and printers, trade photographers and enlargers, technical and portrait photographers, magazine and trade journal illustrators, artists, designers, advertising agents, etc. Private company. First directors: R. A. Horan and H. S. Macintosh. Registered office: 22, Northumberland-avenue, W.C.2.

GLOBE MUSIC PUBLISHING CO., LTD.—Capital £400, in shares. Private company. First directors: M. Scott and F. J. Duck. Registered office: 102, Charing Cross-road, W.C.2.

ELKIN MATHEWS, LTD.—Capital £5,000, in £1 shares; to take over the business of booksellers and publishers recently carried on by C. E. Mathews as "Elkin Mathews." Private company. First directors: A. W. Evans, F. W. Brown and Mrs. E. P. Monro. Registered office: 9, John-street, Adelphi, W.C.2.

CLAYTONS, LTD.—Capital £1,500, in £1 shares; to take over the business of general stationers carried on by A. L. Hillman and J. L. Hillman at 61, High-street, Dudley, as "Claytons and Co.," and to carry on the same and the business of manufacturers of and dealers in leather and fancy goods, etc. Private company. First directors: J. L. Hillman and A. L. Hillman. Registered office: 61, High-street, Dudley.

BRITISH MAKERS YEAR BOOK, LTD.—Capital £500, in £1 shares; to acquire the business of a stationer, compiler and publisher of the "British Makers Year Book" carried on by W. Hopwood at Manchester, as "William Hopwood." Private company. Directors: W. Hopwood, W. H. Andrew and V. A. B. Hughes. Registered office: 199, Deansgate, Manchester.

B. ZINN, LTD. (London).—Capital £1,000, in £1 shares (500 preference and 500 ordinary). To adopt an agreement with B. Zinn and to carry on the business of importers, exporters and general merchants, etc. Power is taken to carry on business as dealers in leather goods, stationery, fancy goods, chemicals, etc. Private company. Subscribers: B. Zinn, P. Elliss and T. Harris. Directors: B. Zinn and P. Elliss.

DENNY AND THOMSON, LTD.—Capital £500, in 5s. shares; manufacturers of and dealers in medicines and food preparations, book and general publishers, printers and advertising agents, etc. Private company. First directors: M. Hall and C. W. Forward. Registered office: 17, Bloomsbury Mansions, Hart-street, W.C.1.

M. GOODMAN AND CO., LTD. (London).—Capital £10,000, in £1 shares; to acquire the business of theatrical and general advertising contractors carried on at 48, Rupert-street, W., as "M. Goodman and Co." Private company. Directors: M. Goodman and A. A. Goodman.

W. DRYER AND CO., LTD.—Capital £200, in £1 shares; hardware merchants, stationery and fancy goods dealers, etc. Private company. First directors: N. Schaapwol and W. Ossedryver. Registered office: 53, Merchant-street, Bow, E.3.

UNIVERSAL POSTAL FRANKERS (London).—Capital £100,000, in £1 shares; to adopt an agreement with the Sterling Telephone and Electric Co., Ltd. (vendors and promoters), to acquire and turn to account certain patents and rights, and any inventions relating to machinery for franking letters, telegrams, cablegrams, marconigrams, receipts and the like, etc. Private company. Subscribers: F. S. Gaylor and J. Findlay.

ART LOVERS ASSOCIATION, LTD.—Capital £1,000 in £1 shares; to carry on the business of dealers in fine art, pictures, etchings, engravings, art publishers, etc. Private company. First directors: Mrs. A. M. Wiltshire, Mrs. O. Chapelier, F. Chapelier and G. Chapalier. Registered office: 70, Grafton-street, W.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

SPOTTISWOODE, BALLANTYNE AND CO., LTD.—Satisfaction to the further extent of £34,000 (viz., £14,100 first and £19,900 second) on March 31st, 1922, of first and second mortgage debentures dated December 28th, 1900, securing £140,000, of which £137,000 remained outstanding on July 1st, 1908.

"**BACUP TIMES,**" LTD.—Debenture dated May 22nd, 1922, to secure £1,300, charged on the company's undertaking and property, including uncalled capital. Holders: R. Thorburn and W. Williamson, 38, Mosley-street, Manchester.

PORTALS, LTD. (paper manufacturers, Whitchurch, Hants).—Issue on May 19th, 1922, of £30,000 debentures, part of a series already registered.

Hazell, Watson and Viney, Ltd.

At the thirty-eighth annual general meeting of the shareholders of Messrs. Hazell, Watson and Viney, Ltd., held on Friday at Stationers' Hall, Mr. W. Howard Hazell, J.P. (the chairman), who presided, said the past year had been one of extraordinary difficulty in the printing trade. The directors in their last annual report had foreshadowed that there would be a decrease in the sales, and though every effort was made to obtain more orders, the effect of the lessened demand for printing was shown in the profits, which had dropped from £40,812 to £30,171. In view, however, of the very abnormal conditions of the past year, the directors considered the result satisfactory, and when the general trade of the country revived, the profits would improve.

Under the company's scheme the employees of all grades can purchase shares at less than market value, and they have applied for ten thousand employees ordinary £1 shares, of which 8,391 were issued as fully-paid at March 31st last. In addition, the employees (other than the directors) now hold 1,450 fully-paid ordinary £10 shares, purchased under various schemes at less than their

market value. There are now two hundred employees who are shareholders.

The company have recently opened a Continental branch at 46, Place De Brouckère, Brussels. A weekly newspaper, the *Anglo-Belgian Times*, printed partly in English, French, and Flemish, has been started successfully.

The report and accounts were adopted, and a final dividend was declared of 11s. per share, free of income-tax, on the fully-paid ordinary £10 shares, making 7½ per cent., free of income-tax, for the year.

A Paper Goods Manufacturer's AFFAIRS.

The first meeting of creditors was duly held at the London Bankruptcy Court, under a receiving order made against Cecil Kenneth Heywood, paper goods manufacturer, described as of 7, Caledonian-road, King's-cross, and 56, Brondesbury-villas, Kilburn.

Mr. F. T. Garton, official receiver, reported that accounts had been lodged by the debtor showing total liabilities £20,988 (unsecured £14,253); assets valued at £2,889; and a deficiency estimated at £11,654. According to the debtor's statements, it appeared that since leaving school he had always been engaged in the paper and allied trades. He commenced trading on his own account as a paper merchant at 24, Avenue-chambers, Southampton-row, W.C., in December, 1917, with £600 capital, £500 of which was advanced by Mr. Chas. Baker. The business was successful during the first year, and he made a net profit of £580. Under an agreement with Mr. Baker, he agreed to pay that gentleman 50 per cent. of the net profits as consideration for the advance. Mr. Baker also lent him money from time to time during that period, but the majority of those loans had been repaid. The business was not successful during the first half of 1919, owing to the general slump in trade. After the Armistice the debtor decided to manufacture, and for that purpose took a factory at 7, Caledonian-road, purchasing the freehold for £3,375 and expending £1,600 upon alterations to the premises. Mr. Geoffrey Baker advanced him £6,000 on mortgage, and the debtor purchased machinery valued at £2,300, which sum was advanced by Mr. Chas. Baker. In consideration of that loan the old agreement was cancelled, and a new one entered into whereby the debtor was to pay him 25 per cent. of the net profits. The business was not successful, owing to bad trade, and the debtor suffered seriously through lack of working capital. Moneys were continuously being supplied to him by the Baker family, and their company supplied him with goods, with the result that at the present time he owed Mr. Chas. Baker £7,000, Mr. Geoffrey Baker £6,223, Messrs. Chas. Baker and Co. and Messrs. Chas. Baker and Son, Ltd., papermakers, £3,000 for goods supplied, and in addition Mr. Chas. Baker had guaranteed his overdraft at the bank to the extent of £1,500. The limited company had also guaranteed certain of his trade debts amounting to £1,000. Being unable to proceed without additional capital, the debtor approached Mr. Chas. Baker with the object of obtaining a further loan. Accounts were prepared showing a gross loss of £1,700 on the previous six months' trading, and although that was converted into a small gross profit on the last two months, the loan was not forthcoming, and these proceedings ensued.

The debtor attributed his failure to want of capital and general trade depression.

A resolution was passed to appoint Mr. H. A. Allison (J. Dex Lewis, Ceasar and Co.), Crown-court, Cheapside, E.C., as trustee to administer the estate, assisted by a committee of inspection. The bond to be given by the trustee was recommended to be for £4,500, because, although the debtor only returned his assets at £2,889, it was considered possible that a charge on the machinery would be held to be void under the Bills of Sale Act.

THE EBURITE PAPER CO. (1919), LTD.—A meeting of the principal creditors was held on Thursday, the 25th ult., when a statement on the affairs of the company was submitted by the receiver. An adjournment was unanimously agreed to for a period of six weeks, and meanwhile a scheme of reconstruction will be formulated by the directors.

There were two fatal accidents in the paper, printing, etc., group of trades during April.

Australian Notes.

**Paper Market—Book Post Regulations—
Suggestions by the Trade—Newspaper
Reciprocal Arrangement with U.S.A.—
Cost of School Books—Mr. Wm. Brooks
—J. Fielding and Co.—New Company.**

(From Our Sydney Correspondent.)

RECENT statistics indicate that the paper market is picking up a little, but it has a great deal of leeway to make up. The conditions are now quite the reverse of what they were during the war period. Supplies appear to be ample, but the demand is not sufficient to absorb all the material available.

THE leading bookselling firms in Melbourne have addressed a letter to the Secretary of the Postal Department suggesting various amendments to the Commonwealth Postal Laws relating to books and magazines. The firms in question are grateful to the Postal Department for endeavouring to improve the postal conditions, but they take exception to certain regulations.

WITH regard to the Australian book post it is suggested that the idea of registration should be abolished. Registration they regard as unnecessary since the printer's name and address in the usual place ought to be sufficient evidence of origin. It has been so for some years, so why change it now? is the question they put.

ANOTHER point taken up by the booksellers relates to works by Australian authors, and they put forward some pertinent questions as to who is an Australian author. The letter, after pointing out that there will be trouble over the limitation, proceeds in the following piquant manner:—Who is an Australian author? Must he live in Australia? If he decides to live abroad does he forfeit his rights? Is a foreigner who has his books printed in Australia an Australian author? Would a school edition of a Shakspearian play edited by an Australian author get the preferential rate?

QUITE a lot of other troubles will arise, it is pointed out, and accordingly it is suggested that all books printed in Australia without any qualifying or disqualifying restrictions as to authorship or subject matter should go through the book post at 2d. per lb.

ADVERTISEMENTS on Australian printed books is the third point taken up, and in regard to this matter the booksellers say: Advertisements ought to be allowed quite apart from publishers' announcements. It is the custom all over the world for commercial advertisements to appear on covers and in selected places within covers. The addition of a few advertisements may be the determining factor which may decide whether a book is to be printed or not. An instance may be quoted in the case of the N.S.W. Bookstall Series of Novels. The margin between cost of printing and trade price is so small that the assistance given by the insertion of a few advertisements is very important. This series and others have been a great boon to Australian authors, and ought not to be penalised by unnecessary restrictions.

A MESSAGE from Melbourne states that the Federal Executive has given approval to a reciprocal agreement made between the Postmaster-General's Department and the United States Government, providing for reversion to the old rates charged for transhipment of newspapers through the post between the two countries. This independent agreement was rendered necessary owing to the high rates fixed at the International Postal Congress, held at Madrid last year. The new rates will be 1½d. per 4 oz., and 1½d. for every additional 4oz. or fraction thereof. This will be one-half the rates now operating, and will be practically the same as those charged before the Madrid scale was enforced. Ratification has been sent to all the States, and the lower rate is in operation.

THE cost of books used in the State schools was discussed at the annual conference of the Australasian Women's Association held in

Sydney. A proposal was put forward by the Flemington branch that the State Government should be asked to introduce some scheme whereby the cost would be reduced. The eagerness with which mothers who were delegates to the conference jumped up to speak to this proposal showed very clearly that the suggestion was a popular one.

IT was suggested by various speakers that the State Government should print the books, and should provide depots at the State schools where they might be purchased at cost price. Many delegates referred to the difficulties faced by the poorer mothers in paying for the books required, especially when their families were large, and to the extra expense incurred owing to frequent changes in the books used.

THERE was a general consensus of opinion that mothers did not want free books, but desired that the cost of books should be reduced, and the proposal made by the Flemington branch was agreed to.

AN interesting interview with Ald. Wm. Brooks, M.L.C., appeared recently in the *Sydney Daily Telegraph*. Mr. Brooks, who was Paper Controller during the war, recently returned from a visit to the Old Country, and a representative of this paper had an interview with him at the time. The firm of Wm. Brooks and Co., Ltd., which the alderman established, comprises all the ramifications of printing, manufacturing stationery, paper bag, envelope and paper box making, together with many other lines connected with the printing and allied trades, and his knowledge of the industry has been used in many directions for the public benefit.

MR. Brooks' self-analysis produces excellent advice for the younger generation. "Looking back over my experiences as employer and manufacturer," he observes, "I am entitled to say that any progress I have made has been almost entirely due to hard work and personal exertion. It is wonderful what a man can get through if he absolutely refuses to acknowledge defeat."

IN this connection the *Sydney Telegraph* observes that there is no greater champion of employers' rights in Australia than Mr. Brooks, who has attained front rank among printers and publishers in New South Wales, and who is the appointed delegate of the Central Council of Employers to Mr. Hughes' round table industrial conference.

J. FIELDING AND Co., LTD., has issued a circular letter to its shareholders, intimating that the directors have resolved that the £20,000 7 per cent. preference capital is to be redeemed, and that an extraordinary meeting of shareholders will be held to pass the necessary resolutions. It is understood that the company has idle funds, for which it has no use at present, and considers it should use some of this money to redeem the preference shares.

THE following new company has been registered:—The *Albury Daily News* Printing Co., Ltd., with a registered capital of £10,000, to acquire the business now carried on at Albury, known as "W. J. Mangan and Co.," to establish and publish a newspaper or newspapers in Albury, and to carry on the business of printers, stationers, lithographers, type-founders, etc. Subscribers: F. B. Hefferman, W. J. Delaney, A. J. Pike, A. N. Hart, Frederick C. Blacklock, Alfred Michell, John Peter Smithenbecker.

MR. W. FARMER WHYTE, editor of the *Daily Mail*, Brisbane, has been appointed to the position of editor of the *Daily Telegraph*, Sydney, in succession to Mr. D. Braham, who recently resigned, after a period of service exceeding seven years.

MR. ANDREW STEWART, head of the firm of Messrs. McCarron Bird and Co., of Melbourne, has died suddenly. Mr. Stewart was trained as a printer, and was chairman of the Master Printers' Association on various occasions, and also a member of the printers' wages board.

DURING January and February the imports of paper and paper goods into Russia amounted to 10,200 tons, the figure for February being 5,200 tons.

Trade Notes.

SERIOUS damage by fire was done last week at the printing works of George Lowe of Wallis-road, Hackney Wick. Energetic steps are being taken to repair the damage, and it is hoped that in a couple of weeks or so business will again be carried on as usual.

FIRE AT BRADFORD.—A fire broke out on Friday evening at the premises of Mr. William H. Berry, lithographic and letterpress printer, of Nerfield-street, Bradford. The estimated damage is about £5,000, which is covered by insurance. It is hoped that it will be able to start almost immediately the colour printing machinery, and temporary arrangements are to be made with regard to the letterpress department.

A **FIRE** which broke out on the third floor of a paper warehouse at the back of the *Punch* offices in Bouverie-street, London, was speedily extinguished by the fire brigade.

The Mayor of Dover has opened a fund in aid of the widow of Mr. George W. Jenner, the Dover printer who was drowned in the wreck of the P. and O. liner, "Egypt," after having handed his lifebelt to a lady passenger who was without one. Mrs. Jenner is left in needy circumstances, and the Mayor feels that many might like to participate in showing sympathy. The printing trade will doubtless wish to be adequately represented in this public tribute to a gallant printer. Subscriptions can be sent to the Mayor, Town Hall, Dover.

MR. FISHER stated in the House of Commons last week that no date for the closing of the continuation schools in London had yet been fixed.

By the courtesy of the Lanston Monotype Corporation a demonstration of the Miller Labour-Saving Machinery will be given to members of the Printers' Managers and Overseers Association at 43, Fetter-lane, E.C., on Tuesday, July 11th, 1922, at 5.30 p.m.

At the Birmingham Police Court last week, two employees (Thomas W. Deakin and William Tanser) of Messrs. Evans and Adlard, paper bag makers, of Moor-street, Birmingham, were each sent to prison for six weeks with hard labour, for being concerned in the theft of a parcel of paper bags, valued at 5s. 6d., belonging to that firm.

L.C.C. CENTRAL SCHOOL.—The annual exhibition of the work of the L.C.C. Central School of Arts and Crafts for the session will be open from June 7th to 21st, 10 a.m. to 8 p.m. daily, Saturday 10 to 12 noon. Admission is free on signing the visitors' book. The exhibits include work in writing and illumination, printing, bookbinding, wood engraving, book illustration, etching, lithography, etc.

The non-stop aeroplane from Hendon carrying films of the Derby photographs for the *Aberdeen Daily Journal* reached Aberdeen, a distance of over 500 miles, at 10.20 p.m. on the evening of Derby day.

PRINTING AT A DISTANCE.—A Hungarian engineer of the name of Szabo has invented a device for printing at limited distances by electric current as well as by wireless. Complete sentences are set up in lines and columns in the transmitting apparatus, and a corresponding impression is conveyed to the receiver either by electric current or by wireless waves. The invention, it is said, will make it possible for newspapers to appear simultaneously in different parts of the world without making use of the post or telegraph.

LEEDS PRINTING TRADE SPORTS.—The committee of management of the Leeds Printing Trade Sports (to be held at the Headingley Athletic Grounds on July 8th next) announce that the profits will be divided among the Printers' Pension, Almshouses and Orphan Asylum Corporation, the Nat-sopa Memorial Home, the Caxton Convalescent Home and the Carshalton Convalescent Home. The programme will include events for all classes of printing employees, and in each section teams from offices in the city will compete. Various challenge cups have been presented for competition, and in each event valuable prizes are being offered. The committee, of which Mr. Frank Petty is the chairman, meets every fortnight, and each printing establishment in Leeds has been asked to send representatives and to offer advice. Last year a profit of over £100 was handed over to printers' charities, and it is hoped to achieve better results on this occasion.

WESTGATE-ON-SEA is raising £100 to spend on advertising the town as a health resort.

STRIKING witness to the value of Press publicity for seaside resorts was borne at the annual meeting of the Worthing Publicity Association on Thursday.

ST. PANCRAS COUNCIL has refused to let the public pavements for advertising at £1 a year rent per square yard.

The Associated Booksellers of Great Britain and Ireland are holding their annual conference in London this year. The proceedings open with a *soiree* on Friday evening, June 9th, at Stationers' Hall, and close with an excursion to Hampton Court on Monday, June 12th. The conference proper takes place on Saturday and Monday, June 10th and 12th at Stationers' Hall.

The annual musical evening promoted in Birmingham on behalf of the orphan fund of the Institute of Journalists and other charitable funds, was a great success, realising about £150 net.

The death occurred in Birmingham last week of Mr. E. M. Mountfort, newspaper cartoonist, of Edgbaston, at the age of 78.

The death took place at Sudbury of Mr. Edward Lewis, a former proprietor of the *Suffolk and Essex Free Press*, with which he was connected for 33 years.

A WELL-KNOWN Dundee journalist, Mr. James S. Neish, has died at the advanced age of 91 years. He joined the staff of the *Dundee Courier* and *Weekly News* in the early 'seventies, and was for many years police court reporter for the *Dundee Courier*.

The death is announced at Clifton of Mr. William Adlard, aged 85, who for 40 years was a partner in the firm of Evans and Adlard, paper merchants, of Moor-street, Birmingham. He retired some years ago. The business was founded over a century ago by Luke Evans, and he was joined a little later by the father of Mr. William Adlard, who in turn was followed by his son and then by his grandson.

DR. ELLIS POWELL, for many years editor of the *Financial News*, died on Thursday at Siddington Manor, near Cirencester, after addressing a political meeting. Dr. Powell was a prominent member of the Institute of Journalists and for many years one of the leading members of the Council of the Newspaper Proprietors' Association and of the Empire Press Union. He was one of the London delegates to the Imperial Press Conference, Ottawa. In 1920 he retired from active association with the London Press.

The late Mr. William Wall, Upper Dicconson-street, Wigan, managing director of Messrs. Thomas Wall and Sons, Ltd., and editor of the *Wigan Observer*, who died on April 18th, aged 68 years, left £1,623.

LARGE crowds gather daily outside the new Carreras building in Regent-street to watch the wonderful Baron machine making 800 "St. Dunstan's" Virginia cigarettes per minute. The machine distributes the tobacco, rolls it in the paper, prints in two colours, gums the edges and cuts the cigarettes to the length required.

AN American group has obtained authority to construct three paper mills in Bulgaria, the output capacity of which would be 150 tons a day. The raw material to be used would be straw from wheat.

HIGH wages and restriction of hours are declared responsible for the fact that New York City is losing some big printing orders and some big printshops. The loss of printing business transferred to other parts of the country will this year alone amount to millions of dollars.

The last monthly report from the Industrial Commission of the State of New York indicated that in the Printing and Book-Making section of New York State industry there are 4 per cent. more employees than in June, 1914, and a 93 per cent. increase in wage.

The bookbinding concern of George McKibbin and Son, of Brooklyn, U.S.A., announces the death of the president, George McKibbin. Mr. McKibbin was one of the most prominent men in his industry, and was always interested and active in organisation affairs in the bookbinding and allied trades.

THERE is said to be increasing unemployment in Moscow, and 522 printers are reported as amongst the unemployed.

A CONGRESS of North European journalists will be held in Helsingfors from 13th to 24th June, with about 50 representatives from each of the four northern countries. Many ques-

tions of the utmost importance to them will be discussed.

ALLEGATIONS of heavy subsidies to French newspapers from English and other sources have been made in a controversy aroused in the French Press by a suggestion made in the Chamber that newspapers receiving money from foreign countries should be prosecuted.

AMONG new members elected to the British Chamber of Commerce, Paris, are Miss M. A. Lawson, managing director of Messrs. T. W. and C. B. Sheridan Co., Ltd., bookbinding, printing, boxmaking, leather embossing and paper working machinery, 63, Hatton-garden, London, E.C.1, and the Dorland Agency, Ltd. (Agence Dorland), advertising agents and contractors, 24, Boulevard des Capucines, Paris (9e).

The *Cologne Gazette* has notified its German subscribers that its monthly price is to be 40 marks, of which amount the paper manufacturer receives 35 marks.

The Inter-Allied Commission has prohibited the publication in occupied territory for three months of the newspaper *European Press*, which is published in English at the cost of a German firm in Bremen, on account of "articles calculated to prejudice the dignity and security of Allied troops of occupation."

In consequence of the accession of Brazil and Hungary to the revised Berne Copyright Convention of 1908, Orders in Council were made on April 21st, 1922, under Section 29 of the Copyright Act, 1911, extending the provisions of the Act to Brazilian and Hungarian authors and works. Copies of the Orders may be seen in the Patent Office Library, 25, Southampton-buildings, W.C.2.

OWING to the rise in the price of news-print by 1,600 per cent. since 1914, high telegraph and telephone charges and the heavy taxation on advertisements, 470 Austrian newspapers have been compelled to suspend publication this year. The present distress, it is stated, will inevitably lead to disaster for the entire newspaper industry, unless the Government takes immediate action.

TRANSVAAL FUSION.—As from March 1st the long-established businesses of Messrs. Adlington, Ltd., and McKowen and Radford, Ltd., of South Africa, have joined forces. The combined business will trade under the style and title of Radford, Adlington, Ltd., and, with two plants operating under one roof, the new organisation will be in a powerful position to cope with the requirements of its extensive clientèle.

"CURRENT OPINION," the new official organ of the Industrial League and Council (82, Victoria-street, S.W.1) contains much of importance to those interested in the betterment of industrial relations.

Trade Union Matters.

"T.A." LEVIES.—The Typographical Association Executive Council have taken advantage of their new powers to levy the members. The levy is to be a shilling a quarter per member until the members' balance reaches £6 each in the General Fund. Sixpence per member will be levied at the end of the June quarter to build up the Superannuation Fund.

MUCH credit attaches to the local branch of the Typographical Association for the success of efforts to stop the Canterbury Town Council from accepting a recommendation for them to do its own printing by the installing of a typewriter, rotary duplicator, and stapler, at an estimated cost of £66. It was pointed out in a letter to the Council that such recommendations were likely to increase the unemployment existing in the printing industry, and so help to swell the number receiving the unemployment dole, whilst at the same time placing the work (which rightly belonged to the printing trade) in a department which is already supplied with many well-remunerated jobs.

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES:

- | | |
|---|--|
| 1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading. | 4.—Centres of any kind or width can be worked on the machine. |
| 2.—It occupies a space of only six feet on the run, and is quite noiseless. | 5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day. |
| 3.—The power required is such a small amount that it can be driven from any existing shafting. | 6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills. |

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., *Engineers, Myrtle Road Works, Brentwood, ESSEX*

Paper Bag and Box Wages.

Proposals as to Minimum Rates.

Notices of proposal to fix and/or vary minimum rates of wages have been issued by the Paper Bag and Paper Box Trade Boards (Great Britain) as follows:

Paper Bag Trade Board (Great Britain).

Proposal [P. (8)], dated April 21st, 1922 (issued with the Minister's consent) to vary the general minimum time-rates and overtime rates for male and female workers and the piece-work basis time-rates for female workers for periods dependent upon the cost of living index figure, as published each month in the *Labour Gazette*.

The rates proposed per week of 48 hours range according as the cost of living index figure falls within ranges specified by the Board between 150 and 0:

General minimum time-rates: (a) Male workers, (i) machine tacklers, 23 years of age and over, 94s. to 45s., with lower scales for younger workers; (ii) workers entering the trade for the first time at the age of 21 years or over as machine tacklers, 74s. to 35s. 6d., 80s. to 38s., 87s. 6d. to 42s., during the first, second and third twelve months of employment respectively; (iii) paper bag cutters of 23 years of age and over, 86s. to 40s., with lower scales for younger workers; (iv) workers entering the trade for the first time at the age of 21 years of age or over as paper cutters, 75s. 6d. to 35s. 6d., 78s. to 36s. 6d., 82s. to 38s., during the first, second and third twelve months of employment respectively; (v) hydraulic pressers, slitters, stock-keepers, packers and despatchers of 21 years of age and over, 75s. 6d. to 35s., 76s. 6d. to 35s. 6d., 79s. to 37s., 82s. to 38s., during the first, second and third twelve months and subsequent employment in the same occupation respectively; (vi) workers other than those specified above, 79s. to 32s. 6d., with lower scales for learners; (b) female workers, including home-workers, 41s. to 20s., with lower scales for learners.

Piece-work basis time-rates for all female workers, including home-workers, 44s. to 21s.

NOTE.—Each cost of living period is a period from the first day of the month following publication in the *Labour Gazette* of a cost of living figure within one of the ranges of percentages specified by the Board until the first day of the month following the publication of a figure within another such range.

Paper Box Trade Board (Great Britain).

Proposal [B. (9)], dated May 5th, 1922 (issued with the Minister's consent), to vary the general minimum time-rates, piece-work basis time-rates and overtime rates for male and female workers for periods dependent upon the cost of living index figure and to cancel a piece-work basis time-rate in its application to certain classes of male workers.

The rates proposed per week of 48 hours range as follows, according as the cost of living figure falls within ranges specified by the Board (from not less than 93 to less than 1):—

(a) General minimum time-rates: (i) Male worker employed as die-makers, forme setters, cutters (including shears and guillotine) and machine-minders and head stock-keepers, from 46s. to 72s. 6d. for workers of 23 years of age and over, with lower ranges of rates for such workers between 18 and 23 years of age; (ii) all other male workers, except learners, from 33s. to 55s., with lower ranges of rates for male learners; (iii) female workers, other than learners, from 20s. to 33s., with lower ranges of rates for female learners.

(b) Piece-work basis time-rates: (i) Male workers, other than the classes specified in (a) (i) above, from 36s. to 61s.; (ii) female workers (including homeworkers), from 22s. to 35s.

The Trade Board also propose to cancel the piece-work basis time-rate of 1s. 3½d. per hour at present in operation for all male workers in its application to the classes of male workers specified in (a) (i) above.

NOTE.—Each cost of living period is a period from the 28th day of the month of the publication in the *Labour Gazette* of a cost of living figure within one of the ranges of percentages specified by the Board until the 28th day of the month of the publication of a figure within another such range.

WAGE decreases in the paper, printing, etc., group of trades during the January-April period affected 104,000 workpeople approximately, the decreases representing £15,200 in weekly wages.

Government Paper Contracts.

Contracts were placed with the following firms during April:—

Post Office.

PAPER, TELEGRAPH.—Waterlow and Sons, Ltd., London, E.

SLEEVES, PAPER.—S. O'Neill and Sons, Ltd., Castleton, near Manchester; Paper Tube Makers' Association, Ltd. (Messrs. J. Stell and Sons' Branch), Rochdale.

Stationery Office.

BAGS.—J. Dickinson and Co., Ltd., Hemel Hempstead.

BOXES.—A. E. Walker, Ltd., London, N.; Thames Paper Co., Purfleet; Containers, Ltd., Thatcham, Berks.

CARDS, CLOTH LINED.—A. E. Mallandain, Park Royal.

CASES FIBRE, PACKING.—Thames Paper Co., Ltd., Purfleet.

INDIA TAGS.—Spickett and Downs, London, E.; Applied Paper Co., London, N.; Wheelers Sundries, Ltd., London, E.

PAPER OF VARIOUS DESCRIPTIONS.—J. Cropper and Co., Ltd., Kendal; Caldwell's Paper Mill Co., Ltd., Inverkeithing; Grosvenor Chater and Co., Ltd., Holywell; R. Craig and Sons, Ltd., Caldercruix; J. Brown and Co., Ltd., Penicuik; Paper Cutting and Toilet Requisite Co., Ltd., London, S.E.; R. Sommerville and Co., Ltd., Creech St. Michael, near Taunton; Wiggins, Teape and Co., Ltd., Chorley and Dover; W. Henry and Co., London, E.C.; Darwen Paper Mill Co., Darwen; S. C. and P. Harding, Ltd., London, S.E.; J. A. Weir, Ltd., Alloa; Wm. Joynson and Son, Ltd., Kent; Northfleet Paper Mills, Ltd., Northfleet; S. Jones and Co., Ltd., London, S.E.; A. G. Thornton, Ltd., West Manchester; Bathford Paper Mills Co., Ltd., Bathford; Ulverston Paper Co., Ltd., Ulverston; Roughway Paper Mills, Ltd., Tonbridge; Team Valley Paper Mills, Ltd., Gateshead; J. Wild and Sons, Ltd., Radcliffe; J. Cropper and Co., Ltd., Kendal; Olive and Partington, Ltd., Glossop and Manchester; Thos. Owen and Co., Ltd., Cardiff; Barrow Paper Mills, Ltd., Barrow-in-Furness; E. Collins and Sons, Ltd., Glasgow; Golden Valley Paper Mills, Bitton; Inveresk Paper Co., Ltd., Musselburgh; Guard Bridge Paper Co., Ltd., Guardbridge; Hendon Paper Works Co., Ltd., Sunderland; St. Neots Paper Mill Co., Ltd., St. Neots; Hollingworth and Co., Maidstone; G. Wilmot, Ltd., Shoreham; J. Barcham, Green and Son, Maidstone; T. H. Saunders and Co., Ltd., Dartford and High Wycombe.

STRAWBOARDS.—Waterlow and Sons, Ltd., London, E.C.

Crown Agents.

PAPER.—T. H. Saunders and Co., Ltd., London, E.C.; J. Baker and Co., Ltd., London, E.C.; J. Gordon and Co., London, E.C.

PRINTING PAPER.—H. Spalding and Co., London, E.C.

London Press Golf.

In the London Press Golfing Society's Inter-Office Foursomes series at Coombe Hill, the first round results were:—

Harmsworth's Encyclopædia walked over; Times No. 2 scratched.

Happy Magazine walked over; News of the World scratched.

Answers beat Central Press by 4 and 2. New York Times beat Grand Magazine by 2 and 1.

John o'London's Weekly beat Pearson's Magazine by 6 and 4.

Strand Magazine beat Evening News by 3 and 2.

SECOND ROUND.—All Sports beat The People at 19th hole.

Daily Mail No. 1 beat Sporting Life by 5 and 4.

Daily Mail No. 2 beat the Morning Post by two holes.

The Times No. 1 walked over; the Daily Mirror scratched.

Pictorial Magazine beat Tit-Bits by 2 and 1. Happy Magazine beat Harmsworth's Encyclopædia by two holes.

Answers beat New York Times by 2 and 1. Strand Magazine beat John o'London's Weekly by 4 and 2.

THIRD ROUND.—Daily Mail No. 2 beat The Times No. 1 by one hole.

Battersea Polytechnic.

Commercial Paper Examination.

The following were the questions set at the Commercial Paper examination held at the Battersea Polytechnic on the 26th ult.:—

Size of double demy and of oblong double medium.

By what name is 16½ by 26½ in. known commercially? Also 25 by 40 in.?

What is official postcard size?

What do you understand by H.P., H.C., E. and O.E., M.G., C.I.F. or C.i.f., sans recours, petite vitesse, general average, "bulk" as applied to paper, "beating"?

Give the two most usual sizes for stock strawboards, T.S. cream-laid banks, and loose-leaf ledgers.

What properties and characteristics should music roll paper possess, also offset litho paper?

What stipulation would you make when ordering strawboards if regularity was required?

What commercial test would you apply to ascertain whether a paper was "hand made," "tub sized," cylinder mould made, suitable for map printing, and a greaseproof wrapping?

Discuss "stretch" in paper briefly and give two examples where a high degree of stretch is necessary.

Why should tinted linen strawboards discolour, and what precautions would you take to avoid discoloration?

How would you judge the following papers for quality: (a) Azure laid E.S. writing (b) art paper for trichromatic printing (c) cutlery tissue (d) antique book.

Describe the difference between an "imitation art" and a super calendered printing.

What is the cause of "curling" and "cockling"?

Say briefly what you know of the process of lithography.

Give the rule for the binding of books as regards fibre direction and explain reasons for same.

A 320-page book is required to bulk 1½ in. How many thousandths of an inch will a sheet register on the micrometer?

A printer has an enquiry for 10,000 catalogues of 160 pages, demy 4to, for which he has 125 screen blocks for the inside and three-colour blocks of 150 screen blocks for the cover. Estimate suitable stocks for pricing the paper and use suitable substances. Show calculations.

Which way should a paper be fed into a printing machine, and why?

The final question asked by what process various samples of paper were printed, and the reasons.

There were 41 questions altogether.

American News-Print Production.

According to the monthly bulletin of the News-Print Service Bureau, the 47 reporting companies produced 183,674 tons and shipped 185,975 tons during April. Shipments exceeded production by 2,301 tons. Production figures include 988 tons of hanging, of which 393 tons were made in Canada.

The average daily production of news-print paper by the mills reporting for April amounted to 89¼ per cent. of the average daily output during the three months of greatest production in 1920 or 1921, with allowances for new machines.

Comparing the production during the first four months of 1922 with that of the same period for 1921, the 31 reporting United States companies show a decrease of 5,583 tons, or 1 per cent.; the 16 Canadian companies an increase of 58,477 tons, or 22 per cent., and the total of the 47 companies an increase of 53,094 tons, or 8 per cent.

Stocks during April decreased 2,780 tons at United States mill points and increased 501 tons at Canadian points. Total stocks at all reporting mills amounted to 28,806 tons, or 2,279 tons less on April 30th than on March 31st, and were equivalent to 3½ days' maximum production.

As a result of the recent wage conference, the majority of the news-print manufacturers in the United States, parties to the arbitration award, have signed agreements with the International Brotherhood of Papermakers, comprising mostly skilled workers.

TRADE CARDS. One inch in column: 52 insertions, £13 10s.; 26 insertions, £7 5s.; 13 insertions, £3 17s. 6d. Proportionate rates for 2 ins.

New Inventions.

Improvements in Web-Printing Machines.

The following patents have been taken by Messrs. Crabtree and Sons, Ltd., and Mr. E. W. Smith: In a web-printing machine transverse register of the web is effected automatically by controlling mechanism for moving the web roll axially by means of a spindle, rod, or the like *a*, which is freely movable in either direction between ball or roller bearings *a*¹, and is adapted to be moved positively

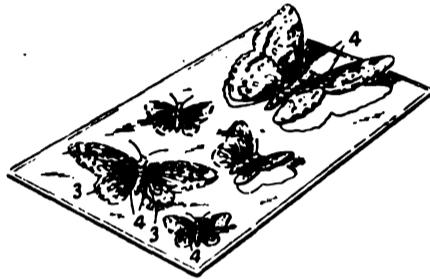

by the web on any lateral deviation of the same in either direction. The rod *a* carries lateral guides *a*², formed with contact members *a*³ for the web, and when the web deviates in either direction it moves the rod *a* with it. The rod *a* is connected by a lever *b*¹ and link mechanism to a two-way clutch, which is normally in an inoperative position. The clutch is thrown in by the lever *b*¹ to connect a bevel driving gear, which is driven by the web to a screw, which moves the web roll axially in the direction required to preserve the correct transverse register of the web. Another patent deals with the tension of the web in a web printing machine, whereby it is automatically controlled by an hydraulic pressure device, the pressure in which is controlled by the tension of the web passing over a roller connected to a piston or diaphragm forming part of the hydraulic device, which transmits a variable pressure to an hydraulic brake on the spindle of the web roll. The hydraulic

brake may be of the kind described in Specification 138,761. As shown, the web is guided by rollers *m*, *n* to pass over a tensioning roller *b* carried in a lever arm *e* connected to a spring-pressed rod *k*, which tends to keep the arm *e* raised. The arm *e* is also connected to a piston *h* of an hydraulic pressure device formed of an upper water chamber *g*¹, connected by a diaphragm to a lower cylinder, in which the piston *h* can move. The chamber *g*¹ is connected by a pipe *q* to an hydraulic brake *o*, the piston of which works in a cylinder constructed similarly to the pressure device described. If the tension of the web is low, the hydraulic pressure increases, and the increased braking effect raises the tension. The pressure of the hydraulic system is controlled by an hydraulic pressure chamber *r*, fitted with a screw-actuated piston *h*.

Pictorial Post Cards.

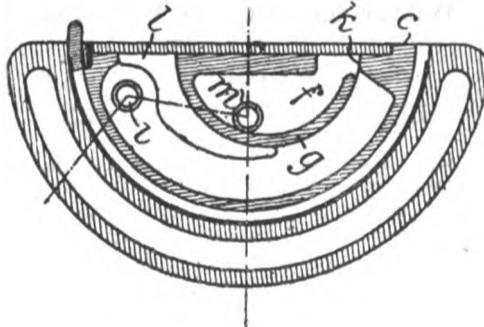

Sir Adolph Tuck and Messrs. Raphael Tuck and Sons, Ltd., have patented an invention in which a post card, correspondence card, letter card, or greeting card bearing a printed representation of a flying bird, insect, or the like, or of a flower, is provided with scoring along the edges of the wing or wings of the bird, etc., or of the petals of the flower, so that the wings or petals may be broken through and bent out from the card to give

the appearance that the bird, etc., or flower is mounted on the card, or that the bird, etc., is on the point of leaving the card. The card may also be lightly scored along the lines about which the parts broken through are bent. In the form shown, the edges 3 of the wings of butterflies printed on a picture post card are scored and the lines 4 about which the wings are bent are lightly scored so that the wings may be bent up as shown.

Casting Stereotypes.

In an invention patented by Mr. C. Winkler relating to a stereotype mould, the water jacket for cooling the back of the cast plate is divided by a partition wall into two chambers, the water being admitted to the chamber adjacent to the plate and then pass-

ing through an opening in the partition wall into the other chamber, from which it overflows. The hollow core *c* is divided by the partition *g* into two chambers *f*, *l* in communication through the opening *k* in the wall *g*. A valve-controlled inlet pipe *i* is arranged at the end of the chamber *l* remote from the metal inlet opening of the mould, the water escaping from the chamber *f* through the outlet *m*.

YOU can get into line with the best by installing a **MIEHLE** two-revolution press.

IT IS BUILT WITH A MICROMETER,
 but does not need a micrometer to run it.

When you have a Miehle you will be able to print black and three-colour work equal in quality to the best produced by any other printers in the country—and good printing commands good prices.

The best advertisement for the Miehle is the Miehle. It has been the means of assisting many hundreds of printers to establish their businesses in the front rank, and what it has done for them it can do for you. The Miehle has, over and over again, proved that the best is the most profitable.

Shall we send full particulars?

The Miehle

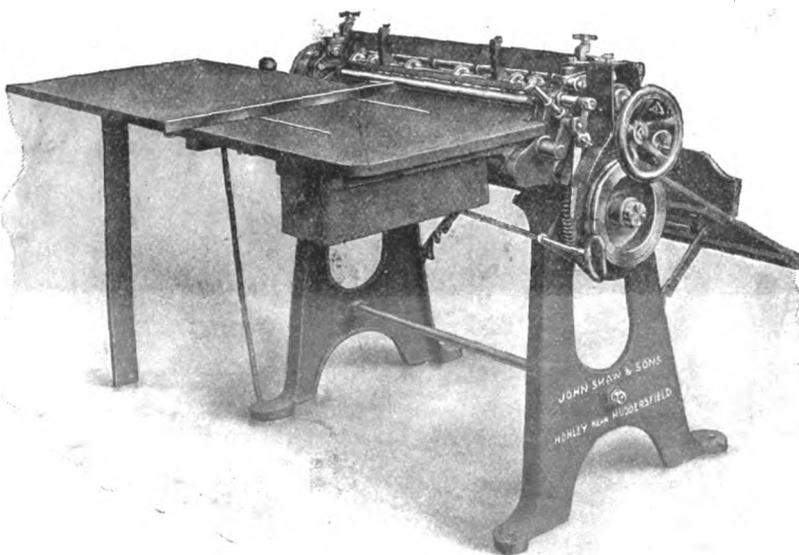

is manufactured only by

Special Export Issue 4d.

Export Notes and Comments.

Export Outlook Brightening.

THOUGH there has been no boom in British export trade, and there is no indication that a boom is lying ahead in the immediate future, yet the international trading situation has moved many points nearer to normality since the last quarterly export issue of the *British and Colonial Printer and Stationer*. One of the most encouraging features is the rise in the value of the pound sterling as against the American dollar. This brings some relief at least from the overwhelming odds which the depreciated Continental exchanges have placed against British export trade. The improvement of British credit means an important gain for the home exporter and the future holds promise of further advancement towards equality of footing with German and other competitors, whose rivalry has been and is so important a factor in overseas trade.

Opening Out New Markets.

THE need for going out "bald-headed" for foreign markets during the slump is emphasised by the British Chamber of Commerce of Turkey and the Balkan States which stresses the necessity of advertising, particularly during periods of depression, if it is desired to open up new markets or to develop old ones. In confirmation of this it has been stated authoritatively that during the recent trade slump at home, those articles which have been extensively advertised have suffered least. A useful warning is given to traders who imagine that their goods will sell in foreign markets on their merits. Those who entertain such views are labouring under a delusion. Therefore, states the report of the British Chamber of Commerce referred to: "Advertise, and advertise extensively, if you wish to develop your trade in foreign markets. Advertise in every possible manner to catch the importer's eye as well as that of the prospective buyer."

Lamson Paragon Enterprise.

AN example of how to go out for foreign business is provided by the Lamson Paragon Supply Co., Ltd. They have already subsidiary undertakings in Australia and elsewhere, operating with success. They are now opening a shop at Calcutta, which will be the headquarters of the new subsidiary company, "Lamson Paragon (India), Ltd." This, it is hoped, will conserve and increase their valuable trade in India and the Far East. Businesses have also been opened in Monte Video. During the past year the managing director travelled over 15,000 miles, visiting the United States and Canada, and renewing relationships with associated companies in those countries. In addition, he visited various cities on the Continent, and everywhere he found a fine spirit of co-operation, goodwill and loyalty to the mother country. This close touch between the centre and the

branches doubtless explains the success of the company in a period of severe depression.

Catalogues Wanted in Australia.

IF the news which comes from Australia is correct there should be a big demand for printing catalogues, according to the London correspondent of the *Manchester Guardian Commercial*. Australian manufacturers are crying out for catalogues of English goods and other details of our manufactures. At the same time we are told that American manufacturers are pouring literature of this sort into the Australian cities, and as a result are getting a good deal of business which the importers would prefer to send to this country if they knew where to get the goods. It is quite evident that greater use should be made by British printers of all facilities for securing Commonwealth orders. An important channel for reaching colonial customers is afforded by trade journals, especially those which, like the *British and Colonial Printer and Stationer*, issue special editions at specified intervals for colonial readers. The correspondent above referred to mentions that in many items American catalogues and trade journals are the only publications which the Commonwealth importers get in the English language, and it is pointed out that business men on this side should realise what this means to American trade. This criticism, of course, does not apply to the printing and paper trade journals, since readers both of the *British and Colonial Printer and Stationer* and of the *World's Paper Trade Review* are fairly numerous in the Commonwealth; the fact remains, however, that greater use of the facilities which the printing press of this country and the trade journals mentioned afford ought to be accepted. With the tide of business turning, in Australia as elsewhere, the time is opportune for placing before Australian customers the latest printing devices.

New Zealand's Preference.

DESPITE the advantages possessed by some rivals of the British exporter in finding a market in New Zealand, there is undoubtedly a very strong determination among New Zealanders to give preference to British products when these can come anywhere near the goods of the other competitors in respect of comparative prices. A striking instance of this occurred recently when the Prime Minister of New Zealand was asked in the House of Representatives if a contract had been given for hydro-electrical supplies to a British firm, notwithstanding a tender from a New Zealand company handling American machinery for £14,000 less. Mr. Massey replied that the difference was £13,000, which would be reduced by the Preference tariff to £7,000. The Cabinet, he added, had decided to take British machinery manufactured by British workmen. This generous spirit toward the Mother

Country should be of assistance also to exporters of printing machinery and other supplies for the printing trade.

A Tasmanian Opening.

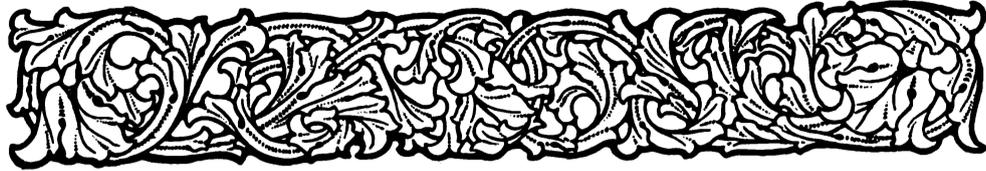

WE note from its annual report that the Government Printing Department of Tasmania is feeling the need for expansion and for the purchase of new machinery and other supplies to cope with increasing demands. The report states: "The necessity for renewing the linotype and lithographic plants has become insistent. During the past year it has been impossible to compass the work in the linotype branch without overtime, which is false economy, inasmuch as it increases the cost of production, and is injurious to the health of the linotype workers. The lithographic plant, after nearly 40 years' service, has outlived its usefulness, and cannot be expected to justify itself in the light of modern methods." We doubt not there must be numerous printeries in the Antipodes which in this post-war period feel urgent need for the displacement of out-of-date plant, and the favour with which British supplies are regarded should encourage exporters to exert their best efforts to meet the need.

The South African Outlook.

THE printing trade in South Africa is by no means enjoying a boom period at the present time, and there does not appear much likelihood of any great immediate increase of demand for supplies in this part of the world. The Rand labour troubles have, of course, had a serious effect in depressing trade all round, and in this the printing trade had suffered its expected share. Prices are very low, wages reduced, and a tendency to hand-to-mouth buying is not surprising in the circumstances. A feature which gives some ground for optimism in looking for trade expansion is the fact that money is plentiful and the bank rate of interest the lowest since 1914. The worst of the slump is now felt to be over, and the keen competition that exists gives special attraction to any cost-reducing machinery or other supplies that can be offered.

Opportunities in India.

TRADING conditions are gradually smoothing out in India, and opportunities for British supply houses are improving. This is not only the opinion of those who have dealings with India from this side, but it is confirmed by Mr. E. W. Petter, chairman of the executive of the British Engineers' Association, who has recently returned from a tour in that country. Giving impressions of his visit, Mr. Petter observes that industrial India is developing very rapidly. An interesting comparison is made with labour conditions which exist in the Empire with those which obtain in this country and the competition which is thus

represented is described as serious. The Indian operative, it is pointed out, has no restriction on output and no trade union regulations. Accordingly, he soon becomes skilled in the use of machinery and he then goes ahead working it to the limit of its capacity. With the developments which are taking place there ought to be a steady growth in the market for printing and paper supplies, and it behoves our manufacturers in this country to pay due attention to the Eastern market. An exchange correspondent at Bombay says there is a demand for machinery of almost every description. New printing machines are not available and second-hand machines are fetching good prices.

Difficult Market in Malaya.

THE market for printing supplies in the Federated Malay States is, like the general market in this part of the world, a particularly difficult one. During the latter part of 1921 large shipments of German goods found their way to the local market *via* Java, and all were readily snapped up, the favourable exchange to Germany enabling goods to be sold at much below British manufacturers' prices. Prices remain extremely low, and it is hard to find much ground for optimism in the outlook—at any rate up to such time as the exchange problem shall have approached more nearly to rectification.

Paper Goods in Turkey and the Balkans.

THE stationer and paper merchant has no small interest in the Near East markets. It is shown by a return of the imports cleared through the Constantinople Customs that during the past year paper and manufactures represented 3,399 (in thousands of Turkish pounds), thus being entitled to be placed among the principal main groups. Under the same heading the exports of local produce amounted to 1,409 (thousands of Turkish pounds), being again among the main groups. The conduct of business in the Near East is a delicate operation, but experience and study can achieve much.

The Market in Poland.

MANY eyes are turned now to the vast markets opening in Eastern Europe. A special article in the *Board of Trade Journal* deals with the beginning of the industrial era in Poland. Of particular interest are the writer's observations as to the position of British goods. "British goods are, in most cases, more expensive (than those of other countries), the difference being sometimes as much as 50 per cent." This alone, apart from other considerations, hampers business with Great Britain to such an extent as to make it practically impossible. Germany is in a peculiarly favourable position, both as regards exchange and geographical situation, to push trade with Poland, but the writer is evidently of opinion that Great Britain could do more to accommodate the requirements of Polish traders. "British goods are popular owing to their superior quality, and, given equal conditions as to price and terms of payment, preference would be given to them."

Chinese Markets.

ATTENTION is once more drawn to the splendid opportunities which China offers as a market for British goods, and printing supply houses are naturally interested in view of the great developments which are taking place by the absorption of western ideas. The publication of books and newspapers and the use of the printing art are growing, with a consequent demand for paper and printing facilities. According to Mr. T. B. Partington, who is well acquainted with conditions in China, that country, now receptive to all the West has to offer by way of modern science and industrial achievement, presents to the British merchant and manufacturer greater potentialities than any other section of the world. British business methods are held in high esteem in a country where commercial honesty stands high. It is pointed out, however, that conditions of eastern trade are changing and are becoming much more complicated than in the past. Moreover competition is keener. And again we find the German making a bid for the custom he enjoyed before the War. So far as the paper side of the business is concerned, British firms are paying careful attention to the vast markets in the East, and it will doubtless repay printing supply houses to study conditions and opportunities in that direction.

A D.O.T. Suggestion.

ARISING out of the correspondence in *The Times* on the question of Chinese trade, "F. H. C." criticises the Department of Overseas Trade and makes a suggestion which might have something in it. He asks: "Until our Department of Overseas Trade (whose staff, according to the Geddes Report, consists of a huge establishment of 396 persons, with offices in London, costing over £120,000 a year in salaries alone) realise and will take advantage of the experience and advice of commercial men who have spent most of their lives in China, and not listen to officials who have never visited the country and know nothing whatever about its customs, exchanges and general methods of trading, how can we expect to go ahead?" Accordingly the writer goes on to suggest that the Department should open a Chinese office where the merchant or trader could get "true information" regarding conditions in China "without a lot of patronage and red tape," and adds that there are many men like himself, who have recently retired from the Far East, who would be only too pleased to give the benefit of their knowledge in a honorary capacity. If this idea were practical, it would apply as well to other markets, and there might be built up a useful advisory service at little cost. But the something for nothing system is not usually a lasting one, and in any case retired merchants would soon lose touch with conditions. Apart from direct individual touch with foreign markets the D.O.T. does provide the best available link between the home manufacturer or merchant and the markets of the world.

The Palestine Market.

PALESTINE offers a growing market for printed matter and stationery, this being due in large part to the fact that the Zionist movement is taking an average of 10,000 educated Jews into the country each year. The United Kingdom already has a considerable share in stationery orders from that part of the world, though her rivals in Central Europe run her very close, particularly in the cheaper grades of paper and other stationery supplies. Some interesting particulars of the classes of stationery being sold in Palestine are furnished by the American Vice-Consul in Jerusalem. He mentions that cardboard boxes of note paper, white cream, and light blue, 6 by 8 inches, 50 sheets and envelopes to match, sell at 30 piasters each, and boxes of the same size containing 30 sheets and envelopes sell at 20 to 25 piasters. Boxes of larger dimensions are also handled but the above mentioned sizes are the ones most frequently asked for. This paper comes almost entirely from England and France.

Stationery Requirements.

LETTER paper in pads, from England, France, Holland and Italy, 5 by 8 and 8 by 10 inches, containing from 50 to 100 sheets, with a retail price varying from 8 to 25 piasters, has a large sale. The envelopes preferred by the better class native demand are those with an inner lining of thin coloured paper. These envelopes in packages of one dozen sell for from 3 to 7 piasters according to the quality of the paper. The cheaper grades of paper come from Germany, Austria and Czecho-Slovakia in letter and note paper sizes with envelopes, and sell at from 6 to 25 piasters. Pads, in standard sizes, sell at from 3 to 7 piasters. One of the most popular writing papers among the poorer class is a small package containing 10 sheets and envelopes which sell at 5 piasters the package. Official stationery supplies for the administration governing in Palestine are purchased locally, dealers of the country submitting tenders. For this purpose most of the local dealers carry a grade of paper to meet the Government's requirements. Cap size first sheets of a good quality of typewriter paper may be had for 85 piasters a ream; second sheets at 65 piasters; letter size first sheets for 50 piasters; and second sheets at 37 piasters the ream. This paper is imported from England. A cheaper typewriter paper may be found in the shops which comes from Germany and Austria, but the dealers claim that the better quality is usually demanded by their trade. Carbon paper from American and English houses is handled; the American paper sells at 40 piasters for a hundred sheets and the English at 55 piasters for the same quantity; the first being of the best quality and having the largest sale.

Writing Papers Used.

LONG sheets of paper, known as foolscap,

are used by the native business men for commercial and legal purposes. This paper is carried in two grades, that from England, France and Italy retails for 75 piasters per ream; and a cheaper quality from Germany, Austria and Czecho-Slovakia for 30 piasters. The better grade has the largest sale. Great Britain heads the list of importers of writing paper and she improved her position in 1921 as compared with 1920 so far as value is concerned. The value of writing paper from this country taken into Palestine represented something like £10,000 as against £5,000 in the previous year. Italy slightly improved her position while Holland made a considerable advance as also did other countries. Japan and the United States, however, both lost ground.

European Trade Periodical.

THE issue of a new journal of international trade is an event of some importance. With the active support of most of the European Governments, a new periodical (under the title of the *European Commercial*) is to be published under British auspices in Vienna. The *European Commercial*, Sir Ernest Benn (one of the promoters) states, "which will be printed in English, will conduct no propaganda, its mission being simply to bring business men together and to give them facts and figures. To maintain strict impartiality among the various countries, the advertising space will be rigidly rationed."

German Print for U.S.A.

THE United Typothetæ of America has recently sent out a letter calling attention of American printers to the menace to the industry which is being made by printers of Berlin, Budapest and Vienna. The foreign printers are making a vigorous attempt to flood the American market with their products, an example of the *modus operandi* coming from a firm in Budapest, which offers 10,000 circulars, 24 by 36 inches in size, printed in two colours either from type or by offset, to be folded, enclosed in envelopes, addressed and postage attached, thus securing a circulation direct to the customer in the United States, and all for the sum of \$36 in American money. The same job in the United States, of course, would cost several hundred dollars.

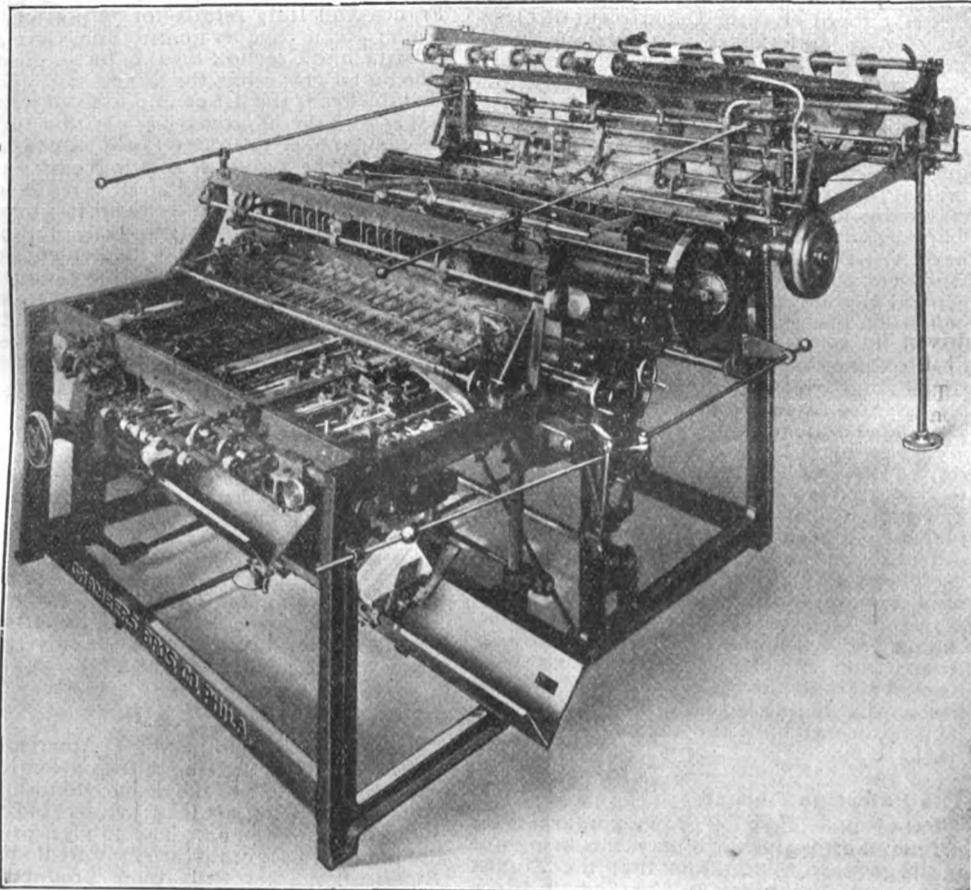

U.S.A. Printing Convention.

PREPARATIONS are well advanced for the third annual convention of the International Association of Printing House Craftsmen which is to be held in Boston, Mass., from August 28th to September 2nd. Efforts are being made to gather together a complete exhibition of machinery and equipment and every standard machine and device used in composing and press-rooms as well as in binderies will be shown in actual operation. A special feature is to be a comprehensive printing exhibit where will be shown a great variety of art, book, catalogue and commercial printing on a practical scale. The convention is bound to be very educational and British printers who can tear themselves from the claims of business which ought to be developing in the autumn will find much at Boston to interest and instruct them. Much as one would like home printers to renew acquaintance with American printing methods, one would rather that business here was so flourishing that they could not afford the time required to cross the Atlantic.

Book Fair at Florence.

LATER news indicates that British exporters are much less adequately represented than expected, at the Florence Book Fair, which opened last month and will continue until the end of July. The Italian trade has naturally the best showing, but German enterprise is also very evident and French printers are well represented. Russia, too, appears to have a good exhibit, which includes not only some fine book work but also some striking posters. British book producers, we regret to hear, have merely sent a small gift of books which is by no means representative of the important place this country holds in the graphic arts of the world. It would seem there is still too much of the insular mentality about British traders, who must make more aggressive use of opportunities for overseas publicity if our export trade is to show the expansion so much desired.

It is rumoured that the price paid for the Inveresk Paper Mills was £360,000, of which £160,000 is in cash and the balance in shares.

Trade Notes.

It is reported from Glasgow that on Monday morning fire destroyed Thompson Bros. printing and box-making factory in Surrey-street, Glasgow, the damage being estimated at nearly £10,000.

LONDON CART-HORSE PARADE.—Fry's Metal Foundry have repeated their customary success at the London Grand Horse Parade, held on Whit-Monday at Regent's Park, two of their single-horse vans, which are so frequently seen in and around Fleet-street, having respectively taken the first and second prize, in their class.

THE Federation of Master Printers, at their Glasgow conference, adopted a resolution, on the motion of Mr. James MacLehose, seconded by Sir William Waterlow, appreciating the very gallant conduct of William Jenner, the printer on the liner "Egypt," in giving up his lifebelt to a woman. The Federation unanimously agreed to send a resolution of sympathy to Mr. Jenner's widow, and forwarded £50 to the relief fund.

THE Prime Minister, in a written answer to Captain G. Terrell, says that any statement to the effect that he controlled a journal of any sort in France, or that a journal controlled by him and expressing his views was circulated free at the Genoa Conference, was pure invention.

CONSIDERABLE interest has been shown by large gatherings at an exhibition of the work of the S.P.C.K. which has been held at the Agricultural Hall, Islington, under the auspices of the Church Missionary Society. During the exhibition the public were able to see the setting in numerous native languages of a large number of tracts and leaflets, which were also printed on the spot by a hand-press. The appliances were kindly loaned for the occasion by Linotype and Machinery Limited and Messrs. Harrild and Sons, Ltd.

A VERDICT of "Death from natural causes" was recorded at a Lewisham inquest last week on William James Meaden, aged 87, of Lewisham, formerly proprietor and editor of the *Shipping List*.

THE death has occurred at Bournemouth of Mrs. M. A. Berry, mother of Mr. H. Seymour Berry, Sir Wm. Berry and Mr. J. Gomer Berry. She was in her 76th year.

"SUICIDE during temporary insanity" was the verdict returned at an inquest at Hammersmith last week on William Henry Piper, 60, the manager of the printing department of the *Uxbridge Gazette*, of Chiltern View-road, Uxbridge.

THE interment of the late Mr. James Smart, who died at his residence, 101, Queen's-road, Everton, took place at Anfield Cemetery. The deceased gentleman, who was in his 91st year, was the doyen of the printing trade of Liverpool, and claimed the proud distinction of having worked the first cylinder machine driven by power in the old firm of George Philip and Sons.

THE paper box-making factory at Fishponds, in which Messrs. E. S. and A. Robinson are interested, is nearing completion.

"AMATEUR WIRELESS," a new periodical, well illustrated and full of information, is published by Cassells at 3d. weekly.

A RECENTLY started Thrift Club in connection with the *Evening Express* (Cardiff) staff has proved an unqualified success, a good deal of which is due to the hard work put in by Mr. Tom Bevan, the hon. secretary and treasurer. In recognition of this, members of the club gathered in the readers' room last week and presented Mr. Bevan with a fountain pen and leather attaché case.

BRITISH TRADE SHIP TOUR.—In view of recent announcements of a projected voyage round the world by the steamship "Orontes," renamed "British Trade," confusion has arisen between this voyage and that arranged for another vessel under the auspices of British Trade Ship Limited, of which Earl Grey is chairman. The statement is issued to the Press that the "Orontes," or "British Trade," has no connection with British Trade Ship Limited, whose proposal is to build a special ship for the purpose of an exhibition and send her round the world in 1924. The intended voyage of the "Orontes" follows very closely the itinerary sketched out for the British Trade Ship, but Earl Grey and his co-directors of British Trade Ship Limited desire to make

it clear to intending exhibitors on the "Orontes" (or "British Trade") that British Trade Ship Limited is in no way responsible for any arrangements in connection with the "Orontes" voyage.

THE Whitsuntide gathering of the Co-operative Union at Brighton discussed the question of a daily newspaper for the co-operative and labour movements, and eventually it was decided to limit the daily paper proposal solely to the co-operative movement.

ASSOCIATED BOOKSELLERS.—Following the opening session of the conference of the Associated Booksellers, which took place at Stationers' Hall on Saturday, a dinner was held at the Hotel Cecil. Mr. John Murray proposed the toast of "Literature," and Sir Henry Newbolt replied. The need for educating booksellers' assistants was emphasised by Mr. J. G. Wilson (London) in a speech delivered at the conference at Stationers' Hall on Monday. Mr. Wilson urged the need of training for assistants. He thought the Stationers' Company might welcome some proposals on these lines, but what the booksellers had to fear was a return to the old discount system. The net system was being threatened by several educational publishers, and the only way the trade could secure a reasonable measure of prosperity was by having a net selling price.

THE Mercantile Press has started business at Cape Town. Extensive arrangements have been made for the execution of all kinds of printing, etc.

UNDER the title of Radford, Adlington, Ltd., the well-known Johannesburg printing houses of Adlington, Ltd., and McKowen and Radford, Ltd., have amalgamated. The managing director is Mr. J. W. B. Radford.

Crisis in the Printing Industry.

Notices Posted: Attitude of the Unions.

Australian Notes.

So far the worst has happened with regard to wages in the printing industry; and according to the decision of the Master Printers' Federation, notices were posted on Monday in printing offices throughout the country.

These notices set out that on and from the pay-day in the week ending on July 1st, 1922, reductions in the rate of wages payable to adult male workers would be at the rate of 5s. per week, while on and from each of the pay-days in the weeks ending respectively on July 22nd, August 12th, and October 7th, 1922, and January 6th, 1923, further reductions would be made at the rate of 2s. 6d. per week. In the case of adult women workers a first reduction on July 1st of 2s. 6d. is notified, with subsequent decreases of 1s. on July 22nd, 1s. 6d. on August 12th and October 7th, and 1s. on January 6th. Proportionate reductions for male juniors, male and female learners, apprentices and piece-workers are also provided for.

"Remarkable Unanimity."

According to information obtained from the headquarters of the Master Printers' Federation, the instructions given by the Federation to post notice have been responded to by the general printing section of the industry with remarkable unanimity. In many areas every employer of trade union labour has posted the notices, and, with the exception of firms employing only one or two workers, the whole country can be said to be quite solid.

With regard to the newspaper position in the country, practically all the mixed offices, news and jobbing, have posted their notices, and an overwhelming proportion of the weekly newspapers and a very large number of the daily newspapers also.

In London practically all the important general printing firms have posted their notices; but owing to the breakdown of the negotiations of the Newspaper Proprietors' Association and the trade unions—due largely to the action of Lord Northcliffe, it is stated—many of the firms printing periodicals have not found themselves in a position to post notices, while there are certain jobbing firms associated with these particular houses who have also not carried out the instructions of their Association. Both in London and the country it may be definitely said that a larger proportion of employers have posted notices on this occasion than did so last autumn.

According to information obtained from the London Master Printers' Association the response to the circulars which have been issued advising the posting of notices has been satisfactory and has exceeded all anticipations. Many firms about which doubts had been entertained came into line with the general membership. In the case of one large firm the Father of the Chapel expressed his surprise that notices were posted when he had been led to understand from his union that nothing of the kind would take place.

A statement issued by Mr. W. Whyte, secretary of the London Master Printers' Association, says: "The result of my letter to members of the 9th inst. has been highly encouraging to the Council, as 80 additional firms have now been added to our previous list of those who had responded to the questionnaire stating their intention to post notices, making a total of over 500 London firms which have undertaken to support the Association at this crisis in its efforts to secure a much needed reduction in costs to pave the way for a revival in the trade. Even this position is improving from hour to hour. Practically all the large employers in the trade are already on our lists as having agreed to post notices. These include—Messrs. Barclay and Fry; Bell Punch and Printing Co.; Blades; Brown and Co.; Clowes; Crescens Robinson; De La Rue; Griffiths; Harrisons; Hazell, Watson and Viney; Kelihers; Knights; McCorquodales; Geo. Philip; Pulmans; Rissen; Roneo; Spottiswoode, Ballantyne; Truscotts; Waterlows; Wightmans; Wilkes, etc., etc."

From the union side we learn that notices have been put up in less than one-third of the offices of the lithographic section of the trade in London.

Unions Watching Events.

In the meantime the unions are carefully

watching events, and a meeting is to be held to-day (Thursday) with a view to considering the position and to take any action that may be necessary. The view of the unions is that when the notices expire the agreement between the employers and the workpeople is terminated, and that the employees will automatically come out. Nevertheless it is hoped, doubtless on both sides, that some amicable settlement may be reached before Monday week.

According to a statement made by the L.S.C. on Monday evening only a comparatively small number of printing houses, less than 20 per cent., have issued lock-out notices to the members of the society, which, by an overwhelming majority, rejected the proposed wage cuts of 15s. per week spread over a period of nine months. Although the agreement expires in a fortnight's time, it is not expected that there will be a lock-out on a large scale.

The opinion held by trade union leaders generally is that the position is very serious, and one representative, questioned as to the possible outcome, said that the future was "in the lap of the gods."

Where Notices were Not Posted.

The position of houses where notices have not been posted is interesting. In the provinces, we understand, the Typographical Association has instructed their members to approach firms who have not posted notices and ask for a definite undertaking that wages would not be reduced in those establishments during the whole of 1922.

It is understood that the Stationery Office has issued a notice to the effect that it will agree to the terms eventually arrived at by the employers' and employees' organisations in the wages dispute.

Lithographers Out in Scotland.

In Scotland, where lithographic members of the Scottish Wages Board declined to negotiate through this Board with the Scottish Alliance at the same time as the letterpress printers, the letterpress printers and bookbinders balloted their members on a proposal of 15s. reduction and this was accepted. A conference was held with the lithographers on May 25th, when they were asked to accept the same terms, but they declined. Consequently the employers posted notices that a similar reduction would be made in lithographers' wages as in the case of the letterpress members of the trade. The members of the Lithographers' Union refused to accept these terms and they accordingly left their work last week end.

Between 200 and 300 men in Edinburgh are affected; there are 400 members of the Society out in Glasgow, and 50 men are out in Aberdeen. Altogether it was expected that 900 lithographers in Scotland would be idle.

The opinion held among the Scottish lithographers is that the Scottish Alliance of Employers, in ignoring the offices of the J.I.C., have taken up a wrong attitude.

GUMMED PAPER SAMPLE BOOK.—A praiseworthy bit of enterprise stands to the credit of Messrs. Samuel Jones and Co., Ltd., of Bridewell-place, London, E.C. 4, who send us a large and handsome loose-leaf volume containing an extensive assortment of specimens of the non-curling gummed papers for which this firm is famous. Bound in attractive cloth boards and with decorative jacket and endpapers, the volume contains a number of articles of interest to users of gummed papers, and the specimen pages (many of them elaborately printed to show the results the papers are capable of) are made readily accessible by the use of substantial thumb indexing to distinguish the different classes.

IMPORT duties on printing papers entering Kenya Colony will be reduced from 20 per cent. *ad valorem* to 15 per cent. if the recommendations of the Special Committee on Tariffs are adopted.

The Federation of British Industries announce that, following on the successful opening of the Brussels Sample Room, arrangements have now been completed for setting up a similar Permanent Exhibition of British Samples in Copenhagen.

Company Reports—Effect of Industrial Depression—Australian Mill at Geelong Closed—Cumberland Mills' Breakdown—Fielding Return Preference Capital—Lamson Paragon Above Par—Paper Contract Action—Newspaper's Record Circulation—New Companies.

(From Our Sydney Correspondent)

AN interesting review of the position of various Australian paper and allied companies recently appeared in the *Sydney Daily Telegraph*. Referring to the Australian Paper and Pulp Co., it is said:—These shares have declined in market favour, owing to the reduction in the December, 1921, half-year's dividend to 8 per cent. p.a. and also the closing down of the Geelong mill through lack of orders. The payment of 10 per cent. p.a. for the company's first period of 10 months to June, 1921, was decidedly liberal, for it absorbed over £62,100 of the profits, and left only £10,800 for reserves. At the same time the company's earning power was not fully extended last year, for the new mill at Fairfield had only been started. Still the reduction in the dividend rate suggests that the profits from this mill so far have not prevented some decline in the total net earnings. The set-back may be only temporary, or it may be that the directors think 8 per cent. p.a. sufficient as an interim dividend, pending the final result of the year's operations. Still, other Australian paper mills have not been doing well of late.

CONCERNING the Cumberland Paper Board Mills, Ltd., we have these comments: In June, 1920, year, this company paid a dividend of 14½ per cent., but in September, 1920, was reconstructed, and in the June, 1921, year made a net profit of £40,800 (£27,400 in 1920), paying a 10 per cent. dividend, and distributing £30,100, over £13,000 more than in the previous year. Since then business has been unsatisfactory. The continued slump in prices made it necessary to write down stocks. Moreover, for some months the company has experienced a bad manufacturing period, due to industrial depression, while there was a serious breakdown at the mills, which laid the company's large machine idle for some weeks. To these factors the directors attribute the decision not to pay any interim dividend for the December, 1921, half-year on any of the shares. They say, however, that there is no cause for anxiety, as "the company is financially sound, business is much more active, and trade prospects more satisfactory."

THE first preference shares at June, 1921, were secured by tangible assets of £7 17s. per £1 share, the second by £4 5s., and the third by £3 9s. 9d. Consequently the capital in each class appears to be reasonably safe. The minimum dividend in each class is 8 per cent. cumulative preference. The total dividend charge is about £13,100 (first £3,200, second £5,100, and third £4,800, ranking in order of preference), which is less than the net profits in any one of the past four years. These shares, therefore, appear to be worth some consideration. The ordinary shares are not attractive; their tangible assets value is almost par.

J. FIELDING AND CO., LTD., cardboard box-makers and printers, we are told, was reconstructed in 1920, and, though its September, 1921, year's net profit, £17,700, was £19,800 below the old company's 1920 earnings, the 8½ per cent. dividend paid by the new company gave the shareholders £2,100 more than the sum of £7,500 received in 1920.

THESE shares appear to have merits, it is added. Notwithstanding the heavy fall in the 1921 earnings they were still £6,700 over the preference and ordinary dividend charge of £11,000, and there is therefore a substantial margin for a decline before the ordinary rate of 8½ per cent. could be threatened. Moreover, the preference charge will soon disappear, as the preference capital of £20,000, carrying 7 per cent. per annum, is to be returned to shareholders. Furthermore, the company is strong financially. It owed only about £5,200 in September, 1921, and had liquid assets of £42,400. The fact that £20,000 cash is to be paid away to shareholders is

proof that the position is now better still. Unless a higher dividend is paid the shares are dear at 23s. for the yield, £7 8s. 11d. is not sufficient for shares in a manufacturing company.

THE £1 shares of Lamson Paragon, Ltd. appear to the writer to be highly valued at 2s. 6d. above par. The net profit of £6,590 for October, 1921, year was £8,600 below that of 1920, and moreover was about £900 below the 10 per cent. dividend. The reduction in net profit was much greater in proportion than the decrease of £2,400 in the gross profits to £25,300, suggesting a heavy increase in overhead expenses. The directors reported that "the year 1921 has had to carry the burden of a greater fall in paper than could have been anticipated," and further that "all stocks have been written down to present day values." As the current year may reasonably be expected to be free from any further great fall in paper, the writing down of the stocks should enable the company to show improved profits. There must, however, be a marked increase if 10 per cent. dividends are to be comfortably maintained, and a reasonable sum added to reserves.

In the Sydney Courts, Carmichael and Co., Ltd., sued to recover £11,715 16s. from the New South Wales Country Press Co-operative Co., Ltd., under a contract for the supply of 403 tons of news printing paper. The defendant company did not appear, and the jury gave a verdict for the amount claimed.

AN audited statement concerning the circulation of the Sydney Daily Sun shows that new records have been reached during the March quarter. The highest net sales figure is 167,196 on March 12th, followed by 166,345 on March 26th. The Weekly Sun on the latter date attained a record sale of 182,676 copies.

THE New Outlook Publishing, Ltd., has been registered with a capital of £1,000 in £1 shares. Objects: To acquire, print, publish, and circulate a magazine to be called the *New Outlook*, or any other magazine or publications; to carry on the business of printers, engravers, etc.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIP DISSOLVED.

R. H. Parry and G. E. Yates, machine rulers and bookbinders, 30, Peters-lane, Hanover-street, Liverpool, under the style of Parry and Yates.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

A. G. E. Ryman, The Hut, Reading-road, Fleet, Southampton, stationer.

Bankruptcies, etc.

THE INTERNATIONAL PRESS SERVICE, LTD., 392, Strand, W.C.—A compulsory winding-up order was made against this company in May, 1921, and the report of the official receiver and liquidator has now been issued to the creditors and shareholders. The accounts show liabilities £799 against assets cash 8s. 9d. and an unpaid call £3,740 estimated to produce "nil." The deficiency to shareholders is estimated at £4,560. The company was formed in February, 1919, as a private company, to carry on business as news distributors and agents, printers and publishers. The nominal capital was £12,500, divided into 10,000 preference shares of £1 each and 50,000 founders' shares of 1s. each. In April, 1919, the company agreed to acquire from the Anglo-Russian Press Service, Ltd., the right of publishing the "Sons of Britain Album" and the advertisement rights in connection therewith, the consideration being the payment to the vendors, out of the profits to arise from the publication of the Album, of £20,000 and 10 per cent. of the net profits. The Album was intended to be a pictorial biography of those who earned distinction during the late

Situations Wanted.

COMPOSITOR (T.U.) requires situation on Piece; used to Trade Papers and Tabular Work; quick, clean; 5 years' war service; age 30; good references.—Box 13945.

COSTING and Estimating Clerk and General Assistant in Jobbing and News Office. Advertiser recommends capable man (aged 25) for position as GENERAL ASSISTANT in Management, both Office and Works, to anyone who has suitable vacancy.—Fuller information on application to Box 13962.

ENGINEER'S DRAUGHTSMAN, internal combustion, etc., car experience, desires Position where artistic talent would be of service; ability for advert. lay-out and commercial art.—Address Box 13952.

war. The steps for the publication of the Album did not proceed beyond the preparation of "dummy" copies and the advertisement of the book. In the opinion of the official receiver the failure of the company is due to mismanagement and to the application of its funds otherwise than in the interests of the company.

THE ARUNDEL STUDIO, LTD., 53, Old Bailey, E.C.—Under a compulsory winding-up order made against this company last December accounts have been filed showing liabilities

LETTERPRESS OVERSEER (32) desires change, present position 5 years (12 hands); Charge Composing, Machine and Warehouse; Estimator, thoroughly practical; C. and G. Certificates.—Box 13930.

MACHINE MINDER (Michles), Single, Twin or Trip Tandem Machines, well up in best class Work, Black and White and Colour Process, desirous of change; single, and with good references; Cross Feeder knowledge, etc.; society.—Box 13931.

MONO CASTER & KEYBOARD MECHANIC, 20 years' experience, healthy, as Caster—Charge or above; prize awards 1906 and 1907.—Guest, 41, Saltoun-road, S.W.2. 13961

YOUNG MAN (20), expert Shorthand, knowledge Economics, Literary, seeks Journalistic opening.—Box 13941.

Agencies.

COLONIAL HOUSES desiring AGENTS or REPRESENTATION in the United Kingdom are invited to communicate with J. J. Robson and Co., Manufacturers' Agents, Staple Inn Buildings (South), 335, High Holborn, London, W.C.1. 13960

Machinery for Sale.

FOR SALE.—An ALL-SIZE MARINONI PERFECTING WEB PRESS, to print a sheet 40 by 50 in.; minimum cut 22 in. and by 1/4-in. up to a maximum of 40 in.; width of web 40 in.; speed 4,000 to 5,000 per hour; open delivery; in good running condition.

A DRUM-CYLINDER FLAT BED PRESS by Messrs. Hoe and Co.; will print a sheet 40 by 60 in.; pyramidal inking; speed 1,200 per hour; in excellent condition.—Full particulars and prices from Temple Press, Ltd., 7-15, Rosebery-avenue, London, E.C.1. 13919

FOR SALE, ONE 14-in. PATENT SILVER-LOCK TABLE BRONZING MACHINE; maker, Gadsby, London; price £25.—For further particulars apply, Cadbury Bros., Ltd., Engineers' Office, Bournville. 13956

FOR SALE.—TWO Second-Hand GAS ENGINES; one 1 1/2-h.p. (Crossley), can be seen running, the other a 1 1/2-h.p. (Gardner). Offers invited.—"Reporter" Office, Harmer-street, Gravesend. 13959

SECOND-HAND LINOTYPE for sale; Model No. 1 converted in 1915 to Model No. 4 Pattern with regard to Vice and Jaws; Double-letter Machine, Universal Mould from Nonpareil to Pica, equipped with Two Magazines and Two Sets of Matrices; completely overhauled and remodelled in 1915, and has been very little used since.—Offers should be sent to Box 13954.

Partnerships and Financial.

WORKING PARTNER, PRINTING AND STATIONERY.—An opportunity offers for acquisition of a Third Share in old-established sound and profitable South African Printing and Stationery Business. Capital required about £12,000, according to valuation. Good salary and share profits. Genuine concern.—Apply to "South Africa," c/o Martin Farlow and Co., 50, Gresham-street, Bank, London. 13957

YOUNG GENTLEMAN, with capital from £1,000 to £1,500 to INVEST, and anxious to enter business, will find an opening as WORKING DIRECTOR with old-established Printing House in Yorkshire.—Write, in first instance, Box 13946.

Miscellaneous.

COLONIAL NEWSPAPER CUTTINGS, dealing with the Paper, Printing, Stationery and Allied Trades, are wanted by Advertiser.—Communicate, stating terms, to Box 13882.

WANTED, THREE or FOUR-COLOUR BLOCKS (Odd or Series), suitable for Wall Calendars, size about 6 by 8 in.—Price and colour-proof, to L. F. De Vos and Co., 37, Canal de l'Amidon, Antwerp. 13953

£2,177, assets valued at £202, and a deficiency of £3,275 with regard to shareholders. The official receiver and liquidator reports that the company was formed in March, 1920, with a capital of £3,000, to carry on business as dealers in copyrights, lithographers, designers, etc. The failure is attributed to lack of support, excessive expenditure, and to the speculative nature of the business. In the opinion of the official receiver and liquidator it is largely due to the excessive amount of salaries paid.

Aug. Brehmer's (British) Successor

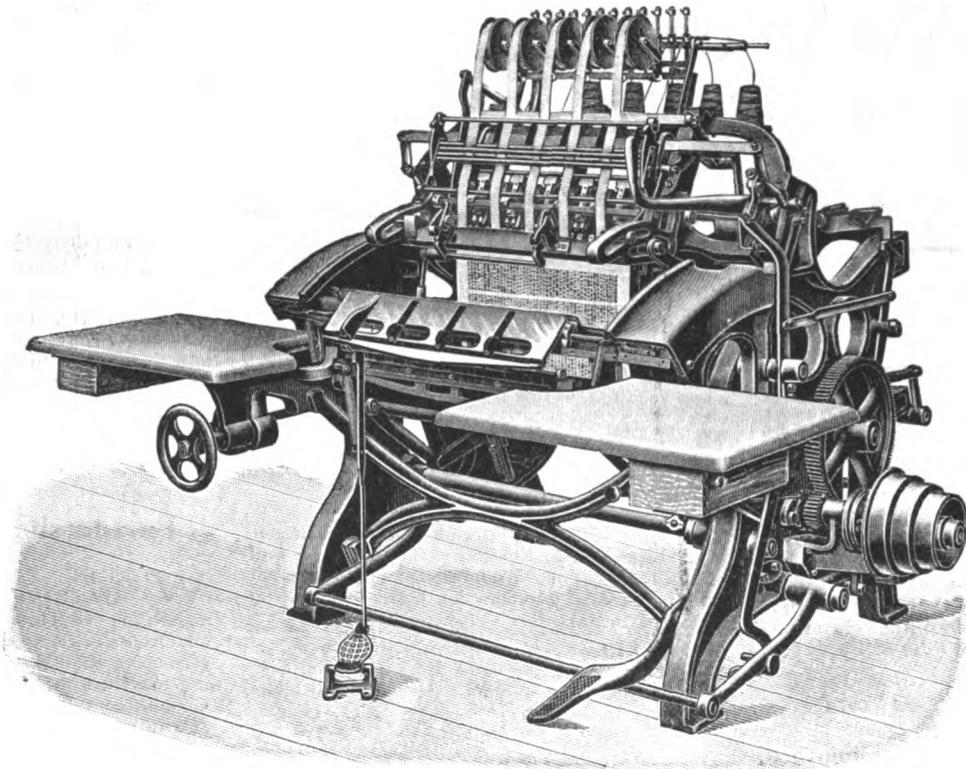

THOMAS McAULLIFFE.

Wire Stitching Machines for every purpose.

Thread Stitching and Knotting Machines for School Exercise Books and Calendar Work.

Thread Book Sewing Machines for Sewing Light Letterpress and Heavy Account Books.

Glueing Machines, End Sheet Pasting Machines and Folding Machines (Hand or Automatic Feed).

No. 33 Thread Book Sewing Machine.

THIS Machine is intended for sewing the heaviest Account Books, Letter Copying Books, Guard Books, etc., and is made in two sizes, one to take books up to 22 in., and the other up to 28 in. in length. According to size, one to six books may be sewn at one time and cut asunder afterwards, each separate book having kettle stitches at its ends and also between the tapes. Speed of Machine, according to size of work, is up to 35 Sections per minute.

What Our Manufacturers are Doing.

British Machinery and Other Products that
Merit the Attention of Overseas Buyers.

Bag Machines: Bumsted and Chandler, Limited.

Messrs. Bumsted and Chandler, Ltd., have recently incorporated many improvements in their well-known patent bag machines, and they claim that these are now as mechanically perfect as it is possible to make them. All gear wheels have machine-cut teeth; sprocket wheels and chain have replaced pulleys and leather belting, and the result is a very reliable unit producing bags equal to the best hand-made with great regularity, whilst the amount of power required to drive the various machines has been considerably reduced. A new departure is the supplying of a printing attachment to work in conjunction with the bag machine, thus producing perfectly shaped and printed bags direct from the paper roll in one operation, a combination of very high economic efficiency. The machines are made in five standard sizes, covering a range from a tube to contain 60 pennies up to a 28 lb. sugar bag. The smaller machines for the production of penny bags and bankers' cash bags are provided with a very strongly designed and efficient perforating gear when so required. The board of directors of Messrs. Bumsted and Chandler, Ltd., has recently been joined by Engineer Commander H. B. McGhie, D.S.O. The company's bag machine department has continued to be busy in spite of the general depression in other lines of output.

Machinery: Edmund Bush and Son, Ltd.

Many lines of goods of interest to Colonial users are provided by Messrs. Edmund Bush and Son, Ltd., of Crown Point-road, Leeds, the following specialities manufactured by them are amongst those of special note. Patent Varnishing and Gumming Machines, sizes from double-crown to quad-demy, all fitted with automatic pump, etc., a most reliable machine which gives excellent results. Patent Drying Apparatus—the latest Patent Model invented by Messrs. Bush and fully guaranteed to dry either spirit varnished or gummed sheets. It can be attached to any make of varnishing or gumming machine, and is a great labour and floor-space saver. Sheets emerge from apparatus perfectly dry, which makes it a great boon to the trade, the old method of drying being dispensed with. Well-known printing offices have installed this apparatus, and have expressed satisfaction. Messrs. Bush and Son, Ltd., also supply Ink-Grinding Mills, which they claim to be the most powerful mills on the market in two sizes, 24 in. by 12 in., also 20 in. by 10 in.; and another speciality is their Patent Ink-Mixing Machine—a most useful machine, simple and efficient, whereby old inks are restored to working consistency. It is very economical, and is made in two sizes to mix 75 and 150 lbs. respectively. Readers may have illustrated catalogue and present prices for the asking.

Envelope Machines: Carlaw and Sons.

The well-known firm of David Carlaw and Sons, of 31, Finnieston-street, Glasgow, was established in 1860 and has a high reputation for the manufacture of machinery for the envelope-making and allied trades. They are continually introducing improved features and a handsome loose-leaf catalogue which reaches us from them shows many very attractive items. The Carlaw "Leader" Envelope Folding and Gumming Machine is supplied in numerous variant forms which enable it to meet the needs even of out-of-the-way local demands, such as are sometimes met with in overseas markets particularly. It folds, gums, and dries the envelope complete, and its superior design and construction are such that its output is now stated as 40,000 to 55,000 envelopes a day from each machine, banded by one girl. It can be fitted with variable-speed electric motor drive, and is adaptable for either gas or electric heater. Among other interesting Carlaw manufactures may be mentioned their Adjustable Envelope Cutting Knife, for cutting the four corners of odd sizes of envelope or pocket blanks; also their Envelope Tissue

Lining Machine, for affixing tissues to envelope blanks in a wide range of sizes; their Envelope Creasing and Gumming Machine with treadle, and the Lever Envelope and Label Cutting Machine for hand power. These and other "Leader" machines represent a high standard of British workmanship and should interest overseas as well as home users.

Machinery: Caxton Machinery Co.

Our overseas readers interested in machinery of all kinds for the printing and allied trades should remember that the export trade is specially catered for by the Caxton Machinery Co., of 188, Albert-street, Glasgow. Among this firm's present offers for export are: Platen Printing Machines for treadle and power, from 8 by 5 to 15 by 10; Guillotines, 20 in. upwards hand and power; Wire-Stitching Machines all sizes; Perforating and Paging Machines; also a large range of second-hand machines—Wharfedales, Platens, Guillotines, etc., specially re-conditioned for export.

Bookbinding Machinery: Oscar Friedheim, Ltd.

This firm of specialists in all classes of labour-saving machinery for the printing, bookbinding, boxmaking and stationery trades, whose address is 7, Water-lane, Ludgate, E.C.4, claims to have fully regained the amount of business which they did before the war. The enterprise which the firm have displayed in securing orders from Colonial markets has been considerable since the war period, and this enterprise, taken in combination with the high quality of the appliances produced, has brought the business to a high state of efficiency. The two principal machines which they are placing on the market are the "Simplified Booksewing Machine" and the "Thread Stitching Machine." A special point about the former is that no needle heads are required, the whole of the work being done by a small spiral needle, which can be replaced at a small cost. Another feature about this machine is that it sews to suit the book, and, further, the needle heads being dispensed with, it is possible to put many more stitches into the book and sew over many more tapes in a given size than has hitherto been possible. The machine is made in three sizes, and is capable of dealing with the small pocket diary as well as the largest account book. The "Thread Stitching Machine" is an appliance Oscar Friedheim have had on the market for several years, and has met with general commendation from the principal printers and scholastic binders both at home and in the Colonies. Another important speciality which is handled by this concern is the supply of the latest and most up-to-date envelope-making machinery

Ruling Machinery: John Shaw and Sons.

Overseas and home buyers of ruling machines should bear in mind the well-known Yorkshire firm of John Shaw and Sons, of Honley, Huddersfield. Their machines have long since established themselves in favour with the trade, but the firm is not resting upon past laurels, but using every effort to keep abreast of the times in the demand for increased efficiency in every direction. Messrs. Shaw and Sons inform us that their Striker Pen Ruling Machine has been still further improved, and is still selling very well, there being now over 4,000 in use all over the world. Also they have vastly improved their discruling machine, having brought out an entirely new machine under the name of the "Super-Imperial." For both feint and striking work, they claim that this machine is far in advance of any other on the market. Another important manufacture of theirs is a rotary perforating machine, which they call the "Imperial." This is quite a universal machine, and will do not only the ordinary slot hole perforating, but also the very fine pin hole perforating, scoring, slitting and creasing.

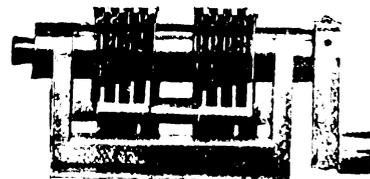

Many of these machines have been sold, and the firm is still busy on further orders. These machines are very simple to work, and are giving great satisfaction to all who have obtained them.

Machinery: Smyth-Horne, Ltd.

Messrs. Smyth Horne, Ltd., the well-known providers of machinery for the bookbinding, printing and allied trades, whose double-page advertisement appears in the centre of this issue, in addition to their usual line now have for sale the American Norwood Section Folder and the Premier Line-up or Register Table. Moreover, their usual Seybold line has been augmented by a new series of Cutters (with a special clamping feature) known as Z 10. Messrs. Smyth-Horne are perfectly willing to show any of these machines to those interested. The firm reports that trade is improving rapidly, and quite a number of orders have recently been placed.

Numbering Machines: E. W. H. Stanleigh.

Home or overseas printers who require numbering machines—either the ordinary variety or numbering machines specially designed to meet the needs of particular classes of work—should not overlook Mr. E. W. H. Stanleigh, of 23, Bartlett's Buildings, Holborn-circus, London, E.C.4. Mr. Stanleigh is turning out British-made numbering machines of reliable quality in a wide variety of designs, the models produced ranging from simple hand machines and others of the more ordinary kind up to very special apparatus thought out to meet problems of the efficient

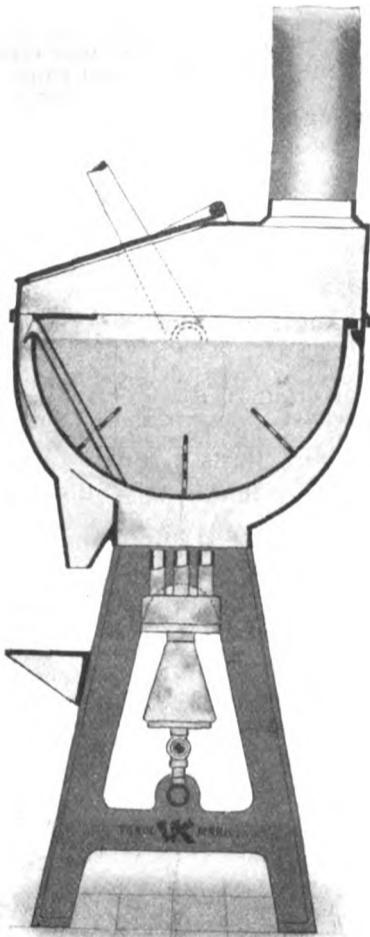

Ticket-Numbering Machine.

and economical numbering of exceptional work. A somewhat out-of-the-way design is illustrated herewith, this being one example of apparatus designed for the individual job—in this case the numbering of tram tickets. A series of numbering machines specially designed for the job in hand and adapted to the particular rotary or flat-bed presses used, will often effect wonderful economies as compared with the hand work so often resorted to. We understand that Mr. Stanleigh is extending his export business, and welcomes inquiries from overseas printers, for whom he is always ready to suggest designs adapted to solve the individual problem of the inquirer. Machines for numbering fibre, wood or metal can also be supplied.

Melting Furnace: Victory Kidder Printing Machine Co.

A great variety of machinery for printers is manufactured at the large Victory Works at Birkenhead of the Victory-Kidder Printing Machine Co., Ltd., whose London offices and showrooms are at 66, Houndsditch, E.1. The machinery dealt in by this firm ranges from printing presses for newspaper and other work right down to the little numbering machines shown in the firm's advertisement in our pages. The machine which we illustrate herewith is the Victory-Kidder Oscillating Stereo Metal Melting Furnace. The unique and simple construction of this metal melting furnace with gas furnace will appeal to all users of stereotyping equipment. The Victory Kidder melting pot has no valves to leak nor other mechanism to get out of order. It is fitted with highly efficient gas burners and the close contact of the flame with the pot, which is entirely enclosed by the outer shell, is conducive to economical heating. The inside of the outer shell is lined with asbestos, which not only conserves the heat

and economises gas, but also prevents radiation and consequent discomfort to the operator. The metal is protected from oxidation by the passage of the non-oxidising fumes of combustion over its surface and by the film of dross and other impurities that remains unbroken on its surface. The metal is poured by simply tilting the pot and is taken from the bottom of the pot, thereby ensuring the use of perfectly clean metal. No skimming or ladling is necessary. The action of pouring

Metal Melting Furnace.

automatically keeps the metal stirred and well mixed. The firm recommends in all cases the attachment of the automatic gas regulator, the function of which is to economise and automatically control the supply of gas, and thereby keep the metal at the correct temperature and prevent overheating. The furnaces can be fitted with oil instead of gas burners if required.

Type Metal: T. G. and J. Jubbs.

Messrs. T. G. and J. Jubbs, of Leeds, the well-known firm of type metal manufacturers, started business in 1859, and now supply a vast number of printers with all they need in the way of metals. Jubbs have the knack of supplying the right composition, and have received many expressions of appreciation. A letter received dated May 27th, 1922, reads "last year we cleared all our metal out, and substituted Jubbs' metal, which has been a great success. We are now ordering a further supply, which we expect to be of the same quality, in order to preserve the good appearance of the paper at the present time." Another firm who print catalogues state they "printed 200,000, and the last run was satisfactory, all the order being accepted." A firm using a monotype argued about the price, but passed the order to Jubbs, saying they preferred their metal, as they did know they were getting a reliable metal, even if they paid more for it. Jubbs also supply leads, clamps, metal furniture and quotations. One of their customers writes: "Please find cheque for furniture re-cast. I am very pleased with the assortment. It does great credit to your knowledge of the necessary requirements of the small printer as well as the large." Anyone wanting good quality material could not do better than write Jubbs, Leeds, for prices and samples. Quality is considered first, prices later. The *Daily Mail*, in their stereo department and lino department, use Jubbs' metal exclusively.

Type: Pavyers and Bullens, Ltd.

Users of printing type the world over will be interested to remark the centenary of the typefoundry firm of Pavyers and Bullens, Ltd., of Cromer-street, London, W.C.1. The present month completes one hundred years' continuous manufacturing and trading, as the founding of the present firm dates from June, 1822, when Benjamin Pavyer, sen., started business on his own account at Ball-alley, Old-street, London. To celebrate the centenary, Messrs. Pavyers and Bullens, Ltd., have issued an attractive brochure, "One Hundred Years," giving an account, illustrated by numerous portraits, of the establishment and early days of the two type foundries—B. Pavyer and Son and George Bullen and Co.—which in 1882 were amalgamated under the present title of Pavyers and Bullens, Ltd., and giving also some particulars of the personnel connected with the firm throughout its history. The booklet reminds the reader of the wide range of type faces, borders, etc., shown in the firm's specimen book. The firm does a considerable amount of export trade, both in type and in printers' supplies generally.

Type: Messrs. Shanks and Sons.

Of interest both to printers overseas and to those at home is the fact that Messrs. P. M. Shanks and Sons, Ltd., of 31, Red Lion-square, W.C.1, have issued a new specimen book of the extensive series of book and jobbing faces produced at their old-established type foundry. They have thus brought together in one volume, and in a simple yet effective manner, the types shown by them in recent years in examples of booklet, advertisement, circular and other leaflets that have been so well-known and appreciated in the trade, as not only showing the type faces, but giving ideas and suggestions for their effective use. The book opens with a fine series of body founts ranging from five point to eighteen-point, and among them we notice a large face series of effective character and a series of excellent newspaper founts, together with examples showing roman and jobbing letters in combination. There are also examples of modern booklet pages that show well the combinations that may be made, and the effects that may be obtained by different sizes of the same type face. Among the display founts that are both pleasing and effective are the Venetian old styles, Gaelic old styles, Plantin old styles and Dolphin and Flemish old styles. These series offer a remarkably wide selection for display work, and the Elstree and Elsmere old style faces will be found very effective for many jobs. In the heavier faces the Holborn series and Crude condensed, together with the Tribune series, are noticeable for their clearness of cut and symmetry of design. Most useful for circular and other work is the Heavy Round Hand, which, indeed, is also suited for attractive and bold booklet jobs where something striking is desired. The specimens in the book also include a fine range of Sans-Serifs, and a series of attractive Clarendon faces. Indeed there is nothing absent that could be wanted by the modern display printer. The end of the volume is devoted to examples of borders and ornaments, of which there is a great variety, many of them being shown worked in colours. Some of the borders are designed for use in newspaper and magazine advertisements, and are most effective and original. Art initials and ornaments for enlivening display work are offered in plenty, and there is a fine series of Royal Arms blocks, in various sizes, that are quite different from the usual thing, and artistic in their drawing. Labour saving rules and music types are also here, the latter being in both staff notation and in tonic sol-fa. The Red Lion-square Foundry has always been noted for the quality of its metal, indeed Shanks' patent hard metal type was well and favourably known in the trade a good many years ago, and the standard then set is still kept up and improved upon. The whole of the very extensive series of book and jobbing founts shown in this new book can be furnished on the exact British-American Standard of .166044 of an inch, which is now the recognised unit for modern types. The book is beautifully printed, as a type specimen book should be, and is neatly bound in red cloth with a portrait of William Caxton blocked in gold on the front cover. Home and Colonial printers, when in want of new and effective faces should not fail to inspect Messrs. Shanks' volume, which offers almost every variety that could be required in the ordinary office.

Printers' Leads: Taylor and Watkinson.

The old-established firm of Taylor and Watkinson, of Belgrave Foundry, Barking-avenue, Leeds, lays claim to being the largest manufacturers of printers' leads in the world. Certainly they are specialists who have built up an immense trade both at home and overseas, and the printer who gets in touch with Messrs. Taylor and Watkinson can rest assured that he is dealing with those whose experience and equipment enable them to give him tip-top service. Machine-cast and planed leads of all kinds are readily available, and the firm makes a special point of careful attention to overseas orders.

Process Supplies: Pictorial Machinery, Limited.

Process cameras, stands, etc., of the highest quality are to be had from the firm of Pictorial Machinery, Ltd., of 7, Farringdon-road, London, E.C.1. A special feature of the firm's work is the making of special cameras or apparatus. Special dark-room cameras are made up to 60 by 40 in. In the firm's repair department they overhaul instruments, put them in new condition and this whether the overhaul be of lenses, prism boxes or any other parts. Messrs. Pictorial Machinery, Ltd., have recently been appointed sole agents for the Gevaert Process Plates which are 12½ per cent. cheaper than any British-made plate. Another important feature is the Douthitt Diaphragm-Control System. That is a feature which is perhaps difficult for the printer quite to understand, but to the photographer or

Douthitt Diaphragm-Control.

process operator who has to make negatives and requires to make them of standard excellence and uniformity, the Douthitt Diaphragm-Control is of great interest as by means of this simple appliance and scales based upon the optical laws of negative making, it is possible to get the very finest quality of negative standardised. One of the largest process houses here has, we understand, just installed eight of these plants, one for each of the cameras, and is about to instal more, whilst the firm is putting in plants with many other of the important houses both here and on the Continent.

Stereotyping Materials: W. J. Light and Co., Ltd.

Very great progress has been made by Messrs. William J. Light and Co., Ltd., of 127, Fenchurch-street, London, E.C.3, particularly in ready-made flongs for all classes of stereotyping, news, fine art and general jobbing—for news work especially. The increasing demand for Light's "Ideal" and "Cleartype" hand-casting qualities and their "Winkolight-Junior" special Autoplate dry flong is adequate testimony to the efficiency of these grades for the particular purposes for which they are expressly made. Light's "Photo-Tone" Flong for magazine and high-grade colour work has created a great impression, showing that what can be done by electrotyping can be done equally well by the "Photo-Tone Stereo Process" at one-fifth of the cost and proportionately quicker. For general jobbing work the R.M.Q.D. (Ready-Made Quick Drying) and "Ideal-A" qualities will be found to be exceptionally efficacious and easy to work. In addition to these specialities of their own make and moulding accessories for use with all classes of flongs, Messrs. Light and Co. sell their special "Everwear" Oil and Ink-Proof Press Rubbers and act as selling agents for some of the best makes of platen machines and for "Winkler" Stereotyping Appliances, which, for efficiency and time and labour-

saving, are to be very highly recommended. Flat and Rotary Printing Machines for letterpress, offset and fast-running news of the well-known M.A.N. types are also under Light's selling agency care. Readers can have every confidence in adding the name of W. J. Light and Co., Ltd., to their buying lists, if indeed they are not already in communication with them.

Printing Ink: Lorilleux and Bolton.

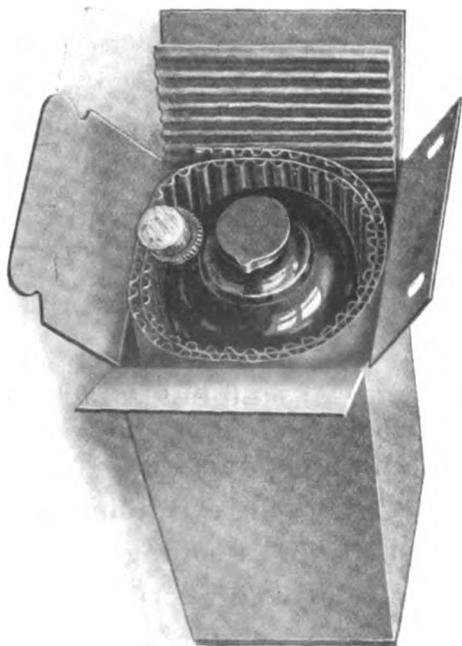

From Messrs. Lorilleux and Bolton, the ink manufacturers, of 31-34, Cursitor-street, London, E.C.4, we hear that export trade shows distinct and welcome signs of recovery after the recent depression. This applies not merely to those countries with whom trade facilities are more or less normal, but also to markets which are adversely affected by the rate of exchange. It is evident that the demand for British quality is as strong as ever, even where the difficulties of trading would appear to be almost insurmountable. Messrs. Lorilleux and Bolton are continuing their policy of manufacturing their products specially to suit local climatic conditions, because they believe that it is only by studying the varying requirements in this way that distant markets can be permanently held. There seems no reason to suppose that this revival in overseas business is other than permanent, and they are planning for the future with every confidence.

Poster Inks: Slater and Palmer.

Some specially attractive lines in letterpress poster inks are being produced by Messrs. Slater and Palmer, of 4, Wine Office-court, Fleet-street, London, E.C.4, who send us a series of leaflets showing their effective use in a large variety of colours. The firm informs us that the prices offered are 1s. 6d. per lb. for 6 dozen, 1s. 9d. per lb. for 3 to 6 dozen (one colour in one delivery), 2s. per lb. for smaller quantities—but violet, mauve and magenta being 3d. per lb. more than above. Carriage paid for orders above 20s. in value.

Writing Ink: Polygon Manufacturing Co.

Those on the look-out for writing ink of superior quality would do well to test the merits of Polygon Indelible Ink, made by the Polygon Manufacturing Co., Ltd., of 40-46, Banner-street, London, E.C. The makers are prepared to demonstrate to those interested, by actual tests, the validity of the high claims they make for this ink. They affirm it to be an ideal ink for general writing purposes, and

Ink Packed for Dispatch.

entirely satisfactory for use in fountain pens—absolutely non-fading, non-gumming, non-corrosive, and giving a writing which is permanent and not liable to be affected by either acids or water. This ink is conveniently available in special Pen-Rack Pattern Ink-wells of 1 oz. and 3 oz. and in 8 oz. to 40 oz. bottles. A sample bottle is illustrated herewith.

Roller Composition: "Durable" Printers' Roller Co.

A matter of vital import to the printer overseas, as to the printer at home, is the quality of the composition used in his rollers. Those who experience any difficulty in this respect can find in the "Durable" Printers' Roller Co., Ltd., of 14, Charles-street, Hatton-garden, London, E.C.1, a firm of specialists in printers' rollers and roller composition, whose long experience and high repute mark them out as particularly fitted to give advice and provide supplies in connection with rollers for printers all over the world. The "Durable" company have been making rollers since 1868, and by their accumulated knowledge of the fitness of materials for special climates, and by the scrupulous scientific care directed to the maintenance of a reliable and uniform product, they have built up a world-wide export trade in addition to the extensive business done in this country. A useful hint to those using rollers in hot climates is found in the fact that the "Durable" Roller Co. deprecates the tendency of printers to think that a composition for use in a high temperature must be hard to the feel. Many an overseas client must, we think, have been first surprised and afterwards delighted at the "Durable" people's insistence that the beautifully elastic, resilient composition offered was suitable, by reason of the scientifically balanced choice of its ingredients, for use where a much harder material had been customary. The advantage of the softer composition is obvious, as the quality of printing and the durability of rollers depends so largely on the resilience of the rollers used. The "Durable" composition can be re-melted several times without the loss of its efficiency, and its elasticity necessarily means longer life to rollers, the wear on which is occasioned not only by friction but also by the continually alternating compression and stretching to which the roller surface is subjected in its working.

Channon's Patent Glue.

A superior glue that is of interest to bookbinders and others both at home and overseas is that produced by Channon's Patent Glue, Ltd., of 3, Cloak-lane, London, E.C.4. The makers have given us very striking evidence of its high quality, it having been submitted to the severest tests in Government use and having come out with flying colours. A point of special importance to bookbinders is the fact that the makers have been successful in adapting it for use with the Smyth-Horne bookbinding machines in connection with which it has proved entirely satisfactory. Overseas readers will note with special interest that it serves well under troublesome climatic conditions, even in the tropics. It is now in use in Burmah, Straits Settlements, China, etc., and has proved immune to the insect enemies of books, such as white ants, as well as to the climate of those countries.

Mr. J. H. MERRINGTON, following a connection with the firm for the last twenty-nine years, has taken over, as from June 1st, the old-established business of Messrs. George Forrester and Co., papermakers' agents, 91, Queen Victoria-street, London, E.C.4. Mr. Merrington, who will trade in his own name, has had transferred to him the following agencies:—Hamang Pappirfabrik, Nykvarus Pappersbruks, Saevareid Karton and Pappfabrik, and Vestfos Cellulosefabrik, whose specialities have a good name on the market.

Paper in New Zealand.

Depreciated Currency Surtax.

In an official notice issued by the New Zealand Customs Department, writing and printing papers are included among those upon which special duties are imposed when imported from countries having a depreciated currency. There is also included wrapping paper, all kinds, glazed, mill-glazed, or unglazed, including browns, caps, castings, sulphites, sugars, and all other bag papers, candle carton paper, tissues, and tinfoil paper, not printed, n.e.i., in sheets or rolls of any size, if they are, under the Tariff, liable to *ad valorem* duty.

CHARITY SPORTS

(Under A.A.A. Laws and N.C.U. Rules) at

STAMFORD BRIDGE ATHLETIC GROUNDS

On SATURDAY, JULY 15th, 1922, at 2 p.m. Sharp.

L.S.C. MILITARY BAND IN ATTENDANCE.

President, W. R. MASTERS, Esq.
 (Fleetway Press, Ltd.).

OPEN EVENTS:

- First Prizes £7 7s. Four Prizes each Event.
- 100, 220, 880 YARDS, 1 MILE HANDICAPS.
- 2 MILE WALKING HANDICAP.
- 220 YARDS VETERANS' HANDICAP (over 40).
- 1/4 MILE and 1 MILE CYCLE HANDICAPS.
- LADIES' 100 YARDS HANDICAP.
- 1 LAP SCRATCH WALK.
- LADIES' 440 YARDS RELAY RACE (4 at 110 YARDS).
- 100 YARDS HANDICAPS for BOYS and GIRLS (ages 8 to 15).

Great 14-Mile Road Race

For 25-GUINEA BOTTOMLEY CHALLENGE CUP.
 To be won 3 times, not necessarily in succession.

TRADE EVENTS:

TRADE SOCIETIES ONE MILE RELAY CHAMPIONSHIP. Open to Teams representing the various Associations and Trade Unions connected with the Printing and Allied Trades. Teams comprise four runners for 880, 440, 220, 220 yards (two reserves allowed). Two Sets of Medals and Winning Team holds "BRADDICK" Challenge Shield.

80-YARDS VETERANS' HANDICAP, for Bona Fide Amateurs and Holders only. Minimum Age 35 years. Four Prizes.

THE FRYOTYPE TEAM CHAMPIONSHIP OF THE BRITISH ISLES. The Championship consists of 100 yards, 880 yards, 1 Mile Running and 1 Mile Walk, open to Teams representing Firms in the Printing and Kindred Trades in the United Kingdom. Competitors must be from one Firm and have been in their employ 13 weeks prior to date of closing the entries on July 10th. Three to enter and two to compete at each distance. Three Prizes for each distance and eight Medals to competitors representing the Winning Team.

TUG-OF-WAR COMPETITIONS:

THE WALKER-USHER CHALLENGE CUP (to be Won 3 Times in All). For Light Weight Tug-of-War Teams not to exceed 66-st. aggregate (to be weighed on the ground). Winning Team holds the Cup presented by Messrs. Walker Bros. One or more Teams accepted from each Firm. Two Sets of Prizes and a Special Prize for the Coach. Seven to enter, Six to Pull.

ONE LAP OBSTACLE RACE. For Members of the Printing and Kindred Trades. Three Prizes.

"LINO TYPE" 2-MILES SCRATCH FLAT CHALLENGE SHIELD. Presented in 1897 by the Linotype and Machinery Limited, Open to Teams representing Firms in the Allied Trades. Competitors must have been employed at the Firm they represent at least a month prior to the date of the race. Six to enter, Four to run, and Three to score. First man, Gold Medal; First Team, Gold Centre Medals; Second Team, Silver Medals (these seven Medals are presented by the Linotype and Machinery Limited). Suitable Prizes will be given to First Unplaced Team not having been prize winners in this event. Two additional individual Prizes for First Two Men in Unplaced Teams, the first man home excepted.

Entries close First Post Monday, July 10th, to Hon. Secretary, W. C. JEWELL, 21, Shandon-road, Clapham, S.W.4.

ENTRY FEES.—1s. 6d. each event. Children's event, 6d. Teams, 3s. All entries must be made on A.A.A. Forms.

ADMISSION TICKETS ONE SHILLING EACH (including Tax).

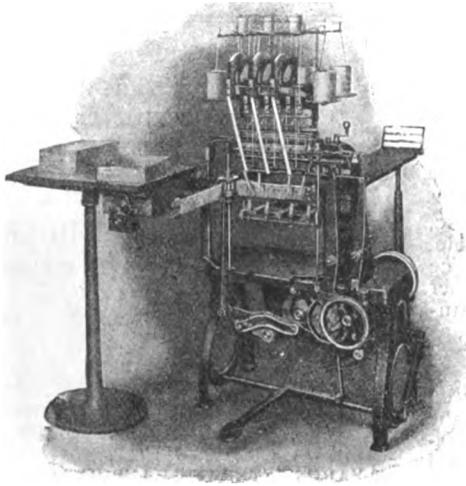

Children under Twelve Half-Price.

Enclosure, 1s. 6d. Grand Stand Seats, 2s.

To be obtained from Mr. H. F. Parker, 8, Albion-road, Wandsworth-road, S.W., and Mr. C. Pushee, 34a, Aristotle-road, High-street, Clapham, S.W.4; The Falcon Hotel, Gough-square, Fleet-street, E.C., or from any Member of the Committee.

The Past, Present and Future of the Costing Movement.

By W. HOWARD HAZELL, J.P.,

Chairman of the Costing Committees of the Federation of Master Printers and the London Master Printers' Association.

I think it would be well to consider how far the printing trade has succeeded in carrying out the ideals of the costing campaign. May I remind you that ten years ago, when the Costing Committee was formed, there was no recognised system of costing in the printing trade, and no uniformity of method of arriving at cost and charge. Many of you will remember the gathering in Kingsway Hall, when the system advocated by the Committee was explained, and when 1,200 printers sat for two days to listen to, criticise, and finally cordially approve the Costing System that had been prepared. From that day forward the campaign has gone on steadily through years of peace, through years of war, and through the equally trying years after the war, and the System has successfully met the many difficulties that have arisen, and greatly assisted all printers in their business.

Success of Standard System.

The System was devised for the trade by members of the trade, and is used by many hundreds of printers in all parts of the United Kingdom, and one of the leading accountants in this country, who is an authority on costing methods, has said that it is the finest system that has been devised by any trade. The work has been so successful that three officials give the whole of their time to advising printers and assisting them to instal the system. In addition to the Costing Committee of the Federation, local costing committees have been set up in almost every Alliance, and by arranging meetings and local discussions, they are helping to carry on the campaign.

Before the System was prepared, there was no uniformity in the definition of various terms, but now the meanings of cost, of chargeable and non-chargeable time and materials, departmental and overhead expenses, have been defined, and are universally accepted: so that printers from Land's End to John O' Groats may meet and discuss their costs, and know what they are talking about. It is now recognised as the system for master printers, and has been used by H.M. Stationery Office in their own factories, and has been quoted and recognised as an authoritative system in the Courts of Law.

In order to assist printers, hourly rates for the different processes have been prepared for different districts, and they are issued as a help in estimating for use by those who have not installed the System, and as a guide to those who have. When a printer has the System, he can compare his hourly rates with the district rates, and if he finds they are higher than the Committee's rates, he knows that he must investigate his costs and find the cause for his high hourly rates. It is a barometer by which he can gauge the efficiency of his factory. During the war, when wages were rising and the prices of materials jumping abnormally, and plant was only partly occupied, it was almost impossible for a printer to know what was a fair basis for cost and charge. The Costing Committee issued an authoritative statement giving a percentage showing the increase in cost from time to time, and these figures were used as a basis for adjusting public and private contracts. The public generally looked upon the statement of the Committee as a fair and impartial statement of facts. The advantage of having a body whose opinion as to the increased cost was accepted, was of enormous value to the printing trade during the difficult years of the war.

Educational Work Accomplished.

Costing classes for master printers, cost clerks, and others, have been started in various parts of the country, and the whole System is fully explained. At St. Bride Institute, London, over 350 students have passed a stiff examination in the whole methods of costing. Similar classes have been held in Manchester, Edinburgh, and elsewhere, and classes of a simpler charac-

An address delivered at last week's Cost Congress at Glasgow.

ter for instructing clerks in keeping records of cost, have been held in many towns when local costing campaigns have been started. In addition, classes for estimating clerks have been held in London and elsewhere, so that the estimating might follow on the lines of the Costing System.

A commencement has been made with what I hope will ultimately become a large and useful library of books published by the Federation. About 18,000 copies of the book explaining the Federation Costing System have been sold, and the books on "Estimating" and "Office Organisation" have been of considerable value to many printers. A jobbing price list, showing the cost and reasonable charges for the great variety of jobbing work, has been issued on two or three occasions, and has helped printers to obtain reasonable prices for this important section of work.

This, gentlemen, is a brief summary of what the trade has done in the past ten years in order to establish sound methods of costing, and to assist its members to improve their estimating and charging for work. It is a record of which I think we may well be proud. There is a tendency at the present time for some to be despondent about the future outlook of the printing trade and of the costing movement, but I would urge you not to be despondent and not to be down-hearted. In spite of all the difficulties of the past ten years, we have established the Costing System as the system for printers throughout the United Kingdom, and we are in the proud position of having other trades say: "Why cannot we devise our own system of costing for our trade, the same as the master printers have done?"

Examples of Help Given.

May I give you two instances of how costing has assisted printers? Some time ago I lunched with a member of a very large printing firm, and the owner of a small printing business. The member of the large firm said: "Some years ago, before the Master Printers' System was devised, we put in proper costing methods, and to our astonishment we found that a certain class of business amounting to £30,000 per annum was showing such a heavy loss that it was hopeless to try and raise the prices to cover the cost. We shut down that department, and in spite of the greatly reduced turnover and the heavy overhead charges, our profits went up slightly in the first year, and we had floor-space and plant available for developments in the future." The small printer said: "For years I had been making very, very small profits. I came to the big meeting in Kingsway Hall, and saw at once that I had been working in the dark and on wrong methods, and in the first year when I had the System properly running I made as much profit as I had made in the previous five years, and I have never had any cause for complaint since. The Costing System showed me where I was wrong."

I must, however, tell you that there are some who criticise the work of the Costing Committee, and I will give you a very candid criticism that I heard. A member of a well-known firm of printers said: "Mr. Howard Hazell is a lunatic. He is mad about costing; he ought to be shut up in a lunatic asylum!" I am very glad to say that I was in good company; for, he added, "The other members of the Committee are just as mad as he is, and ought to be interned with him!" But, gentlemen, if we be mad, then there must be method in our madness, for later on this printer installed the System in his own works! Can we have a more glowing testimonial of the advantages of the methods that we advocate?

The Need of the Present Time.

So much for the past. What of the present? What is the need of the world at the present time? First, it is essential that the costs of production should be reduced in order to stimulate the demand for commodities and increase employment, and thus make the trade more normal. Secondly, prices should be stabilised, and erratic and

ludicrous price-cutting should be eliminated, so that prices show a reasonable profit for the producer. One of the best methods of lowering the costs of production is to increase the efficiency of the organisation, and I know of no more potent influence for reducing waste, eliminating errors, avoiding mistakes and saving material, than by having a proper and well organised costing system in any and every factory. A good costing system is a signpost in the works, pointing the road to efficiency. There are some people who think that the only result of costing is to find the cost of production, but in addition to this desirable result, the figures collected show the loss of time and waste of material, detect errors, and will show which methods and machinery are obsolete, and point out to the management how to improve the efficiency.

I fear that too often the prices quoted to customers are based on ignorance, tempered by fear of what the customers will say, but with a costing system the lowest price at which the costs are covered is known, and with this information there is much less fear or risk of a printer quoting unreasonable prices. If a printer continually works below cost, it must ultimately mean bankruptcy, and bankruptcy means ruin to the employer, loss of a job to the workers, and is harmful to the community. If a printer compensates for low prices to some customers by charging high prices to others, it is unfair to those customers who pay high prices, and whose business may be damaged by the lower prices their competitors obtain. The aim of the Costing System is that fair prices, based on reasonable costs, should be the basis for all work produced by printers. This is a square deal to all concerned, and by making prices more uniform, and assisting in increasing the efficiency, we are dealing with two of the greatest difficulties of the present time.

An Ideal for the Future.

There is much work yet to be done, and I would venture to suggest to you an ideal for the future. Let us not rest content until every printer has installed the costing system, and every printer is obtaining a reasonable profit on every job. It is possible that some of you may think that this is the unattainable ideal of an optimistic visionary. It is no such thing. It is a sane and reasonable ambition to set before the printing trade; an ambition that may be realised if each one of us would do his share. It cannot be obtained by the labours of the devoted few, but needs the whole-hearted support of the many.

It is by working and not by wishing that we shall win the way to success. There are still many printers who need to be converted to the advantages of the Costing System. The political opinions of printers may be conservative or liberal, but I am afraid that in the control of their business and in costing matters, liberals become conservative, and are slow to change their methods. Here then is an opportunity for you to help your fellow printer. You can show him how he can improve his profits, strengthen his business and lessen his costs, and in helping him you are also helping yourself. You will help to reduce price-cutting based on ignorance, and while you are improving his profits you are also improving your own. It is not often that you will thus find the path of duty and the path of profit running side by side. This, it seems to me, is the work that lies before the printing trade. Its successful accomplishment will have far-reaching effects in many directions as the movement extends. You will increase the membership of the Federation, you will improve the efficiency and lessen the cost of production, and you will strengthen the position of the printing trade and the commerce of the country. When that time comes the Federation will be able to speak for its members with greater force than it does at the present time. Its influence and usefulness will be greatly extended, and the whole craft will be in a better position than it has ever been in the past.

I wish I had the tongue of an orator, and I would so stir your minds and fire your enthusiasm that each one of you would leave this hall determined to do what you could to carry on this movement. Go back to your cities and your towns; go back to your Alliances and your Associations, and, talk, teach, and preach costing. If you will but do this, if you will but instal the System in your works; if you will support the local Costing Committees throughout the country, you will make the Costing Conference at Glasgow a red-letter day in the annals of the printing trade, and confer a lasting benefit on the industry to which you belong.

Master Printers in Scotland.

Successful Gatherings for the Cost Congress and Federation Annual Meeting.

In spite of the uncertainty existing in the printing industry regarding notices and wages, the annual gatherings in Glasgow promoted by the Federation of Master Printers were full of enthusiasm. In our last issue we indicated the success of the meetings from the numerical standpoint, and subsequent experience has shown the value of the conferences from the social and craft aspect.

The Costing Congress.

An elaborate programme had been prepared for the Costing Congress in the Large Hall of the Grand Hotel. In last week's issue we gave Mr. J. D. Wise's practical contribution to the discussion, and elsewhere in this issue we present Mr. Howard Hazell's valuable and exhaustive review of a movement in which he has taken a conspicuous part. Other papers we hope to print in subsequent numbers of the *British and Colonial Printer and Stationer*. Mr. James MacLehose, LL.D., president of the Federation, occupied the chair, and delivered his presidential address. At the midday adjournment the delegates were entertained to luncheon in the St. Andrew's Hall by the Scottish Alliance. The congress was resumed in the afternoon, and various aspects of the costing problem were dismissed.

Civic Reception.

A reception to members of the Federation attending the meetings and their friends was given in the evening in the City Chambers by the Lord Provost, Magistrates, and Town Council. The guests were received in the Satinwood Salon by the Lord Provost, who was accompanied by Mrs. Paxton. Among those present were Dr. MacLehose, Sir William Waterlow, Sir Cecil Harrison, Sir John Reid, Sir Robert Wilson, Sir John S. Samuel, Professor Kennedy, Dr. W. B. Blaikie, Colonel W. A. Collins, Mr. John Blackie, and Mr. J. Monte Wilson.

The Lord Provost, welcoming the members, said the Corporation of Glasgow were always pleased to offer hospitality to important bodies that were working for the good not only of their own trade and profession, but of the community at large, and the Master Printers' Federation of the United Kingdom had special claims to recognition, because it included in its membership some of the most prominent citizens of Glasgow—men who had rendered important service in a variety of directions. Their president, Dr. MacLehose, was a very good specimen of the type of man to whom he referred. (Applause.) The history of the Federation was a very interesting one. It was founded 22 years ago; the membership was over 4,000, and included everybody of importance in the printing trade. The main objects of the Federation were to look after the interests of the trade and take concerted action when necessary on problems or legislation affecting it. The Federation was of enormous value in securing the reductions on the postal rates which had now come into operation. No trade suffered more by the heavy postage rates recently in force. People who formerly were prepared to have circulars printed and posted for one halfpenny thought twice before they paid one penny for the postage. The result was that a great deal of printing went out of the country, and circulars were sent to the Continent and printed and posted there. He hoped the Federation would not rest until they secured a further reduction in the postal rates, because cheap postage had an important bearing upon the trade of the country. It enabled manufacturers and others to circularise their clients and keep them informed regarding new directions of commercial and industrial enterprise. He also desired to pay a tribute of appreciation to the work carried on by the Glasgow Printing and Kindred Trades Employers' Association. The Corporation had occasion frequently to come in contact with the members of the Association in a business way, and had invariably found them efficient and obliging and anxious to meet official requirements. He knew of no more loyal body of citizens than the members of the Federation

of Master Printers, and for that reason, and for the reason that they were honouring the city with their greetings for the third time, the Corporation extended to the members and their lady friends a very cordial welcome.

Dr. MacLehose, on behalf of the Federation, thanked the Lord Provost, the Magistrates, and Town Council for their hospitality.

On the motion of Mr. J. Monte Wilson, president of the Glasgow Master Printers and Kindred Trades Association, a vote of thanks was given to the Lord Provost and his colleagues.

Federation Annual Meeting.

The 22nd annual meeting of the Federation took place on the Tuesday, when as we have already announced, it was decided, in view of prevailing conditions in the industry, that the office bearers should continue to hold the reins until July. The report which was presented to the meeting was summarised in our last issue.

The annual dinner in St. Andrew's Hall in the evening was again a great social success. Some 520 members were present, with Mr. James MacLehose, president of the Federation, in the chair, the platform company including Sir Robert Wilson, president of the Scottish Alliance; Mr. R. A. Austen Leigh and Mr. J. C. Coppock, vice-presidents of the Federation; Sir Wm. Waterlow, London; Mr. J. S. Waterston and Mr. G. D. Stewart, Edinburgh, and others.

The Craft of Printing.

In submitting the toast of "The Craft of Printing," Mr. Wm. Brodie, Glasgow, said he claimed as his uncle the late Dr. W. G. Blackie, who in his day was one of the founders of the Master Printers' Association in Glasgow. That Association was the pioneer, from the masters' point of view, in organising the printing trades throughout Scotland. He paid a tribute to the part played by their president during the times when Trade Union views were often boisterous, but Dr. MacLehose, with his clear vision, bright views, and lucid speeches, nobly played the part of captain of the old master printers' ship. He thought it would be admitted by all that the craft of printing had rendered universal and indispensable service to the whole of mankind. Without printing, the whole civilised world would very soon resolve itself into a chaotic wreck, and the surest proof of that was to be found in the fact that all civilised men, women, and children accepted from day to day the million and one products of the craft of printing as a mere matter of course.

Dr. MacLehose, in reply, said the craft had opened wide the portals of literature. (Applause.) Five hundred years ago, and even before that, they had scholars and great libraries, but the number of people who could use the latter with advantage was limited. It was due to printing that nowadays literature could be brought to every home. It was due to printing that the humblest scholar, however abstruse his subject, could find the open door of a great library.

Speaking as a citizen of Glasgow, he would like to refer to the beauty of the craft. It would ill become him to forget his great predecessor, Robert Foulis, who, nearly two hundred years ago in the University Press of that city by the beauty of his work and by the accuracy of his printing made a European reputation for his press. Nothing was too great for him to aspire to, and the care he gave to everything connected with his work made his editions of Greek and Latin classics, and his folios of ancient and modern authors sought after as marvels of typographical art. It often occurred to him (Dr. MacLehose) that in the productions of modern times they might give a little more thought than they sometimes did to the beauty of their craft. (Applause.) As for the Federation, it did not seem to him many years ago since he presided in a small room in Glasgow over a small gathering to discuss whether it was worth while having a Federation of Master Printers in Great Britain. Truthfully they were not by any means sure. To-day, however, the

Federation had 5,000 members, and it dealt with the working conditions of about a quarter of a million employees. They were a Federation leagued together for a common object, which was the good of the industry, and he had to acknowledge the magnanimous way in which the trades and sections of the Federation had subordinated their own particular interests to that of the larger whole. (Applause.) Speaking of the relations of employers and employed the President said he had often been impressed by the spirit of goodwill which had been shown. Whatever the developments or advances in material things might be, they should never forget that the human element was, and must remain, the most important one. They should remember that the future of their craft was in their hands. They should recognise that any difficulties which might confront them could only be solved to-day as they could only be solved in the past by being prepared to meet those difficulties with a broad and sympathetic outlook, and in a spirit of high courage. (Applause.)

Excursions.

The rest of the week was devoted to motor excursions into the Highlands of Scotland, a steamer excursion on the Firth of Clyde, and a visit to Edinburgh and the Forth Bridge. Entertainment for the ladies was provided in ample measure while the gentlemen were engaged at the meetings. Indeed, the organisation of the week's gatherings had been most carefully planned and as carefully carried out. Committees had been appointed to deal with various aspects of the conference, so that nothing was left to chance. Our Scottish friends are to be congratulated on the completeness of the manifold arrangements.

The Hydroloid Process.

A new treatment of paper and boards has been brought to our notice by Messrs. Hydroloid Ltd., of 30, Walbrook, E.C.4. From samples of various kinds inspected by us there certainly seems to be a wide field in which their preparation will prove of value. The Hydroloid process, as it is called, can be used for any class of paper or board and produces greater strength in all materials, apart from its water and oil proofing qualities.

The company is devoting its attention in the first instance to water and oilproof kraft and wrapping papers, a new type of ivory board, also writing and ledger papers. The first of these will compete with all classes of pitch paper, and especially papers for export packing, tyre-wrapping, etc. The ivory board is produced with a surface equal to a first grade linen pulp board at a competitive price. The writing and ledger papers have also exceptional strength and a firm writing surface. We have inspected samples of paper which certainly are of exceptional strength, and should be found of special value for loose-leaf ledgers. A waterproof writing and ledger paper is a distinct novelty, and with the extra strength obtained, should prove of interest to foreign correspondents in those places where paper is subject to drastic treatment. Also as a parchment effect can be produced its introduction for legal work should not long be delayed.

There are, doubtless, from information imparted to us, numerous other products that will be manufactured by the company as soon as business is established with the lines already mentioned, and we shall have pleasure in drawing our readers' attention to these as they are developed.

It only remains to mention that Messrs. Alex. Pirie and Sons, Ltd., of London and Aberdeen, are the prime movers in this undertaking.

ODHAMS PRESS, LTD. has just issued a new publication the *20 Story Magazine*.

THERE are a great many blind card players who can hold their own against expert bridge and whist players. The blind play with specially marked cards, which they "look at" with their fingers. Recently card playing has become so popular amongst the blind that the Inventions and Research Committee of the National Institute for the Blind, 224, Great Portland-street, W.1, has standardised the marking of these cards. Sighted people can play with a blind pack as with an ordinary one.

Africa, Canada, etc.

THURSDAY, JUNE 15, 1922.

Crisis in the Printing Industry.

APPARENTLY all attempts to arrive at a
settlement on the wages question in the
printing industry of England have failed, and
the employers have been obliged to post
notices announcing a reduction of rates from
Monday week. It is understood that notices
generally were posted on Monday, so that the
employees must either accept lower wages or
submit to a lock-out. Much better would it
have been had an amicable arrangement been
possible. This would have been in the
best interests of both sides. Neither the
employers nor the workpeople desire to close
down at this stage, but all the same it is
essential that lower costs should prevail.
When readjustments are taking place in every
department of industry, it ought to have been
possible to come to a reasonable arrangement
in the printing craft. The case of the en-
gineers should have been a warning of what
is likely to occur. There we see great financial
loss not to one side only of the combatants
but to both, and not to one industry only, but
to the whole country. It would be lament-
able if the printing trade were to suffer in an
equally futile fashion. The organisation of
the master printers believe they have gone to
the utmost limits to meet the union repre-
sentatives and have eased the path of read-
justment as much as they can economically.
Certain unions, of course, occupy rather
privileged positions, but whilst it is good to
have a giant's strength, it is sometimes dan-
gerous to use it. It is quite understandable
that employees should resist reductions in
wages, but there is a stage when it is
necessary to compromise. That stage has
now been reached, indeed has been passed.
Compromise ought to have been possible
before the notices were posted. Perhaps the
employers were suspected of "bluffing," but
it must now be realised that they were in
earnest. It is certainly to be hoped that even
now wise counsels will prevail, and that as
little injury to the industry as possible may
ensue.

Record Federation Meetings.

THE annual meetings of the Federation of
Master Printers in Scotland last week were
easily a record in regard to the numbers at-
tending, if not also from the point of view of
the subjects discussed. Including the ladies,
the company reached close upon 800. This
was a large crowd to handle, but the mem-
bers of the committee had worked so hard
and so well that everything went forward
without a hitch. Months of preparation, of
course, were required to perfect the arrange-
ments for entertaining such a gathering; but
the organisers have every reason to be grati-
fied with the result of their work. As for the
business of the conference, the members of
the Federation attended to this very
thoroughly. Many matters of detail, but
particularly the wages question, were frankly
discussed. An outstanding feature of the
whole of the proceedings was the remarkable
enthusiasm shown for the president, Mr.
MacLehose. This was most marked, and
whenever he rose to speak he was acclaimed
with extraordinary warmth. The annual
dinner of the Federation is an outstanding
event of the conference, and this year its suc-
cess was greater than ever.

The Cost Congress.

WHILE there was nothing quite new pro-
pounded at the annual Cost Congress, the
proceedings were well attended and enthu-
siastic. The principles of cost finding are
steadily making progress, as shown by Mr.
Howard Hazell in the paper which we print
on another page. At Glasgow the small
printer took a larger share in the proceedings
than he has done previously. It was clearly
demonstrated that the outlook of the small
printer is broadening, and that he is develop-
ing the commercial side of his business.
Printing is essentially an industry of practical
men, and it is only the man who realises the
commercial possibilities of his business that
will make real progress. Mr. J. D. Wise,
president of the South-West London Associa-
tion, made a deep impression with his very
practical address to the Congress. He struck
a new line and ventilated new ideas. No
mean accomplishment for a Londoner to
teach Scotsmen something in the way of
hard-headed business methods! The ques-
tion of time dockets for bookbinders was
appropriately taken up by the Congress, and
a resolution was passed unanimously urging
the use of these upon bookbinders.

Appreciation!

At the beginning of the year the *British
and Colonial Printer and Stationer* adopted its
pre-war format, and our efforts to bring out a
good practical, readable and interesting num-
ber each week have won for us the apprecia-
tion of a large circle of readers. We are also
encouraged by the support extended to us by
the leading members of the printing and
allied industries, which serves to stimulate us
to increase further the usefulness of this
journal and to assist in promoting the welfare
and prosperity of the printing craft. What is
necessary to overcome the long period of
depression is the true spirit of co-operation, a
reasonable attitude on the part of employers
and employees, and a disposition, based on
mutual goodwill and understanding, to re-
move all impediments that stand in the way
of progress.

Home and Colonial Business.

It shows that the pages of the *British and
Colonial Printer and Stationer* are carefully
studied when readers so freely express their
appreciation. The fact that the paper is read
by the right people—people that buy—points
to the highest efficiency as an advertising
medium. Since it was established 44 years
ago, the *British and Colonial Printer and
Stationer* has had the consistent support of

manufacturers of machinery and suppliers of requisites for printers, bookbinders, wholesale stationers, box makers, bag makers, etc., etc. Why? Because advertising in its pages pays, and pays well. There is increased business ahead for the man who advertises. As Sir Charles Higham, M.P., recently remarked:—"Be an optimist. Have faith in your country and your goods. There is business, but it is a little harder to get than usual, but advertising will help you if you have the courage to try it. Advertising is no longer an expense, because it increases sales, reduces overhead expenses, and therefore adds nothing to the cost of the article."

What Advertisers Say!

THE *British and Colonial Printer and Stationer* is really read weekly throughout the United Kingdom, British Colonies and principal Foreign countries—hence its value to advertisers. Our Special Quarterly Export Issues also stand unexcelled as strong business pullers. Among recent unsolicited testimonials received we may quote from a well-known printing ink manufacturing firm: "The *British and Colonial Printer and Stationer* has undoubtedly put more business into our hands than we would otherwise have obtained—especially Colonial business." Under date of May 10th Mr. E. P. Woodman, Managing Director of the Fisher Bookbinding Co. (1912), Ltd., writes:—

"We are sure you will be pleased to hear that through the advertisement that we have in your old-established paper—the *British and Colonial Printer and Stationer*—we have received numerous enquiries from all parts, and have been successful in securing some very good orders, which proves conclusively that your Journal circulates amongst those who are in search of manufacturers who can carry out their orders to their satisfaction, and, of course, give their customers faith in the work they undertake to bind.

"It may also interest you to know that we are very busy, and, from what we can see of it, the whole of the Printing and Bookbinding Trades will soon be in a flourishing condition, which is much to be desired after the slack period we have all gone through for the past two years.

"We wish you continued success with your Journal."

A trade journal is undoubtedly the medium for trade advertisements, and for genuine service advertise in the *British and Colonial Printer and Stationer* which aims to give its readers and advertisers alike the fullest efficiency.

Australia and "Dumping."

AUSTRALIA is an important market for British paper, and it is very encouraging to find that the demand is increasing. With the removal of trade restrictions on August 1st, imports from Germany will be admitted. According to reports from Melbourne, some alarm is felt as to the possibility of dumping, and the statement issued by the Minister of Customs to the effect that no other country in the world has framed such stringent regulations to prevent the illegitimate flooding of its market as Australia is most reassuring. We are told that the power given by these regulations to bring the values of goods when landed up to United Kingdom rates will be rigorously enforced if necessary.

G.W.R. POSTER COMPETITION.—The Great Western Railway Company announces that the adjudicators have made their awards in the poster competition. Out of nearly 3,000 competitors, the following have been successful in securing the three prizes:—1st (100 guineas), Mr. Laurie Taylor, London; 2nd (75 guineas), Mr. Tom Gentleman, Glasgow; 3rd (50 guineas), Mr. S. Kennedy North, London.

Personal.

MR. B. A. MEYER, the hon. organiser of the recent Newspaper Press Fund matinee at Drury-lane was, on Monday, the guest of honour at a luncheon given by the President of the Council of the Newspaper Press Fund at the Savoy Hotel.

VISCOUNT BURNHAM handed to Mr. Meyer, on behalf of the Press Fund, a silver cigarette case suitably inscribed.

SIR WILLIAM NOBLE, M.I.E.E., Engineer-in-Chief to the British Post Office, made the first call on the "Relay" automatic telephone exchange just opened at the head offices of the *Liverpool Courier and Express*. A neat brochure has been issued to commemorate the event, which marks a pioneer step in newspaper equipment.

MR. JAMES McQUITTY, on retiring from the hon. secretaryship of the Belfast Printing Trades Employers' Association, after 17 years in that capacity, has been presented with an illuminated address and his portrait in oils.

MR. W. G. GRAHAM (Graham and Heslip), president of the Association, occupied the chair on the occasion of the presentation, and tributes were paid to Mr. McQuitty by Sir Robert Baird, K.B.E., Mr. R. J. Lynn, M.P. (editor of the *Northern Whig*), Mr. H. T. Whitley (secretary of the Belfast branch of the Typographical Society), and many other prominent printers.

COUNCILLOR W. B. WYKES, of Leicester, has been elected president of the Midland Master Printers' Alliance for the ensuing year.

MR. CHARLES T. JACOBI is to be the speaker at the next meeting, on Tuesday, the 20th inst., of the South-West London Master Printers' Association, to be held at the Public Library, Lavender-hill, S.W. 11, at 7 p.m. Mr. Jacobi's subject will be "Wages and Hours: Some Comparisons between the Present Time and that of One Hundred Years or More Ago."

MR. W. R. MASTERS (of the Fleetway Press, Ltd.), who is the new president of the Printing and Allied Trades Charity Sports Association, is a prominent figure in boxing and athletic circles, and is known throughout the trade as a benevolent supporter of printers' charities. A notice of the Association's annual charity sports in July appears on another page.

MR. GEORGE V. MADDAMS, who is the Midland Counties representative of the well-known firm of printing manufacturers, Messrs. Fry's Metal Foundry, of 25-42, Holland-street, Blackfriars, S.E. 1, has now moved from Gravesend to "The Laurels," 21, Mayfield-road, Moseley, Birmingham.

MR. MADDAMS is a practical printer of considerable experience, and is well-known throughout the printing trade, having been hon. secretary for very many years of the football section of the P.A.T.C.S.A.

MR. S. H. SMITH, who for some years has been the manager of the *Walsall Pioneer*, now incorporated in the *Walsall Observer*, has joined the printing and publicity department of Messrs. W. Cooper and Nephews, Ltd., chemical manufacturers, Berkhamsted.

MR. J. E. THORNTON, the manager of the *Yorkshire Post*, had a serious fall at Weymouth last week, whilst on his way home from a holiday in the South, and dislocated his shoulder. After being detained for a few days in a local nursing home he was able to return to Leeds.

MR. F. J. BURKE, who has been elected president of the Victorian branch of the newly-formed Printing Industry Employers' Union of Australia, was formerly secretary of the Bookbinders' Union, which now forms a part of the Printing Industry Employers' Union. After retiring from the position of secretary of the bookbinders he was elected president of the organisation.

Prominent South African Printer.

Mr. Ernest T. M. Notcutt.

It is now nearly 30 years ago since the subject of our brief sketch landed in the Cape, and, therefore, Mr. Ernest T. M. Notcutt may justly be regarded as one of the outstanding figures amongst the pioneers of "Print" in South Africa, says the *South African Printer and Stationer*.

His first connection with "the art preservative" occurred in Northampton, just before the outbreak of the Franco-Prussian War, and in the year 1877, the then youthful Notcutt, turned to London and entered the services of that fine old firm, Messrs. Waterlow and Sons, Ltd., with whom, save for a short break, he continued until 1892—representing 15 years of practical experience that must many a time have stood him in good stead during his long association with "Print" in this country.

Landing in Cape Town early in 1892, Mr. Notcutt took up his appointment as manager of the general printing and stationery department of the late firm of W. A. Richards and Sons—in those days the Government Printers to the old Cape Government—in which capacity he continued for over six years.

Decided upon pursuing a progressive course, he founded, in February, 1898, the S. A. Electric Printing Co., Cape Town, with which business both his name and personality have been identified from the very first, and the success attending the efforts of this firm has proved a fitting reward for his initiative and enterprise.

The "Electric" has for years been one of the outstanding printing houses in South Africa, and many of the old hands in the trade will affectionately recall the good old days spent happily in the employ of the "Electric." It is interesting to note that the S. A. Electric Printing Co. was last year formed into a limited liability company with Mr. Notcutt as life chairman and director, and his many friends throughout the trade will sincerely wish him many happy and prosperous years, thoroughly deserved, in his present capacity.

Mr. Notcutt was the first secretary appointed to the Associated Master Printers of the Cape, and took an active part in the formation of that body, which has had so excellent an effect in matters appertaining to the stabilising of trade conditions in that centre. Remaining as secretary of the Association until 1915, Mr. Notcutt occupied the presidential chair for the year 1919-1920, and in this position his undoubted business acumen and practical knowledge of printing proved of inestimable value to the Master Printers Association of the Cape.

Brunner Mond and Co., Ltd.

The report of Brunner Mond and Co. for the year ended March 31st, shows a balance to the credit of profit and loss of £1,022,000 making with £138,308 brought in a total of £1,160,308.

An amount equivalent to the depreciation of stocks and the cost of issue of Preference shares has been transferred from investment surplus reserve account to the credit of profit and loss account to meet these charges, which are debited thereto. Investment surplus reserve has been closed by the creation of a capital reserve account of £1,000,000 and the transfer of £220,101 to general reserve in addition to the transfer to profit and loss account referred to.

The directors propose to pay on June 28th a dividend on the Ordinary capital at 11 per cent. per annum, making, with the interim dividend, 8 per cent. for the year, subject to deduction of income-tax, to be placed to suspense account £50,000, to be written off patents account £797, leaving to be carried forward £93,293.

FROM the "Durable" Printers' Roller Co., Ltd., of Charles-street, Hatton-garden, London, E.C., we have received a copy of the latest (the fifth) edition of their well-known brochure "The Right Hand of the Press," which contains much information of interest to users of printers' rollers, with special reference to the "Durable" roller composition, which is obtainable from all the recognised importing houses. A copy of this brochure is obtainable post free on request.

(paper manufacturers, etc., Sheffield).—Particulars of £250,000 debentures with a premium of 2½ per cent., authorised February 16th, and covered by trust deed dated May 4th, 1922; charged specifically on a debenture for £250,000 issued by Chadwick and Taylor, Ltd., and—as a floating security—on the company's undertaking and property, present and future, including uncalled and other capital, subject to such of £296,100 subsisting debentures as may be outstanding; whole amount issued. Trustees: National Provincial and Union Bank of England.

PARTINGTON'S KENT BILLPOSTING, LTD.—Mortgage dated May 27th, 1922, to secure £120, charged on 13, Beach-street, Mile Town, Sheerness. Holders: Sheerness Permanent Benefit Building Society.

THE Blackfriars Type Foundry, Ltd., has issued a list of revised prices for the body founts and jobbing types produced by the firm. The high speed at which the types are cast on their patent rotary typecasting machines enables the company to quote bottom prices and the reductions shown in the new list are considerable and show a saving of from 7d. to 1s. 7d. per lb. according to sizes and the weights ordered. Sundries, such as borders, ornaments, commercial signs, logotypes, etc., are also offered at revised prices.

THE Stationery Office has invited tenders for 1,000 reams of toned printing papers.

A Buyers' Guide to Supply Houses

Advertising in the "British and Colonial Printer and Stationer," with a brief reference to some of their Specialities.

PAPER AND PRINTING TRADE PUBLICATIONS.

"BRITISH AND COLONIAL PRINTER AND STATIONER." Publishers: Stonhill and Gillis, 58, Shoe-lane, London, E.C.4.

The *British and Colonial Printer and Stationer*, founded in 1878, is published every Thursday. It has a large circulation among Printers, Stationers, Box Makers, Envelope Makers, Bookbinders, etc., whose interests are catered for by the publication of the latest improvements in machinery, new processes, labour and time-saving devices, etc. A strong weekly feature is its *Commercial Intelligence*. The *Quarterly Export Issues of the British and Colonial Printer and Stationer* afford an unexcelled channel of publicity, seller being introduced to buyer with most successful results. Are you a subscriber? If not, why not? It is a good investment at a low price—13s. for one year (subscription 8s. 8d., plus 4s. 4d. postage). Send a remittance to the publishers, as above, at once.

"THE BOOKBINDER" forms a Monthly Section of the *British and Colonial Printer and Stationer*, and may be obtained for an annual subscription of 3s. 3d., including postage.

"WORLD'S PAPER TRADE REVIEW." Publishers: Stonhill and Gillis, 58, Shoe-lane, London, E.C.4.

Anyone interested in the paper market will find a fund of information in the pages of the *World's Paper Trade Review*, established in 1879. Published every Friday, it gives particulars of Papermaking Machinery and Processes, Current Prices of Raw Materials, Market Reports, Interviews with Leading Men associated with the industry, *Commercial Intelligence*, etc. It surveys the whole field of the paper and allied industries at home and abroad. Become a weekly reader by remitting 32s. 6d. (subscription 26s., plus postage 6s. 6d.), to the publishers. There is no better medium for advertisers, as, to quote one of many testimonials: "We have found your paper at every mill with whom we are doing business, both here and on the Continent."

PLANT AND MACHINERY.

A Notable Kraft Paper Mill:

TORP BRUGS AKTIESELSKAB, FREDRIKSSTAD, NORWAY.

One of the most notable paper mills in Norway is that of the Torp Brugs Aktieselskab, Fredriksstad. Its well-known speciality is genuine kraft paper, and it is generally recognised that Torp quality has a world-wide reputation for strength, finish and appearance, and, consequently it is not sur-

will be seen from the illustration at the foot of this page, the mills are on the most modern lines. Started up in 1910, important extensions were effected some four years later, the present capacity being 12,000 to 14,000 tons of genuine kraft paper per annum.

An important characteristic of Torp kraft

suitable supply of wood, with the result that the finished product for superiority stands on the highest level.

The machine rooms of Torp Brugs, are spacious and lofty, affording plenty of light, and are well adapted in every respect to secure a high-class product.

MR. K. MORCH,
 Managing Director.

MR. HENRY FRANTZEN,
 Head of Sales Department.

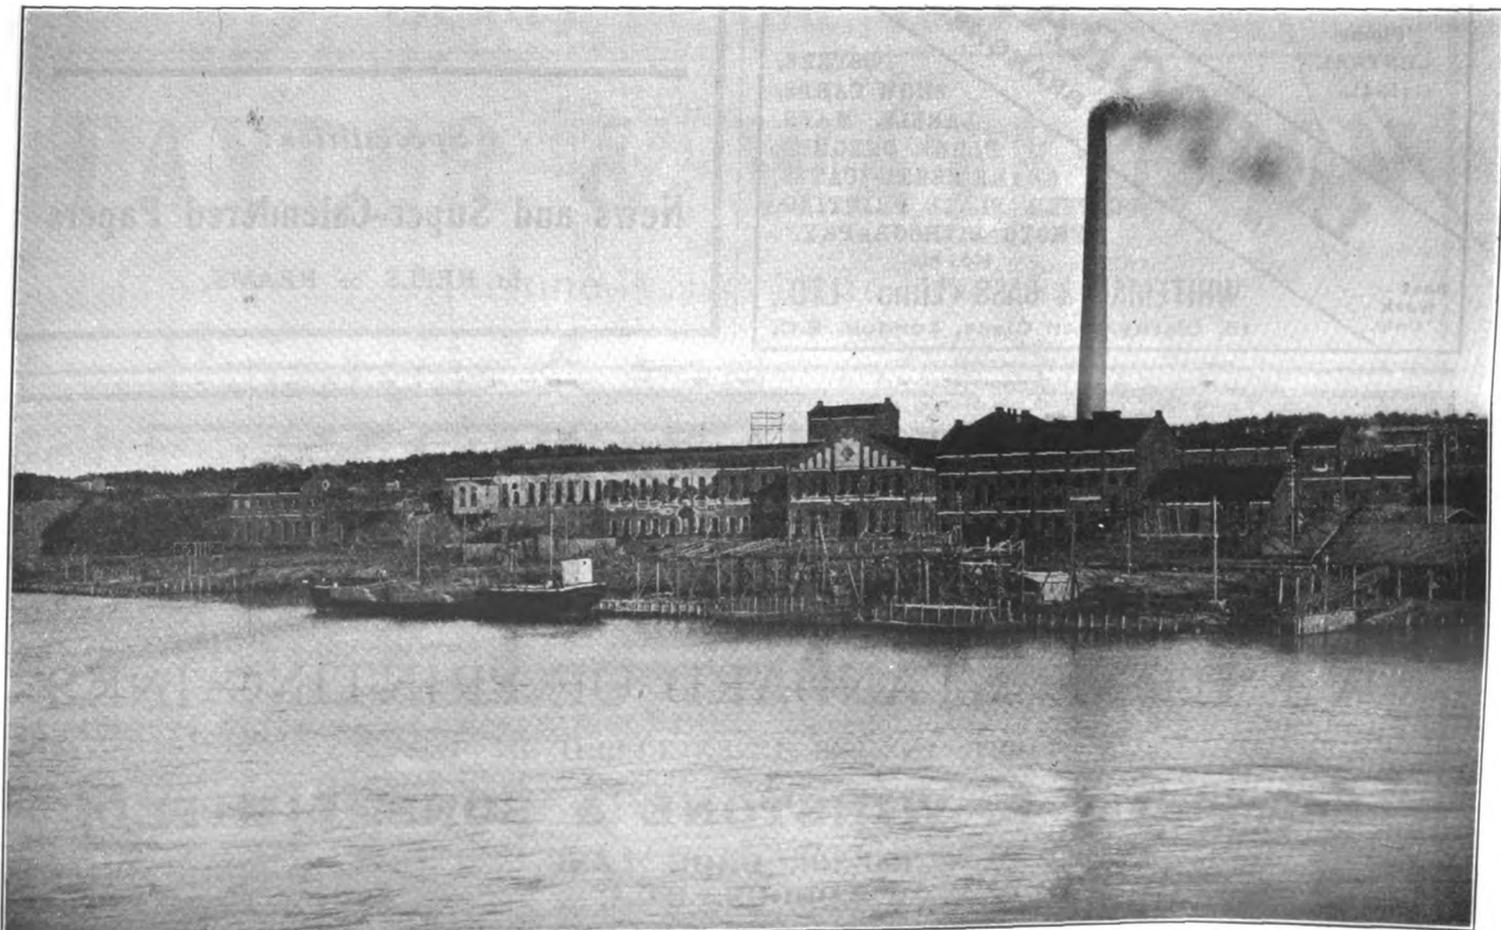

MR. T. V. OLSEN,
 Representative in the United Kingdom.

prising to find that whilst most paper mills for a long period have experienced a falling off in demand, Torp Brugs have been in the unique position of having their machines running at full capacity.

Torp Brugs are situated on the river Glommen, some three miles from Fredriksstad. As

is its unvarying high quality. This is the result of special attention throughout all stages of production, and the use of a specially treated raw material. The company has its own sulphate pulp mill, and, owing to the wide-spread business connections of the directors, has command of a plentiful and most

There are three machines, one a Yankee, 103 in. wide for M.G., and two Fourdriniers, 103 in. and 120 in. respectively, running on unglazed qualities. The machines are electrically driven, the system being of a most improved type, which secures the utmost uniformity in substance. There is a big export

GENERAL VIEW OF THE MILLS OF TORP BRUGS AKTIESELSKAB, FREDRIKSSTAD, NORWAY.

demand for Torp kraft, and packing conditions receive special attention. The overhead cable conveys the bales from the packing department to the mills' warehouse situated on the wharf for prompt dispatch, or loading may be effected direct to the ship's hold, and it may be mentioned there is seldom a vessel calling at Fredriksstad that does not take a part cargo of Torp kraft, and, further, the largest ocean-going steamer is capable of accommodation alongside the mills' own warehouse.

The board of directors comprise leading business men, who are to be congratulated on bringing to such an eminent position the manufactures emanating from Torp Brugs. The chairman is Mr. Consul Ludwig Wiese, who, together with Mr. Otto Nilsen and Mr. Joh. Næser, are intimately associated with the wood industry.

The managing director is Mr. K. Mørch,

who is well-known in the pulp and paper trade for his progressive ideas. Not only in

Trade Mark.

the management of mills has he achieved conspicuous success, but in the construction

of up-to-date works, his experience covering important work in this respect in Norway, Sweden, Finland and Russia.

The chief of the sales department is Mr. Henry Frantzen, who has been with the company since its formation. Under his able direction sales of Torp kraft bearing the trademark shown have reached all parts of the globe, and it may be safely stated that in all countries the quality of the product is regarded in the highest favour.

In the sale of Torp kraft Mr. T. V. Olsen, of 10, Ludgate-hill, London, E.C., the representative in the United Kingdom and for export, has rendered invaluable assistance. Mr. Olsen has also been associated with the company from its inception, and has given entire satisfaction not only to the mill but to the mill's customers, with whom he has always maintained the most pleasant business relations.

Costing as an Aid to Efficiency.

By A. WILLIAMSON, F.C.W.A.,

Secretary of the Costing Committee of the Federation of Master Printers.

A great deal is heard about costing and cost-finding, and both terms are used by many who have little real knowledge of their import.

Cost accountancy is a science—it has to deal with theory as well as practice. It requires the gift of imagination as well as the ability to grasp facts. It is as closely related to the accountancy of income and expenditure on the financial side of a business as it is to the equally important activities of wages and production.

A true system of costing calls for a close analysis of all the expenses of a business. Capital charges as well as charges against revenue must be brought under review. It is not sufficient to accept figures as they appear in most balance sheets. For the purposes of compiling a trading and profit-and-loss account expenses are "lumped" together, and in such cases it is not possible to make comparisons. A proper system of costing must take into account both the fixed and fluctuating expenses, find the cause and the effect, endeavour to account for the variations in the different items, and seek for means of reducing them. It is not sufficient to take the expenses incurred and duly pass them on the consumer; efforts should be made to reduce them.

Calculating Overhead Expenses.

It has been, and still is to an alarming extent, a practice to calculate the proportion of overhead expense by putting a flat percentage on the wages expended on work. The effect of this method is to load on to the highly paid and usually more skilled operator an undue amount of expense. To state a case: Take a firm employing men at, say, £5 a week, less skilled at £4, women at £2, and juniors at 15s. If an all-round figure of 100 per cent. is used the amount recovered equals the wages paid, yet in all probability each of the above-mentioned operators will be occupying an equivalent portion of floor space with its attendant expenses. It is also highly probable that the cheaper the labour the dearer the cost of oversight.

The inequality of distribution of expense by a percentage on wages is still further accentuated where the cost of machinery and hand labour comes into the process of manufacture. It must, therefore, be admitted that the recovery of overheads by a flat percentage on wages is not equitable in many businesses. There is little probability of any business which deals with a multiplicity of orders of varying quantities and values such as is handled by the general printer be-

ing able to satisfactorily recover its costs by a percentage on wages. There are, however, some sections where process costing could be applied if an efficient cost accountant were in charge, and where close attention could be devoted to comparisons of costs.

There are methods in use in many printing offices which approximate very closely to the method just described, but the printing industry does not stand alone in this respect—"there are others." The principles of the Federation System are, however, steadily permeating the industry, and the terms used are becoming more and more understood, and the operations of the system less and less feared as its value and importance is better appreciated.

The overhead expenses are elusive and difficult to apply. Their maintenance in reasonable proportions calls for the strictest segregation and analysis. The fixed expenses such as rent and rates go on without any regard to the volume of work being transacted, and whilst at one period the amount may be represented by the figure of, say, 5 per cent. of the total expenses, at another period they may run to as much again. Some expenses are variable and rise and fall according to the amount of work done, but analysis would ascertain the proper ratio. A high percentage of overhead does not of necessity imply a high cost of production, neither does it indicate a state of great efficiency: either one or the other may, however, be present. Increased efficiency may cause the percentage figure to rise and at the same time decrease the cost of production. Any sort of limitation of output is a serious matter to all concerned, and must inevitably result in an increased cost of living. It cannot be too often reiterated that the slow progress of any work through the factory is forcing on to it charges which it is not entitled to bear. To talk of these matters in time values is of little use—money values are far more easily understood and much more convincing.

It is of the greatest importance that departmentalisation should be used as the basis for the allocation of expenses. Under this heading rent and rates, light and heat, power and repairs, interest and depreciation can be as accurately apportioned to the various production centres as the dispenser measures the component parts of a recipe. In some businesses it may be deemed necessary to find a purely manufacturing cost and distribute selling expenses by the percentage method. In most cases it is feasible to find an all-in hour rate and recover the whole cost according to the time taken multiplied by the rates for the various operations,

The Cost of Costing.

By some persons the installation of a costing system is looked upon as an expense. It should be understood by such persons that much of the work that would be handled by the costing department is already being done by some members of the staff, but without the benefits that would accrue from the co-ordination of the results. Properly installed and worked with intelligence, it is as important an investment as the very latest invention to increase production. Machines are introduced into some factories without the slightest knowledge of what it costs to run them, whereas an efficient costing department would be able to find the cost and make comparisons with existing plant, thereby making the purchase a thoroughly intelligent transaction.

To instal a costing system and make no other use of it than to find the cost of production in order to pass it on to the customer is equally as foolish as putting a closed eye to a microscope or an ear stopped with cotton wool to a telephone. A firm without a costing system is blind and deaf, and makes its way through business life as subject to disaster as a blind and deaf man is liable to accident in a busy street—with this difference, however, that the public is sympathetic to the man but caustically critical of the business when it learns the facts.

So-called "scientific management" has made some progress in this country, and fortunately we are becoming less afraid of things and methods that come to us bearing on them the word "scientific." After all, what is science but applied commonsense?

Some members of the business community have a natural gift for salesmanship and a sort of intuition that enables them to fix a price, who by their gifts of good fellowship have been able to succeed, and whilst friendship will always take a prominent place in business dealings—and rightly so—there are signs that the speed of modern business will eliminate firms not properly equipped with an efficient costing system and thus in a position to compare results in the only way that is sufficiently responsive to be immediately effective. Whilst on this point, may I emphasise the importance and the value of comparative figures arrived at on exactly the same lines? We have a system that can be applied to every printing business, no matter what its peculiarities may be, and figures procured in this way and compared with others on the same lines have a real value.

After expenses have been departmentalised the results should be divided into definite periods for ease of comparison. Any deviation should be at once challenged and

LM Two-Colour Offset.

THIS press has five cylinders—two large diameter plate cylinders, two transfer cylinders, and one impression cylinder—arranged in the form of a pyramid with the impression cylinder at the top. The first colour is printed from the cylinder at the front of the machine, and the second from the cylinder under the feed board at the back. The plate cylinders make only one revolution to each impression, and are mounted in rigid bearings. The transfer cylinders are two-revolution, and are adjustable for pressure. An important point concerning these cylinders is that they are adjustable independently of each other, obviating any necessity for underlaying should one colour require a little more pressure than the other. This effects a considerable saving of time when making ready.

The impression cylinder rests centrally between the two transfer cylinders and is also adjustable for pressure. This cylinder also makes two revolutions; it takes the sheet when off impression, falls to print, and rises and delivers the sheet on its second revolution. It will be noted that the sheet is not transferred from one cylinder to another during the printing operations, and as a result clean printing in perfect register is obtained.

The first colour damping mechanism is situated over the upper part of the plate cylinder and consists of two plate damping rollers, two intermediate vibrating brass rollers, a feed roller, and a water fountain roller. The inking mechanism consists of five plate inking rollers, two geared steel vibrators, one steel rider, two transfer rollers, one ductor roller, three distributing rollers with three steel riders, and a large vibrating drum. The amount of vibration of the ink drum and vibrator rollers can easily be varied between the maximum vibration and zero. The ink fountain and a portion of the rollers are built on a carriage, which can be rolled out of the way when desired.

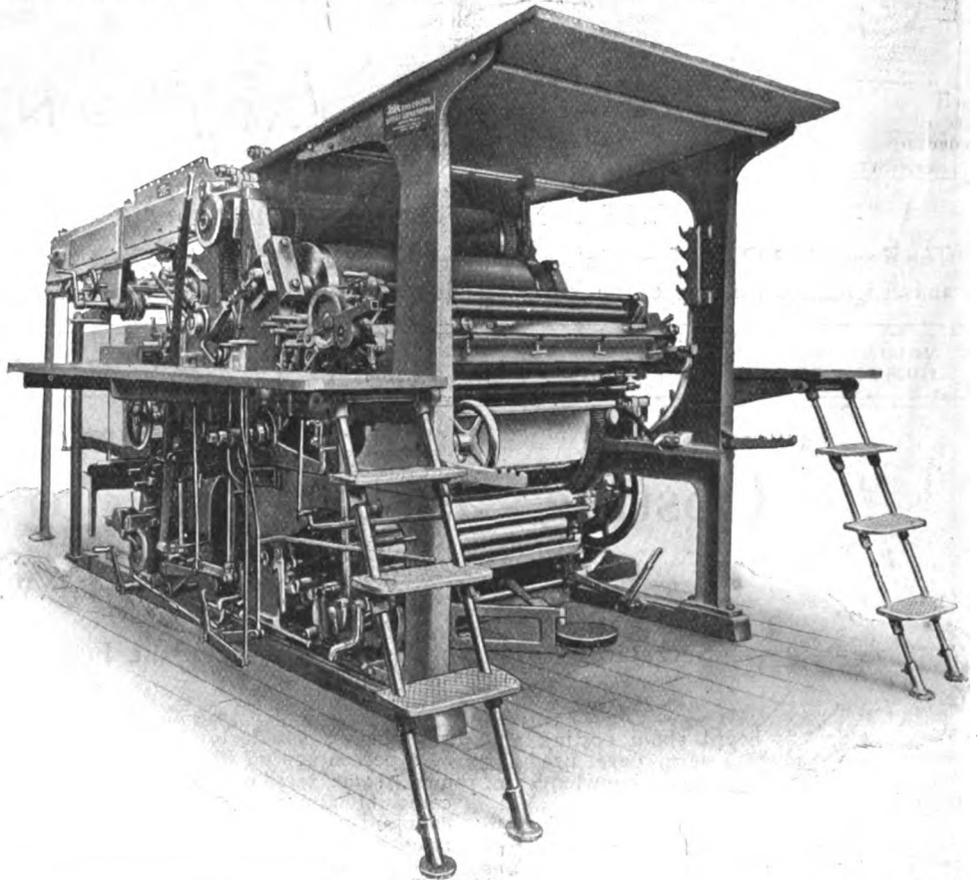

The second colour damping and inking arrangements are similar to the first, but with the positions reversed, the damping motion being at the bottom and the inking at the top of the cylinder.

The complete separation of the two damping and inking arrangements enables a larger area of plate to be exposed for examination—a decided advantage that is fully appreciated by users. Yellow and black, a delicate tint and bronze blue, or any other extreme combinations of colour, can be printed on this press without fear of one colour affecting the other, thus broadening the scope of the machine beyond the narrow limits of printing in two shades of the same colour, such as pink and red, light and dark blue, and so on. Another important advantage due to these independent mechanisms is that each plate can be supplied with the precise amount of water which the nature of the work demands. Further, one plate can be covered with fine half tone work and the other with heavy solid matter.

Special attention has been made to the provision of devices for quickly and accurately bringing the two plate cylinders into register with each other. For example, assuming that the first plate has been set to its correct position in the usual way and it is found that the second plate is on the slant gripper ways, a special plate-twisting clamp arrangement will speedily put this right. If the plate requires moving bodily, either forwards or backwards, it is only necessary to slacken off the screws in the cylinder end; and

then by a worm and wheel device the cylinder can be moved in the direction required, and the cylinder screws fastened again. The means of adjustment for the side lay of a plate consists of a spindle operated by means of a screw with fine threads. In this way the whole cylinder is moved bodily, ball-thrust washers making the adjustment an easy matter.

The delivery on the LM Two-Colour Press has many distinct advantages. It is an extended chain and pile delivery which delivers the sheet printed side up. It is an ideal arrangement for use in combination with an automatic feeder. It enables the sheets to be delivered on to a board ready for removal in bulk by truck without disturbing the sheets. The piling of the sheets in this way gives the printed matter time to dry, and not only dispenses with the usual labour required to move the sheets from a delivery board every half-hour or so, but avoids the possibility of work being spoiled through smudging of the ink.

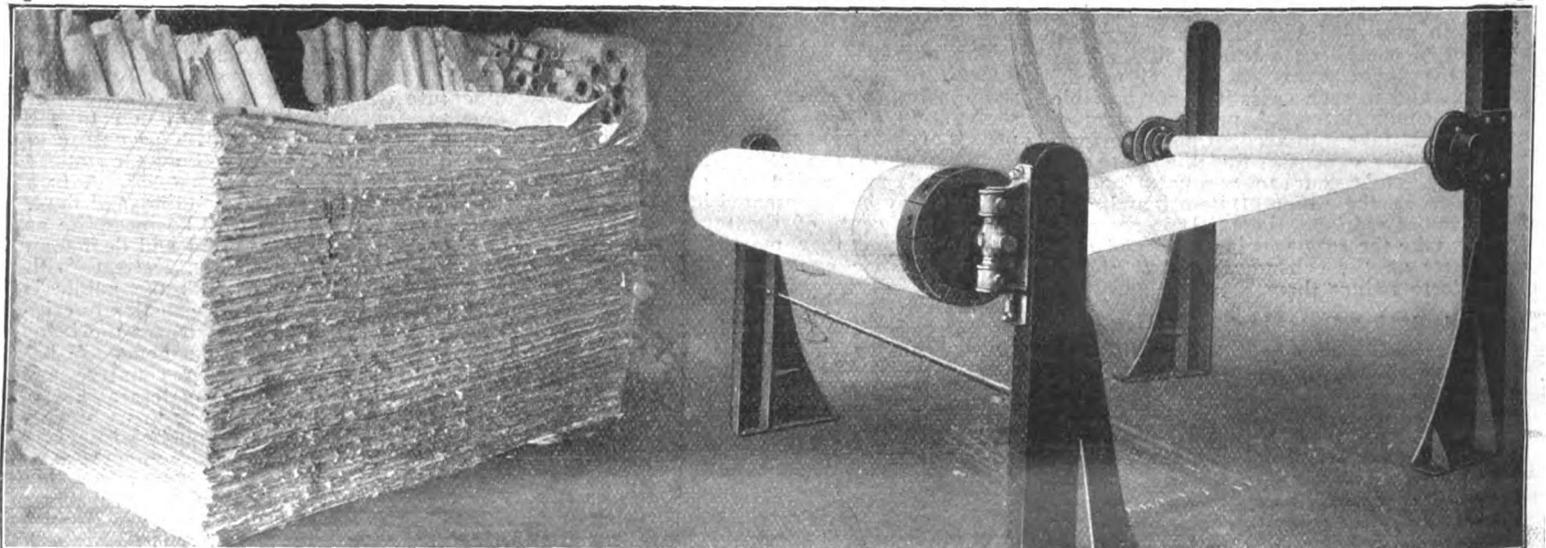

Linotype and Machinery Ltd.

9 Kingsway, London, W.C.

Members of the Association of British Manufacturers of Machinery for the Printing and Allied Trades

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES :

- 1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading.
- 2.—It occupies a space of only six feet on the run, and is quite noiseless.
- 3.—The power required is such a small amount that it can be driven from any existing shafting.

- 4.—Centres of any kind or width can be worked on the machine.
- 5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day.
- 6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills.

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., *Engineers,* Myrtle Road Works, Brentwood, ESSEX

the cause ascertained and dealt with. At the end of the fiscal year the totals should again be compared with what had gone before. From now onwards the figures become of increased value and interest, and it is now possible to take steps to ascertain where economies may be instituted.

Economies Effected.

One of the first economies to be effected will probably be in the direction of reducing the amount of stock held. Any excess over requirements will result in a distinct loss on a falling market, but in any case will lead to a crippling of the liquid resources of the business. Too many firms buy and sell paper and other materials without making the slightest attempt to keep an inventory of them in the shape of a Stock or Paper Record. They can have little if any knowledge of either their requirements or the speed with which the stock passes through their warehouses, and thus are unable to make an intelligent effort at economy in buying. The cost of keeping these stores, and the cash value lying idle is a much more eloquent way of referring to these things than to refer to them in terms of reams and grosses.

Materials of all kinds are required in every business and in varying proportions according to the process. The cost of handling this material provides a very wide opportunity for leakage. If the finished parts are allowed to accumulate and occupy space around the worker, his usefulness is impaired and his earning capacity reduced. In addition the parts accumulate dust, deteriorate, and get knocked about. Material should always be readily accessible to the worker according to the requirements of the work to be performed, and it should be removed as quickly as possible when the operation is completed. Every impediment in the way of the worker increases the cost of production and has a psychological effect on him which automatically decreases his efficiency.

Non-productive labour is another direction in which economies may be looked for. It may be an economy to increase the non-productive labour, and where possible a percentage cost of non-productive to productive wages should be ascertained and fixed so that a close watch could be kept and the correct proportion maintained. This figure should be known to the departmental manager so that he may be enabled to keep down this expense to the efficiency point.

Departmental consumable stores costs should be carefully watched in ratio to production, not only in bulk but by sundry items or groups according to their nature.

A proper system of costing has also a useful function to perform in the direction of improving production, because the cost of a lack of co-ordination between departments can be demonstrated in terms of £ s. d. For a workman to be told that the delay through failing to keep time with a certain piece of work or material has resulted in the loss of an hour or a day does not prove so effective as to be able to prove to him that so much cash value has been lost to the firm and will ultimately find its outlet in a reduction of earnings.

Time and Production.

Having found the cost of a department and ultimately the cost of an operation, it is of the highest importance that data should be secured as to the time charged out to jobs and the amount produced in the time thus expended. This is the stage where tact and resourcefulness are absolutely necessary. The worker should be surrounded by such conditions that there is pleasure in doing his work. He should have such confidence in his employer that he will willingly co-operate in any effort by which his trade can be improved in any direction.

Every job taking up in any department more than an hour should be carefully estimated in time values before the work is commenced, and on completion comparisons should be made. Any differences should be investigated and errors of judgment should be carefully noted for future guidance. These investigations will open up many avenues along which the problem of efficiency can be pursued. Where proper costing records are kept this is not a difficult matter. Casual testing operations where it is known that a test is being made are far from satisfactory, and do not provide reliable data upon which to formulate schemes.

The proportion of non-productive time in every department and for every operation should be known for every factory. It is not enough to accept a statement that the average chargeable time in a department is

such and such, it should at once call for an investigation as to why it is so, and an effort should be instituted to make it more by re-organisation of the department and by thinking out newer methods of planning and routing the work.

Questions such as these should be asked: What is the cost of delays in a year? How much will it cost to remove them? Will a liaison officer, at the cost of a few pounds a week, remove the cause of delay as between department and department? Will increased capital expenditure in the way of plant or machinery reduce or increase the hour cost? Will the cost of replanning the factory reduce the cost of production? Would a reduction in the machines give more room to work and increase the output?

Every printer should ascertain his correct costs, find some other printer working on similar lines, compare results, check averages, and be prepared to table factors which have been helpful. Equipment should be scrutinised to find its possibilities and it should be ruthlessly scrapped when it has seen its best days. Plant should be reduced to the lowest working minimum, and that minimum worked remorselessly and replaced frequently with modern improvements. He should, with determination, refuse to do a job for which he is not properly equipped—not necessarily refuse an order, but get the other fellow to help—concentrate on the work most suitable to the plant; be ever on the look out for new ideas and better methods that could be incorporated in the business in such a way as to improve the service rendered to the public and at the same time increase the profit of the industry.

Eliminating Waste.

The cost of carelessness and wastefulness on the part of employees is not an inconsiderable item in every business. The effect of being able to bring this to the notice of the party concerned in terms of money would be to get a readier assent to changes. Watchfulness would take the place of indifference if it were realised that waste of every description had the effect of increasing cost and thus decreasing demand, ultimately ending in a reduction of wages.

The remarkable results achieved by Taylor and Gilbreth in America and by others in this country have shown what can be done by observation and a willingness to assist. When the effect of a change of method can be demonstrated by means of a costing system the operator is better able to visualise the benefit that is likely to accrue and there would probably be a readier acceptance of the suggestions that would be made from time to time.

Scientific cost-finding and scientific management cannot exist apart, one is the correlative of the other. Both are endeavouring to reach the same goal—a reduction of the price to the consumer. This goal will be the sooner reached as the two are brought closer together.

The great need of the moment is more accurate cost-finding by the industry on uniform lines. The use of a costing system is beneficial to the individual firm, but is immensely increased in value as it becomes possible to compare results between firm and firm.

The wage-earner and the salaried official need also to remember that there is no need for one if the other be absent. Bare elbows or black coats are not the measures of the world's needs but a whole-hearted endeavour on the part of each to do his work in the best possible way in the least possible time.

[Some percentage figures relating to expenses were quoted, but it is proposed to carry these a stage further before publication. Firms using the Federation System and wishing to have their expenses compared will be so assisted on forwarding their Form I, to the Costing Secretary, 24, Holborn, E.C.1. These particulars will be treated confidentially, and should be registered and marked "Private and Confidential."]

CHEMICAL SPECTROMETER.—A novel spectrometer of comparatively low cost, of exceptional compactness and reading direct in wave-lengths to an average accuracy of 0.15 micro-millimetres (1.5 Angstrom units) is produced by Adam Hilger, Ltd., of 75A, Camden-road, London, N.W.1. It is adapted for use in detecting impurities in printing inks and determining the action of inks on papers of different tints, as well as for other uses in the printing and paper trades.

Printers' Managers and Overseers ASSOCIATION.

London Monthly Meeting.

The June meeting of the Printers' Managers and Overseers (Parent) Association was held at the Old Bell, Holborn, on Tuesday of last week, the second Tuesday of the month being chosen instead of the first on account of the Whitsun holidays. There was a large attendance of members, and the chair was occupied by the president, Mr. S. M. Bateman.

Success of United Gathering.

Arising out of the reading of the minutes of the previous meeting, reference was made by the chairman to the recent United Gathering at Liverpool. He mentioned a very moderate statement he had seen in print to the effect that the United Gathering "might be counted a success." That, he thought, was an inadequate statement: the gathering was undoubtedly a great success. It was one of the best gatherings he had ever attended. Everything possible had been done for the visitors' comfort; the weather was first-class, and everyone present had thoroughly enjoyed the proceedings.

New Members Elected.

The June agenda again included the election of new members, and the following were admitted to membership in the usual formal fashion: Mr. C. W. Chapman (Bean, Webley and Co., Ltd., Long-lane, Borough, S.E.1. Overseer—Composing Department), Mr. W. Padgett (Shaw and Sons, Ltd., Fetter-lane. Overseer—Litho Department).—Mr. A. E. Smith (Pettitt, Cox and Bowers, 33-34, Rathbone-place, London, W.C. Overseer—Letterpress Machine Department), and Mr. A. G. Wills (The Whitefriars Press Ltd., Tonbridge, Kent. Overseer—Composing Department). The three London nominees were present, and received a personal welcome.

The only matter brought up under "general business" was the question of the wages crisis. A show of hands was taken in order to get some indication of the proportion of firms that had posted notices of wages reduction.

Smoking Concert.

After the dispatch of the brief business agenda the rest of the evening was devoted to a smoking concert, arranged by Mr. Arthur W. Paul. This comprised a long programme, which was notable for the wide variety of the items included, these ranging from singing of the grand opera class right down to the broadest comedy. Miss Betty Carlyle's soprano singing in "Il Bacio," "The Pink Lady" and other selections showed both ability and feeling, and merited the very hearty applause evoked. Outstanding, too, were the very able tenor songs of Mr. W. R. Coultart. Bass songs by Mr. R. J. Dowling were also much applauded. Miss Marie Stone and Miss Rose Hayes showed themselves two most vivacious comedienne, whilst the comedy side of the programme was further sustained in clever characterisations by Mr. Ernie Bewsey and Mr. Tom West, Mr. Geo. Simson also contributing some comic items. At the piano was Mr. Pringle, whose pianoforte solo playing was encored, and who acted as accompanist throughout.

The concert closed with a vote of thanks to Mr. Arthur Paul and the artistes, this being moved by Mr. Gill and seconded by Mr. Jarvis.

German Paper Scarcity.

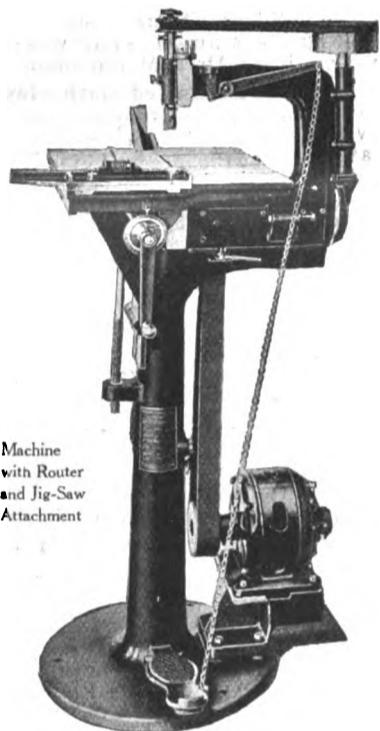

According to the German trade papers the scarcity of paper in that country is causing great troubles to many publishing and printing enterprises, and some of them have been compelled to stop. The papermakers on their side refer to lack of cellulose and wood pulp, which prevents them from running full speed, and the German Government has therefore reduced to a minimum the granting of export licenses for sulphite fibre.

The official quotations for cellulose in Germany to domestic paper mills have lately been increased to Rmk. 1.850 per 100 kilog. for bleached sulphite, Rmk. 1.575 per 100 kg. for easy-bleaching sulphite, and Rmk. 1.475 per 100 kg. for strong sulphite, but it is alleged that buyers often have to pay a far higher price if they want to have any cellulose.

Trade Notes.

WRITS AGAINST LORD NORTHCLIFFE.—Sir Andrew Caird, K.B.E., and Mr. Walter G. Fish, C.B.E., the Press Association states, have issued writs for libel against Viscount Northcliffe. It is reported, at the same time, that both are continuing to perform their duties in connection with Associated Newspapers, Ltd., of which Sir Andrew Caird is vice-chairman and Mr. Fish a director. Mr. Fish was for many years news editor of the *Daily Mail*, and latterly had been its representative upon the Newspaper Proprietors' Association. As recent correspondence showed he was the mover of the resolution calling for negotiations with the unions regarding a reduction in wages.

THE London *Star* published on May 27th last a report of the death at Southend-on-Sea of Mr. W. E. Clery, otherwise known as Austin Fryers, but now learns that the report was inaccurate, and Mr. Clery, who is alive, has issued a writ for libel against the newspaper.

At the Edinburgh Court of Session last week counsel were heard in an action brought by a Glasgow steel-worker against Messrs. George Outram and Co., Ltd., Glasgow, proprietors and publishers of the *Evening Times* newspaper, for £200 as damages for alleged slander in a report of police court proceedings. Lord Blackburn dismissed the action as irrelevant, and found the defenders entitled to expenses.

MESSRS. MACMILLAN AND CO., LTD., the publishers, have been granted leave by the Privy Council to appeal from a judgment of the Court of Appeal of Bombay holding that an edition of North's translation of Plutarch's "Life of Alexander the Great, with Notes," published by K. and J. Cooper, of Bombay, was not an infringement of Messrs. Macmillan's reproduction of the same life.

THE Penarth printing business of the late Mr. C. W. Williams is now under the control of Miss E. M. Harries.

MESSRS. CROPPER AND CO., the Southwark folding box manufacturers are building a factory at Colthrop, Thatcham.

MUNICIPAL PRINTING.—The Newcastle Labour Party has issued a manifesto in support of municipal printing. The efforts to secure a municipal printing department in Newcastle are reviewed at length, and it is said that a second report by the special committee which went fully into the matter showed a better case for municipalisation, and that the profit on the year if the work had been done by the municipality would have worked out at £8,235, on a slightly less turnover. The manifesto states it is regrettable that a scheme for a municipal printing department showing such handsome results should have been turned down, and the Newcastle Labour Party will persistently press upon the City Council this real economy measure.

Two hundred delegates from all parts of the country attended the opening at Edinburgh on Monday of the third annual conference of the National Federation of Retail Newsagents, Booksellers and Stationers. The conference passed a resolution by the National Council emphatically opposing the reintroduction of halfpenny newspapers. Satisfaction was expressed that the Federation had successfully opposed the introduction of a national morning paper which was to be sold at a halfpenny. The desirability of establishing closer agreement with other trade unions connected with the printing and publishing trades was the subject of several resolutions on the agenda.

At the annual meeting of the Rhyl Advertising Association last week Mr. Percy Ashfield, the president, again paid high tribute to the value of Press advertising. No trader, he said, could make his business known unless he advertised it. "Keep your advertisement running as long as you can," he said, "it always pays."

A PRINTER'S error in an unusual place occurs in a recent issue of one pound notes. On these notes, instead of ONE POUND in large letters across the face of the note, ONE POUND appears, F taking the place of E. The rate, which is numbered "96 No. 245,103," is genuine.

THE thirty-sixth annual edition of "Kelly's Directory of the Merchants, Manufacturers, and Shippers of the World" has just been published at the price of 64s.

THE Hull and East Riding District of the Newspaper Press Fund report that a profit of £407 was made on the recent first annual dinner, which was attended by Lord Burnham.

SIR SIDNEY LEE, presiding at an address on "The Gentle Art of Sub-editing," which was given by C. Spenser Sarle to students of the University of London on Monday, announced that he was withdrawing at the end of the session from the office of director of the courses for journalism at the university which he had held since their institution three years ago.

THE death has occurred at his residence in Cardiff, last week, of Mr. John Henry Roberts, who had for some years been manager and a director of the Rees Electric Press, Cardiff. Coming to Cardiff from Aberavon Mr. Roberts served in the army as a printer during the war, and until a paid official was appointed about a year ago subsequently acted as hon. secretary of the Cardiff Master Printers' Association.

MR. HORACE E. HOOPER, of "Encyclopædia Britannica" fame, died last week in New York. Mr. Hooper was associated with Mr. Walter Jackson in the publication and sale of the "Encyclopædia Britannica." Between 1900 and 1902 they acquired the copyrights and trade name of the work, and an English company known as Hooper and Jackson was formed, which company had a contract for the publication of the eleventh edition of the Encyclopædia.

THE death occurred last week of Mr. David C. Lathbury, who was in his 92nd year. In 1863 Mr. Lathbury joined the *Saturday Review*, and in 1878 became joint editor of the *Economist*. Five years later Mr. Lathbury was appointed editor of the *Guardian*, but there eventually arose differences with the proprietors, and after sixteen years' service his engagement was terminated. He then founded the *Pilot*, but the venture was not a financial success, and the paper ceased in 1904, four years after it was started.

THERE was a large representation of Cardiff printers and members of the Loyal Commercial Lodge of Freemasons at the funeral at Cardiff Cemetery on Saturday, of Mr. John Henry Roberts, formerly hon. secretary of the Cardiff Master Printers' Association.

THE late Mr. Charles Mitchell, West Dulwich, and West Harding-street, Fetter-lane, E.C., printer, who died on April 11th, left £6,142.

THE late Mr. William David Currie, Langholme, N.B., journalist, formerly connected with the *Annandale Observer* and the *Eskdale and Liddesdale Advertiser*, who died on March 16th, left £2,744.

MESSRS. PETER DIXON AND SON, LTD., the well-known manufacturers of "news," etc., of Spring Grove Mill, Oughty Bridge, near Sheffield, and West Marsh Mills, Grimsby, have opened a London office at Blackfriars House, New Bridge-street, E.C., under the management of Mr. W. C. Powers.

MESSRS. POWELL, LANE AND CO., LTD., paper-makers' agents, have now been appointed sole agents in the United Kingdom for the well-known five-machine mill, Papier-und Pappenfabric E. Mahn, Klingenberg, Bz. Dresden, Germany, making white, coloured and copying tissues, etc.

MR. JAMES SCOTT, late of Messrs A. Johnson and Co. (London), Ltd., 3, Gracechurch-street, E.C.3, has started business on his own account at 16-20, Farringdon-avenue, London, E.C.4. Mr. Scott has lately been visiting the Continent, studying market conditions, and he has arranged to represent mills specialising in unglazed and glazed white and coloured printings, down to demy 8 lbs.

THE current issue of the *Americal journal, Antiques*, contains an illustrated article by George H. Sargent on "The Handbills of Yesterday," dealing with the historical importance of hand bills and broadsides of the Colonial and later periods and their growing interest to collectors of Americana.

IN March 57 paper establishments in the United States employed 24,832 workpeople, whose earnings were \$582,973. There were decreases of 0.5 per cent. in workpeople and of 1.7 per cent. in earnings compared with February, and decreases of 8.5 per cent. in employees and of 13.6 per cent. in earnings compared with March last year.

THE Belgian Industrial Company at Shawinigan Falls, Quebec, is preparing to extend its paper mills at a cost of 1½ to 2 million dollars, which does not include cost of machinery.

NEW FIELD FOR PRINT.—A firm of wrapping paper dealers in New York have struck upon an interesting plan which tends to popularise their wrapping paper and at the same time provide more work for the printer. The firm has arranged for a series of specially written illustrated stories, which it entitles "Uncle Wiggily Stories" and which it prints on wrapping paper and paper bags, these to be sold to stores for the purpose of attracting the child trade of the country. Each story refers to another sheet that can be had of a different story, so that children will bring their mothers back to make further purchases.

PRAISE FROM AMERICA.—The *Photo Engravers' Bulletin*, of Chicago, remarks: "The *Blackpool Times*, St. Annes-on-the-Sea, England, marks the progress of the offset press in the newspaper field. . . . Some copies of the paper have been received, and it must be said of it that the type and halftones (which latter are used plentifully in its pages) could not be more satisfactorily printed, particularly on such rough surfaced news stock. For years, many of the best magazine covers have been printed by the offset method; and there is a monthly in Havana, Cuba, called *Social*, which is printed in that manner, but the *Blackpool Times* is a new and successful step in the newspaper field."

A MEMORIAL has been unveiled in the cathedral church of St. Anne, Belfast, to the memory of Belfast representatives of the printing and allied trades killed in the war.

THE Irish Free State Government has adopted the idea of advertising by post marks used in the cancellation of postage stamps. The Belgian Government are also extensively advertising their official boat services between Dover and Ostend by post marks in English.

A NUMBER of English members of the International Association of Journalists, who are visiting Holland were welcomed to Flushing by the municipality. The Burgomaster, Mr. van Hoelderren, in the town hall, paid a tribute to the guests and to the Association, the president, Sir Harry Brittain, returning thanks. The tour includes visits to Middelburg, The Hague, Delft, Rotterdam, Amsterdam, Marken, Volendam, and the Brasemer lakes.

THE editors of *Bande Mataram* and *Akali*, extremist vernacular dailies in the Punjab, have been arrested on a charge of sedition.

QUERESHI, who succeeded Gandhi as editor of *Young India*, and was arrested on the 12th inst., has been sentenced to a year's rigorous imprisonment and a fine of 500 rupees, or a further six months' imprisonment in default, for writing two articles in *Young India* "calculated to create disaffection." The publisher and printer of *Young India* received a similar sentence.

THREATS of kidnapping and murder are alleged to have been made in anonymous letters to Mr. W. A. Locke, the proprietor and editor of the *East London Advertiser*.

THE tariff of wages in the Norwegian paper industry expires on August 15th, at which time employers expect a great reduction in wages to take place.

A REPORT on the Swedish paper trade states: There is still a good demand for kraft papers, wrapping papers, and news, and the prices show a stiffening tendency. As to other grades of paper, the market is rather slack, and orders are not so plentiful as they should be or as the situation of the paper trade gave promise of being some weeks ago.

FROM Messrs. Sherratt and Hughes, of 34, Cross-street, Manchester, we have received a copy of the latest book by Sir Charles W. Macara, Bart. Its title is "Getting the World to Work," and it deals with a variety of important industrial subjects, the articles comprised being mostly reprinted contributions to newspapers and periodicals. The range is wide, from "Proposals for the Better Conduct of the Cotton Industry" to such general subjects as "Disarmament" and "Internationalism in Industry." The volume is well printed and bound in cloth boards, and the price is 5s.

Printing Trade Wages Dispute.

All Eyes on the Joint Industrial Council.

It is welcome news that—although at the eleventh hour, just as the notices are beginning to expire—a further meeting of the Joint Industrial Council of the Printing and Allied Trades is being held. The following announcement was issued to the Press on Saturday:—"In deference to a suggestion of the Ministry of Labour, in order, if possible, to avert a stoppage in the general printing offices throughout London and the Provinces at the end of next week on the wages question, a meeting of the Joint Industrial Council of the Printing and Allied Trades will be held on Wednesday next at Montagu House."

We gather that there has been no new move on either side in the meantime, and the proceedings of the J.I.C. at this very critical juncture will be watched with the keenest interest by the whole industry. There met on Friday the resumed conference of the trade union representatives who, it will be remembered, were unable to reach any conclusion when they met on the 2nd inst. to discuss the possibility of making some joint proposal to the employers. Again, however, no such proposal was forthcoming. We gather that the meeting showed that many of the unions felt themselves to be in a very strong position and the general feeling was one of great confidence, so that there was no wish to approach the employers with a joint proposal.

The bookbinding section of the unions held an overflowing mass meeting at the Memorial Hall on Thursday to discuss the position created by the giving of a week's notice of wage-reduction to bindery workers. We understand the meeting expressed itself unanimously determined to resist the reductions notified.

Scottish Lithographers' Position.

In connection with the wages dispute in the Scottish lithographic printing trade, a largely attended meeting of the men in the Edinburgh district was held in Broughton Hall on Thursday. At the close Mr. Thomas Sproat, general secretary of the Lithographic Printers' Society, stated that, so far as the meeting was concerned, the situation was unchanged, but they were prepared to meet the Scottish Alliance of Employers at any time. The position of the men, Mr. Sproat said, was that before the notices regarding the wages cut were tendered to them they did everything they could to get a Joint Industrial Council meeting to consider the position in Scotland, with a view to having the notices suspended pending the negotiations that were being carried on across the Border. They agreed to the offer of a Conciliation Committee, but it was not possible to get that Committee together until Tuesday last. The dispute had been reported to the Ministry of Labour.

To prevent any misunderstanding as to the position of the Scottish Alliance of Employers towards the Joint Industrial Council, it should be stated that the Scottish employers consider that as the general question of the wages dispute came before the J.I.C. on two occasions, all requirements of the constitution of the J.I.C. had been fulfilled before they posted their notices. Mr. Sproat applied to the officials of the J.I.C. to call a meeting of the Conciliation Committee and the employers expressed their willingness to meet in Scotland on the Tuesday following the Whitsun holidays, but arrangements for this meeting were not carried out. It was then decided to call a meeting of the Conciliation Committee for the following Tuesday, but on this occasion it was not convenient for the representative of the lithographers' union to be present and the meeting was therefore not held. This week's meeting of the J.I.C., called at the request of the Ministry of Labour, provides an opportunity for the Scottish lithographers to get the discussion they desire.

At a fully attended meeting of the Lancashire, Cheshire and Derbyshire Federation of Weekly Newspapers, held in Manchester on Friday, discussion took place on the course of action to be followed, should the present wage negotiations result in the stoppage of the publication of newspapers. A resolution was adopted "That this meeting agrees that, in the event of a stoppage, no attempt shall be made by any member to publish a paper during such stoppage."

J.I.C. Meeting.

As we go to press, the meeting of the J.I.C. convened at the instance of the Ministry of

Labour is in session at Montagu House. Up to 3 p.m. no announcement was obtainable as to any decision being arrived at. The parties to the conference consulted separately after a joint discussion, which was subsequently renewed.

Something further on the subject of the wages dispute will be found on our leaderette page.

The Wage Question.

The opinion being held amongst many employers in the printing and allied trades that the wage question is not thoroughly understood by the rank-and-file in the industry, the following concise statement of the case has been issued by a firm of Bradford printers:—

"Judging by the result of the ballots on this question, we feel that the members of the unions concerned cannot fully grasp the present position. It is incredible that they should be willing to face a wage dispute in order to attempt to maintain their weekly wages at a figure which is 148 per cent. above pre-war (not allowing for payment for holidays and shorter hours) when the cost of living figure is only 81 per cent. above pre-war.

"How can resistance to a reduction in wages which will leave the weekly wages 105 per cent. above pre-war (again not taking into account payment for holidays and shorter hours) possibly be justified in the face of a cost of living figure at 81 per cent. advance?

"Let us compare the minimum pre-war wages and present wages in a Grade 2 town:

	Per week.	No. of hours.	Wages cost per hour.	Per cent. advance on pre-war.
Pre-war	85/-	51	8 1/2 d.	
Weekly wage to-day	87/-	48	1 9/16	104%
Wages per week worked, allowing for holiday payments	90/6	48	1 10/16	172%

"This means that to-day our wages cost is nearly 2 1/2 times pre-war!

"Let us now take the employers' offer, which, we understand, all the unions in England have turned down, and are prepared to face a wage dispute rather than accept.

Employers' Offer.

	Per week.	Wages cost per hour.	Per cent. advance on pre-war.	
Pre-war	72/-	48	1/6	118%
Wages per week worked, allowing for holiday payments	74/11	48	1/6 1/4	127%

"This is a reduction of 15s. per week, proposed to take place in six stages, the whole reduction coming into effect early in January, 1923. The employers also propose that there shall be no further reduction in wages before 1924.

"Under this proposal, not taking into account either shorter hours (now 48, 51 pre-war) or the payment for holidays (a very valuable gain to the employees in the printing and allied trades), the weekly wages would compare as follows:—

	Pre-war.	Employers' Proposal.	Per cent. advance in weekly wage.
	85/-	72/-	105%

"Taking into account the payment for holidays, which is only fair, as it is an extra payment as compared with pre-war, the figures would be:—

	Pre-war.	Employers' Proposal.	Per cent. advance in weekly wage.
	85/-	74/11	114%

"The employers' offer, which the members of the unions have refused by ballot, represents an advance on pre-war wages of 114 per cent. (to stand until January, 1924), when the cost of living figure to-day shows 81 per cent. advance.

"In view of the cost of living figure and the reduction in wages throughout all other industries, it cannot be denied that the employers' offer is a generous one. In spite of it, there is a wage dispute, it means that those employed in the printing and allied trades are out for more wages than they are entitled to.

"The necessity for the reduction in wages proposed by the employers is beyond question. Our firm is in rather a different position from the ordinary printer, but every day brings complaints with regard to our prices, although they have not been advanced in proportion to the increased cost.

"We can only hope that wiser counsels will prevail, and that the employees in the printing trade will benefit from the experience of those in other trades."

Trade Union Matters.

On July 1st the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers holds its gala day at High Beech Epping Forest.

OWING to a strike of members of the Irish Transport and General Workers' Union employed by the *Freeman's Journal*, Dublin, that newspaper and allied publications have stopped publication. The strike arose at the week-end over the dismissal of a member of the Transport Union.

NORTH-WESTERN CONFERENCE.—On Saturday last the North-Western group of the Typographical Association held their annual conference of delegates at the Royal Hotel, Bury. The deputy-Mayor (Alderman T. Rothwell), a master printer, welcomed the delegates to the town on behalf of the Corporation, and in a pleasing speech acknowledged the worth of two of the group officials who have been in his employ. At the close of the business an excellent dinner was provided at the Royal Hotel. During the meal half-a-dozen members of the national executive council arrived from a meeting in Manchester and gave the conference the latest news of the present crisis in the printing industry. There was a long discussion on the committee's report covering the present situation and a resolution was sent urging the executive council to hold to their terms. Preston had a motion to press for the total elimination of the female reader. The president (Mr. Knights, Bolton), was re-elected; vice-president, Mr. Nelson, Liverpool; sec.-treasurer, Mr. H. J. Harvey, J.P., Blackburn. Committee—Messrs. J. E. Howarth, Rochdale; F. Taylor, Southport; T. Hargreaves, J.P., Chester; J. A. Pilling, Bury; H. V. Marsh, Manchester; M. C. Robinson, Carlisle. Auditors, Messrs. S. Fox, Ashton-under-Lyne; and T. Haines, Preston.

THE North Wales and Border group of the Typographical Association will hold their annual conference at Conway on July 1st.

THE following members of the executive council of the Typographical Association have been appointed the committee for the ensuing twelve months:—Messrs. P. Barron (vice-president), W. Bottomley, T. Dawe, H. V. Marsh, H. Patch, C. Pavis, T. F. Roche, E. G. Yates, and the officials of the council. It has been decided that this committee shall deal with wages negotiations or changes in working conditions.

MR. H. SKINNER, the secretary of the Typographical Association, has reported to the executive council that he recently interviewed the Income-Tax Commissioners on the question of abatement being granted to readers on the same basis as to other members of the Association. The Commissioners had stated, he said, that readers were not regarded as manual workers, and therefore nothing could be done to ease their position.

CLOCKS ON LINTYPES.—A report has been laid before the executive council of the Typographical Association at a meeting of the Joint Labour Committee at which the question of clocks on linotype machines was raised. Mr. J. D. French, on behalf of the Association, pointed out that the Association having accepted a form of time docket, the employers were not entitled to use a mechanical method of time checking, which Typographical members were not prepared to use. The T.A. representatives present expressed themselves as strongly opposed to the use of the clocks, which they considered an arbitrary method, not permitting of any explanation in respect of the numerous details of work in a jobbing office. It was agreed that a small joint deputation should see the clock in action. The deputation saw this in operation, and the Typographical Association representatives agreed that the clocks answered no purpose which could not be as well or better done by writing, and that their introduction could only be viewed as an effort to speed up the staff by mechanical means.

WE have received some excellent samples of "642 tub-sized cream wave bank" from Messrs. Grosvenor, Chater and Co., Ltd., of 68, Cannon-street, E.C.4, a firm that aims at high quality, whilst at the same time the prices quoted are attractive. The range of "Dryad" coloured triplex boards are of excellent variety, and the specimen of "910 quality glazed imitation parchment" should prove a good marketable line.

Printers' Bowling Tournament.

The annual bowling tournament between the Bristol Press Bowling Club and the Cardiff Caxton Club (which latter is established under the auspices of the Joint Industrial Council and the Printing and Kindred Trades Federation), the seventh of the series, took place on the Penarth Club's green on the 10th inst. Last year Caxton's brought the trophy, a 25 guinea cup presented by Messrs. D. Duncan and Sons (*South Wales News*), back to Cardiff after an exciting win by a single shot; on Saturday they retained possession of the cup by the handsome margin of 29 shots. The Bristol players were entertained to luncheon, and after the match a reception and tea, followed by an enjoyable smoking concert took place at the Queen's Hotel, Cardiff. Mr. Robert J. Webber, president of the Caxton Club and general manager of the *Western Mail* presided. The toast of the "Bristol Press" was given by the Caxton captain, Mr. T. E. Powell, and in responding Mr. Charles Wells (*Bristol Times and Mirror*), the visitors' president, expressed thanks for the extreme hospitality with which they had been received. In proposing the health of the donors of the cup, Mr. W. H. Harris, chairman of the Caxton Club remarked that notwithstanding the cloud hanging over the printing trade to-day goodwill and common sense on both sides would bring them through all right, a sentiment that was greeted with applause. Mr. E. W. Holder responded.

In the course of the other speeches reference was made to the excellent organisation work of the Caxton's hon. secretary and treasurer, Mr. A. W. Stevens.

The Canadian paper industry is understood to have now well turned the awkward corner which at one time confronted it owing to the sharp fall in prices and the recrudescence of the competition of foreign imports in the U.S. market. The price of news-print is now thought to be stabilised; cost of production has decreased. Some of the big Canadian mills are again manufacturing at or near their full capacity.

LEGAL.

In the High Court of Justice
 (Chancery Division), 1922. B. No. 2267.
 Mr. JUSTICE SARGANT.

IN THE MATTER OF LETTERS PATENT granted to JOHN FREDERICK BENNET bearing date the 17th November, 1906, and Numbered 26,069

and
 IN THE MATTER OF THE PATENT AND DESIGNS ACTS, 1907 and 1919.

NOTICE is hereby given that John Frederick Bennet of 82, Queen Street, in the City of London, Printer and Stationer, and the "At a Glance" Calendar Company, Limited, whose registered office is situate at Finsbury Pavement House, in the City of London, the Assignees of the above-named Letters Patent have by Originating Summons, dated the 1st May, 1922, applied for an Order that the term of the said Letters Patents may be extended for 4 years or for such period as the Court shall think fit.

AND Notice is hereby given that on Tuesday, the 18th July, 1922, application will be made to the Court that a day may be fixed before which the said Summons shall not be in the paper for hearing.

AND Notice is hereby given that any person desirous of being heard in opposition to the said Summons shall at least 7 days before the said 18th July, 1922, lodge Notice of such opposition at the Chambers of the Judge, Room 157, Royal Courts of Justice, Strand, London, and serve a copy thereof upon the undersigned Solicitors.

And Notice is hereby further given that the address of the undersigned Solicitors is the address for service on the applicants of any documents requiring service upon them in accordance with Order 53a, Rule 3a, of the Supreme Court.

Dated this 14th day of June, 1922.

COOPER, BAKE, ROCHE & FETTES,
 6 & 7, Portman Street, London, W.1.
 Solicitors for the above-named applicants.

Machinery for Sale.

FOR SALE, ONE 14-in. PATENT SILVER-LOCK TABLE BRONZING MACHINE; maker, Gadsby, London; price £25.—For further particulars apply, Cadbury Bros., Ltd., Engineers' Office, Bournville. 13956

 Representatives also in Australia, India, South
 Africa, Canada, etc.

THURSDAY, JUNE 22, 1922.
The Crisis.

By the time this issue of the *British and Colonial Printer and Stationer* is in the hands of its readers the employers' notices of reduction of wages will, in some parts of the country, have already expired, and by the end of the week this will be the general position. As mentioned on another page, the Joint Industrial Council was convened by request of the Ministry of Labour to meet on Wednesday in London, and whilst we have to go to press before the termination of the conference, there is ground for hope either that a settlement will be reached or that some new basis for discussion will be put forward. As, however, some of the notices were due to expire on Wednesday, it seems inevitable that some further stoppage of work must take place, whatever the outcome of the J.I.C. discussions. This is much to be deplored, and it is to be hoped that both employers and trade union representatives will make it their first aim to arrange—even if it be at some sacrifice of *amour-propre*—that stoppage of work shall be cut down to a minimum. Stoppage or no stoppage, a working arrangement will have to be come to in the end, and so far as we can see, anything in the nature of a strike or lock-out will not only be gratuitous waste of money, but will also tend to develop unfortunate domestic dissensions in the ranks of both parties participating, besides damaging the friendly relationship which has been built up between employers and employed in the printing industry.

Posting Time for Printed Matter.

We have already made some comment upon the inconvenience caused by the restriction upon the time for posting invoices, circulars, proofs, etc., under the printed matter postal rate. The delay often occasioned by this restriction must adversely affect the free use of the reduced postal rates—a matter of great importance to printers. We note that a London correspondent of the *Manchester Guardian Commercial* rightly stresses the inconvenience

caused. He writes: "The time limit of 3.30 p.m. for posting printed papers at the half-penny rate is causing a good deal of annoyance to traders. Retailers complain that frequently parcels come to hand from the warehouses before the invoice is received, and have to be put on one side to await the arrival of that document, in order that the contents may be checked. It is a common occurrence for a parcel to arrive one morning and the invoice not to follow until the next day. One way out of the difficulty would be to enclose a duplicate invoice in the parcel. Apart from this duplication it would seem necessary for clerical staffs in the warehouses to more quickly prepare and post the necessary invoices. Even this, however, could not avoid the delay in respect to parcels packed and despatched late in the afternoon, which would still arrive by passenger train before the invoices sent after 3.30 p.m. through the post."

"Open Shop" Conditions.

It is especially interesting at the present juncture to learn that the printing strike which began in Canadian printing houses last year is still officially in being. On June 1st, last, therefore, many plants witnessed the first anniversary of their management under open shop conditions. When the men went out on June 1st, 1921, the majority of them were confident that it was only a matter of a week or two before they would be back. Twelve months have now rolled by and still "the strike is on"—technically, that is to say, for as far as the trade is concerned it was over months ago. Jobbing and publishing plants, we hear, are now running as efficiently as before the strike and in spite of all rumours of poor workmanship the percentage of work refused is actually less than previous to June 1st, 1921.

America and Book Imports.

It is gratifying to note that there is strong feeling among the book dealers of the United States against a communication which the U.S. Treasury Department has just issued to the examiners of merchandise at all the ports of entry stating that the exact law about the marking of merchandise with information as to the country of origin must now be enforced on books. This law if literally interpreted would apparently mean that all the imported English books would have to bear the legend, either printed or stamped upon them, "Made in England." The U.S. Treasury is rightly being urged by the American book trade that the printer's imprint giving the town of origin should be accepted as sufficient to satisfy the requirements of the law, and that an added mark—which would often seriously mar a valuable book—should not be insisted upon. The *New York Publisher's Weekly* wisely remarks: "Common sense is, after all, the best interpreter of any law, and a slight application of common sense in this matter will remove a difficulty which might otherwise be serious to all interested in books from abroad. . . . There is a possible international complication in this regulation which should certainly be avoided. Great Britain, Canada and Australia put forward such proposals but promptly withdrew them when the explanation now made to our own Treasury was put before them. Our relations in this whole matter of exports to Canada have been strained by the manufacturing provision in our Copyright Law, which Canada proposed to copy, and to add unnecessary complications now would be to suggest to Canadian legislators that what is sauce for the goose is sauce for the gander. We need to have these matters made right at home—otherwise we cannot ask other countries to be fair and friendly to us."

The Foreigner's Opportunity.

THE foreign competitor is only too ready to avail himself of any opening that may exist for his wares in the British market

Another circular has come into our hands from a German firm offering paper and printed matter at extraordinary figures. In the circular before us prospective customers are urged to take advantage of the low exchange of the mark and have their advertising done direct by mail from Germany. This, it is pointed out, will cost three times less than if the circulars were posted in the United Kingdom. The firm in question offer to print circulars for a ½d. per letter—paper and envelope, addressing and postage all included. This is possible, it is added, because of the unbalanced mark situation in Germany and because of the fact that wages are only a fourth of what they are in other countries, while "even postage from Germany to any foreign country only costs a fraction of what you pay for a circular within your city." The prices which are quoted for circulars according to the class of paper used are interesting. For 300 to 500 circulars on writing paper the price per letter is 1½d., on kraft paper or printing paper 1¼d., news print paper 1¼d. There are fractional reductions for larger quantities until we come to over 2,000 circulars, when the price for the three grades of paper are respectively ¾d., ⅝d. and ½d., these being the prices "per circular and including paper, envelope, printing, addressing and postage." There is, however, a prospect of an increase on these charges after June 15th in consequence of the raising of the postal tariff on July 1st. Accordingly the prices quoted will be raised by ½d. for all orders passed from England after June 15th. While the printing on the circular before us is fairly good, there are several faults, wrong founts being common, while the mistakes in spelling and grammar would not appeal to the customers of any firm which had its work done abroad. Moreover, there is a danger of providing possible German rivals with a list of customers, for the printing firm in question ask those to whom it appeals to send them a list of customers and in a fortnight they will receive a circular letter from Germany in approved form. On the kraft paper sample which is sent us, the reasons for the cheapness of paper in Germany are set forth boldly. The first is the suggestion that Germany is the country for raw material, the second refers to the quality of German paper, and the third, as already indicated, is that, in consequence of the depreciation of the mark, wages are a quarter of what they are in other countries.

Standardisation in the Netherlands.

ELSEWHERE in this issue we refer to the new regulations which have been introduced in the Netherlands as to the sale of paper. The Royal Decree setting out provisions for the standardisation of qualities and sizes of paper does not make it quite clear to what extent the Decree operates. The governing factor is Article 14 of the Merchandise Act (Warenwet), 1919. An inquiry to the Consul General of the Netherlands in London brings the information that "the term 'sale' in the Article includes 'delivery,' 'transport,' etc.," and therefore the Consul-General is inclined to the opinion that the regulations on paper would also apply in general to paper made in the Netherlands and to paper imported. However, sections 14 and 15 of the Act provide that exceptions can be made for articles intended for export, and section 16 also for articles intended for import. We hope to be able to give details later if any such regulations have been made in regard to paper.

MR. H. HOLMES, on behalf of Messrs. Chas Morgan and Co., Ltd., has been good enough to present to the Papermakers' Association a Paper Mills Directory for 1864. This is a welcome addition to the interesting old volumes which Mr. Foster is getting together in the form of a papermakers' library. Although one of the early editions, it is curious to note the resemblance to the format of the present work, which, of course, has grown larger with the development of the industry.

Personal.

THE Premier of France, Madame Poincaré and Marechal Pétain were the guests of Viscount and Viscountess Burnham at Claridge's Hotel on Sunday at a luncheon, on behalf of the League of Help. Amongst others present were Sir Frank and Lady Newnes, Mr. Wickham Steed (editor of *The Times*), and M. de Marsillac (president of the Foreign Press Association).

SIR G. ROWLAND BLADES, M.P., captained the cricket team representing both Houses of Parliament which played a match last week against Westminster School.

MR. GEORGE WILSON, father-in-law of Mr. Hearst, the American newspaper proprietor, has been inspecting London methods of producing illustrated newspapers. "The Englishman is the best printer in the world," said Mr. Wilson to a representative of the *Daily Graphic*.

LORD NORTHCLIFFE has returned from the Continent, despite the following announcement which appeared in *The Times* on Friday: "On account of indisposition, Lord Northcliffe has been ordered by his physicians to abstain from work for the present. The publication of his articles on Germany will, therefore, be temporarily suspended."

LORD NORTHCLIFFE is reported to have purchased the whole of the Walter interest in *The Times*, the price stated being £200,000.

MR. T. G. GRAHAM, the London journalist, who last week was honoured by being elected Grand Master of the Manchester Unity of Odd-fellows, has been adopted as Independent Liberal candidate in the East Nottingham by-election.

MR. W. S. WALKER, Mr. J. Noel and Mr. J. Mellor have been presented by the Typographical Association with cases of pipes and a fountain pen respectively on retiring from the Executive Council of the Association.

MR. S. W. NEWCOMBE has been elected chairman of the News Department of the London Society of Compositors by a majority of 230 votes.

MR. C. E. KING, the managing director of the *Middlesex Advertiser*, has been presented by the staff of that paper with a Royal Worcester coffee and liqueur set on the occasion of his silver wedding.

MR. ROBERT J. WEBBER, general manager of the *Western Mail*, was on Friday re-elected chairman of the Cardiff Business Club, of which Mr. R. P. Henry, of the *South Wales News*, was also re-appointed a director. Votes of thanks were tendered to the *Western Mail* and the *South Wales News* for services to the club during the past year.

At the annual meeting of the Staff Sick Fund of Messrs. W. H. Smith and Son (Printing Department), a presentation was made to Mr. E. W. Griffin on behalf of the Federated Chapels for his work as the First Aid man of the firm.

MR. GRIFFIN is a member of the Committee of the P.M.A., and is also a member of W. H. Smith's St. John Ambulance Division. The presentation took the form of a handsome solid marble timepiece suitably engraved, and in reply Mr. Griffin expressed his grateful thanks for the handsome present.

MR. S. E. BUSHER, the managing secretary of Messrs. W. E. Smith, Ltd., wholesale manufacturing stationers and printers, of Sydney, N.S.W., will be in London at the end of July.

MR. BUSHER will be pleased to interview manufacturers' representatives during his visit. The London office of the company is Ewing House 73 74, Chiswell-street, E.C.1.

MR. E. J. JESTY, we learn, has resigned his position with Messrs. James Spicer and Sons, Ltd., in whose service he has been for over a quarter-of-a-century. Mr. Jesty is well-known in the trade, and his many friends will wish him success in any future undertaking.

The Anomaly of the Printers' Manager and Overseer as a Trade Unionist.

SIR,—The recent trouble in the engineering industry, followed so closely by a threatened stoppage in our own allied trades, brings very forcibly to the forefront the unenviable position of the manager, overseer or foreman, as he is variously termed. In the printing trade the overseer, while inevitably subject to trade union rules and regulations, is at the same time the recipient of favoured treatment from his employer. In many cases he is regarded as a member of the staff and in almost all other circumstances he is at least semi-staff. Practically a department or works manager is a master's man in the true sense of the word. His ordinary duties cause him to safeguard the employer's interests. It is anomalous, therefore, that he should at the same time rank as a member of any trade union. Directly a workman elevates himself to the position of overseer he ceases to be a trade union unit and becomes an administrative unit.

In part the distinctive status of the overseer is exemplified by the existence of the P.M. and O.A., an organisation which, I believe, includes both staff and semi-staff members—union and non-union. In the engineering trades it is recognised more fully by the affiliation to the parent body of an overseers' organisation. As I understand it, the shop managers belong to the Federation as a special section. They have all the privileges of superannuation, death benefits, etc., that the union offers its members and they pay a 2s. 6d. subscription weekly, the employer adding a further 2s. 6d.

Does not the present situation demand that the Master Printers' Federation should take steps to put an end to the anomalous condition which permits a man to reap all the benefits of superior office and then at the call of an opposing interest (with which he may have less sympathy than monetary attachment) quit his post and conceivably damage the prospects and status of foremanship in the process?

The argument is clear and simple. A manager or overseer is a master's man, and if he is not he is an unfaithful servant in his position. Masters' men should belong to the masters' federation rather than to the men's union. As things are they have no option, and as participants in prospective benefits from trade unionism they would be loth to make any change which would involve the loss of benefit. Granted a scheme which would sufficiently ensure adequate compensation I suggest that the great majority of our overseers would willingly entertain the proposal to form a sub-section of the Federation.

Yours, etc.,
H. M.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

UNITED KINGDOM.

An enquiry has been received for the names of manufacturers of machines for making paper "straws" or tubes as used in partaking of iced drinks. United Kingdom firms who are manufacturing machines for the purpose mentioned are invited to send particulars to the Department of Overseas Trade, 35, Old Queen-street, London, S.W.1, with a view to their name being transmitted to the enquirers. (Reference No. 6610/T.E. should be quoted).

NEW ZEALAND.

An agent, resident in Auckland, is anxious to get in touch with United Kingdom publishers and manufacturers of stationery with a view to representing them in New Zealand, on a commission basis. He states that he has had 25 years' experience in the bookselling trade. (Reference No. 638).

When writing advertisers please mention *The British and Colonial Printer and Stationer*.

Keir and C. H. Bullen. Registered office: 105a, Bold-street, Liverpool.

CON PLANCK, LTD.—Capital £2,000, in £1 shares; designers and producers of, and dealers in, novelties, show cards, labels, fashion plates, catalogues, posters, sketches, prints, etc., advertising agents, printers, stationers, etc. Private company. First directors: C. H. Planck, C. B. Ward and P. S. Braund. Registered office: 5, King-street, Covent-garden, W.C.2.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

LONDON AND INCORPORATED PRESS, LTD.—Mortgage on certain lands, premises and machinery, at Hendon, and the company's undertaking and property, present and future, including uncalled capital, dated 7th, 1922, to secure all moneys due or to become due from the company to the National Bank.

KING BROS. AND POTTS, LTD. (printers, St. Leonard's-on-Sea).—Satisfaction to the extent of £350 on April 20th, 1922, of debentures authorised February 10th, 1913, securing £1,000.

PRINTONIA, LTD. (South Norwood).—Satisfaction in full on June 8th, 1922, of first debentures dated June 8th, 1904, July 1st, 1909 and November 27th, 1912, and second debentures dated April 22nd and June 21st, 1909, securing in all £800.

ALDINE PUBLISHING Co., LTD.—Satisfaction to the further extent of £1,000 on May 5th,

1922, of second debentures dated March 27th, 1907, securing £10,000, (£2,000 remains outstanding).

CLARE, SON AND CO., LTD. (stationers, printers, newspaper publishers, etc., Wells, Somerset).—Satisfaction in full on May 21st, of mortgage or charge dated April 4th, 1922, securing £550.

SUNDAY PUBLICATIONS, LTD.—A memorandum of charge dated June 2nd, created by the receiver and manager for the debenture holders under an order of court dated May 18th, 1922, has been filed. The charge is to secure all moneys due or to become due from the company to Lloyd's Bank, Ltd., not exceeding £5,000 with interest at 6 per cent. per annum. Property charged: All the undertaking, property and assets of the company comprised in or charged by debenture for £200,000 dated September 1st, 1921. The present charge is in priority to the said debenture.

GROCCERS' JOURNAL, LTD.—Satisfaction in full on April 7th, 1922, of debenture dated August 23rd, 1921, securing £4,000.

HENRY GOOD AND SON, LTD. (stationers, etc.).—Mortgage dated June 1st, 1922, to secure £2,000, ranking in priority to £6,000 outstanding first and £1,000 second debentures, charged on leasehold premises in Moor-lane and Sydney-avenue, E.C. Holders: Perpetual Investment Building Society.

MEYERS, BROOKS AND Co., LTD. (newspaper proprietors, etc., Enfield).—Particulars of £3,000 debentures authorised May 27th, 1922, charged on company's undertaking and property, present and future; whole amount issued.

W. N. SHARPE, LTD. (commercial and fancy stationers, etc., Bradford).—Satisfaction in full on April 27th, 1922, of mortgage dated April 1st, 1920, securing £14,000.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

ENGLAND AND WALES.

PARTNERSHIPS DISSOLVED.

E. H. JOYNSON, W. O. H. JOYNSON, and J. S. Fearnley, paper manufacturers, at St. Mary Cray, Kent, under the style of William Joynton and Son; so far as concerns J. S. Fearnley. **F. R. Pickett and C. W. Pickett**, at Tunbridge Wells, as wholesale stationers under the style of Henry Pickett and Sons, so far as regards F. R. Pickett. **J. Lee, F. Brooks, and E. Norvall**, label cutters, 5, Torrens-street, City-road, London, and 1, Lauderdale-buildings, Aldersgate-street, E.C., under the style of Brooks and Norvall.

THE BANKRUPTCY ACT, 1914.

RECEIVING ORDER.

Meynell, F., 92, Brook Green, Hammersmith, journalist.

MESSRS. HENRY BOOTH (HULL), LTD. of Park-avenue Printing Works, Hull, send us a catalogue and price list showing a large variety of tickets and labels in rolls, pads or single, suitable for all trades.

MESSRS. W. LUNNON AND Co., mill agents for "Lunco," the inexpensive typewriter paper, 59, Carter-lane, London, E.C.4, send us samples of their typewriter paper, especially suitable where many carbon copies are required. The paper is obtainable in various different colours.

Printing in Aberdeen.

The Tercentenary Celebrated.

The first printing press in Aberdeen having been established by Edward Raban in 1622, this year completes the centenary of printing in the "Granite City." The event was fittingly celebrated last week by the Aberdeen Master Printers' Guild at a dinner in the Palace Hotel on Friday, the company including representatives of the printing craft from Scotland and London. Mr. J. F. Kellas Johnstone, the well-known Aberdeen bibliographer, delivered an oration on "Edward Raban, Laird of Letters, the First in Aberdeen."

Mr. J. R. Sutherland, Aberdeen University Press, presided, and the company included not only the Lord Provost and many University and Church dignitaries, but also Messrs. R. T. Wishart, secretary, Scottish Alliance of Master Printers; J. N. Strachan, printer, Forfar; Wm. Hackett, printer, Peterhead; James Lefevre and Robert Shepherd, Aberdeen Branch of the Scottish Typographical Association.

Apologies for absence were received from Mr. Jas. MacLehose, M.A., LL.D., Glasgow, president of the Federation of Master Printers, Messrs. Robert Wilson, president of the Scottish Alliance of Master Printers; James Paterson, Glasgow; and J. S. Waterston, Edinburgh, past presidents of the Scottish Alliance of Master Printers; J. Monte Wilson, Glasgow, vice-president, and Geo. D. Stewart, hon. treasurer of the Scottish Alliance of Master Printers, and many others.

The Chairman, in asking Mr. Johnstone to give his address, made special reference to the presence of Dr. W. B. Blaikie, who, he said, was a descendant of a former well-known Lord Provost of the city, and who was affectionately regarded as the father of the Scottish printing trade. (Applause.)

Edward Raban.

Mr. Johnstone's carefully-prepared address embodied the results of his own research, tracing Raban's family history down to the death of his eldest son, also a printer, in 1685. Edward Raban, he said, was born about 1579; his birthplace was unknown, but by his own statement it was English, and his parents were German. He alluded to an uncle, a parson "in Melton Mowbray, in Gloucestershire; but that town was in Leicestershire, and the error was strange, displaying great ignorance. Local records proved that a Raban family lived at Melton in the late 16th and 17th centuries. Those Rabans were possibly connected with a German family of printers at Frankfurt, who invariably spelt the name Raben represented in Latin by the word "Corvinus." Christopher Raben, of that family, became in 1586 the pioneer printer of Herborn, a small University city in the Duchy of Nassau, in South-West Germany. That he was an experienced printer was manifested by his tastefulness and use of decoration and the presswork in most instances; indeed, he was generally better than his Edinburgh contemporaries, who had more ample and costly material to work with.

The Chairman gave "The Memory of Edward Raban," which was honoured in silence.

Mr. P. J. Anderson proposed "The Art and Craft of Printing."

Mr. John Milne, Central Press, in the course of his reply, said that gathering had a note of sadness in the fact that the prime mover in that movement to perpetuate the memory of Edward Raban, the late William Smith, of the Bon Accord Press, had not lived to see the dream of his life realised.

In a delightfully reminiscent speech Dr. Blaikie gave the "City of Aberdeen." He referred to the history of printing, and dwelt in detail on the career of the noted Aberdeen printer, James Chalmers. In 1748 Chalmers had printed the oldest newspaper that existed in the country to-day, the *Aberdeen Journal*, which he noticed that day had issued its 21,051st copy. That paper was 42 years older than *The Times*, and 26 years older than the *Morning Post*, the oldest English daily.

"The University of Aberdeen" was given by Mr. G. M. Fraser, librarian.

In reply, Principal Sir George Adam Smith, said that one controversial matter which he ventured upon with some hesitation was the fact that if the University of Aberdeen was drawn at any time in the next few years into bankruptcy it would be through its printing bills. (Laughter.) He did not blame the master printers in that connection, but as a supplier or customer he felt that they had

arrived at a very critical state of affairs. Unless costs came down, whoever was to blame for their height, there would be a very large departure of custom from the printing trade in this country within the next few years, if not months.

A memorial, erected by the Aberdeen Master Printers' Guild to Edward Raban, was unveiled on Saturday in Drum's Aisle St. Nicholas Church, Aberdeen.

Stationers' Association of the U.K.

Annual General Meeting.

Success attended the seventeenth annual general meeting of the Stationers' Association, held at Stationers' Hall on Wednesday of last week. In the regretted absence of Mr. Percy Barringer (owing to ill-health) the chair was occupied by Mr. Frank P. Dorizzi, chairman of the Council.

On the motion of the chairman, seconded by Mr. Wallis Manspard, the seventeenth annual report was cordially approved. The report congratulated the members upon the continued growth of the Association in numerical strength, usefulness and influence.

A Year's Progress.

During the period under review no less than 569 retailers and 45 manufacturers and wholesalers (a total of 614 firms) have joined the Association. This is the largest increase in membership for a number of years, and compares most favourably with the record of 406 firms elected during the previous twelve months. Applications for membership have been received from stationery houses in New Zealand, U.S.A., Holland, and Denmark. With the object of encouraging the employees of firms connected with the stationery trade to take a greater and more personal interest in the business of their principals as well as to acquire a better technical knowledge of their trade, it had been decided to accept applications from stationers' assistants for election as associate members, and the Council especially urge all retail members who employ assistants to encourage such to take advantage of this new section of the Association. The outstanding matter of interest in the year's calendar was the visit paid to the United States in October last by the official delegates of this association—Messrs. Percy Barringer (president), Clifton Tollit (vice-president), and Laurence G. Sloan—to the annual convention of the National Association of Stationers of the U.S.A. This important gathering took place at Atlantic City, and the British delegates met with a most enthusiastic reception, whilst the speeches made by these gentlemen created a profound impression upon their American friends. The report went on to state that the revision of postal charges had been received by traders with especial satisfaction, as it has been so abundantly proved that while the high cost of postage has acted as a great deterrent to trade generally, the stationery trade has particularly been most seriously affected. The Stationers' Association claims to have played its part in the campaign for cheaper postage by means of protest meetings, making direct representations to the Government, and addressing its views to every member of the House of Commons. Another interesting point in the report referred to navy, army and air force institutes, it being remarked that few traders seem to realise the insidious menace to their interests threatened by the expansion of this body into a huge and miscellaneous trading concern. The Association's president has been actively engaged (at the House of Commons and elsewhere) with the National Protest Committee in an endeavour to restrict the activities of this monopoly to their legitimate function, viz., the supply to service men only. The evil is stated to have been partly "scotched," but is still rampant in many districts, so that constant vigilance is more than ever necessary.

The annual accounts and financial statement were presented by the hon. treasurer, Mr. Sydney C. Simmons, and showed a very favourable state of affairs. Mr. W. B. Warren (chairman of Finance and Membership Committee) seconded the adoption of the accounts as audited, and this was agreed.

The Elections.

The next business was the election of four firms to serve on the Council in the Manufacturers' Section for the next three years. A ballot was taken, and the following firms were elected: Burge, Warren and Ridgeley, Ltd.;

G. Delgado, Ltd.; Fuller and Mead, Ltd.; Mabie, Todd and Co., Ltd.

There was also an election of four firms to serve on the Council in the Wholesalers' Section for the next three years, the firms elected being: Educational Supply Association, Ltd.; Evans, Gadd and Co., Ltd.; George Vickers, Ltd.; Wheatley and Tasker.

Four firms to serve on the Council in the Retailers' Section for the next three years were also elected as follows: L. Lydall and Son; G. H. Martin; F. J. Morgan and Co.; Truslove and Hansan, Ltd.

The auditors (Messrs. Holmes and Son) were re-elected.

Stationery Samples by Post.

Mr. Sydney J. Sandie, C.C., then moved the following resolution, which was carried:—"That this meeting of members of the Stationers' Association of the United Kingdom most strongly urge H.M. Postmaster-General to reinstate the conditions under which samples of stationery may be sent through the post at printed paper rate, and respectfully ask that a deputation of the Association and other bodies interested may be received by him at an early date in order that the matter may be fully discussed."

The meeting closed with a vote of thanks to the chairman, moved by Mr. Chas. H. Cummins.

Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

The usual monthly meeting of the Association was held on Tuesday of last week at the headquarters, St. Bride Institute, Bride-lane, E.C., the chair being occupied by the president (Mr. A. W. Hunt), who was ably supported by the vice-president (Mr. H. Milton). The large gathering, meeting in the midst of the printing trade wages crisis, made that topic the uppermost one in conversation before the actual business commenced and also in subsequent discussion.

Mr. A. Cox (general secretary) having read the minutes of the last meeting—which were confirmed—submitted several items of correspondence.

Among these was a letter from Mr. J. R. Riddell asking for notification of the appointment of the Association's representative on the Governing Body of the new technical school. This letter had been placed in the hands of Mr. Eden, the Association's technical adviser, and the arrangements that had been come to with Mr. W. Bullett, general secretary of the Stereotypers' Overseers' Association, was that Mr. Eden should represent the two Associations for the time being. A letter was also read from Mrs. Rolls, who was continuing the business of a former member, the late Mr. Rolls. Other letters were received from two unemployed members seeking appointments.

New Members.

The meeting then proceeded to the election of the following candidates for membership: Messrs. Fredk. Cavelli (binding), Eden Fisher and Co.; A. J. Jones (vellum binding), Wells and Co. The election being unanimously endorsed, the president extended to the new members a hearty welcome to the ranks of the Association.

The Annual Outing.

The next business to be considered was the annual outing which takes place on Saturday, July 8th, when a visit is to be made to the London Paper Mills at Dartford. Mr. H. Milton, who spoke on behalf of the stewards, said that the arrangements for the occasion were well in hand, and he hoped to see a large gathering. The ladies, he said, would be especially welcomed.

A paper by Mr. Geo. A. Eden on the new technical school was the next item on the agenda, but Mr. A. G. Aves proposed, in view of the disturbed state of the industry, and the desire there was among the members that it should be discussed, that it be left over till next month.

This was seconded by Mr. G. A. Rutherford and agreed to.

The rest of the evening was occupied with questions relating to the lock-out notices and how overseers might be affected by them.

Closing a discussion, the president expressed the hope that an amicable arrangement would be come to that would be satisfactory to both sides.

A vote of thanks to the chairman closed the proceedings.

The Irish Printing Trade.

State of Prices and Wages.

When the Associated Irish Newspapers was started in the mid-summer of 1917, the provincial press of Ireland found itself in a parlous place—states the monthly circular of the Associated Irish Newspapers. Economically it had been existing up till then in a position for which "degradation" is not too strong a word. The result was that when war pressure came many newspapers found themselves on the verge of bankruptcy. A few provincial printers met in Dublin, and made up their minds that the old economically unsound prices should no more obtain. Thus, necessity saw the birth of the Associated Irish newspapers, and it is generally conceded that in those earlier years the organisation attained a higher standard of efficiency, in bettering the conditions of the provincial press, than it has ever since reached. Following the war, there were political troubles in Ireland, which rendered organisation extremely difficult. Moreover, for a time the A.I.N. was rather overshadowed by the Irish Master Printers' Association, all of whose energies were almost ceaselessly engaged in fighting the wages increases. But for the earlier organisation, there is not the least shadow of a doubt that these wages increases could not have been borne, and those who to-day grumble about the high wages the provincial press is compelled to pay rather lose sight of the major fact that at least industrial peace was preserved in the newspaper and printing trades during those difficult years, and that in probably more instances than some members would like to reveal the proprietors were kept out of the debtors' court.

Printing Prices.

Frequent inquiries are made by members of the Irish Master Printers' Association in regard to the minimum printing prices charged. These have never yet been officially fixed by the organisation as a whole, although various Ulster groups have agreed amongst themselves as to their minimum charges for ordinary printing work. The scale laid down by the Ulster group has been adopted in many other places. In some districts a larger sum is quoted and obtained. The following prices may be taken as suitable minima:—

Double-demy posters (35 in. by 22½ in.) 50, 29s.; 75, 32s. 6d.; 100, 36s. Double crown posters (30 in. by 20 in.) 50, 23s. 6d.; 75, 26s.; 100, 29s. Demy (22½ in. by 17½ in.) 50, 16s. 3d.; 75, 18s. 6d.; 100, 20s. Demy folio (17½ in. by 11½ in.) 50, 13s.; 75, 14s. 9d.; 100, 16s. 3d. Crown folio (15 in. by 10 in.) 50, 11s.; 75, 13s.; 100, 14s. 6d. Accounts 8 mo. (8 in. by 5 in.) 250, 10s.; 500, 13s.; 1,000, 16s. 6d. Quarto accounts, 250, 12s. 6d.; 500, 16s.; 1,000, 24s. Concert tickets, small (2½ in. by 3½ in.) 100, 7s.; 200, 9s.; 300, 10s. 6d.; 500, 13s.; 1,000, 20s. Handbills crown 8 mo. (7½ in. by 5 in.) 500, 13s. 6d.; 1,000, 17s.; 2,000, 25s.; 5,000, 45s.

It is hoped that at the annual meeting of the I.M.P.A. in July a serious effort will be put forward to utilise the imprint movement to prevent unfair competition, and to go more carefully into the question of quoting for the bigger classes of work generally.

Messrs. Cahill and Co.

Newspaper men and printers generally throughout Ireland, who deplored the destruction, in February last, of the well-equipped premises of Messrs. Cahill and Co. at Ormonde quay, will be glad to know that the firm has now purchased the premises of the Greenmount Spinning Co. at Harold's Cross, and hopes within a short time to be able to turn out the *Irish Farmer*, *Ireland's Own*, *Irish Life*, and the score or so of other publications which, together with a large supply of general printing, issue from their works. The fact that the firm has been able to "carry on" through a very difficult time, taken in conjunction with the remarkable recovery of the *Freeman's Journal*—which was able to issue a new paper a few weeks after the complete destruction of its plant—is a testimony to the courage and enterprise of Irish printing and to the resiliency of the trade. In passing, it may be mentioned that the *Freeman's Journal* has installed one of the latest model Intertype machines, which is capable of setting up to 36 point.

Wages Movements.

The movement to reduce wages in the printing and allied trades throughout Great

Britain has been watched with interest by the members of the Irish Associations. The whole question of a new Irish movement will have to be considered at a very early date. The minutes of the Ulster group meeting held at Belfast on May 8th reveal the fact that the Northern members are as active as ever, and that some discontent obtains in regard to the failure of the Southern groups to stand as solidly as they might have done on the question of a reduction in wages.

The Coming Election.

The Stationery Office is this week issuing a circular to the Sheriffs of each county of the 26, informing them who the contractors are in the different areas, and giving instructions for the issue of the ballot papers for the forthcoming elections. Under the contract, the printer must supply the material for these ballot papers.

It is interesting to recall that the present contracts were arranged at a joint meeting of the Irish Master Printers' Association and the Dublin Master Printers in the autumn of 1920. This arrangement still holds.

Bookbinders' Leather for Australia.

A considerable quantity of bookbinders' leather, cloth, etc., is included in a tender issued by the Australian Government. Among the various classes of leather required are the following:—Morocco, calf, basil, russia, roan, etc., as well as 140,000 manilla tags. Copies of the tender can be obtained on application to Australia House, Strand, W.C.2. The last day for receiving tenders is Monday, July 3rd.

How Orders for British Papers ARE LOST.

In a letter to the Aberdeen press Mr. Thomas Tait, the well-known paper manufacturer, draws attention to the ruinous competition which is being met with from Continental countries with low exchange rates, and incidentally he puts a question which ought to weigh with those who have power to influence the legislative machine of this country. He mentions that he was given an opportunity a little while back to quote for several days work, and as he was anxious to keep his machines running over the Whitsuntide holidays he put in a very keen price, which apparently was something under 4d. per lb. In spite of his endeavours to quote as low as possible he found later that the order had gone to Austria at 2½d. per lb. delivered to a Scottish port. Mr. Tait recalls that during the war when the Excess Profits Tax was about 5d. per lb. in order to avoid trouble he asked the Paper Control Department as to their idea of price for a similar paper, and he left his customer to fill in the fair market price. The Government price was then a minimum of 9d. while his customer thought 1s. 2d. was a fair figure. Mr. Tait winds up his letter with the following query: Will some fair trader—not "free trader"—tell the public what proportion of the out-of-work benefit this Austrian paper will pay in taxes to the British nation and of the 5½d. poor rate announced in to-day's Aberdeen paper?

Spicers, Limited.

Formal announcement has been made both by Spicer Brothers, Ltd., and James Spicer and Sons, Ltd., of the completed arrangement by which the two companies are amalgamating under the title of Spicers, Ltd. It is intimated that the Rt. Hon. Sir Albert Spicer, Bart., will be the chairman of the amalgamated company for the first year and will be succeeded by Mr. H. G. Spicer, who in the meantime will be deputy chairman. Both parties point out that under the amalgamation their stocks will be even more complete than at present, while the amalgamation will be the means of strengthening the powers of service by increased facilities and larger and more varied manufacturing powers. Messrs. James Spicer and Sons point out that they will add to their combined distributing and manufacturing potentialities that of paper-making.

Boston Graphic Arts Exposition.

Arrangements Made on a Big Scale.

Judging by the astonishing amount of cleverly-produced publicity matter which we are receiving on the subject, our American friends are leaving no stone unturned to ensure the success of the Second Graphic Arts Educational Exposition to be held in Mechanics' Building, Boston, during the entire week commencing August 28th and ending September 2nd, 1922.

In addition to the business side of the Exposition there are to be many attractive social features. Very special attention is being given to the arrangements for the entertainment of lady visitors, and among the items on the lengthy programme we notice motor drives, visits to numerous places of interest in the locality, theatre parties, dancing, bathing and even a "shopping tour."

An imposing list of exhibitors is sent us, and it would seem that the Exposition will be thoroughly representative of the printing and allied trades.

The Printing Exhibit is to be one of the best features. This part of the show will occupy a whole section of the building. Here will be shown a great variety of art, book, catalogue, magazine and commercial printing. A complete direct-by-mail campaign in full detail will be displayed, with attendants to explain to buyers of printing the advantages of this form of advertising. The lay-out display will show examples in black and colour work for cards, boxes, folders, catalogues, broadsides, posters, magazine inserts and advertisements. The composition exhibits will include examples of old style and modern treatments of straight and tabular matter, and display type and illustrated arrangements. The presswork shown will include results obtained by letterpress, offset, lithographic and rotogravure processes in black and colours, on platen, cylinder and rotary presses.

Binding operations will be shown through a variety of examples of different methods of folding, stitching, backing, blocking, trimming, covering and lettering. Interesting and impressive displays of regular work by representative printers will be augmented by exhibits of priceless examples of especial honour printing and binding. The first printed sheet produced in America came from a press in Cambridge, Mass. Many early productions are still preserved and arrangements are under way to include some of them in the exhibit.

Classes from art institutes and colleges maintaining business administration and advertising departments will attend the exhibit with their instructors, and arrangements will be made to have competent printing authorities address them on the value of printing to the business man. Advertising representatives and purchasing agents from the United States, Canada and Europe will attend to study the display of printing, and note the development of the newer and fuller co-operation of the printer and the advertiser.

This section of the building devoted exclusively to the printing exhibit will afford good light and ample room for comfortable and leisurely examination and study of the exhibits. It is claimed that no such setting and completeness has ever been available for a printing exhibit before. An attendance of over 250,000 is confidently expected.

Caxton Home "Remembrance Day."

Saturday, June 17th, was kept as "Remembrance Day" at the Caxton Convalescent Home, Lymington, this being the anniversary of the opening of the War Memorial Wing and the unveiling of the Printing Trades Roll of Honour. Over one hundred subscribers, friends and relatives of the men who had fallen were present. Mr. C. J. Drummond, J.P., after a short opening address, placed a wreath at the foot of the roll of honour screen. Mr. C. W. Bowerman, M.P. (treasurer), and Mr. T. E. Naylor, M.P. (vice-president), spoke of the part played by the members of the printing and allied trades in the war, and made feeling reference to the men whose names are inscribed on the roll, many of whom they had personally known. The sounding of the "Last Post" brought a very simple and touching ceremony to a close.

Stationers' Social Society.

Bowls Competition.

Although a bowls competition has only been introduced as a part of the curriculum of the Stationers' Social Society during the last two seasons it has served to bring to the front a body of enthusiastic bowlers, and this section of the society's activities bids fair to become very popular, especially as it provides a further opportunity for relaxation and the advancement of pleasant personal intercourse.

Weather conditions on the 14th inst. were not ideal, but a large number of players and friends assembled early in the day on the splendid green (Cumberland turf) of the Malden Bowling Club, which was placed at the disposal of the Stationers' Social Society through the kind influence of Mr. A. Woollacott, J.P. It will be remembered that last year Mr. Woollacott presented a challenge cup for annual competition amongst the bowling members of the Society, the winner on that occasion being Mr. James H. Senier.

The entrants this year were Messrs. J. Cairns, Geo. Michie, H. H. Burholt, J. H. Senier, W. H. Day, Wm. Penman, G. J. Ralph, P. S. Porteous, W. S. Muir, E. Macfarlane, M. Relph, A. Woollacott, E. M. Fells, and T. W. Hastings. In the preliminary rounds some good play was witnessed. Mr. Woollacott, of county fame, met Mr. Hastings, and an extremely close game resulted. Mr. Wm. Penman is another bowling veteran whose keenness is unflagging, and Mr. M. Relph is also a determined player. It is that spirit of cheerfulness and goodwill in defeat shown by the bowlers of the Stationers' Social Society that added so much to the pleasure of Wednesday's gathering, and the very few points between loser and winner emphasised the fairness of the handicapping.

In the semi-finals Mr. E. M. Fells beat Mr. J. H. Senier (the holder of the cup), and Mr. H. H. Burholt scored a victory over Mr. Geo. Michie. In the final Mr. Fells (who received three) played a plucky game, but fell to Mr. Burholt (scratch), who was the runner up last year. The winner showed excellent form, scoring 21 to his opponent's 14.

Mr. Lionel Savory, the president of the Stationers' Social Society, took a keen interest in the competition, and among other visitors were Messrs. T. C. Dyer, A. E. Bishop, H. Haxton, A. H. Moody, F. J. Willmer, etc. Mr. A. E. Mist, the popular hon. sec., was, as usual, most assiduous in carrying out the arrangements in connection with the meeting.

Mr. Savory, in handing the cup to Mr. Burholt, congratulated him on his success, and also tendered to Mr. Woollacott the thanks of the Society for the privilege granted them to play on such an excellent green.

Mr. Fells also congratulated the winner, and Mr. Burholt responded, feeling it a great honour to hold the cup for the time being.

Mr. Woollacott and the secretary of the Malden Bowling Club said they were only too pleased to welcome the visitors.

United States Customs Tariff.

In the *British and Colonial Printer*, August 18th, 1921, we published Schedule 13, dealing with paper, etc., of the Bill for the Revision of the United States Customs Tariff, passed by the House of Representatives.

The Bill has since been revised by the Finance Committee of the Senate, and is now before the Senate. Alterations are shown both as regards the rates of duty proposed and the basis on which *ad valorem* duties are proposed to be levied.

The following paragraphs dealing with paper, etc., are taken from the supplement of the *Board of Trade Journal* containing the United States Tariff Revision Bill:—

Printing Paper.

PAR. 1301. Printing paper, not specially provided for, one fourth of 1 cent per pound and 10 per cent *ad valorem*: Provided, That, if any country, dependency, province or other subdivision of government shall forbid or restrict in any way the exportation of (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly), or impose any export duty, export licence fee, or other export charge of any kind whatsoever (whether in the form of additional charge or licence fee or otherwise) upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp, the President may enter into negotiations with such country, dependency, province, or other sub-division of government to secure the removal of such prohibition, restriction, export duty, or other export charge, and if it is not removed he may, by proclamation, declare such failure of negotiations, setting forth the facts. Thereupon, and until such prohibition, restriction, export duty, or other export charge is removed, there shall be imposed upon printing paper provided for in this paragraph, when imported either directly or indirectly from such country, dependency, province, or other subdivision of government an additional duty of 10 per cent *ad valorem* and in addition thereto an amount equal to the highest export duty or other export charge imposed by such country, dependency, province, or other subdivision of government, upon either an equal amount of printing paper or an amount of wood pulp or wood for use in the manufacture of wood pulp necessary to manufacture such printing paper.

Boards.

PAR. 1302. Paper, board, wallboard, and pulpboard, including cardboard, and leather board or compress leather, not laminated, glazed, coated, lined, embossed, printed, decorated, or ornamented in any manner, nor cut into shapes for boxes or other articles and not specially provided for, except pulpboard in rolls, for use in manufacture of wallboard, 10 per cent *ad valorem*: Provided, That for the purposes of this Act any of the foregoing less than nine one-thousandths of an inch in thickness shall be deemed to be paper; sheathing paper, roofing paper, deadening felt, sheathing felt, roofing felt or felt roofing, whether or not saturated or coated, 10 per cent *ad valorem*.

PAR. 1303. Filter masse or filter stock, composed wholly or in part of wood pulp, wood flour, cotton or other vegetable fibre, 1½ cents per pound and 25 per cent *ad valorem*; indurated fibre ware, masks composed of paper, pulp or papier-maché, manufactures of pulp, and manufactures of papier-maché, not specially provided for, 30 per cent *ad valorem*.

Tissue Paper, etc.

PAR. 1304. Papers commonly known as tissue paper, stereotype paper, and copying paper, india and bible paper, condenser paper, carbon paper, coated or uncoated, bibulous paper, pottery paper, tissue paper for waxing, and all paper similar to any of the foregoing, not specially provided for, coloured or uncoloured, white or printed, weighing not over eight pound to the ream of four hundred and eighty sheets on the basis of twenty by thirty inches, and whether in reams or any other form, 6 cents per pound and 15 per cent *ad valorem*; weighing over eight pounds and less than twelve and one-half pounds to the ream, 5 cents per pound and 15 per cent *ad valorem*; weighing over twelve and one-half pounds and less than eighteen pounds to the ream, 4 cents per pound and 15 per cent *ad valorem*; crêpe paper, and filtering paper, 6 cents per pound and 15 per cent *ad valorem*: Provided, That no article composed wholly or in chief value of one or more of the papers specified in this paragraph shall pay a less rate of duty than that imposed upon the com-

ponent paper of chief value of which such article is made.

Coated Papers.

PAR. 1305. Papers with coated surface or surfaces, not specially provided for, 5 cents per pound; papers with coated surface or surfaces, embossed or printed otherwise than lithographically, and papers wholly or partly covered with metal or its solutions (except as herein provided), or with gelatin, linseed oil cement, or flock, 5 cents per pound and 20 per cent *ad valorem*; papers, including wrapping paper, with the surface or surfaces wholly or partly decorated or covered with a design, fancy effect, pattern, or character, except designs, fancy effects, patterns, or characters produced on a paper machine without attachments, or produced by lithographic process, 4½ cents per pound, and in addition thereto, if embossed, or printed otherwise than lithographically, or wholly or partly covered with metal or its solutions, or with gelatin or flock, 20 per cent *ad valorem*: Provided, that paper wholly or partly covered with metal or its solutions, and weighing less than fifteen pounds per ream of four hundred and eighty sheets, on the basis of twenty by twenty-five inches, shall pay a duty of 5 cents per pound and 25 per cent *ad valorem*; gummed papers, not specially provided for, 5 cents per pound; cloth-lined or reinforced paper, 5 cents per pound and 20 per cent *ad valorem*; papers with paraffin or wax-coated surface or surfaces, vegetable parchment paper, grease-proof and imitation parchment papers which have been supercalendered and rendered transparent or partially so, by whatever name known, all other grease-proof and imitation parchment paper, not specially provided for, by whatever name known, 3 cents per pound and 25 per cent *ad valorem*; bags, printed matter other than lithographic, and all other articles, composed wholly or in chief value of any of the foregoing papers, not specially provided for, and all boxes of paper or papier-maché or wood covered or lined with any of the foregoing papers or lithographed paper, or covered or lined with cotton or other vegetable fibre, 5 cents per pound and 35 per cent *ad valorem*; plain basic paper for albumenising, sensitising, baryta coating, or for photographic processes by using solar or artificial light, 3 cents per pound and 20 per cent *ad valorem*; albumenised or sensitised paper or paper otherwise surface coated for photographic purposes, 3 cents per pound and 25 per cent *ad valorem*; wet transfer paper or paper prepared wholly with glycerin or glycerin combined with other materials, containing the imprints taken from lithographic plates or stones, 65 per cent *ad valorem*.

Writing Paper, Envelopes, etc.

PAR. 1307. Writing, letter, note, drawing, hand-made paper and paper commercially known as hand-made paper and machine hand-made paper, japan paper and imitation japan paper by whatever name known, Bristol board of the kinds made on a Four-drier machine, and ledger, bond, record, tablet, typewriter, manifold, and onionskin and imitation onionskin paper, calendered or uncalendered, weighing eight pounds or over per ream, and paper similar to any of the foregoing, 3 cents per pound and 15 per cent *ad valorem*; but if any of the foregoing is ruled, bordered, embossed, printed, lined, or decorated in any manner, other than by lithographic process, it shall pay 10 per cent *ad valorem* in addition to the foregoing rates: Provided, that in computing the duty on such paper every one hundred and eighty-seven thousand square inches shall be taken to be a ream.

PAR. 1308. Paper envelopes not specially provided for shall pay the same rate of duty as the paper from which made, and in addition thereto, if plain, 5 per cent *ad valorem*; if bordered, embossed, printed, tinted, decorated or lined, 10 per cent *ad valorem*; if lithographed, 30 per cent *ad valorem*.

PAR. 1309. Jacquard designs on ruled paper, or cut on Jacquard cards, and parts of such designs, 35 per cent *ad valorem*; hanging paper, not printed, lithographed, dyed, or coloured, 10 per cent *ad valorem*; printed, lithographed, dyed, or coloured, 3 cents per pound and 20 per cent *ad valorem*; wrapping paper not specially provided for, 30 per cent *ad valorem*; blotting paper, 30 per cent *ad valorem*; paper not specially provided for, 30 per cent *ad valorem*.

PAR. 1312. Playing cards, 10 cents per pack and 20 per cent *ad valorem*.

Embossed Paper and Board.

PAR. 1313. Papers and paper board and pulpboard, including cardboard and leather-

board or compress leather, embossed, cut, die-cut, or stamped into designs or shapes, such as initials, monograms, lace, borders, bands, strips, or other forms, or cut or shaped for boxes or other articles, plain or printed, but not lithographed, and not specially provided for; paper board and pulpboard, including cardboard and leatherboard or compress leather, laminated, glazed, coated, lined, printed, decorated, or ornamented in any manner; press boards and press paper, all the foregoing, 35 per cent *ad valorem*; test or container boards of a bursting strength above 60 lbs. per sq. in. by the Mullen or the Webb test, 25 per cent *ad valorem*; stereotype-matrix mat or board, 35 per cent *ad valorem*; wall pockets, composed wholly or in chief value of paper, papier maché or paper board, whether or not die-cut, embossed, or printed lithographically or otherwise; boxes, composed wholly or in chief value of paper, papier-maché or paper board, and not specially provided for; manufactures of paper, or of which paper is the component material of chief value, not specially provided for, all the foregoing, 40 per cent *ad valorem*.

Paper Price Tangle.

Sensation in American Trade Circles.

Quite a sensation has been created in American paper circles by the announcement that all the fine paper houses holding membership in the Paper Trade Division of the Typothetæ of Philadelphia have resigned in a body.

This drastic action follows the activities of the Typothetæ in regard to "the long price list" and the action of the Federal Trade Commission in taking proceedings against the United Typothetæ of America. The Commission charges that the "Three Year Plan," which is supported by the supply trade to the extent of one-tenth of 1 per cent. of their sales, is operated in restraint of trade in that it tends to establish a fixed price for printing.

Accordingly representatives of the paper trade were called as witnesses, and during the hearing a letter was read from the manager of a supply house, in which it was stated: "We feel that we were forced into it against our judgment." The paper men were asked to give their reasons for contributing to this plan, and were asked if any pressure was brought to bear in making them become advocates.

The reason for the resignation of the fine paper houses from the Typothetæ is set forth by Mr. A. E. Whiting, president of the Paper Trade Association of Philadelphia, who says: "Several months ago when the question of the retail price list first was taken up, a number of the houses felt that they should resign from the Paper Trade Division of the Typothetæ in order to avoid being in a position that might be embarrassing to either party, but they were persuaded not to act as individuals. Since then, the opinion of several authorities learned in the law has been received that if litigation that is now pending against the U.T.A. and questioning the legality of its position in advising that paper purchasing be made only of long list houses, was successful, all the members of the Typothetæ and, of course, so far as we are concerned, the members of the Paper Trade Division, specifically might be held accountable and it was solely for this reason to avoid a responsibility which we did not think we should permit ourselves to be in a position to have placed upon us, that we decided to withdraw. It was the intention to set forth these facts in an official letter. We, of course, are just as friendly as ever with the printers, and we are quite willing to continue such financial support as we have been able to give in the past."

The Typothetæ of Philadelphia have since tried to assure the paper houses on the legal aspect of the question, stating that they have "the opinion of able counsel that the issuance of a retail price list is in no way illegal."

Further development will be awaited with interest.

THE Langfield series of fine tinted papers, issued by Messrs. John Dickinson and Co., Ltd., are stocked in three different sizes, and can be obtained in seven colours. The papers—suitable for distinctive advertising purposes—are made up into reams of 480 sheets and priced at 4½d. per lb.

Paper Standardisation.

Important Departure in the Netherlands.

A Royal Decree of March 9th contains provisions for the standardisation of qualities and sizes of paper in the Netherlands under Article 14 of the Merchandise Act (Warenwet), 1919. This looks like the first effort to enforce standardisation by legislation.

It is set out in the first article that the terms "book" and "ream" must be qualified by the number of sheets if not complying with the terms governing "standard paper," while standard paper may solely be applied by the trade to paper meeting with specific requirements in Schedule II., which is devoted to the qualifications of the various classes of paper.

In the case of normal paper, which is specifically defined, this has to bear a watermark bearing the word "normal," and the whole watermark must appear at least once on every sheet of 34½ by 44 cms. The watermark, before the paper bearing it is brought into circulation, must be inscribed in a public register, which will be maintained for this purpose by the Government Intelligence Service.

The penalty for infringement of any of the

articles in the Decree is six months in the second division or a maximum of 2,000 guilders' fine, while the goods bearing such infringement are to be forfeited.

Schedule I. sets out the descriptions and sizes of paper in detail, while Schedule II. deals with quality. The testing of paper to ascertain whether it meets with the requirements of the Decree will be carried out according to W. Harzberg, 1921, 5th edition, the physical qualities being tested under a relative dampness of the atmospheric conditions of 65 per cent. The breaking test and resistance to creasing will be carried out by means of the instrument constructed for this purpose by Schopper, the breaking test being carried out for paper dried to 100 degs. Celsius. The breaking limit and creasing limit are to be decided by testing 10 strips taken in the weakest direction of the paper from 10 different sheets. The sizing will be decided by the usual tests and also by writing with good class ferro-tannic acid ink in heavy writing with cross lines.

Other tests relate to the resistance to light and erasive resistance. Regarding the requirements of erasive resistance of printing paper, it is pointed out that the demand for this type of paper is a guarantee against "picking."

Normal and standard papers may not contain any free acids. In the case of paper weighing more than 150 grammes per square metre the breaking test is reduced by 10 per

cent. and the creasing test by 20 per cent. Investigations of the physical properties of cardboard of more than 400 grammes per square metre will not be applied.

With regard to the requirements of sizing resistance to light and erasive resistance, comparison has to be made with standard samples which will be obtainable in three grades for three different sorts of paper from the Government Intelligence Service at Delft or from the Government Bureau for Testing Commercial Articles.

The qualifications for different sorts of paper are set out in detail. In the case of writing paper of unlimited durability, for instance, the weight per square metre is to be not less than 150 grammes and the breaking limit in the weakest direction at least 5,000 metres, while the number of creases in the weakest direction is put at 300. Writings are subdivided according to durability and definite limits are applied as to breaking strength. In the case of paper for printing and illustrations the minimum thickness of 0.23 mm. is allowed, and in this and other cases resistance to light has to be very great, while there are other restrictions as to stretch in printing.

Specifications are set out governing envelope paper, drawing paper, blotting paper, wrappings and cardboards in view of the various purposes for which each class of material is used. There is, however, no specific mention of strawboards.

New Inventions.

Die Printing Presses.

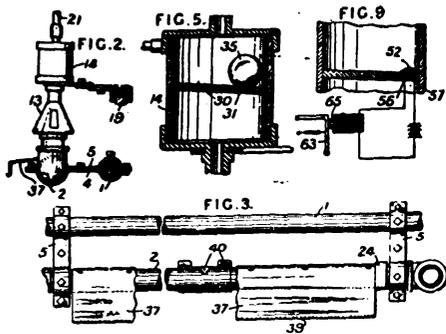

An invention by Messrs. Waite and Saville relates to machines for printing from engraved plates or dies of the type described in Specification 174,436 are provided with devices for stripping the printed card from the die. A mask 6 carried by a frame 5 is arranged between the die 2, which is face downwards, and the rising table 4 which gives the impression. The frame 5 is detachably mounted on arms 7, 7^a fixed to vertical rods 9, 9^a, which are mounted to slide in guides 10, 11 on the cross-head C of the

machine and are normally held in the raised position, to facilitate the positioning of the card to be printed on the table 4, by springs k. The arms 9, 9^a are moved by levers 12 mounted on a shaft 13 which also carries an arm 14 rocked by a cam 15 driven from any appropriate part of the machine. From the highest position, the arms 9, 9^a are depressed so that, during printing, the mask is between the die and the sheet, and, on the table 4 falling, they are further depressed to cause the mask to strip the card from the die. The springs k may be dispensed with, and the device arranged to fall by its own weight to strip the card off the die, in which case the table 4 is arranged to recede to a greater extent.

Heating Attachment for Printing Presses.

A heating attachment for printing, sheet feeding and like machines, as patented by the Canadian-American Machinery Co., Ltd., and C. H. Cochrane, is provided with a movable member adapted to control the supply of the heating medium by being caused to vary its operative position automatically by the action or inaction of the machine to which it is applied. As shown, a ball 35, Fig.

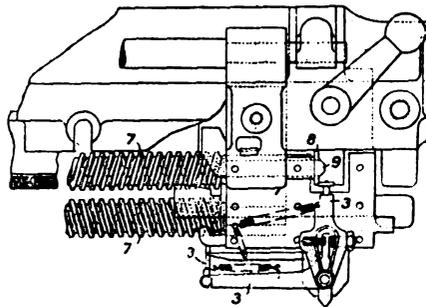

5, resting on an inclined partition 30 in a casing 14 through which gas is passed from a flexible supply tube 21, Fig. 2, and via a mixing chamber 13 to a perforated gas pipe 2, Fig. 3, is seated, when the press is inactive, on the flared end of an aperture 31 eccentrically formed in the partition 30, and so shuts off the gas. The gas pipe 2 is fixed by clamps 4, 5 to the front bar 1, and the casing is clamped to a bar 19 of the press delivery carriage so that when the latter is reciprocating during the working of the press the ball 35 is unseated and travels about on the partition, thus allowing gas to pass through the aperture 31. A pilot jet for relighting the gas is fixed by a band 24 to the pipe 2 and is connected to the upper part of the casing 14.

Spring clips 40, Fig. 3, preferably lined with asbestos, may be used to shut off the perforations not required. A shield 37, Figs. 2 and 3, fixed to the pipe 2 and provided with a turned-down end 39 protects the operator from the glare of the flames and directs some of the heat down on to the pile of sheets being formed. In a modification, Fig. 9, the ball 35 is replaced by a globule of mercury 52 which, when the press is inactive, bridges two contacts 56, 57, thus energising an electro-magnet 65, attracting a spring-pressed lever 63 and shutting off the gas. The attachment may be fixed to the front end of the press, the sheets passing over the shield 37 and then collecting beneath it, and may also be applied so as to co-operate with the impression cylinder, being fixed to the moving feed board and alternately heating the cylinder tympan and the sheets.

Distributing Matrices.

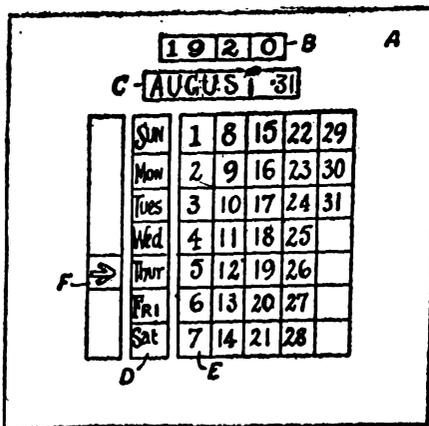

Messrs. Linotype and Machinery Limited, and others, have patented a method whereby in order to increase the rate of distribution of the matrices per revolution of the distributor screws, the threads of the screws are increased both in pitch and in number. In the example illustrated, each screw 7 is provided with two

threads of double the ordinary pitch so that two matrices can be engaged with the screws at each revolution. The matrix lifter 3 is caused to operate twice per revolution by the provision of two lobes 9 on its actuating cam 8.

Perpetual Calendars.

Mr. W. M. Clark has patented a perpetual monthly calendar which comprises a board or tablet A upon which the stationary and movable parts are mounted. The days of the month are arranged in columns E and the day names of the week, repeated once, are marked on vertically adjustable endless band D. The first four columns E are permanently marked on the surface but the fifth column is

of a length equal to three day-number spaces and is provided with an endless band to display one, two, or three last days of the month or three blanks. An horizontally movable strip C bears the names of the months and the year number of which the last two figures are carried by endless bands so as to be adjustable, is exhibited at B. An adjustable indicator F is provided to mark the actual day of the week or a particular date.

Costing Publishers' Bookbinding.

By ALEC ORROCK,

Member of the Executive and of the Costing Committee of the Scottish Alliance of Master Printers.

In a little book with the title of "Practical Estimating," published ten years ago, I find the following: "Profit is an item in which the Master Printer will be guided by circumstances, as it depends largely upon the class of work and clientele for whom he caters. Some printers are prepared to run their plant for a small profit, relying upon a large turnover to recompense them; others with a limited clientele will require a rather larger percentage. Usually 33½ per cent. added to actual cost will be found sufficient to cover all establishment expenses and to provide a fair profit." That, apparently, was the general practice of estimating in the printing and kindred trades less than ten years ago, and I suppose it was only at the end of the financial year that it was discovered that sometimes 33½ per cent. did not cover all establishment charges and yield a fair profit.

When we think of bookbinding, most of us are inclined to consider the trade as a whole from our own particular angle, quite often overlooking the fact that there are two distinct branches of the trade whose methods of working differ very widely, whose custom is drawn from entirely different sources, and whose costs and hourly rates do not really lend themselves to comparison. These two branches are the letterpress or publishers' bookbinding and the stationery, or commercial bookbinding, and it is well to make it quite clear which branch we are referring to when we discuss costs and other problems affecting the trade.

Departmental Costing.

For costing purposes, my bindery is divided into the following departments:—Folding, sewing, cutting, gilding, forwarding, casemaking, blocking and warehouse. In addition, I have a miscellaneous department which is divided into three sections: hand-sewing, etc., forwarding, and finishing. There is a special daily docket for each of these departments which corresponds with the cost sheet. This not only facilitates the costing clerk's work, but is also extremely useful as an indicator of the progress of the binding of a particular book, as a glance at the cost sheet tells you exactly what has been done and what there is still to do. How often are bookbinders rung up with the question: "How soon can we have copies of such and such a book?" If you use the costing system, you ask for the cost sheet and you are thereby enabled to give an answer straight away, in place of telephoning all

over the bindery to find out the position before you can give an answer.

The weekly value of production statement is, to my mind, a most interesting and instructive document, and through its means I am certain that the manager of a bindery will be made aware of time lost through various causes, of which, otherwise, he would be ignorant. As regards non-chargeable time, this, of course, is also an item which a binder must take into account, but it does not amount to such formidable proportions as is found in the printing office. This is one of the reasons why, as a rule binders' hourly rates are lower than printers': at the same time, non-chargeable time is there, and must be reckoned with. It is wonderful how those odd half hours—cleaning machines and break-downs, etc.—mount up. The value of production sheet tells you what they amount to.

Some of my friends said to me when discussing the system: "Yes, the costing system is all right, but look at the expense of an additional clerk. Remember what you have said regarding non-chargeable time." I agree that you will require an additional clerk, but I am equally certain that you will save the amount of the year's salary in 6 months; and at the same time, being the possessor of an accurate costing system, you will be able to say "my price is correct."

Suitability of Federation System.

The letterpress bookbinding section undoubtedly lends itself to the complete application of the Federation Costing System. Fairly long runs enable the workers to be employed quite steadily upon a definite process of some particular job. Machines are kept fully employed (sometimes) upon work of a more or less uniform nature, and the similarity of various jobs enables one to gauge the process times to a very close degree of accuracy. Hourly rates, once established by the costing system, can in normal times usually be maintained throughout the year. Any leakage is immediately spotted through the weekly statements of costs and value of production, and steps can be taken towards a remedy before it has gone too far.

Unless there are some extraordinary circumstances, it will be found that the hourly rates in a bindery devoted to publishers' work vary very little. A friend in the trade, who works the Federation Costing System, was good enough some time ago to compare rates with me, and we were both agreeably surprised to find that our rates were practically identical, a sure sign to both of us

that we were on the right lines. We have occasionally asked one another to cost some particular job which we had estimated for and which we had lost, being told, as a rule, that we were miles out of it, but as a result of the comparison of estimates we have usually found that it was our competitor who was far off the mark.

With regard to the miscellaneous department—and this also applies to the stationery or commercial bookbinding—an entirely different state of conditions has to be dealt with, both from an organisation and a costing standpoint. Indeed, it is doubtful if any other section of the printing and allied trades has quite so complicated a problem when one considers the nature of the work. Orders for varying small quantities involving work of a widely different character are constantly coming in, which necessitates a very intricate scheme of co-opting to keep a worker employed upon a process for any length of time. Where the system is adopted of putting jobs through in batches, it is rarely that the proper sequence of operations can be maintained. Some jobs in the batch are most likely to be wanted sooner than others so that after passing through one operation, the size of the batch may be increased or decreased before it goes on to the next process. It is with this knowledge of the intricacy of keeping proper time records that the average miscellaneous binder, or the stationery binder, looks with a great deal of scepticism upon the possibility of applying the Federation Costing System in its entirety to his section of the trade.

Costing Miscellaneous Work.

The main object of the costing system is to find out what it actually does take in time and money to do a certain job, and in order to do this well it is worth while recording every five minutes that is expended upon it. "Too much book-keeping" is the common cry of both employer and employed where proper costing is not being done. One might expect the reluctance of the workers themselves to put down every small item of time, but it is hard to understand an employer who is content to charge work out upon an unproven time basis, losing hours on many jobs for the sake of the few seconds per day that it takes to make out proper time dockets. There is no use in blinding ourselves to the fact that in miscellaneous binding, and in the stationery section of the trade, there are some serious obstacles in the way of proper costing, but there are some firms who are tackling these problems and

finding a way out. What, of course, is needed is hearty co-operation from the workers, not merely to overcome the prejudice against filling in time dockets, but to go the whole way and lend us their intelligence to help to overcome difficulties as they crop up.

Take, for instance, a man marbling a batch of books. He may be putting through a dozen jobs at the same time, each of a different size and a different quantity. Now, it would be impossible for the costing clerk to dissect his time and spread it over these different jobs; therefore, we need to have his loyal co-operation to enter each of these jobs on his time docket and spread his time over them to the best of his ability. To get such intelligent co-operation, it is often necessary to take the men into our confidence and show them what a difficult thing it is to price out the product of their labour. Once a man sees the importance of charging out work according to its actual cost rather than on guess work, you can look for his support. To any of my friends who have doubts about their workers agreeing to fill up time dockets, I should like to tell them that some years ago, when I first introduced the Federation Costing System, I was met with a point-blank refusal to fill up daily dockets. My employees had in those days been accustomed to write out a weekly time sheet which, looking back upon it now, was, I am quite certain, not worth the paper it was written upon. Well, I asked the whole of the employees to meet me. I explained the great difficulties under which a bookbinder laboured as to the proper price to charge for a book. I explained the Federation Costing System to them and left them to consider the matter. In about a quarter of an hour's time I was informed that they would try it and from that day to this I have never had a single instance of a man refusing to fill up his time docket, nor have I ever heard of an entry being made which was not an accurate record of the time taken.

The Trade Binder.

Trade binders who do not fix their charges upon a sound basis of cost, work untold injury—not only to themselves and to their

colleagues in the binding trade, but to their customers. Let us take a town where there are several trade binderies. The printers who patronise these binderies usually have to depend implicitly upon the fairness of the prices quoted by the binder for his portion of the work. Therefore a carelessly made up price, especially if it happens to be too low, upsets that feeling of confidence which should exist between the printers and the bookbinders. The result, in many cases, is that printers instead of asking for one price for each small job must, for their own protection, ask a quotation from every trade binder in the town. Such a state of affairs results in a useless waste of time and energy both on the part of the binders and the printers.

Several years ago, we had a good deal of trouble about prices in Scotland, and the members of various bookbinders' associations put their heads together, and after many meetings and a great deal of work issued two price lists, one for miscellaneous binding and one for commercial binding. Now there is nothing secret about these price lists. They were approved by the Scottish Alliance Costing Committee, and circulated to every member of the Alliance through the Alliance offices. The printer or wholesale stationer who has these lists in his possession has no need to ask for an estimate. He can make up his price according to the list, and depend upon it that any trade binder in Scotland will abide by it. In fact, many printers who have bookbinding departments of their own use this list as their basis of pricing out work whether they have the costing system in operation or not. There are cases where the Federation Costing System has been installed up to the point of showing each week what the net cost of production has been, and deviating slightly from this point by using the trade price list as the basis for ascertaining the value of production. That is to say, that instead of recording so many hours at such-and-such an hourly rate as the value of production, they have taken so many jobs at whatever prices they are listed, and compared the total with the actual cost of running the department during the period. This course takes a much longer time to

show the true position between cost and value of production, but it does give one a fairly good idea as to how the list compares with his actual costs. For this latter piece of information I am indebted to Mr. Henneggin, who has done such good work in connection with the installation of the Federation Costing System in Scotland. This is mentioned, not with the idea of throwing any bookbinder off the essential need of working the Federation System in its entirety wherever that is possible, but more as a sort of temporary way out for any firm who may not yet have been able to get time dockets properly filled in by their workers. Any expedient for taking costs is better than working totally in the dark.

We are indebted to the Federation for many things which they have done for the printing and kindred trades, but had the Federation done nothing else but preach the gospel of cost-finding and put us on the right lines for discovering our costs, we owe them something which we can never repay. In conclusion, I would strongly urge every bookbinder who has not adopted the Federation Costing System to do so as soon as he possibly can. I am perfectly certain he will find it to be the best investment that he has ever made.

ASSISTING CUSTOMERS.—An excellent idea is that adopted by an American printery. In order to assist customers in preparing copy in the best possible manner, thus eliminating re-arranging it in the printing office, the Guide Printing and Publishing Co., of Brooklyn, sends out at various times to its clientele a layout sheet. These layout sheets have been especially prepared by the Guide company, and by using them the customer is spared the expense of rewriting and preparing the copy in the composing-room. The layout is made up of leaders in pica squares, the total sheet being 48 picas wide by 63 long. Full instructions are given on the reverse side of the sheet regarding the preparation of copy, and the Guide company announces that the plan has proved a great success and is very popular with its customers.

IT PAYS

to Advertise in the *British and Colonial Printer and Stationer!* The following is one of many unsolicited testimonials we have recently received.

Under date of May 10th Mr. E. P. Woodman, Managing Director of the Fisher Bookbinding Co. (1912), Ltd., writes:—

"We are sure you will be pleased to hear that through the advertisement that we have in your old-established paper—the *British and Colonial Printer and Stationer*—we have received numerous enquiries from all parts, and have been successful in securing some very good orders, which proves conclusively that your Journal circulates amongst those who are in search of manufacturers who can carry out their orders to their satisfaction, and, of course, give their customers faith in the work they undertake to bind.

"It may also interest you to know that we are very busy, and, from what we can see of it, the whole of the Printing and Bookbinding Trades will soon be in a flourishing condition, which is much to be desired after the slack period we have all gone through for the past two years.

"We wish you continued success with your Journal."

Trade Notes.

SIR FRANK NEWNES, BART., presiding at the annual meeting of George Newnes, Ltd., on Tuesday, said it was proposed to place in St. Bride's Church—the cathedral of the printing trade—a tablet or bust in memory of the late Sir Arthur Pearson. It had also been suggested that a memorial of the speaker's father should be placed in St. Bride's Church.

JOINT INDUSTRIAL COUNCIL.—The next meeting of the Joint Industrial Council of the Printing and Allied Trades will take place on July 19th, when the annual report will be presented and its officials elected for the ensuing year. According to the constitution of the Council the president for the next year will be selected from amongst the trade union representatives.

NEWCASTLE MUNICIPAL PRINTING.—The manifesto issued by the Newcastle Labour Party on the subject of the municipal printing plant contains, we understand, nothing new, the figures contained having previously been shown to be arrived at on an incorrect basis—it being incorrect to assume that if the proposed municipal plant could effect a saving on certain small jobs, savings in the same proportion could be made on big contracts. It was after a careful scrutiny of all the figures that the Council decided it would be unwise to proceed with the scheme.

The Amalgamated Society of Lithographers are holding a special meeting on Monday next at the Memorial Hall, London, to consider the report on the wages negotiations.

The Scottish lithographers, who are at present on strike, are negotiating separately, and are meeting the Scottish Alliance of Master Printers this week at Glasgow. The general secretary, Mr. Thomas Sproat, has arrived in that city, and an early settlement is thought to be probable.

The annual meeting of the Football Section of the Printing and Allied Trades Charity Sports Association is to be held at the Cannon-street Hotel on Friday evening. The chair will be occupied by Mr. W. R. Masters (president)

who will be supported by Mr. J. Gomer Berry. The proceedings will commence at 7 o'clock.

On Wednesday of last week teams representing the *Rockdale Observer* and Messrs. Wrigley and Co., met in the cricket tournament arranged by the Local Printing and Kindred Trades' Federation. The *Observer* scored 118 and Wrigley's 28 runs.

The *Shetland Times*, of Lerwick, has just celebrated its jubilee.

A NUMBER of journalists, principally representatives in London of newspapers published in distant parts of the Empire, were entertained on Monday night at the Lyceum Club, the occasion being the annual dinner organised by the Journalists' Board Club.

The Sunday Publications, Ltd., publishing the *Sunday Illustrated* and the *Sunday Sports Telegram*, were defendants on Tuesday in an action brought by Mr. E. P. Montesole and Mr. H. Fieldhouse, debenture holders, who were given a declaration that they and all other holders were entitled to a charge on the company's undertaking. The ground of their suing was that their security was in jeopardy.

MR. ARTHUR ROBERT WHITE, senior partner in the firm of Messrs. R. F. White and Sons, advertising agents, 33, Fleet-street, has died at the age of 67.

The late Sir John Williams Benn, director of Messrs. Benn Brothers, Ltd., left £7,375.

"EUROPEAN COMMERCIAL."—Sir Ernest Benn left London on Saturday to complete arrangements for the publication in Vienna of the *European Commercial*—which, as previously mentioned, is to be an organ of world-wide commerce, printed in English. Sir Ernest maintains that the overwhelming importance of political problems at the present time makes it almost impossible to obtain the correct commercial view, and that a staff of English journalists in the middle of the European welter of rumour and exaggeration will be best qualified to distribute news with a proper regard to truth and proportion.

CLEAN-UP DAY IN AMERICA.—American printers have proclaimed July 8th of this year as annual clean-up day. On that day

all printers and publishers are expected to devote their time to a thorough house-cleaning of their plant. By doing this they will clean up all the odds and ends of their paper stock, disposing of all the non-usable part and putting the balance in such a shape that they can use it at some future date, and at the same time know just what they have on hand. Old type, rules and slugs which are of no utility value should be discarded. Machinery should all be gone over and a thorough overhauling made. While the main purpose of this annual clean-up day is for the benefit of the printers and publishers, it also benefits supply houses, paper merchants and others by creating new business.

The late Mr. Simpson Clarke, Bridlington, governing director of Brumby and Clarke, Ltd., printers, who died March 6th, left £16,660.

London Sales Manager—FRED H. HOWE (late with Winstones).

SOUTH-WEST London Master Printers' Association

Mr. Jacobi on "Wages and Hours."

A very interesting and topical meeting was held by the South-West London Master Printers on the 20th inst., when Mr. Chas. T. Jacobi, formerly managing partner of the Chiswick Press, addressed the members on the subject of "Wages and Hours: Some Comparisons between the Present Time and that of 100 Years or More Ago."

Mr. Wise (president) in introducing Mr. Jacobi spoke highly of the beautiful work that had been turned out by him, and said he was sure that what he had to tell them that evening would be most interesting.

Mr. Jacobi was received very cordially, and on rising thanked Mr. Wise and the members present for their kind welcome.

The Present Negotiations.

Mr. Jacobi prefaced his lecture by remarking upon the special interest attaching to his subject at a time when the trade was in the throes of a wage struggle, with a possible stoppage of work at the end of the week. As they all knew, it is the expressed wish of the large majority of employers that wages may not be reduced to the pre-war level, for it is generally agreed that the working printer was not too well paid in the past but any minimum wage must be dependent on the prevailing economic conditions when we reach what may be considered as more normal times. Foreign competition has somewhat governed this matter of wages, and unless we are careful more work will be sent abroad.

During the war, Mr. Jacobi continued, and even subsequent to peace being proclaimed, wages were advanced on the strength of the official figures for the cost of living, which reached 176 points in November, 1920, over pre-war and the minimum wages for compositors in London were 100s. as against 39s. prior to the war, which is just over 150 per cent. more. Up to the present time compositors' wages have only been reduced by 5s. a week, which means only 5 per cent., and under these circumstances the demand of the employers for a further reduction of 15s. is not an unreasonable one considering the prevailing conditions.

If the official figures were correct enough to warrant advances when on the up-grade, surely the consumer is entitled to a considerable allowance now that they are on the downward grade. Even if the proposed reduction of 15s. is accepted there is still a good margin in favour of the workman, if the rising and falling figures in the cost of living are compared.

Mr. Jacobi added that he felt sure that if a settlement were arrived at on the basis offered, it would be the means of liberating some amount of work now being held up, and thus relieve the present stagnation of trade and provide occupation for the many now unemployed, which is such a strain on the funds of the various unions.

Proceeding then to his subject proper, Mr. Jacobi had many interesting things to say about old-time conditions in the printing trade, and the great improvements made in recent years. We propose to report this address in next week's issue.

Other Business of the Meeting.

At the conclusion of his address, a hearty vote of thanks was accorded Mr. Jacobi, to which he suitably replied. He then passed round a number of interesting papers in his possession, together with some beautiful examples of real good printing.

On the proposition of Mr. E. G. Cole (vice-president), supported by Mr. R. B. Simnett, who attended the F.M.P. annual gathering, a vote of congratulation to Mr. Wise, the president of the South-Western Association, for his admirable address on costing given at the Federation Costing Congress (the vote to be entered in the minutes) was carried with gusto, to which Mr. Wise suitably replied.

Before the conclusion of the meeting another member was elected to the Association.

OWING to termination of lease, Messrs. Walter Judd, Ltd., advertising agents, have removed from 97, Gresham-street, and their address is now 81-87, Gresham-street, E.C.2. Telephone, however, remains the same, viz.: London-wall, 3651/2.

Electrotypers and Stereotypers MANAGERS & OVERSEERS' ASSOCIATION

The usual monthly meeting of the Association was held on Tuesday of last week at the St. Bride Institute, E.C.4, the president, Mr. A. Chadwell, occupying the chair. There was a fair attendance of members, and, in the absence of a lecturer, and with little routine business to be transacted, the evening's proceedings were mostly devoted to matters arising out of the prevailing wages crisis in the trade.

The minutes of the previous meeting were read by the secretary (Mr. W. Bullett).

The president, referring to the new technical school, said that as matters stood at present their own Association and the Bookbinders' Overseers Association were to have only one representative between them on the Governing Board. Mr. Bullett had since been in consultation with Mr. G. A. Eden, of the latter Association, and they had come to an understanding that a representative of that Association should represent the two Associations for one year, providing, of course, they were not granted a representative of their own in the meantime.

The candidature of Mr. J. Davis—H.M. Stationery Office, Harrow—was next considered for membership, and after several members had spoken approvingly of his suitability, he was unanimously elected.

A member, Mr. J. Reeveley, who a short while ago had the misfortune to lose both his hands while overlooking machinery at Messrs. Odhams, made his first appearance since the accident, and his entrance during the proceedings brought him a hearty welcome.

Mr. Reeveley, in addressing the meeting, expressed on his own and his wife's behalf his deep gratitude for the brotherly feeling Mr. Wood and the members of the Association had extended to him. Their magnificent gift to him was greatly appreciated.

Mr. Chadwell, on behalf of the members, said they were delighted to see Mr. Reeveley amongst them again.

Mr. Warren's Address.

Mr. W. Warren (general secretary, National Society), was then asked to speak to the meeting on the question before the trade.

Mr. Warren, in giving a brief account of the position, said it was dangerous to prophecy what was going to happen, but in London, viewing the question purely from the point of view of their own particular branch of the industry the position was eminently satisfactory. All over the country they certainly did not have more than 400 out of 3,500 members affected by the notices. He hoped that the J.I.C. would find a basis on which a mutual agreement would be found which would be acceptable to both sides. It was a good sign, he thought, that notwithstanding the divergence of view expressed by both sides at the last meeting of the J.I.C., there still existed that mutual desire to find some way out of the difficulty. Whatever decision was come to, the unions were desirous that they should get a guarantee of stability as to wages to cover a definite period. He was optimistic regarding the issue.

Mr. W. H. Longley inquired what was the position of the workers in the trade shops.

Mr. Warren, replying, said that the Trade House Employers had informed them that they had no desire whatever to reduce the wages of their members, because as business was to-day they saw no necessity for it. If, however, a general reduction was agreed to throughout the country—and only then—which would enable provincial firms to re-adjust their prices and so make competition severe to London houses, they would inevitably have to consider the question of a re-adjustment.

The secretary reminded the members that the next monthly general meeting of the Association takes place in September and the proceedings were then brought to a close.

THERE is still urgent need for more openings in the printing and allied trades for the employment of disabled sailors and soldiers. Employers interested should write to the secretary of the Printing Trade National Trade Advisory Committee, Ministry of Labour, Industrial Training Department, 1, Sanctuary-buildings, Great Smith-street, S.W.1. (Phone, Victoria 8740.) An officer of the Training Department would gladly visit such employers in order to clear up any points on which there may be doubt.

Loose-Leaf Books.

SIR,—I notice in your issue of 1st inst., page 362, in your remarks under heading, "Bulky Loose-Leaf Books," some very damaging remarks regarding use of loose-leaf ledgers. You state: "Our own objection to loose-leaf ledgers and binders in general is that they are heavy, clumsy, and awkward to manipulate. It is nothing unusual to see two or three clerks struggling to master the opening of some binder."

Allow me to state that instead of its being "nothing unusual," I should rather say that it is most unusual for such an incident as described to happen, and that only where either the suppliers have neglected to instruct their clients regarding the proper working of the loose-leaf system, or, having been instructed, their clients have neglected carrying out such instructions.

One of the best-known advantages of the loose-leaf system is that smaller books properly indexed can be used, thus making it possible for the ordinary routine work to be more easily and more quickly done than when sewn or bound books are used.

A bound ledger has a fixed number of leaves, and so remains; hence, when opening a new ledger, it is necessary to appropriate a certain number of leaves for each active account, so that the bound ledger will contain for a considerable period from 50 per cent. to 75 per cent. of blank leaves in addition to the leaves being actually used.

A loose-leaf ledger is flexible, and contains no unused leaves, each leaf representing one active account only. Hence, as both sides of leaf are used for one account, a deep ledger leaf is not necessary, and therefore a loose-leaf ledger need be only half (or less) the size of the sewn or bound book.

Should the business of a firm which uses a loose-leaf ledger grow, and the number of active accounts increase, the ledger has only to be expanded to admit of the extra leaves being inserted under their proper index tab. Should the number of new accounts increase beyond the capacity of the ledger in use, it is only necessary to procure another ledger cover and divide the contents thus: No. 1 ledger contains active accounts indexed from A—L, and No. 2 ledger would contain active accounts from M—Z, and this can be done in one minute's time. If this plan is followed there is no necessity for any firm to use anything except small, handy books.

Yours, etc.,

P. MACMASTER, Chairman.
British Loose-Leaf Manufacturers, Ltd.
27, Finsbury-street, E.C.

"Postal Charges—Reductions Justified."

SIR,—On many occasions during the progress of the recent protest campaign against high postal charges, you supported the protest by admitting to your columns contributions giving undeniable reasons of the fallacy of high postal charges. The result of such support is now well known. The postal charges have been reduced. The justification of the action of the Postmaster-General in reducing postal charges has just come to hand. Comparing the period of April 1st, 1922-June 17th, 1922, with the corresponding period of last year, the increased revenue to the Post Office has been £2,000,000. If this increase is sustained at the same ratio throughout the present fiscal year 1922-23, the increased year's revenue will amount to £13,000,000.

If reduction means increase, then users of the Post Office will, like Oliver Twist, ask for more reductions. It is hoped that the Postmaster-General, in view of his recent six weeks' successful trading, will soon be able to reduce postal rates to the following:—

Letters: 1d. for one ounce and ½d. for each ounce after.

Post Cards: One halfpenny.

Printed Matter: 2 ounces for one halfpenny and each additional 2 ounces one halfpenny. Such reductions will further benefit trade and commerce, and unemployment in the printing and other industries.

Yours faithfully,

W. H. BURCHELL,
Governing Director, The Caxton Press, Ltd., Hon. Sec., Association of Master Printers of the London Central Districts.

13-15, Leather-lane,
E.C.1, June 23rd, 1922.

TRAVELLER, with connection, wanted, for Process and General Engraving Business; good position for energetic man.—Full particulars and terms, to Box 13938.

Situations Wanted.

COMPOSITOR (T.U.) requires situation on Piece; used to Trade Papers and Tabular Work; quick, clean; 5 years' war service; age 30; good references.—Box 13945.

COSTING and Estimating Clerk and General Assistant in Jobbing and News Office. Advertiser recommends capable man (aged 25) for position as GENERAL ASSISTANT in Management, both Office and Works, to anyone who has suitable vacancy.—Fuller information on application to Box 13962.

ENGINEER'S DRAUGHTSMAN, internal combustion, etc., car experience, desires Position where artistic talent would be of service; ability for advert. lay-out and commercial art.—Address Box 13952.

MONO CASTER & KEYBOARD MECHANIC, 20 years' experience, healthy, as Caster-Charge or above; prize awards 1906 and 1907.—Guest, 41, Saltoun-road, S.W. 2. 13961

YOUNG MAN (20), expert Shorthand, knowledge Economics, Literary, seeks Journalistic opening.—Box 13941.

Machinery for Sale.

SECOND-HAND LINOTYPE for sale; Model No. 1 converted in 1915 to Model No. 4 Pattern with regard to Vice and Jaws; Double-letter Machine, Universal Mould from Nonpareil to Pica, equipped with Two Magazines and Two Sets of Matrices; completely overhauled and remodelled in 1915, and has been very little used since.—Offers should be sent to Box 13954.

Partnerships and Financial.

WORKING PARTNER, PRINTING AND STATIONERY.—An opportunity offers for acquisition of a Third Share in old-established sound and profitable South African Printing and Stationery Business. Capital required about £12,000, according to valuation. Good salary and share profits. Genuine concern.—Apply to "South Africa," c/o Martin Farlow and Co., 50, Gresham-street, Bank, London. 13957

Miscellaneous.

COLONIAL NEWSPAPER CUTTINGS, dealing with the Paper, Printing, Stationery and Allied Trades, are wanted by Advertiser.—Communicate, stating terms, to Box 13882.

PHOTO PRINTS.—Object Photography, etc.; Practical and Skilled Operators at your service; Modern Studios specially planned for all Object Work.—For efficient service send your work to The Nickeloid Electrotype Co., Ltd., Photo Engravers and Electrotypers, 10, New-street-hill, London, E.C.4. 13963

TYPE AND METAL RULE BORDERS, LEADS AND CLUMPS.—Send for samples and prices. Best Alloy used for all these materials.—The Nickeloid Electrotype Co., Ltd., 10, New-street-hill, London, E.C.4. 13964

WANTED, THREE or FOUR-COLOUR BLOCKS (Odd or Series), suitable for Wall Calendars, size about 6 by 8 in.—Price and colour-proof, to L. F. De Vos and Co., 37, Canal de l'Amidon, Antwerp. 13953

CIRCULATION RAISING.

I have some 16 years' practical experience. I have excellent connection in Scotland. I am perfectly positive I can pull up sales. I will do it for a salary and expenses. May I hear from you?

HENRY MADSEN,
3, London Street, EDINBURGH.

 Africa, Canada, etc.

THURSDAY, JUNE 29, 1922.
The Wages Position.

It is a matter for congratulation to those principally concerned in the wages negotiations that the last few very critical days have been passed without the national stoppage that sometimes seemed so threateningly near. A big aggregate number of working hours have been lost to the trade by the gap between the expiry of notices and the receipt of instructions to "carry on," but this is a small matter as compared with the disastrous state of affairs which would have followed a failure to come to any arrangement. We are by no means yet out of the wood, however, and the position is still a most difficult one. To negotiate it will require the exercise of wise statesmanship by all the parties, together with some unselfish consideration of the demands which the industry as a whole has a right to make upon its component sections. The position now reached is rather complex. As indicated in detail on another page, the Typographical Association has agreed to settlement by the Industrial Court, which is to meet on July 4th, and whose decision will be known a few days later. The London Society of Compositors and the Association of Correctors of the Press are considering agreeing to the same course. A number of important unions including bookbinders and lithographers, have agreed to ballot on reductions of 12s. 6d. and 6s. for men and women workers respectively (most of the Scottish unions having previously accepted graduated reductions of 15s. and 7s. 6d.) In the case of the few remaining unions—including the Electrotypers and Stereotypers' Society and the Machine Managers—the notices have been suspended and normal working conditions resumed pending further negotiations.

The Industrial Court.

We gather that there is some misgiving on the part of some of the members of London unions on the question of submitting the wages dispute to the Industrial Court, but we think it should be realised that the circumstances in the present instance are quite

different from those surrounding any previous case of a printing wage dispute being submitted to any form of arbitration. We hope the Typographical Association's experience next week will leave the union as well as the employers convinced that the terms arrived at represent a fair and impartial decision based on the facts of the case—a decision which will relieve both parties of responsibility for the terms eventually reached. The permanent chairman of the Court, Sir William W. Mackenzie, K.B.E., K.C., will, we understand, preside. Details of the constitution of the Court and of the procedure to be adopted will not be known until just before the sitting of the Court, but presumably Sir William will be accompanied by two or four members of the Court—half employers and half trade union officials. The employers' case will be presented by Mr. James MacLehose, M.A., LL.D., president of the Federation of Master Printers, and it is understood that Mr. J. D. French, the T.A. president, will submit the case for the union—neither side employing legal assistance.

Cheaper Postage and Revenue.

It is very satisfactory to the printing industry and the other trades that were active in demanding reduced postal rates to learn that they were right in their assertion that the higher rates were bad business on the part of the Post Office as well as being an unfair burden upon industry. That this was so is shown by the fact that instead of a reduction in Post Office revenue resulting from cheaper postage and lower telephone rates, there is a big increase. For the period April 1st-June 17th the receipts were exactly £2,000,000 more than in the corresponding period of last year.

Preventing Posting Abroad.

IN view of the recent prevalence of the practice of posting circulars and other printed matter from the Continent (even when printed in this country), many people have felt that some legislative action ought to be taken to prevent this practice, which deprives our own Post Office of revenue at the same time as it plays into the hands of Continental and other competitors of British printers. It is interesting to learn from a statement made in the House of Commons last week that the Post Office has in mind the possibility of legal action being necessary. Mr. Pike Pease (Assistant Postmaster-General), replying to a question, said that a large number of circulars issued by the Alpine Sports, Ltd., and by the Free Church Touring Guild had recently been received in the mails from Austria. The excuse for this practice had hitherto been the increase in the printed papers rate. As the postage on inland printed papers had now been reduced to the pre-war rate of ½d., he hoped the firms concerned would discontinue the practice they had thought fit to adopt. Should this continue, it might be necessary to ask Parliament to grant additional powers in order that this practice may cease.

NEWSAGENTS VERSUS NEWSPAPERS.—At the annual conference of the National Federation of Newsagents, Booksellers, and Stationers, at Edinburgh, last week, strong views were expressed on the subject of the encroachment on the "distance limit" policy of the Federation—a protective policy devised to prevent overlapping, as in the appointment of new newsagents where they were not required. The general secretary (Mr. MacLaren) said the whole question was in the melting pot, but one London newspaper had determined to smash the "distance limit." The National Council of the Federation were going out full tilt against the paper, and in the near future there would be heard in the High Courts an action in which the Federation was proceeding against seventeen circulation managers of London dailies for conspiracy and restraint of trade. The most distinguished counsel had been briefed on both sides, and the Federation counsel would be Sir John Simon.

Printing Trade Wages Dispute.

Serious Stoppage Averted.

Although it was found impossible, as we anticipated last week, to avoid some stoppage of work, owing to the expiring of the notices in many cases before an arrangement could be come to, the trade has nevertheless been greatly relieved to find that the decision to withdraw or suspend the notices was reached in time to prevent anything like a general stoppage. In Bradford, for instance, we understand that 66 offices out of 68 closed on Thursday night, and in Leeds about 1,500 workpeople ceased work; London also was not exempt. By Monday evening, however, there was general resumption of work, though in one or two London offices further delay was caused by misunderstanding as to the suspension of notices.

As reported in our last issue, the Joint Industrial Council met on the 21st inst., at the suggestion of the Ministry of Labour, the meeting taking place at Montagu House. The proceedings continued until 1.0 a.m. Wednesday's meeting was occupied mainly by conferences between the employers' representatives and the Typographical Association.

T.A. Accepts Industrial Court.

Attempts to arrive at an agreed settlement proved unsuccessful and Sir David Shackleton offered the services of the Industrial Court which offer it was decided to consider.

Conferences were continued on the following days, proceedings being again protracted until late.

It was eventually agreed that the dispute affecting the Typographical Association should be referred to the Industrial Court, which will meet on July 4th. The terms of reference are wide, and the Court will first of all determine as to whether any reduction at all should be made. The employers put forward originally a sliding scale arrangement under which they showed that after allowing for an improvement in the basic wage, a reduction of 16s. 3d. per week was justified when the cost of living figure stood at 88. As the index figure is now 80 the reduction taken on the same basis would be 19s. 1d. per week. The representatives of the Typographical Association maintained until Thursday last that no reduction at all was required, but they offered a reduction of 7s. 6d. per week before Sir David Shackleton intervened, and subsequently an offer was made by the T.A. that a reduction of 10s. per week would be recommended for acceptance to their members provided the stabilisation period was extended. It is anticipated that the result will be made known a few days after the enquiry opens. As the result of the decision to go to the Industrial Court notices on both sides were withdrawn.

Terms Put to the Ballot.

There were conferences on the Thursday with other unions also, and as a result the employers found it possible to come to terms (on the basis of Sir David Shackleton's proposed compromise) with the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers, National Society of Operative Printers and Assistants, Platen Minders (London), Machine Rulers (London), and the Society of Women employed in the bookbinding and kindred trades (Manchester). Agreement was reached that the representatives of these unions would recommend acceptance of the following terms:—"That a reduction in the rate of wages payable to their male members in London and the provinces of 5s. per week should become operative on and from the pay day in the week ending July 15th; 2s. 6d. on and from the pay day in the week ending October 7th, 1922; and 2s. 6d. on and from the pay day in the week ending January 6th, 1923; and 2s. 6d. on and from the pay day in the week ending July 7th, 1923 (i.e., 12s. 6d., by instalments) with proportionate reductions to piece workers and male learners and binders' apprentices, and no further reductions in wages during 1923. That reductions on the same dates should be made to the women members of these societies amounting to 6s., in instalments of 2s. 6d., 1s. 6d., 1s. and 1s. respectively, with proportionate reductions to piece workers and female learners."

On Friday morning conferences took place with the representatives of the Amalgamated Society of Lithographic Printers, Amalga-

mated Society of Lithographic Artists, and the Society of Lithographic Music Printers when they agreed to recommend their members to accept the same terms as stated above. Conditional on these terms being recommended, it was agreed that the notices posted by employers should be suspended, i.e., the operation of these notices should be deferred pending the result of the ballot of these unions.

At a conference on Friday between the Federation of Master Printers and the London Society of Compositors, in relation to a wage reduction in the general printing trade, the employers made a proposal that the wages question should be submitted to the Industrial Court for settlement.

It is officially announced by Mr. A. E. Goodwin (secretary of the Federation of Master Printers) that if the London Society of Compositors agree to this course the notices which have been posted by the employers will be withdrawn. The London Society of Compositors arranged to hold a special delegate meeting yesterday evening (Wednesday), and it has been agreed that in any event the notices are suspended for a fortnight, and that normal conditions in regard to overtime, etc., are restored in order that further negotiations may take place.

Tentative arrangements have also been made for the suspension of notices to all the other unions involved in the dispute, including the Machine Managers and the Electrotypers, so that there will be no stoppage of work.

The Association of Correctors of the Press holds a special meeting on Saturday to consider the question of referring the dispute to the Industrial Court.

Bristol Master Printers.

Members and friends of the Bristol Master Printers' and Allied Trades' Association, including ladies, met together at Stuckey's Restaurant, Bristol, on Monday evening of last week, at the invitation of Mr. H. V. Chappell (chairman) and Mrs. Chappell. The object of the gathering was primarily to hear accounts of the Annual Meeting and Cost Congress of the Federation, which took place at Glasgow during Whit week. Mr. E. W. Allen, the president of the Bristol Association, was to have presided, but having met with a slight accident during that same day he was unable to be present, and Mr. W. T. Bodey took the chair. The meeting resolved that a letter of sympathy, also expressing wishes for a speedy recovery, should be sent to Mr. Allen.

Mr. Chappell having extended a welcome to the company, an acceptable musical programme was rendered by members of the Association and outside friends, and then Mr. A. Harry Pole gave an address on "My Impressions of the Costing Congress at Glasgow." Mr. R. Cuthbert Hobbs followed with the subject, "The Annual General Meeting," while Mr. Howard Rankin dealt with "The Glasgow Atmosphere."

The great work accomplished by the Federation in the interests of printers was evident from the remarks of the speakers, whilst great praise was given to the Scottish Alliance for the splendid arrangements made for the transaction of business and the comfort and pleasure of the visitors. The fine specimens of printing in the shape of programmes, menus, etc., which those who had gone to Glasgow had brought back were exhibited and evoked high praise. During an interval in the proceedings refreshments were served and an opportunity for conversation thus provided.

On the proposition of Mr. A. T. Arnold hearty thanks were accorded to Mr. and Mrs. Chappell for their kindness in arranging such a successful gathering, and to the speakers for their addresses, Mr. H. V. Chappell suitably responding.

E. A. CHAMBERLAIN, Ltd., manufacturers of millboards, fibre boards, and leather boards, Nailsworth, Gloucester, has joined the Federation of British Industries.

Personal.

MR. W. H. TAFT, ex-President and present Chief Justice of the United States, is to be entertained to luncheon by the Press Club to-day (Thursday). Mr. Harvey (American Ambassador), Lord Burnham (in the chair) and Lord Riddell are also to be present.

VISCOUNT NORTHCLIFFE is reported to be still confined to bed, but better. His medical advisers are not allowing work of any kind, nor correspondence.

MR. J. GOMER BERRY last week paid a visit to the Lloyd Memorial Home at Deal. After a thorough inspection of the institution, he expressed delight at everything he saw. During the visit he unveiled a tablet in honour of the *Sunday Times* and gave a grant of £100 towards the work of the home. Mr. Gomer Berry was accompanied by Mr. H. F. Parker, Mr. W. T. McMullan and the matron.

MESSRS. W. WARREN and W. H. Middleton, general secretary and assistant secretary of the National Society of Electrotypers and Stereotypers are among those attending the Labour Party conference this week at Edinburgh.

MR. W. BULLETT, secretary of the Electrotypers and Stereotypers' Overseers' Association, who already possesses no mean reputation locally as a bowls player, made a good show in the recent St. Dunstan's competition held at the Alexandra Palace. Mr. Bullett managed to get into the third round, and after a somewhat strenuous game with Percy Newell, of Balham, he was beaten by five points.

MR. FRED EASTON, editor of the *National Newsagent*, has been adopted as prospective Labour candidate for South-West St. Pancras.

MR. F. CLEGG, chief reporter of the *Scarborough Standard*, and formerly on the staff of the *Halifax Daily Guardian*, has been appointed editor of the *Deesbury News*.

MR. JOHN CHESHIRE, a well-known figure in the advertising world, for many years advertisement manager of Lever Brothers, Port Sunlight, has been appointed managing director of the company.

MR. COLLINGWOOD HUGHES addressed the members of the Manchester Rotary Club last Thursday on the making of a modern newspaper.

MR. JOHN BUCKLE, printer, of Yarmouth, has just celebrated his 81st birthday, and has received the congratulations of the local Typographical Association.

North London Master Printers.

One of the most successful meetings held in North London took place at Finsbury Park on June 19th when a splendid attendance proved the interest of the members in the questions of the moment that are affecting the trade.

A long discussion on the wages question, opened by the hon. sec., Mr. W. J. Mizen, and taken up by Messrs. Hunt (chairman), Williams, Sproul and Woolridge, made it patent that the members of North London were loyal in their attitude towards the efforts of the Master Printers' Federation.

Mr. T. Sellens was elected hon. sec. of the local district committee for the raising of subscriptions for the Printers' Pension Corporation, whose claims were ably advocated by Mr. Mizen.

The reduced postal facilities that had been put into operation in some parts of the district were discussed and it was resolved that the hon. sec. should send a resolution to the P.M.G. protesting against the reduction, as it interfered with trade generally.

One new member was elected: The Electric Press, 32, Ashley-road, N.19.

Know your retailer's problems and help him sell your goods.

The Bookbinder.

Notes and News.

Wages Dispute Clearing.

It is a matter for satisfaction that the book-binding industry is not to be subject to stoppage at this juncture. Although the menace is not entirely removed, it can be taken now that the prospect of trouble is exceedingly remote. At no time has the union to which the binders belong adopted quite the stubborn attitude which characterises the compositors' unions. It is in fact coming to be accepted as a custom that the latter should require a treatment different from their contemporaries in any dispute. Whether there is really a different degree of skill between bookbinding and typesetting is a matter with which we are not much concerned, but that proposition is one of the fundamentals in the compositors' argument. Just in passing, we would observe that the most highly skilled compositor is the man who sets display work by hand, but the most highly paid men are those who work mechanically.

Improvement in Trade.

The outlook in the binding industry is much brighter than we have known it for many months. Some quite good inquiries are moving for commercial work, whilst publishers are looking forward to vastly improved business as a result of lower priced issues. Nothing in the nature of a boom is expected, and indeed is not desired. Rather, what we are looking forward to is a steady but sure recovery. There are clear signs that this is already on the way, and for this reason alone it would have been disastrous if any stoppage of work had occurred.

Strawboard Prices Rising.

Strawboards are now quoted £10 10s. and £11 per ton, plus extra for small lots and the usual increase for heavy weights. The advance is equal to about 50 per cent. over the standard which previously prevailed, and today's price 150 per cent. over pre-war figures. In the present state of the market further advances are likely, and there are not wanting those who foresee a hardening period extending to the end of the year. One authority has it that the £20 per ton mark will finally be reached. We doubt that very much, although it is quite on the cards that a stiff figure will be asked if the present conditions

continue up to the freezing season. Perhaps there will then be the necessary incentive to cause our mills to turn their attention to strawboards again, as they did during the war. Then, it must be remembered, strawboards were cheap at prices over £50 per ton.

The Thames Co.'s Board.

The Thames Paper Co., Ltd., is sampling a series of wood pulp boards for food containers and other purposes, graded from a cheap non-bender board to a guaranteed bender on both sides. It does not seem to be sufficiently appreciated that there is little occasion to buy this type of product from foreign sources. The Thames board is better in many respects than imported qualities, and prices are competitive. A chief argument in favour of the home mill is that there is direct contact and a surer guarantee of securing a type of board with the particular character or features desired.

Stable Leather Prices.

Leather prices are keeping quite stable, and there is no immediate prospect of change. The demand is poor but improved slightly. Basils range from 7d. to 10d. per square foot, the cheaper qualities having the character of a glorified skiver. Roller basils or glazed buff run about 8d.; fair basils, 10d.; and diced patterns the same. Skivers range between 4½d. and 7d.; pastegrains figure in the lists at 6d. and 7d., rough moroccos at 10d, rough calfs at 1s. 2d. per square foot for seconds and 1s. 6d. for selected skins. Fair or smooth calf figures at 1s. 9d. per foot firsts, and 1s. 6d. seconds; pigskins at 1s. 3d. and 1s. 6d., anglos at 1s. 9d. and hard grained goats at 2s. 3d.

Threads and Tapes.

Threads and tapes have reduced slightly during the month of June, but there is still room for considerable improvement from the buyer's point of view. The quality of machine threads is becoming better but there are many grades on the market which cause an immense amount of trouble and lost time at machine. Users are well advised to buy from the makers or suppliers of the machinery even though the price be a little higher, on the principle that it would be to their own detriment to handle material which reflected against the machine.

Covering Materials.

Calicoes remain firm, prices ranging from 3½d. per yard for common mill to 5½d. per yard for fine pasting calico. Bookcloths are unaltered and to-day's price, which is nearly three times pre-war, is not in tune with index figures generally. Buckrams are in the same category, but users can find solace in the union grade of buckram at 1s. 10d. per yard or the imported legal buckrams which sell at considerably lower figures than our own.

Gold Leaf and Glues.

Gold leaf is easier, and small quantity orders are being executed at 52s. 6d. per 1,000 for 3½ in. by 3½ in. and 63s. for 4 in. by 3½ in. Glues remain around the same figures as last month, i.e., fine Scotch glue £44 per ton, pure skin glue £49, finest hide glue £62 per ton. Lower grade bone glues are available at £35 to £40 per ton.

Loose-Leaf Ledgers.

In the last bookbinding issue we had an observation that loose-leaf ledgers were generally heavy, clumsy and awkward to manipulate and that it was nothing unusual to see two or three clerks struggling to master the opening of a transfer binder. Elsewhere in the current issue our comment is challenged by a loose-leaf authority. Regarding the difficulty of manipulation we can only repeat that the statement is based on experience of many different types of binder on the market. Winding and locking keys are frequently a cause of the trouble, and the interior mechanism does not always work so easily as it should. These are matters for the makers to adjust. We by no means claim, however, that all makes of loose-leaf ledgers and binders present the same difficulty. We appreciate our correspondent's exposition of loose-leaf advantages, but in our paragraph we did not question them or comment adversely. What we said then was that some loose-leaf contrivances have more the character of a super-dread-nought than an account-book and that there was an opportunity for a really simple loose-leaf book combining flexibility with ease of manipulation. This we say again, and in support of our argument would point to recent development of the thong principle as a right step in the direction of its attainment.

British versus German Gold Leaf.

The bookbinders of this country were keenly interested in the recent application made by the British Master Gold and Silver Beaters' Federation and the Gold Beaters' Trade Society, who sought to have home-produced gold leaf protected under the Safeguarding of Industries Act. The application, it will be remembered, was strongly opposed, among those taking part in the opposition being the Federation of Master Printers and the Master Bookbinders' Association. The result of the committee's investigation was a decision against the applicants, and the Board of Trade later stated—as announced in our issue of April 6th—that no further action would be taken in the matter. Thus the bookbinding industry escaped the imposition of a duty which would have meant a further burden upon an already heavily burdened trade. The *Board of Trade Journal* has just published the principal sections of the report presented by the investigating committee, thus making public in more detail than has hitherto been done some interesting facts relating to the competition between German and home-produced gold leaf.

British and German Leaf Compared.

In this report the committee state that they have ascertained, from both parties in the case, that the gold leaf manufactured in this country, though "similar" in character to that imported from Germany, is by no means identical with it. England does not produce, never has produced, and, according to the applicants (i.e., the Beaters' Federation and the Beaters' Trade Society), is unable, for climatic reasons, to produce, the very thin leaf which forms the main export of Germany. The German beaters, as the applicants testify, can produce as much leaf from three grains of gold as the English beaters can from five grains. Consequently, before the war, while German leaf 3½ ins. square sold at a price which for large consignments, did not fluctuate much above the level of £1 12s. 6d. per 1,000 leaves, the corresponding English figure was £2 5s. A witness for the applicants stated: "Your foreign book of gold is worth 9d. for gold alone, and your English book is worth 15d.—the raw material alone." He added: "So you have the 20s. (the approximate present difference in price

per 1,000 leaves) which we are complaining about. It is the raw material alone."

The English leaf is admittedly better, but it was very little used before the war by the industries opposing the claim of the gold beaters. In bookbinding it was only used for very special fine work. Figures submitted by the Master Bookbinders' Association, covering a great part of the trade, show that in 1913 over 19,000,000 sheets of foreign (mainly German) leaf were used, as against 390,000 sheets of English. The book-edge gilders had never, for many years, used English leaf. Its main users were decorators, frame gilders, signwriters, shipbuilders, and motor car builders.

The report proceeds to deal with the question of the comparative prices of British and German gold leaf, as bearing on the claim that the depreciated exchange was an important factor in assisting German competition. The data available, however, went to show that the exchange difference was a far less important factor than was the difference of thickness of the leaf produced. All witnesses for the gold beaters were agreed that in

competition with foreign leaf of English thickness they had little to fear. In view of these facts the committee express themselves unable to report that depreciation in the German currency is the main cause of the undoubted abnormal distress of the gold-beating industry. The advantage in price which the "similar" thin German leaf always had has been only very slightly increased, and competition from the identical article is not seriously complained of.

German Leaf and Unemployment.

The committee went on to investigate the amount of unemployment in the industries represented by the two sides in the case under consideration, this being an important factor in the claim for protection against imported leaf. The report indicates, however, that the amount of unemployment shown to exist in the gold-beating trade was balanced by similar unemployment amongst gold leaf using trades, which would be increased by a rise in price of gold leaf consequent upon a duty on imports. The Book Edge Guilders' Trade Society pointed this out, and the Master Bookbinders' Association expressed the opinion that an increase in the price of imported leaf would merely restrict its use, with consequent unemployment among gold blockers, and would not increase the demand for the fine English leaf from their trade at all. They pointed out that the use of gold in bookbinding is very sensitive to price. A firm which in 1913 used 650 sheets of gold per 1,000 books bound, when leaf was at 35s. per 1,000, used 53 sheets per 1,000 in 1919, when it is said to have averaged 95s.; 223 per 1,000 in 1920, at an average of 86s., and 309 in 1921, at 65s. Similar evidence came from diary publishers, from the Joint Industrial Council of the Printing and Allied Trades, and from the Publishers' Association. All assert that any marked rise in price will at once cut down the use of gold leaf; and as the chief alternative processes—ink-printing and "blind blocking"—require much less labour, will produce unemployment on a considerable scale. The committee was impressed by this opposing evidence, and accordingly they state in the report that they cannot gauge the probable amount of unemployment, but the general argument appears to them to be sound. They conclude that a duty on German leaf would create or perpetuate considerably more unemployment in trades using gold leaf as material than it would cure in the gold-beating industry.

Difficulty of Making Thin Leaf.

The committee's remarks upon the failure of home manufacturers to produce thin leaf are also of much interest. They report: "We have considered whether or not the gold-beating industry in the United Kingdom is being carried on with reasonable efficiency and economy." We have not the knowledge which would justify a confident decision, but certain points are clear. The inability of the British industry to produce the thin leaf is admitted. So far it is inefficient, whatever the cause. The applicants have placed evidence to show that the damp British climate, through its action on the skins between which the gold is beaten, is a hindrance to the production of thin leaf. One of them, who had learnt his trade in the Nuremberg district, stated that he could himself produce the thin leaf there but could not produce it in England. Another applicant, however, told us in confidence that he had produced the thin leaf here, but only at such heavy labour costs as to render its regular production an impossible

commercial proposition. It is also admitted that thin leaf has been produced, though not so successfully as at Nuremberg, in Belgium, Switzerland, France, Italy and Japan. The industry is everywhere a handicraft which uses very little machinery, and apart from some differences in the size and weight of hammers, questions of efficiency of plant hardly arise. England appears to be well equipped with what machinery is used. It is probable that Germany, and perhaps other countries, gain by the family organisation of the craft, which allows of some 'exploitation' of female and child labour. This promotes 'efficiency' of a kind. On the evidence before us we are not completely convinced of the adequacy of the climatic explanation of the British 'inefficiency'; though there seems to be no doubt that the British climate is a handicap to the production of thin leaf."

Costing for the Bindery.

Mr. R. T. Whitehead (Oldham), who should have taken up the discussion on "Costing for Bookbinding" at the Glasgow Cost Congress, but was unavoidably absent, sent the following valuable contribution:—

"We have now had the Federation Costing System in operation for nearly twelve months, and consider it a great success . . . if we can work it satisfactorily, it should be possible in any bookbinding department.

"As a result of experience we have modified the forms somewhat so as to reduce the amount of the clerical work for the binders. It would be a simple matter, if a man took a single book or batch of books all alike, straight through, to put down his time on a daily docket, but in actual practice several men will do some work on a single book, or the batch of books.

"Our practice is as follows: A man will take on a batch of books, say six or twelve, for trimming, all of which will be on different orders and possibly several different styles of binding. The total time spent in cutting the batch is put down on the man's docket, and this time is divided and transferred to the cost sheets the following morning. Exactly the same process is gone through with the marbling. We follow this practice in binding the batch of books. If several men are engaged on the different operations they put down their individual time on the daily docket, and that is divided and transferred to the cost sheet. Anything out of the ordinary, say a Russia-banded laced book, would be treated separately, and the actual time recorded on the docket. The batches of books are also made as similar to one another as circumstances will permit.

"We find the system relieves the binder of as much clerical work as possible, but it is necessary to have someone in the office with a knowledge of time values of binding so as to allocate the total time to the different jobs fairly and accurately. The above applies to miscellaneous work, which is really the most difficult. Work is constantly going through in which the actual time is placed to the order on the daily docket, and where there are more than one or two books to an order, we are able to get the exact time taken. Women's time is much simpler to take, and we get actual time for the operations in all sections. Our binders' girls act also as feeders

for the rulers, and the time spent by each person in the ruling department is recorded on the daily docket and charged at the end of the week to the ruling department, with a corresponding reduction from the wages costs of the binding department."

State of Employment.

Employment in the printing and bookbinding trades continued bad generally during May, but showed a slight improvement in some branches, says the *Labour Gazette*. Employment showed some improvement in the paper trade.

With letterpress printers employment was, on the whole, slack in London, but generally showed a slight improvement on the previous month. In the provinces it continued bad generally, and although some improvement was reported from certain centres (including Bolton, Derby, Bristol and Dundee), in other districts there was a slight decline. In the lithographic printing trade employment continued bad and short time was prevalent. Of over 7,500 workpeople employed in the letterpress and lithographic printing trades covered by returns received by the Department 22 per cent. were working short time, and losing on an average 8½ hours each per week, while 16 per cent. were working overtime to an average extent of 5 hours each per week.

Employment in the bookbinding trade continued bad, though a slight improvement was reported in London. Of over 4,000 workpeople included in the returns received by the Department 37 per cent. were working, on an average, 9 hours per week short of full time.

Of 77,026 members in returns from trade unions, 63 per cent. were unemployed at the end of May, 1922, as against 65 per cent. at end of April and 82 at end of May last year, a decrease of 0.2 on the previous month and of 1.9 on a year before. Of 14,756 bookbinding members 89 per cent. were unemployed at the end of May, 1922, as compared with 10.4 at end of April and 10.1 at end of May last year—a decrease of 1.5 on the previous month and of 1.2 on a year before.

Employers' returns of 14,554 workpeople in the printing and bookbinding trades show a reduction of 0.2 on the previous month and of 3.8 on a year before, whilst their wages, £45,199, represent an increase of 1.1 on the previous month but a decrease of 0.9 on a year before.

THE Donside Paper Co., Ltd., is sending to Sydney and Melbourne 1,400 tons of news paper by the ss. "Gabriella," which loaded at Aberdeen harbour. This cargo is unique in so far that it is the first consignment of paper to be sent from Aberdeen to Australia.

DIVIDENDS AND REPORTS.

C. ARTHUR PEARSON. — Accounts of C. Arthur Pearson for year ended March 31st, 1922, after providing for necessary reserves and directors' fees, show profit of £64,747, plus £36,136 brought in, making £100,884. Directors propose dividend at rate of 15 per cent. per annum on ordinary shares (to include interim dividend of 2½ per cent. already paid), placing to reserve £22,857, carrying forward £38,027. On Sir Arthur Pearson's death £57,407 became payable to company in respect of policy of insurance effected upon his life in 1904. Of this amount part falls to be dealt with as capital and part as income.

WILLIAM TOD, JUNIOR, AND CO., LTD.—Mr. W. Leonard Tod, J.P., chairman and managing director, presided at the twenty-fourth annual general meeting of Messrs. William Tod, Junior, and Co., Ltd., Springfield Paper Mills, Polton, and in moving the adoption of the report and balance-sheet said that the past year had been the worst in all his experience for the paper trade. The mill had been entirely shut for nine weeks during the coal strike, and had been on short time for the whole year. The production of paper had only been about 25 per cent. of the possible output. Since March, however, orders have been coming in much more freely, and since the beginning of the present financial year in April about half as much paper had been made as in the whole of last year, though the mill was not yet in full production. A claim had been made for a large repayment of Excess Profits Duty, and though the auditors had not yet got the figures finally adjusted with the assessor, they considered the claim would be fully substantiated. Even after allowing for this, the year's working had resulted in a substantial loss, but a sufficient amount to cover that had been transferred from reserve. The dividend on the preference shares was being paid out of the special reserve fund created for this purpose. The retiring director, Mr. James A. Hood, J.P., and the auditors, Messrs. W. B. Peat and Co., C.A., were re-elected.

NEW COMPANIES.

WARNER PRESS, LTD.—Capital £500; printers, embossers and diesinkers, block makers and engravers, paper merchants, manufacturers of paper and stationery and parchments, manufacturers of wood and paper pulp, waste paper merchants, etc. Private company. First directors: Rose Levinsky, W. Carter, L. Blumenkehl and S. J. Levinsky. Registered office: 312, Bank Chambers, 329, High Holborn, W.C.

HOME, DOMINION AND CONTINENTAL NEWSPAPER SERVICE, LTD.—Capital £5,000; newspaper proprietors and general publishers and agents, and a newspaper literary service, general printers, lithographers, engravers and advertising agents, etc. Private company. First directors: Lieut.-Col. G. S. Hutchison, S. L. Bensussen, S. Walton and B. A. M. Freeman. Registered office: Cophthall House, 13, Cophthall-avenue, E.C.

CAMBRIDGE FOLDING BOX CO., LTD.—Capital £1,000; manufacturers and factors of and dealers in boxes, baskets, cases, stationers' sundries, fancy goods and articles made of metal, wood, paper or cardboard, printers, lithographers, etc. Private company. Subscribers: A. Korson and H. G. Wells.

Permanent directors: J. E. W. Dolman, G. Neville, A. C. Cameron. Registered office: 439-441, Oxford-street, W.

H. L. CASTLE, LTD.—Capital £5,000; to acquire the business of a printer and publisher carried on by H. L. Castle at Watford, Herts. Private company. First directors: H. L. Castle and C. A. Matthews. Registered office: Water-lane, Watford, Herts.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

GLOSSOP PRINTERS, LTD.—Issue on June 1st, 1922, of £250 debentures, part of a series already registered.

E. N. MASON AND SONS, LTD. (engineers and general stationers, etc., Colchester).—

Satisfaction in full on April 1st, 1922, of mortgage dated January 29th, 1921, securing £2,500.

CROPPER AND CO., LTD. (manufacturers of folding boxes, corded paper bags and paper specialties, etc., London).—Satisfaction in full on June 9th, 1922, of mortgage and land registry charge, dated July 14th, 1911, securing £15,000.

INTERNATIONAL TWINE AND PAPER CO., LTD.—Debenture dated June 12th, 1922, to secure £4,345, charged on the company's undertaking and property, present and future, including uncalled capital. Holder: Mrs. M. M. O. Wilkinson, 237, Knightsbridge, S.W.

ST. PAUL'S PRINTING CO., LTD.—(a) Satisfaction to the extent of £150 on May 31st, 1922, of debentures dated June 18th, 1912, and October 10th, 1913, securing £400 and (b) particulars of £1,000 debentures authorised May 16th, 1922, charged on the company's undertaking and property, present and future, including uncalled capital; also filed; whole amount issued.

MATHER AND CROWTHER, LTD.—Satisfaction to the extent of £2,600 on December 23rd, 1921, and £400 on March 3rd, 1922, of debentures authorised December 30th, 1903, securing £15,000.

NATIONAL PAPER AND PULP CO. (1920) LTD.—Satisfaction to the extent of £8,300 on May 31st, 1922, of debentures dated January 10th, securing £200,000.

BANKRUPTCIES, etc.

Re FRANCIS M. W. MEYNELL.—Creditors interested in the failure of Francis M. W. Meynell, described in the receiving order as Francis Meynell, journalist, of Brook Green, London, met on Monday at the London Bankruptcy Court. Mr. Meynell was brought to the court on the petition of Mr. J. H. Thomas, M.P., a creditor for £2,035 in respect of a judgment for damages for libel given against Mr. Meynell in the High Court, against which he holds a charging order on a £3,000 second debenture on the assets of the *Daily Herald*, which Mr. Thomas valued at £50. The official receiver said that in his preliminary examination Mr. Meynell had stated that he was at present employed as a printer's designer. In 1918 he became news editor of the *Daily Herald* at a salary of £800 a year, and afterwards editor of the *Communist* at £500. He later gave up his editorial duties for personal reasons and resumed his occupation as printer's designer. He estimated his liabilities at £2,300, and his assets consisted of the second debenture of £3,000. His insolvency was due to loss of the action and the liability for damages and costs. There were no resolutions, and the matter remains in the hands of the official receiver, who will wind up the estate.

Gazette.

A WORD OF CAUTION.

In giving the official Gazette information, it must be distinctly understood that we take official records as we find them, and accept no responsibility for inaccuracies, while, as an almost invariable rule, the facts will be found correct. We advise our readers, before forming hasty judgment, to consider that there may be in each case satisfactory explanation which does not appear on the records.—Ed.]

PERRY'S Trade Protection Offices.
(W. R. PERRY, L.D.).
12, COLEMAN STREET, LONDON, E.C.2.
Status Inquiries made as to the position and standing of Traders and others.
PERRY'S GAZETTE and LIST OF CREDITORS are Published weekly, and are invaluable to every one in business. **DEBTS RECOVERED & PAID OVER PROMPTLY**
Particular attention is called to the fact that this is the only TRADE PROTECTION SOCIETY that possesses at its offices in London Registers containing full Bankruptcy and other Registered Information, together with Status Information FOR THE WHOLE OF THE THREE KINGDOMS.
TERMS from £1 is upwards according to requirements. PROSPECTUS and further particulars on application to the above offices.

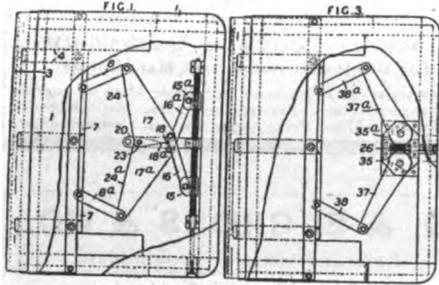

DIRECTORY.

Rates: £3 per annum (52 insertions) for each card of 3 lines or under; each additional line £1 6s. per annum extra.

New Inventions.

Loose-Leaf Binders.

Mr. R. L. Esson has patented an invention that relates particularly to loose-leaf binders in which things are operated by screw mechanism in one of the covers with links or the like connected to the adjustable back. In one form, Fig. 1, a pair of bell-crank levers 17, 17^a are pivoted at a common point 23 to an upwardly and downwardly inclined plate 20 fixed to the cover 1, links 8, 8^a being pivotally connected to the longer arms 24, 24^a and to a plate 7 connected with the adjustable back 3, and thongs 4. The shorter arms 18, 18^a of the

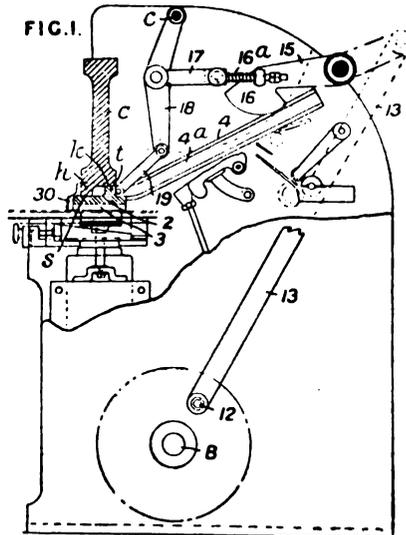

bell-cranks are pivotally connected with the travelling nuts 15, 15^a on the actuating spindle by links 16, 16^a. The bell-cranks are triangular in construction and are inclined upwardly in the direction of the links connecting them to the nuts, these links being inclined downwardly towards the nuts. In another form, Fig. 3, a worm 26 engages with oppositely disposed worm segments 35, 35^a, rigidly connected to lever 37, 37^a, these levers being pivotally connected with the adjustable back by link 38, 38^a.

Improvements in Die Presses.

Messrs. Waite and Saville, Ltd., have patented improvements in machines for printing from engraved plates or dies, of the type in which the die is face downwards during the printing operation, the die 3 is supported in a carriage 2 which is adapted to travel, after each impression, from the printing position up an inclined path where the inking, scraping, and wiping operations are performed. The die-carriage is supported and guided by antifriction rollers in grooves 4, of the inclined guides 4, and is connected by rods 19 to operating levers 18, pivoted at c so that the outer ends thereof follow a path approximating to that of the die carriage. The levers 18 are actuated from a crank pin 12 rotating about the main shaft B of the machine through the medium of a rod 13, lever 15, cam 16, spring connection 16^a and connecting rod 17. The upper surface of the die carriage is of step formation s, t and cooperates with a similar construction h, k of the cross-head C of the machine, which thus supports the carriage during the printing operation, performed by a rising plunger, but

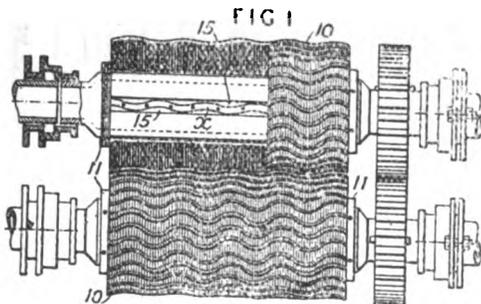

does not interfere with the movements of the carriage. A plate 30 attached to the cross-head prevents the die from being pushed too far forward, and the latter is held in position

during printing by the compression of the spring 16^a due to the completion of the movements of the lever 15.

Corrugating Pasteboard.

According to an invention by Messrs. A., S. and P. Renyi, for which patent application has been made, in respect of corrugating sheet metal, pasteboard, etc., rollers of the type consisting of a built-up series of discs or laminae are provided with curved keys over which the discs pass during assembling so as

to obtain the desired axial curve of the corrugations. In the form shown for corrugating pasteboard, a key x of the required shape projects from a groove 15 in each roll shaft and the toothed discs 10 are provided with keyways fitting over the projecting portion of the key, and are secured in position by screwed rings 11. The roll shafts are hollow for the supply of heating agents.

BOOKBINDING MACHINES.

T. W. and C. B. SHERIDAN CO., LTD., 68, Hatten-garden, E.C.1. Sole Vendors of the Sheridan Bookbinding and Leather Embossing Machines, including Perfect Binders, Wrapping Machines, Case Makers, Paper Cutters, Embossing Presses, Bundling Presses, Gathering Machines, Die Cutting Presses, and all styles of Bookbinding Machines. Printers' Wages and Hours.

Some Comparisons between the Present Time
and that of One Hundred Years or More Ago.

By CHAS. T. JACOBI,

Formerly Managing Partner of the Chiswick Press.

As a co-trustee for some of the Whittingham family—the last of whom died some six years ago—many interesting papers and documents have come into my possession. Among these various papers I found a number of circulars, notices, letters, and scales of prices covering the years 1795 up to 1816, from both employers and employees, which throw much light on the conditions of labour as regards wages and hours of the period just named.

The Chiswick Press was founded in 1789 by Charles Whittingham (the uncle), who died in 1840, and it was carried on by the second Charles Whittingham (the nephew), who died in 1876—a total period of 87 years. My own connection with the Press covers more than 50 years, during 37 of which I was responsible for the active management. In the earlier years I was in a subordinate position, and for the past 3 years have been acting as director and consultant since my voluntary retirement from active work in 1919. Altogether my connection with the Press, up to the present time, has exceeded that of either of the two Whittinghams.

Here I must refer to my own early experiences of the printing trade, which take me back prior to the 54 hours' movement in 1871, which came into force during 1872. When I joined the Chiswick Press, the 1866 scale was in force—36s. for 60-hour week—but prior to that date the wages, I believe, were 33s. and the working week longer.

When I received a nomination for the Chiswick Press with the view of being apprenticed, I was first drafted into the warehouse to await a vacancy in the reading department as a reading boy, which is a very necessary training for a lad going to case. During my probationary period in the warehouse my total hours were 66 per week, because that department commenced at 7 a.m. in order to get the various rooms swept out, and in winter to start the hot-water apparatus to warm the building by the time the staff generally commenced, at 8 a.m. The leaving-off time was 8 p.m., and in order that the 60 hours might be made up, the closing hour on Saturday was 4.30 p.m.

Personal Experience.

My own experience in the warehouse was a useful one, and when I was promoted to the reading room I thought I was in luck's way by having my hours reduced from 66 to 60 only per week! Incidentally they are now only 48 hours!

Résumé of lecture delivered before the South-West London Master Printers Association.

When the 54-hour week came into vogue it was considered a great boon, for it not only gave us some leisure in the evening, but it left us Saturday afternoon wholly free. Wages remained at 36s., and the piece was increased 3d. per 1,000 ens.

For the first few years of my experience in our business, which was practically all book work, we printed entirely by hand, and up to only a few years ago some proportion of the best work of limited numbers was still done by that method. I well recollect that all paper (before the days of supercalendered or so-called "art paper") was wetted down, and after printing, had to be hung up to dry, and then every sheet was filled in singly between glazed boards and cold pressed by hydraulic means. When finished, all the various sheets were laid out in sequence and gathered into complete copies and then folded and packed in neat parcels for the binder or put into stock for future orders as the bound copies were sold out.

At this point it would be well to remember that the present London Master Printers' Association has been a continuing body since 1891, and that any association of employers prior to that period was only formed to meet periodical approaches for increased wages or decreased working hours. Directly the difficulties were surmounted these associations were automatically dissolved and only came again into being when further memorials were presented. On the other hand the workmen have in a way been a more continuous body, but not in such a manner as now organised and federated.

Mr. Sydney Webb, in his "History of Trade Unionism," the first edition of which I had the privilege of printing in 1894, traces its history for two hundred years in this country, but it was really not until the middle of the nineteenth century that the unions or societies connected with the printing industry began to be a power in the land and to be reckoned with in all future negotiations. It was in 1848 that the L.S.C., and in 1849 the T.A., were re-constituted and put on to a more stable footing which, I venture to think, was perhaps an advantage to both sides when negotiating any question of wages or hours, or even customs of the trade, but at the same time one cannot help thinking that in the early days the spirit of trade unionism was more reasonable and certainly more conciliatory in all matters of common interest. But those interests have, in these more democratic days, widened, which has the effect of prolonging any negotiation entered into. I claim to speak with some

authority on this matter for on the completion of my apprenticeship, our house being a Society one, I naturally took up a card, which I retained for a few years until I began to carry the responsibility of management without supervision. In that limited period of membership I always found my fellow members, and the officials especially, quite reasonable on any questions of policy and other matters, which in such a complex business as printing are continually cropping up.

Old Style Negotiations.

It is interesting to note how "history repeats itself" nowadays, when we compare the demands of one hundred or more years ago with those made in recent years for increased wages and decreased working hours. But the former methods of approaching the masters was, you will find, of a more conciliatory character, and also more deferential in expressing the reasons for any consideration.

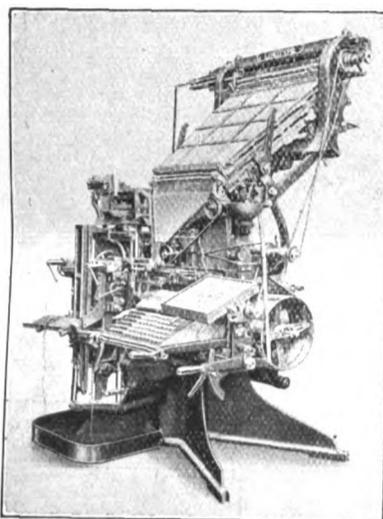

In the case of the compositors, for instance, on January 30th, 1801, when the masters granted an increase, the delegates of the men passed a resolution: "That the resolutions of the masters of the book-houses in the printing business, though not directly agreeable to our propositions, are adequate to our wishes; and that we are not ungrateful in the receipt of our requests, nor negligent of their attention." Again the pressmen in their appeal of 1805 addressed to the employers said: "We humbly presume to submit this address to your candid consideration, and sincerely hope that it will meet with that kind of treatment which is the surest method of preserving that cordiality so essentially necessary between employers and their journeymen."

This was followed by more written in the same strain, and made reference to the previous scales of charges, agreed on in 1787 and 1794 respectively. This document was signed by some 200 different pressmen. The proposed new scale submitted suggested for plain work anywhere between 4½d. and 7½d. per token, or per hour, according to whether folio, quarto, or octavo, and according to size of sheet. Again the size of type used, and the measure to which it was set by the compositors, affected the precise charge to be made by the pressmen in working off. All these details are most interesting to the present generation.

On the other hand the masters, who were usually diplomatic in their replies, answered by the following resolution:—"Resolved:

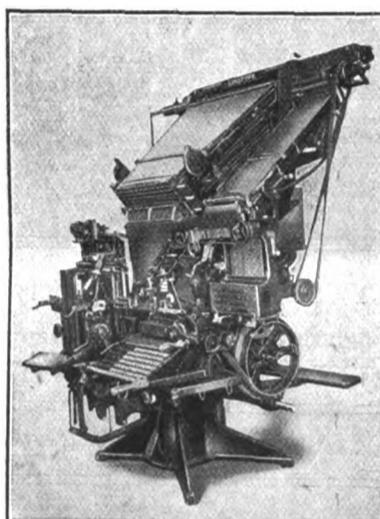

SOME

Modern Linotype Composing Machines

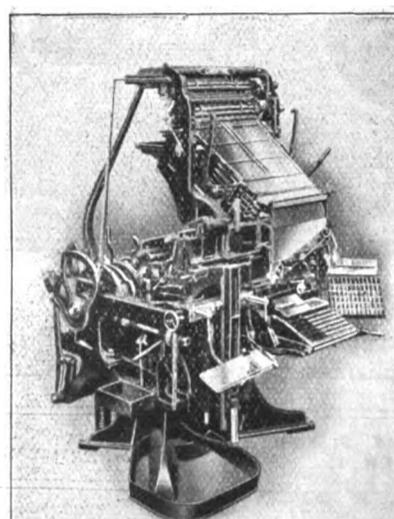

Three-Magazine Linotype.

Capacity, 540 characters. Matrices from more than one magazine cannot be used in one line, but its single distributor is common to all three magazines as required at the will of the operator. Can be installed equipped with one magazine, and additional equipments added as required. Range of bodies and faces 5 to 14 point; line measures up to 30 pica ems. Can also be equipped for head-line work. The ease and rapidity with which the operator changes from one body to another has made it a very popular model.

Three-Magazine Linotype with Auxiliary.

Sets faces from 5 to 42 point on bodies from 5 to 36 point in measures from 4 to 30 ems. The 118 keys (90 standard and 28 auxiliary) provide 596 characters. The auxiliary magazine gives additional time-saving flexibility in the composition of display cap. lines, special characters for book and job work, two-line letters, etc. Matrices from the auxiliary magazine may be assembled continuously or mixed in the same line with those from any one of the standard magazines.

Four-Magazine Two-Distributor Linotype.

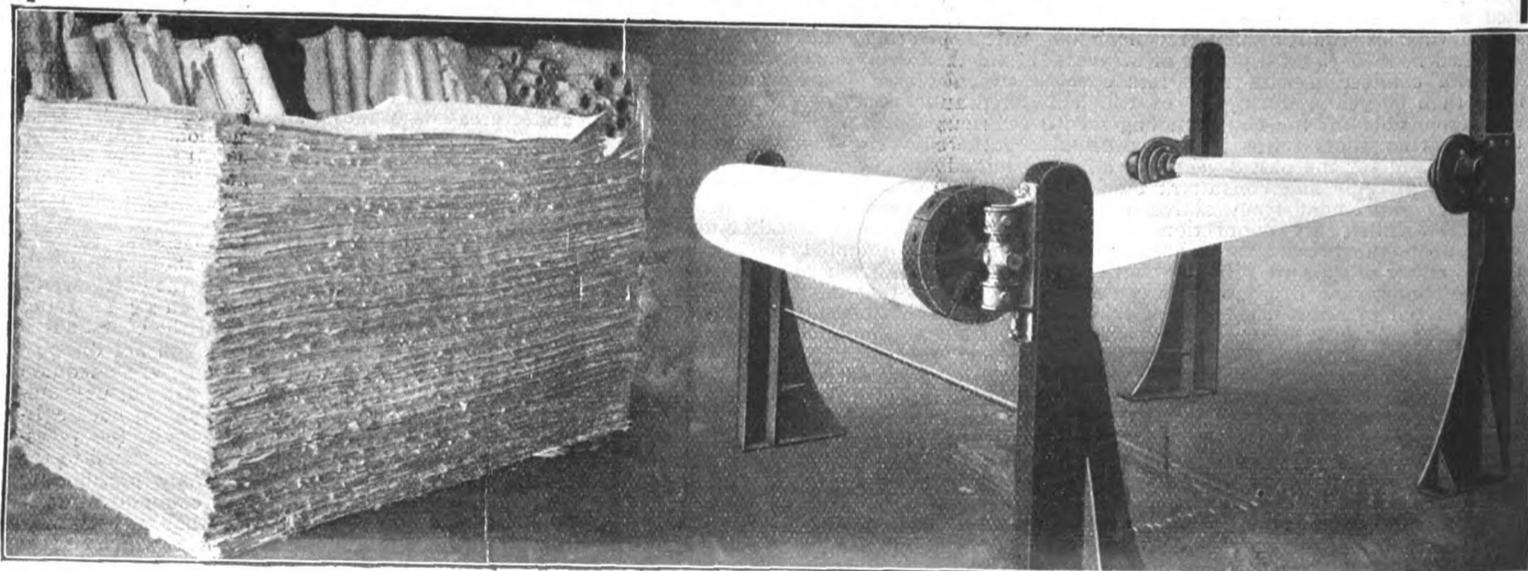

Equipped with four magazines, which with the two distributors can be used as three double units; that is to say, the first and second, second and third, or third and fourth magazines can be used together for the composition of one line. This arrangement gives the printer three distinct ranges of type face combinations in roman, italic, small caps, and display faces without loss of speed. Casts lines up to 30 or 36 pica ems, in bodies from 5 to 36 point. Can be supplied with two magazines only if so required.

Full Particulars from

LINOTYPE AND MACHINERY LIMITED, 9 KINGSWAY, LONDON.

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES :

- 1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading.
- 2.—It occupies a space of only six feet on the run, and is quite noiseless.
- 3.—The power required is such a small amount that it can be driven from any existing shafting.

- 4.—Centres of any kind or width can be worked on the machine.
- 5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day.
- 6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills.

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., Engineers, Myrtle Road Works, Brentwood, ESSEX

That it appears to this meeting that any advance on the scale of compositors' work as adjusted in 1805 is at present inexpedient and impolitic." This was in 1809, but eventually in 1810, both compositors and Pressmen received an advance—compositors of ½d. per 1,000 ens on common matter and pressmen the same amount of ½d. per token extra.

A Serious Dispute.

Early in 1805 the pressmen presented a new scale of prices to the masters, and as the employers said "peremptorily" fixed the date of 4th February of that year for it to take effect. The compositors followed suit, and there were two meetings of masters held, who were "struck with amazement at the enormous and disproportionate advance on current work in which a submission to the pressmen's demands would have involved every principle of justice and equity, and probably tended to the ultimate ruin of every branch of the literary concerns of the United Kingdom." This was, I think, a very lofty attitude to take up.

At this point the compositors also raised the question of the multiplication of apprentices, which was not entertained by the employers, but they were disposed to pass their proposed new scale with certain amendments. But the pressmen were not so easily dealt with, and the piece hands gave notice to leave their situations, and induced the "stab" (unwillingly) to follow their "pernicious example," as the masters termed it.

The masters retaliated by "solemnly and seriously pledging" themselves not to take into their employ again any of those that left unless they "quietly and peaceably" returned to their old jobs, and on the agreed scale of 1800. They also stipulated that "no master will receive or take any work from any other gentleman of the trade pending the present dispute."

In February, 1805, a series of 9 or 10 meetings were held at Stationers' Hall, at some of which, delegates from both pressmen and compositors were present. A settlement seems to have been arrived at with the compositors, but the pressmen were obdurate and the dispute continued.

The booksellers of London and Westminster also met and pledged themselves to support the master printers by suspending in town and country of all works, periodical, or of any other description, the resolution being signed by about 100 of the leading booksellers. This was on February 23rd, 1805, and on March 18th, 1805, at a meeting of "numerous proprietors and publishers of reviews, magazines and other periodical publications" it was resolved to postpone the publication of every work as described above, owing to the pressmen refusing to work at the usual prices. At a second meeting on March 20th, 1805, the booksellers were still more impressed with the propriety of supporting the master printers in their resistance to "the unreasonable demands of the Pressmen" and two resolutions to that effect were passed at that meeting.

As I have already observed, in some respects the present movement of 1922 is but history repeating itself, and certainly has been evident in previous times if we study the several demands made since the 54-hour week was granted in 1872.

The fact must not be overlooked that in receiving these periodical applications the masters have to consider the consumer, and stand between the worker and the customer. In many cases it is not possible for the master printer to recover his cost of production owing to competition.

Some interesting figures were given in the various papers as to the cost of living from 1793 to 1810. It is noticeable that beer seems to have been regarded as a very necessary thing, especially for pressmen, because of their hard work. Some of the prices for beer compare very favourably with those now charged for the present "standard" beer—certainly in price, and perhaps in quality.

Wages and Cost of Living.

The cost of milk in 1793 to 1809 varied from 9d. to 1s. 4d. per gallon, and the other items seem to have increased out of all proportion to the different advances paid from time to time—assuming that the figures given by the workmen were correct, but these the masters challenged. To-day it is the workmen who query the official figures given monthly, although they were readily accepted when prices were rising!

In the report of the jury for the printing section of the Great Exhibition of 1851, there is much interesting reading as to the state of the trade at that date, and the figures given there were on the authority of

Mr. Edward Edwards, at one time secretary of the L.S.C., which was established or re-organised in 1848. He supplied certain figures for no less than 79 towns in the United Kingdom, including London, upon which, he certainly was an authority. The wages for "stab" at that date were 33s. per week for London, and the hours probably 65 or 66. In London alone there were 3,000 journeymen and 1,500 apprentices, and in the country the same proportion was fairly general. In some cases the apprentices even exceeded the number of journeymen. I give a list of some of those instances:—

Town	Journeymen	Apprentices
Bedford	12	20
Berwick-on-Tweed	10	15
Brighton	30	50
Bristol	20	100
Hereford	17	50
Kendal	12	58
Liverpool and Birkenhead	280	500

How these great numbers of apprentices were absorbed into the trade is hard to realise.

Then as to the average all-round wages Mr. Edwards gave the following figures, which must not be confused with the individual fixed rates of the respective towns:

	average weekly
London	3,000 members 25/-
Provinces	2,500 " 20/-
Ireland	1,500 " 17/6
Scotland	1,500 " 15/6

The journeyman printer in those days must indeed have had a hard struggle to live, and the difficulty must have been made greater by his having been swamped by an abnormal proportion of apprentices.

Apart from the present question of the high cost of living—which is gradually falling, and bringing with it perhaps some reduction of the present high wage—the working printer of to-day is to be congratulated on the position he has obtained as compared with even those figures of the mid-nineteenth century just quoted. Those were bad enough, but the conditions were even worse at the beginning of the same century, when the working week was longer and the rate of pay less, with no holidays.

Before leaving the subject of wages and hours a few remarks on the costing system recommended by the Federation of Master Printers as compared with the old methods of pricing will not be out of place.

Going back to the old system, which is given by Hansard in his "Typographia" of 1825, the method then in vogue was a fairly simple one—too simple we would say now. The piece-work scale was largely used for book work at that period, and if the actual composition charge was 20s. for a sheet of 16 pp., 25 per cent. would be added for reading and proofing, and then 50 per cent. was added to that, making 37s. 6d. for what cost 20s. to set up. This addition of 50 per cent. was supposed to cover departmental expenses other than reading and proofing, overhead expenses, and profit!

This method, or some slight variation of it, was generally adopted until the more scientific system came into use in this country. Apparently some of the old printers made both ends meet and others did not, but their plant and general expenses were far less, and production was much slower.

The printer of these days has to provide much more expensive equipment and his departmental expenses and overhead expenses are much greater, so if his hourly rate is much higher—and it has been much increased by bigger rates of wages—the consumer obtains in a way greater value for his money, because by adopting more modern methods of production the workman produces more in the hour; but this is quite apart from the higher cost in wages, which I have just pointed out and for which the employers cannot be held responsible. His position is a responsible one; he has to see labour properly rewarded, and on the other hand to see that his customer is fairly and reasonably treated in the matter of charges.

We have received an early copy of "Seaside and Countryside in East Anglia," issued by the Great Eastern Railway Company, and containing a profusion of new facsimile water-colour illustrations excellently printed in multi-colour half-tone. The booklet is produced for the company by Percy Lindley, of 30, Fleet-street, London, E.C., and is obtainable, price 6d., at any of the G.E.R. offices and agencies.

Charles Straker and Sons, Ltd.

Dispersal of Printing Plant.

A sale of printing plant and material, extending over three days, took place on June 20th to 22nd at the premises lately occupied by Messrs. Charles Straker and Sons, Ltd., Bishopsgate-avenue, E.C. The plant was an extensive one, and the whole of the first day was practically devoted to the sale of type, of which there was a considerable amount, and prices up to 2s. 2d., 2s. 8d., and 3s. 2d. were realised for display founts, lower prices ruling for the commoner sorts. Among the machines sold on the opening day a double crown improved "Albion" press, by Matthews, brought £16; a demy improved "Albion," by the same maker, £17 10s.; and a super-royal "Albion," by Hopkinson and Cope, £12. Several imposing surfaces were sold; among the prices got were the following: A 96 in. by 36 in., £3 3s.; a 72 in. by 31 in., £5; a 96 in. by 36 in., £7; a 40 in. by 28 in., £2 7s. 6d.; a 72 in. by 31 in., £6 10s.; a 96 in. by 36 in., £17; and a 72 in. by 31 in., £4; another of a similar size brought £13.

On the second day of the sale the Monotypes and Linotypes came under the hammer. A nearly new Model "D," pneumatic keyboard brought £115; another went for £125; and three older Model "D's" were sold for £25, £30, and £40. A nearly new Monotype casting machine went for £500; another brought £250; and a third £130. A Model 1 Duplex single-letter Linotype sold for £210, and three similar machines went for £210, £200, and £190. Among the printing machines, a demy wharfedale, by Dawson, went for £155; a double demy drum cylinder, by Furnival, £140; a double demy Wharfedale, by Bremner, £145; a double demy "Reliance," by Fieldhouse, Crossfield and Co., £82 10s.; a same size Wharfedale, by Dawson, £100. Some of the machines went very cheap, and the purchasers secured bargains.

Bookbinding Machinery.

On the third day the bookbinding section was disposed of. Among the lots were a 28 in. treadle perforating machine, £11 10s.; several hand paging machines brought prices ranging from £2 10s. to £3 15s.; a No. 7 reel wire stitching machine, by Brehmer, £6 10s.; a 32 in. "Express" self-clamp guillotine, by Furnival, £60; a 42 in., by the same makers, £65; a two-pillar gold blocking press, by Kampe, £60; a No. 3 Imperial arming press, £11; a treadle index cutting machine, £10 15s. Some bargains were secured by buyers in thread stitchers, and the competition for the ruling machines was not great. A 48 in. automatic double striker, by Shaw, sold for £77 10s.; a 36 in. automatic double striker, by Hickok, for £10; and a bargain was secured by the purchaser of a 40 in. Brissard disc ruling machine at £25. Fair prices were got for a number of electric motors, but two steam engines that were offered did not arouse much competition.

A fair number of buyers attended the sale, and, considering the present depressed state of the trade, the prices obtained could not be complained of. The sale was conducted by Mr. Edwin W. Evans, of 156, Fleet-street.

Trade in Printing Type.

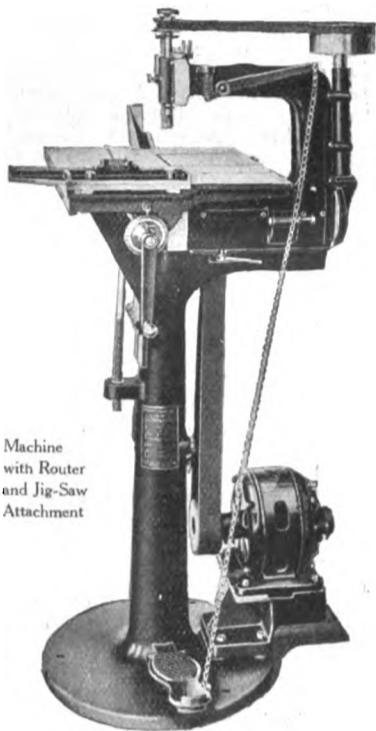

EXPORTS.—British printing type exported during last month amounted to only 11 tons, compared with 30 tons in the corresponding month of last year and 32 tons in May two years ago. Regarding the value for the month, those exports amounted to £3,834 last month, £10,791 last year and £7,670 in May, 1920. The quantity dispatched abroad during the first five months of the present year stood at 78 tons, contrasted with 168 tons last year and 115 tons in the corresponding period of 1920. The values for the five-months' periods were: £26,018 (1922), £55,908 (1921) and £28,539 (1920).

IMPORTS.—Printing type imported into the U.K. during May last amounted to two tons, as against three tons in May last year and three tons in that month two years ago. The values for the respective months were: £645 (1922), £2,102 (1921) and £938 (1920). During January to May 18 tons entered this country as compared with 14 tons last year and 10 tons two years ago (five months). The value of the imports were: £5,204 this year, £6,468 in 1921 and £3,368 in the period of January to May, 1920.

HERE IS THE MACHINE

That Every Department in

Every Printing Office Wants

Machine
with Router
and Jig-Saw
Attachment

THE MILLER SAW TRIMMER

is the fastest mortising machine made. It saws, trims, mitres, grinds, mortises, notches, undercuts, bevels, routs, rabbets, jig-saws, drills, broaches, and planes type-high. This is all done with one machine, which is self-contained. It operates in wood or metal, and puts in perfect register.

Trade Notes.

CHANGES in wages in the paper, printing, etc., group of trades during the period January-May affected approximately 106,000 workpeople, the net amount of change in weekly wages being £15,700.

PRESENTING the report of the Printing Committee to the Norfolk County Council, Colonel B. B. Sapwell is reported to have said that the cost of printing the minutes had fallen from 11s. to 5s. per page in six months. They were now down to pre-war prices.

THE price of *Lloyd's List and Shipping Gazette* has been reduced from fourpence to twopence—"not," it is stated, "on account of any marked changes in the economic conditions governing the production of a daily paper, but because we are convinced that at its reduced price it will make an appeal to many new supporters."

THE late Mr. A. F. Lowry, Neath, well-known journalist in South Wales, left £1,473.

FILM POSTERS.—At the Kinema Exhibitors' Conference at Liverpool speakers condemned what they described as "crude, inept and abhorrent picture play posters." One speaker said that, while some exhibitors were prepared to spend exorbitant sums on a block of films, they were unwilling to spend a sixpence on posters booming them.

THE death has occurred of Mr. James Haworth, of the staff of the *Financier*, who came to London from the *Manchester Evening News*.

FRY'S METAL FOUNDRY, of 25-42, Holland-street, Blackfriars, London, S.E.1, has issued an effective folder, illustrated and printed in two colours, setting forth the merits of the "Fryotype" melting pot. The principal feature is a series of signed testimonials from printing offices in London and in various parts of the provinces bearing striking witness to the efficiency and money-saving capabilities which experience of the "Fryotype" melting pot has proved it to possess. Copies of the folder—and any other particulars desired—will gladly be sent to inquirers applying to the above address.

THE new proprietors of *Sunday Illustrated* and *Sunday Sports Telegram* intimate that the proceedings recently taken in the High Courts are merely a step in the formal process of winding up the old company.

DIPLOMATIC and journalistic representatives of several countries were guests on Friday night at the dinner of the British International Association of Journalists, held at Prince's Restaurant, Piccadilly, under the chairmanship of Sir William Berry, the newly-elected president of the Association.

MESSRS. MARTIN AND CLARKE have sent us a copy of their July stock and price list, printed on a two-sheet superfine white pulp board, of which various thicknesses and sizes are stocked. It will be observed that they have made several reductions in prices to meet requirements of the market. The recent additions to their warehouse stock are a cream wove bond, 36 lbs. double large post, at a popular price, and a speciality in the shape of a glazed white manifold, 17 lbs. double crown.

WRAPPING PAPER CLASSIFICATION.—The Papermakers Association is endeavouring to secure improvement in the classification of wrapping papers in the official British import and export figures; and such is the status which the Association occupies in the eyes of the Department concerned that if at all possible the reform desired will be introduced. At present wrapping papers are classified as follows: 1. Glazed; 2. Unglazed and machine glazed; 3. Oiled waxed and other. For some time it has been felt that it would serve a very useful purpose if kraft paper could be classified separately. Accordingly Mr. A. W. Foster, the secretary of the Papermakers' Association, has been in personal communication with the statistical official of the Board of Trade on the question, and this gentleman adopted a very sympathetic attitude, thanks to the reasonable and courteous manner in which the case was put before him.

THE annual outing of the Printing, Book-binding, and Kindred Trades Overseers' Association is fixed to take place on Saturday, July 8th, when a visit will be made to the London Paper Mills, Dartford. Ladies are especially invited, and the party will assemble at Cannon-street Station at 1 o'clock.

THE usual monthly meeting of the Association of Master Printers of South-East London will be held at the Bridge House Hotel, London Bridge, on Tuesday next, at 4 p.m.

PRINTERS' CHARITY SPORTS.—An exceptionally fine entry has been received for the Printers' Sports at Stamford Bridge Athletic Grounds on the 15th, and visitors may be certain of one of the best entertainments available. For the price of 2s. one is able to have a comfortable seat under cover, with four and a half hours continuous entertainment. For those desirous of competing in the events, for which maximum prize values are offered, late entries will be accepted by the secretary, Mr. W. C. Jewell, 21, Shandon-road, Clapham, S.W.4, up to the first post, Monday, July 10th.

IN our report of the Bowling Competition at Penarth between the Bristol Press and the Caxton Bowles Club, Penarth, it was inadvertently stated that a 25 guinea cup was presented by the *South Wales News* (Duncan and Co.). This cup, "the Associated Newspapers' Cup," was organised by Mr. Robert J. Webber (*Western Mail*), president of the Caxton Bowles Club, supported by the *Cardiff Journal of Commerce*, the *South Wales News*, and the *Western Mail*, who contributed equally to the fund.

THE value of printing machinery imported into Australia from Canada during 1920-21 amounted to only £5, compared with £206 in the preceding twelve months and £1,211 in 1918-19.

PRINTERS' LONG SERVICE.—Four employees of Messrs. Chas. Thurnam and Sons, printers and stationers, Carlisle, have an aggregate record of service with the firm representing 208 years. Recently Mr. Rowland Smart, works overseer, and Mr. George Baty, assistant overseer, were presented with gold watches in recognition of their having completed fifty years' service with the firm. Four years ago Mrs. M. Innes, bookbinders' forewoman, and Mr. R. Sowerby, printer, were presented with pieces of silver plate, in recognition of their jubilee at Thurnam's. The firm have recently instituted a scheme of insurance for their workers, whereby in the event of the death of a worker, his nearest relative becomes entitled to a grant of his wages for one year. Messrs. Thurnam and Sons celebrated their centenary in 1916.

THE late Mr. Andrew Elliot, bookseller, publisher, and stationer, of Edinburgh, who published R. L. Stevenson's first book, "The Pentland Rising," died December 4th, left £13,778.

PAPERMAKERS AND WORKMEN'S COMPENSATION.—Following a conference of employers called by the Confederation of Employers' Organisation, a sub-committee of 25 has been appointed to consider the draft bill for the revision of workmen's compensation. The paper trade has been given two nominations—Mr. F. G. Hawdon, general manager of Messrs. John Dickinson and Co., Ltd., nominated by the Papermakers' Association on behalf of themselves and the Employers' Federation of Envelope Makers; and Mr. Wood, of Messrs. Arnold and Co., of Leeds, nominated by the Federation of Master Printers.

PRINTED books exported during the first five months of the year amounted to 93,940 cwts. (of the value of £1,129,436), as against 121,605 cwts. (£1,474,770) in the corresponding period of last year, and 121,605 cwts. (£1,288,770) in 1920 (five months).

MR. ALLAN BRUCE (Messrs. Allan Bruce and Co., 145, Queen Victoria street, London, E.C.4) has resigned the agency which he has held for many years for the papers manufactured by Messrs. Brindle and Son, Ltd., Samsbury Paper Mills, near Preston. In future Mr. Harold Rogerson, a director of Messrs. Brindle and Son, Ltd., will represent his firm personally in London, to which city he will pay frequent visits. Mr. Rogerson has been connected with Samsbury Mills for over 11 years and is very well known in trade circles.

MR. E. J. JESTY, late of Messrs. James Spicer and Sons, Ltd., has joined the old established firm of Messrs. John Henry and Co., Ltd., 6, Ludgate-square, E.C., and will, in conjunction with Mr. Matt. Henry, control the London office and sales. Messrs. John Henry and Co. represent the Colthrop Mills, Thatcham, and Messrs. Harold Jackson, Ltd., of Garstang, and with the increased output of boards shortly coming on the market from the new 120 inch machine at the Colthrop Mill, Mr. Jesty's knowledge and service should prove valuable.

A New Two-Cylinder Offset.

Some interesting particulars of a new hand-fed two-cylinder offset printing machine, known as the "Augsburg," are sent us by the selling agents, Messrs. William J. Light and Co., Ltd., of 127, Fenchurch-street, London, E.C.3. The handsomely produced brochure before us contains excellent half-tone illustrations of this machine together with striking coloured views of factory interiors and an aerial photograph of the extensive works of the Augsburg-Nurnberg A.G.

An important feature of this machine is that it has only two cylinders (with diameters in the ratio 1:2), namely a rubber cylinder and, arranged beneath it, a larger cylinder carrying both the form and the impression surface. One sheet is printed in every revolution. During the first half-revolution the form prints on the rubber cylinder, and in the second half the rubber cylinder transfers the print to the sheet placed in the meantime on the impression surface.

The rubber cylinder alone is adjustable. The damping mechanism is arranged underneath the cylinder and is adapted for fine adjustment. It can be put in and out of operation either by hand or automatically, and the water feed is regulated accordingly.

The machine is arranged for front delivery, at breast height, the printed sheet, face up, being taken by grippers over the delivery table and allowed to fall, there being no contact of the fresh print with tapes, etc. Output is stated as 2,400 sheets per hour.

Advertisement Regulation Bill.

This Bill, which is regarded as a serious menace to the poster trade, passed through the House of Lords, and is now appearing in the Orders of the Day to be introduced into the House of Commons. Owing to the congested state of legislation there is little likelihood of the Bill being given facilities, and it has certainly not been adopted as a Government measure. The Federation of Master Printers and the Bill Posters' Association are watching the matter carefully, and no doubt friends of the trade in the House will be on the alert.

It cannot be too clearly stated that local authorities have ample powers at present to prevent any abuses with regard to posters, and this measure, it is asserted, is simply put forward by well-meaning people who have an idea that no posters at all should be used, as they seem to be of the opinion that even a small hand-bill posted in a public street interferes with the social amenities of the neighbourhood.

Printing and Paper Workers' GALA DAY.

Some six hundred members and friends braved the unfavourable weather on Saturday to attend the first gala day of the N.U.P.B.M.R. and P.W. at King's Oak, High Beech. Those attending included: Mr. T. G. Newland (accompanied by his wife), Mr. A. E. Holmes (secretary, N.P. and K.T.F.), Mr. G. F. Larcey (secretary, London Central Branch), Mr. S. Stubbings (secretary, London Bookbinders' Joint Branch), W. G. Francis, E. Friend, Mrs. A. L. Taylor, Harry Chalk (chairman), T. W. Woodman, A. McLeod (secretary), and many others.

Mr. A. E. Holmes, an old sportsman, shared the honours with Mr. G. W. Walters and the brothers Wilson as judges and referee.

Mrs. T. G. Newland presented the prizes and wished all happy recollections and the general secretary congratulated the athletes upon their high standard of efficiency, adding that the foundation was planted for "Our Annual Day."

WEST AND NORTH-WEST
London Master Printers' Association
Echoes of the Glasgow Conference.

The monthly meeting of the West and North-West London Master Printers' Association on the 20th ult. was almost entirely confined to business matters, amongst which the labour question, then under consideration at Montagu House, naturally had a place, though it could not be fully discussed. The all-business agenda was agreeably relieved by interesting accounts of the Federation meetings in Scotland given by Messrs. A. Langley and F. A. Perry. A résumé of the latter's address we give below.

"I must first congratulate this Association on having this year at Glasgow, as well as last year at Scarborough, the largest representation of any district association in the London Alliance with the exception of the Central Districts. Your president and hon. secretary, four past-presidents and three other members of the Association, with some half-dozen ladies to look after them, made up a party which gave every evidence of very fully appreciating the Congress, or at any rate the social amenities which are the adjuncts and inseparable reward of those members who during two laborious days with self-denying heroism manfully stuck to their duties and, despite the temptations presented by the manifold attractions of Glasgow as a sight-seeing centre, devoted full time whilst the Congress was in session to considering and discussing the perplexing problems of Printedom. I could have wished that it had fallen to my lot to dilate upon the social junketings and pay my tribute to the munificent hospitality which our Scottish friends extended to us. I think I could have told a most interesting story of our journey to Scotland in a well-appointed saloon and the ways in which the interests of the journey were heightened; the exploration of the city of Glasgow on Saturday, the inspection of the fine collections in the museum and art galleries, the evening reception by the Scottish Alliance, the impressive service at the Cathedral on the Sunday morning with the distinguished figure of the Federation president in his red robes reading the lessons, and the appropriate sermon which was calculated, if not to make the master printer think more highly of himself than he ought to think, at least to help him to recognise the dignity of his calling and the part the daily discharge of his duties plays in publishing the truths and principles which make for the spread of civilisation and the happiness, knowledge and general well-being of humanity in general.

"On Monday morning the serious business of the proceedings began, but before dealing with that I should like to express the appreciation we all felt for the luncheon to which we were entertained at mid-day, the motor excursions provided for the ladies (whose start was watched with envious eyes by the mere men), and the stately civic reception by the Lord Provost, magistrates and councillors appalled in gorgeous robes in the magnificent city chambers, followed by the brilliant ball, the sumptuous dinner with the quaint haggis ceremonial, the delightful steamboat excursion down the Clyde and through the beautiful Kyles of Bute, the interesting visit to the Forth Bridge by special train and thence to Edinburgh by motor charabanc, the tour through the classic city of Edinburgh and the visit to the castle and Holyrood Palace, the delightful prospect of Princes-street and its surroundings, the hospitality extended to us by 'Auld Reekie' all providing material lending itself to a far more interesting talk, even if we leave out the visit to Loch Lomond, and the Trossachs with the snow-capped mountains of Perthshire which some of us enjoyed on Friday, whilst the devotees of golf were driving the balls around the links.

"The Cost Congress was opened by a very brief speech by Dr. MacLehose, and then Mr. Howard Hazell, the grand exponent of Costing, dealt with the "Past, Present and Future of the Costing Movement." (Reported in the *British and Colonial Printer and Stationer* of June 15th.)

"Mr. Alec. Orrock, of Edinburgh, gave an address on 'Costing Publishers' Binding.'" (This appeared in last week's *British and Colonial Printer and Stationer*.) Mr. G. D. Stewart, of the same city, spoke on "Stationery Binding," after which Mr. George Eaton Hart related some of his American experi-

ences. Mr. Richmond, of Glasgow, testified to the value of scientific costing in the engineering profession, and Mr. H. V. Chappell, in a valuable paper, emphasised the need of organisation in small printing offices. Mr. Williamson gave the meeting figures on the comparative average percentage of the component parts of overhead costs. Mr. Sessions, of the Ebor Press, York, whose recent book on estimating I think most members of our Association possess, gave some useful information. Our friend Mr. John Wise, the president of the S.-W. Association, gave a carefully thought out, well expressed, and distinctly thought address on "How a Small Printer Benefits by the Use of the Federation Costing System"—one of the best papers given at any of the congresses I have attended. I would strongly recommend any of our members who are in any doubt of the value of the system to small printers to get a copy of the report of Mr. Wise's address which appeared in the *British and Colonial Printer and Stationer* of June 8th.

"The drone of the bagpipes, from which we never really got away at Glasgow, has faded from our ears, but I venture to think that those who attended the Congress and heard the inspiring addresses and illuminating discussions, and enjoyed Scotland's lavish hospitality, have a store of memories which we would not willingly have missed and that we shall need some very important business to keep us away from future congresses so long as the delights of the Glasgow meeting of 1922 remain in our minds."

Warning to Printers.

Cases have been brought to the notice of the authorities in many different parts of the country in which printers, some of whom are in a considerable way of business, have produced imitations of the whole of one side of currency notes, for £1 or 10s. or a part of one side of such notes for the purpose of advertising goods for sale, theatrical entertainments, etc.

There is no doubt that the printing firms in question, as well as their customers, have dealt with such orders in ignorance of the law, but it is an axiom that that ignorance of the law cannot be held as an excuse for its contravention. It is well, therefore, to point out that the law on this subject is particularly clear. A currency note is deemed to be a bank note, and under the Forgery Act, 1913, any person who in any wise produces an imitation of the whole or any part of a note or of any words, figures, letters, devices, etc., on any bank note is guilty of a serious offence, and there is no exception in the statute in favour of *bona fide* advertisements.

It may be well also to remind our members of the provisions of the Newspapers, Printers and Reading Rooms Repeal Act, 1869, which requires all printers who print for public circulation to print on any documents their full name and address. Cases have been noticed by the authorities in which this statute has been disregarded, and in consequence various persons have found themselves exposed to heavy penalties.—*Federation Circular*.

A Printer's Fortune.

Mr. George Edward Briscoe Eyre, Bramshaw, Wilts, and Redcliffe-square, S.W., formerly a partner in the old firm of Messrs. Eyre and Spottiswoode, and lately chairman of Messrs. Eyre and Spottiswoode, Ltd. and of Messrs. Eyre and Spottiswoode (Bible Warehouse), Ltd., a director of the *Sphere* and *Taller*, Ltd., who died in February, aged 81, left property in his own disposition of the gross value of £490,221, with net personalty £409,294.

He made heirlooms to follow the estate of all the old masters from the Mawbey or Briscoe families, modern studies and pictures by Kumpel, Trantschold, Keyl, Herkomer and Wolf, his household effects at Warrens, his plate and certain diamonds.

OWING to development of business, Messrs. Hill, Palmer and Co., Ltd., wholesale paper merchants, printers and stationers, have removed to larger premises at 80-84, Golden-lane, London, E.C.1.

Printers' War Memorial.
Unveiling at Messrs. Truscott's Tonbridge Works.

A handsome bronze memorial tablet placed in the Dowgate Printing Works (Messrs. Jas. Truscott and Son, Ltd.), Tonbridge, as a war memorial, was unveiled on Wednesday last week by Lieut.-Colonel H. H. Spender-Clay, C.M.G., M.C., M.P. The tablet is placed on the north wall of the bindery room and beneath a relief picture depicting a war scene is the following inscription:—

"To the memory of those who fell in the Great War, 1914-1918.

"C. Adams, M. G. Adams, H. W. Andrews, E. L. Appleby, R. Arnold, B. A. Bantin, W. Batchelor, A. H. Beadle, T. Bentley, W. Cobell, S. J. Elliott, H. P. English, A. E. Gamble, H. O. M. Gammon, P. Groves, J. Hewitt, B. Hitchcock, R. Hutchinson, B. Kinally, W. Lambourne, A. Macnally, J. H. Mills, P. N. Norton, W. Oliver, E. J. Palmer, E. Pankhurst, R. N. Peach, T. E. Pike, J. M. Robertson, C. A. Truscott, F. G. Truscott, M. C., B. Vincent, E. G. Vining, H. Wickenden, F. J. Winchester. "Their name shall remain for ever, and their glory shall not be blotted out."

A similar tablet is being placed in Messrs. Truscott's London works.

A specially prepared form of service was used, and was impressively rendered in the presence of the staff and employees and several invited visitors. The gathering included Sir George Wyatt Truscott, Bart., Mrs. Waller, Mr. H. D. Truscott, J.P., Colonel and Mrs. J. R. Truscott, Sir Eric Truscott, Mr. W. H. Pennell (manager) and Mrs. Pennell, Mr. Albert Bennett, Mr. W. S. Tredgold, and Mr. H. W. Peach (Town Clerk). The only director absent was Lieut.-Colonel R. F. Truscott, O.B.E., who is still in Nairobi.

The service, which was taken jointly by the Rev. Stuart H. Clark (vicar of Tonbridge) and the Rev. D. M. B. Chapman (vicar of St. Stephen's), opened with a hymn, "O God, our Help in Ages Past." Psalm xxiii. was recited, and the Lesson read from Wisdom iii. 1-9. The names of the commemorated were read and special prayers said.

Sir George Truscott expressed the pride they all felt that Colonel Spender-Clay had come to unveil that memorial, because the Member for Tunbridge Wells and Tonbridge had fought in two wars. On behalf of all associated with the firm of James Truscott and Son he could say they would ever hold in hallowed and honoured memory those whose names were commemorated on that tablet.

A Soldier's Tribute.

Colonel Spender-Clay, who was in uniform, gave a brief address before the unveiling. He said he realised that for many that was a moment of sorrow—it brought back memories that were sometimes difficult to bear. He knew that to many people it was a source of sorrow that those whom they loved should lie in some foreign field and that no memorial to them was raised in their own churchyards, where other loved ones lay. But he was reminded of lines by Rupert Brooke, written not long before he met his death in the Mediterranean:—

If I should die, think only this of me.

That there is some corner of a foreign field Which is for ever England.

It was right that in every town and village and works there should be a memorial put up for all time to remind them—if reminding were necessary—of the gallant deeds of their comrades. He would say to those who had seen their hopes dashed like the ebbing tide after the flood of war, have courage and face the future. They hoped that with the gradual evolution of mankind, with the gradual awakening of Christian feeling amongst nations, there might be a more perfect understanding between the nations of the world, which would render a repetition of the events of 1914-18 impossible in the future.

The prayer of dedication was followed by the sounding of the "Last Post" and the "Reveille" by ex-trumpeter W. Manser, late R.E.'s, a former apprentice at Dowgate Works. The hymn, "O Valiant Hearts" preceded the Blessing, after which a verse of the National Anthem was sung.

MESSRS. SLATER AND PALMER send us a striking illustration printed on art paper and depicting a highly ornamental vase standing out against a background of beautifully even dense black. It effectively shows the usefulness of their Fine Process Satin Black Ink No. 134.

Trade Union Matters.

At a special meeting of the Darlington Branch of the National News Guild (which is at present affiliated to the Typographical Association) a resolution was passed declaring that the time has arrived when a change should be made in the constitution of the Typographical Association so that jobbing men and news men shall be distinct sections, and that questions affecting either body shall be decided by that section only and not by the whole membership of the Association as is done at present. In the event of the Executive Council refusing to take steps in the matter, it was suggested that legal advice should be taken as to the possibility of compelling the Typographical Association to forfeit a proportion of the funds of that body with the view of forming a new organisation comprised purely of newspaper workers.

New offices have been secured by the T.A. They are very commodious buildings, beautifully situated in Hulme, Manchester. Possession will not be taken until some alterations have been made.

The annual conference of the Governing Council of the National Society of Operative Printers and Assistants was held at Welsborough last week. The proceedings were marked by a very friendly atmosphere, and there were no echoes of the dissensions which have torn the society during the past year. As a matter of fact, some members who have been most prominent in attacking the society were elected as delegates to the Council, and they themselves in turn bore witness that they had buried the hatchet.

FORMER opponents of the Memorial Home scheme, after they had had an opportunity of viewing the work carried on there, were loud in their praises regarding its capabilities. During the conference Lord Waring (accompanied by his daughter) opened a new water garden, and a vote of thanks was passed to his lordship by the president, on the motion of Mr. George Bevan, seconded by Mr. Lundy.

ON Saturday, the North Wales and Border Counties Group of the Typographical Association held their annual conference at Conway. The delegates were given a civic welcome by the Mayor of Conway. Thirteen branches were represented. A resolution from Wrexham urged the advisability of setting up District Committees of the Joint Industrial Council. Cardiff and Wrexham pressed for stronger action to be taken in operating the fair wages clause in public tenders.

THE dispute that arose at the factory of Messrs. John Rissen, Ltd., in consequence of the dismissal of a girl employee has been amicably settled between the employers and the representatives of the Bookbinders' Union.

"OUR English fellow craftsmen will make no mistake in following out their contemplated action," says the monthly journal of the International Typographical Union of North America, in reference to the proposal that the London Society of Compositors should celebrate its seventy-fifth anniversary next year by the establishment of a home for consumptive members, on the lines of the Union Printers' Home at Colorado Springs.

Openings for British Trade, etc.

Inquiries have been received by the Department of Overseas Trade (Development and Intelligence), 35, Old Queen-street, London, S.W.1, to whom further inquiries should be addressed with the reference number quoted.

CANADA.

A Canadian company manufacturing Christmas cards, whose travellers cover periodically the whole of the Dominion, would be glad to undertake the representation of United Kingdom manufacturers of goods saleable to the stationery trade, etc., which would work in with their present connection. (Reference Canadian Government Trade Commissioner's office, 73, Basinghall-street, London, E.C.2.)

EGYPT

The Administration of the Egyptian State Railways, Telegraphs and Telephones, Cairo, invites tenders for the supply of stationery, including carbon paper envelopes, filing materials and miscellaneous office requisites. Tenders on the prescribed form, addressed to the General Manager at Cairo Station, will be received in Cairo up to 10 a.m. July 27th, 1922.

SPECIAL PREPAID ADVERTISEMENTS

The Minimum Charges for Three Lines, with an average of seven words to the line, for Advertisements under the headings given below are as follows (extra lines at proportionate rates):—

Miscellaneous.

COLONIAL NEWSPAPER CUTTINGS, dealing with the Paper, Printing, Stationery and Allied Trades, are wanted by Advertiser.—Communicate, stating terms, to Box 13882.

PHOTO PRINTS.—Object Photography, etc.; Practical and Skilled Operators at your service; Modern Studies specially planned for all Object Work.—For efficient service send your work to The Nickeloid Electrotype Co., Ltd., Photo Engravers and Electrotypers, 10, New-street-hill, London, E.C.4. 13963

SHOE LANE.—Well-lighted WAREHOUSE to be let, just re-decorated; floor space about 4,300 sq. ft.; suit Paper Trade; rent moderate; no premium.—C. Rawley Cross and Co., Ltd., 21, Bedford-row, W.C.1. 13969

THE Proprietor of Patent No. 164,478 for the manufacture of VEGETABLE PARCHEMENT, is desirous of negotiating with interested parties either for the sale outright, or would undertake to manufacture same.—Apply, Box 13972.

TYPE AND METAL RULE BORDERS, LEADS AND CLUMPS.—Send for samples and prices. Best Alloy used for all these materials.—The Nickeloid Electrotype Co., Ltd., 10, New-street-hill, London, E.C.4. 13964

WANTED, THREE or FOUR-COLOUR BLOCKS (Odd or Series), suitable for Wall Calendars, size about 6 by 8 in.—Price and colour-proof, to L. F. De Vos and Co., 37, Canal de l'Amidon, Antwerp. 13953

CIRCULATION RAISING.

I have some 16 years' practical experience. I have excellent connections in Scotland. I am perfectly positive I can pull up sales. I will do it for a salary and expenses. May I hear from you?

HENRY MADSEN,
3, London Street, EDINBURGH.

Messrs. Cropper's New Box Factory.

Some interesting particulars concerning the folding box factory which Messrs. Cropper and Co., Ltd., are to erect at Thatcham were given to the meeting of the Newbury Rural District Council recently, when the plans were approved.

The new building will be 880 feet in length by 100 feet wide. It will adjoin the existing Colthrop Mills, and will be adjacent to the factory of Containers, Ltd., an allied company. Nearly one million bricks will be required in the erection of the factory, which, when completed and the machinery installed, will create permanent employment for 500 or 600 people. On the work of construction several hundreds of men will be engaged for many months.

THE Post Office scheme for posting advertisements on the walls of post offices is being given its first trial application at the Shaftesbury-avenue post office, London. A contract is said to be nearly complete between a large advertising firm and the Post Office to cover the walls of 1,450 post offices in the British Isles with framed advertisements.

Industrial Improvement.

THE improvement in industry generally as
also in the paper and allied trades is con-
firmed by the latest figures available concern-
ing unemployment. The *Labour Gazette*
Employment Chart shows that the decline in
unemployment was resumed in May and the
allied industries have shared in the improved
conditions. The official report on the state of
trade in the paper industry records a slight
improvement during the month in some dis-
tricts, but employment on the whole was only
moderate. Of 9,700 workpeople covered by
the returns received, 13 per cent. were working
on an average of 12 hours per week short of
full time. Detailed figures relating to paper-
making and staining reveal a lessening of full
time unemployment and of systematic short
time. Of the 59,380 insured workpeople esti-
mated for this side of the industry, 5,506 were
totally unemployed according to the number
of books remaining lodged on May 22nd.
The majority (3,898) were males and 1,608
females. The total percentage unemployed
was 9.3, which represents a decrease compared
with April 24th of 1.5. An even better state
of affairs is shown in regard to systematic
short time. The total of 2,286, of whom 1,644
were males, represented a total percentage on
short time of 3.8, a decline of 2 per cent.

Manufactured Stationery.

OF 68,810 insured workpeople engaged in
the manufactured stationery trade 5,155 were
totally unemployed at May 22nd, 3,756 being
females and 1,799 males. The total percentage
unemployed was 7.5, a decrease of 1.1 com-
pared with April 24th. Short time workers
totalled 2,353, of whom 1,900 were females and
the total percentage of 3.4 represents a decline
in systematic short time of 1.4 as against the
position a month before.

Printing, Publishing and Bookbinding.

THESE sections of the allied industries,
curiously enough, show a less favourable
state of affairs at the end of May. While the
number engaged and the total figures of un-

employment are larger, the percentages of
decrease are smaller. Out of 213,620 estimated
insured workpeople, 15,422 were unemployed
at May 22nd, of whom 10,622 were males.
Total unemployment was thus 7.2 per cent.,
showing a decline as against April 24th of
0.5. Only 1,863 workpeople in these indus-
tries were shown to be working short time,
but the total percentage of 0.9 showed a de-
crease of 0.2 as against April 24th.

Employers' Returns.

THE returns furnished by the employers to
the *Labour Gazette* show considerable in-
creases, both in regard to the number of work-
people employed and the total wages paid in
the week ended May 27th. Although the re-
turns are by no means complete, they indicate
the trend of affairs. Thus the 11,659 work-
people mentioned as being engaged in the
week specified represented an increase of 1.6
in the month and of 22.6 in the 12 months.
The wages paid, £30,857, show respective in-
creases of 3.3 on the month and of 20.4 per
cent. on the 12 months.

An Interesting Comparison.

THE state of employment in the printing
industry in this country bears unfavourable
comparison with that of Germany, but is
considerably better than that of Norway. In
the case of the former country, out of 72,112
members of printing unions making returns,
only 1.9 per cent. of the membership were
unemployed at April, comparing with 1.7
in March and 2.1 in April last year. The
bookbinding section was even in a better
state, for out of a membership of 91,800 the
percentage of unemployed in April was 0.8 as
against 0.7 in the preceding month and 4.1 a
year before. Reports from Norway, how-
ever, show very large percentages of unem-
ployment among printers. At March 21st the
membership of printing unions is returned as
2,374, a percentage unemployment of 15.2. In
the case of the 743 bookbinders in Chris-
tiania, the unemployed percentage is no less
than 23.3, slightly worse than it was in Feb-
ruary, but better than was the position 12
months earlier, when the percentage was 25.9.

German and British Wages.

GERMAN printers are making good use of
the low exchange value of the mark; and in
seeking contracts for printing from countries
like our own, they set forth the advantages
which the exchange gives them. One Berlin
firm, which asserts that it has large contracts
for European countries (including the United
Kingdom) and the United States lays stress on
the difference in wages which the low valua-
tion of the mark represents and which en-
ables the printer in question to quote at very
low figures. A circular before us states in
very uncertain English: "The paper prices
are somewhat lower here in Germany as they
are in England and the U.S.A. The salaries
are very different: our dearest workmen, the
machine operators, received in April, 1922,
weekly about M. 800. That is, according to
the position of the valuta, less than one pound
or three dollars; whilst a compositor gets in
London weekly about 92s. 6d. and in New
York about 39 dollars and 70 cents. The more
work a delivery contains, the better the
quality of execution is, the greater the differ-
ence of salaries and prices is. Also if you
estimate, that about 40 per cent. of the
delivery is composed by paper, and that you
must pay the freight and in some cases the
duties, our prices although considerably lower
as yours. The larger the orders, the greater
the difference is. Besides this, you can require
the greatest deals of our establishment for
quality and wholesale quantities." If German
work is equal to the grammar, it will not be
altogether safe to trust an order in that
quarter.

Printing Trade Wages.

Industrial Court Decides that a Case has been Made Out for Reduction as to the T.A.

This is a momentous week in the history of the English printing trade. Grave decisions are being made as we go to press, and results are momentarily expected.

Industrial Court Decides on Reduction.

The whole question of wages is in the melting pot. So far as the T.A. are concerned, their case was considered on Tuesday by the Industrial Court.

It was announced in the evening that the Court decided that a case for a reduction in wages had been made out, but the decision as to the amount and dates would be announced later.

The following agreed official statement was issued at the close of the proceedings at Old Palace Yard:—

"The Industrial Court, under the presidency of Sir William Mackenzie, K.C., K.B.E., with the assistance of Mr. McKie Bryce, C.B.E., and Mr. D. C. Cummings, C.B.E., met to-day. It considered the reference to the Court by the Federation of Master Printers of the United Kingdom, the Newspaper Society and the Typographical Association. The terms of reference were: Should there be a reduction in the wages of the members of the Typographical Association? If so, what amount, and how any such reduction should be divided, and at what dates.

"The case for the employers was stated by Mr. James MacLehose, LL.D., president of the Federation of Master Printers, and evidence was given by Sir James Owen, president of the Newspaper Society, Mr. Geoffrey Williams, Mr. J. T. Churchill and Sir Frederick MacMillan.

"Mr. J. D. French, general president of the Typographical Association, presented the case for the Typographical Association, and he was assisted by Mr. H. Skinner, general secretary, and Messrs. A. Tricky, W. Bottomley and E. G. Yates.

"Sir William Mackenzie, chairman of the Court, stated that the Court had decided that a case for a reduction in wages had been made.

"The parties concerned thereafter made proposals as to amounts and dates, and the chairman intimated that the Court would give its decision in the course of a few days."

The proceedings of the Court were private and in addition to those who conducted the case on both sides there were present on the employers' side Mr. R. A. Austen-Leigh, Mr. J. C. Coppock, Col. Fletcher, Mr. A. E. Goodwin, Mr. Willett and Mr. Michael.

Mr. A. E. Holmes, general secretary of the Printing and Kindred Trades' Federation, was an interested spectator, and the only one present from the trade union side excepting the five representatives of the Typographical Association.

The further decision of the Court is likely to be known before the end of the week.

The Ballots.

Four unions, as we stated last week, are taking a ballot on the proposed reduction of 12s. 6d. in instalments, the representatives having undertaken to recommend acceptance. How the ballots are going is still an unknown quantity; but the results are to be communicated to the masters' organisation by Thursday.

It is understood that should the vote go against acceptance, the notices which were suspended by mutual agreement will automatically become effective.

London Negotiations.

In London the position is still very complicated. The fact that there are some 14 unions to be dealt with by the London Master Printers' Association indicates the difficulty of coming to a settlement. As already intimated, four of them are taking a ballot.

As to the others, of which the most important is the L.S.C., it is so far to the good that negotiations are to be resumed. Reference to an Industrial Court was apparently not acceptable to the workpeople. Arrangements have been made for the masters' organisation to meet five or six of the unions on Friday. These are the L.S.C., the Machine Managers, the Correctors of the Press, the Amalgamated

Society of Pressmen, the Typefounders and Mono Casters.

Suspension of notices for 14 days, with overtime, was agreed to in the meanwhile, and they will be further suspended if necessary. Should negotiations break down, however, it is understood the notices will again operate.

The London Society of Compositors.

The position of the wages dispute so far as it affected the L.S.C. was considered at a special delegate meeting held on Wednesday night last week at the Memorial Hall.

Mr. T. E. Naylor, M.P., the secretary, carried the story of the wages negotiations from the point reached at the meeting held a week earlier. He dealt first with the proceedings at the adjourned meeting of the J.I.C., then with what took place at the meetings of the negotiating unions with the employers, and finally with the special meeting at which the employers and L.S.C. executive had met again on Friday, June 23rd.

Presenting the L.S.C. Wages' Committee report, Mr. Naylor stated that the attitude of the Society had been as follows:—That if notices were suspended, the L.S.C. Executive would agree to meet the employers again and the overtime embargo would be removed; that the Executive would be prepared to meet the employers before the expiration of the notices to consider the situation in the light of what might have happened as the result of the action of the other unions; and no wages concessions of any sort.

The report having been received, a proposition was moved, seconded and carried unanimously, declining to refer the wages question to the Government's Industrial Court, and expressing the view that it would be advantageous to both sides to continue negotiations as heretofore.

Natsopa Levy.

On the question of a levy in connection with the wages' dispute, we understand that a considerable majority of Natsopa members have voted against it. An unpleasant fact regarding this result is that so few of the members have recorded their votes; at the same time it is pointed out that the numbers voting were considerably in excess of those on a similar question last month. However, it is stated that the Society have decided to pay the dispute benefit to which each member is entitled according to rule. Notwithstanding the result of the levy vote, the Executive has already decided that the funds of the Society shall be used to their uttermost to fulfil their obligations to the members who may be locked out in the event of a rupture.

Lithographers.

A crowded meeting of the Amalgamated Society of Lithographic Printers, London branch, summoned to consider the proposed wages reduction, was held in the Memorial Hall, Farringdon-street, on Monday night. A resolution that in the opinion of the meeting the employers' terms were unacceptable was passed.

A ballot is being taken in this case, and we learn that the result will show a small majority against acceptance of the employers' terms. The definite figures, however, would only be known after we go to press.

The Scottish Position.

In Scotland, where the lithographers have been out for three weeks, the situation has cleared to a certain extent. A conference was held in Edinburgh on Thursday, last week, between the Scottish Alliance of employees in the Printing and Kindred Trades and representatives of the Amalgamated Society of Lithographic Printers of Great Britain and Ireland, and in view of the proposed settlement in England, the Scottish Alliance agreed to recommend acceptance of these terms for Scotland. Pending the result of the ballot, which is now being taken, the men were to resume work. The terms indicated in the ballot papers are 12s. 6d., spread over this and next year, no further reduction in wages to take place during 1923.

FAILURE is the salt, success the sugar of life Both have their place.

Printers' Strike in Germany.

Writing on July 2nd a correspondent reports a general strike of Berlin printers. The strike originated in the publishing house of Scherl, owners of the *Lokal-Anzeiger*. Support of the Printers' Union followed. The demands put forward are for a uniform increase of three hundred marks on the weekly wage and no work on Saturday afternoons. As they already do not work on Sunday afternoons this condition would mean that Berlin would only have newspapers five mornings a week.

All newspapers, with the exception of the *Rote Fahne*, the news sheet of the Berlin working man, stopped publication on the 2nd inst.

Personal.

SIR ALEXANDER JEANS, the managing director of the *Liverpool Daily Post*, attained his 73rd birthday last week, and was congratulated on the fact during a very pleasant river trip which was arranged for the entertainment of Liverpool journalists by the Mersey Docks and Harbour Board.

MR. TAFT, Chief Justice of the United States, was entertained at the Press Club to luncheon on Thursday, when Lord Burnham presided, amongst those present being Lord Riddell and many of the foremost London editors and other newspaper men. The proceedings were of a most cordial character.

MR. JOHN GRAVES who has just retired from his position as representative of Messrs. B. Winstone and Sons, Ltd., has been continuously in the service of this old-established house of printing ink manufacturers (now in his 75th year) since 1862. This creates, we venture to think, a unique record. Those who know Mr. Graves can vouch for his wonderful vitality and enthusiasm in all matters of business, and will wish him many years of well-earned rest.

His successor is Mr. Francis Sheridan, who has already spent several years of useful service with Messrs. B. Winstone and Sons, Ltd., and has earned a reputation which will make his succession to Mr. Graves popular.

MR. WILLIAM A. READE, president of the Ludlow Typograph Co., of America, sailed on Saturday after a visit to this country, and expressed himself very well satisfied with the progress in this country of the Ludlow type-caster, whose representative over here is Mr. Martin J. Slatery. We hear, by the way, that the *Daily Express* is one of the latest London recruits to the Ludlow system.

MR. CHARLES NEWELL, C.C. (of Messrs. John Gordon and Co., Ltd.), at a luncheon at the Guildhall on Wednesday, last week, was presented with a silver tea and coffee service in appreciation of his services as chairman of the Streets Committee during the past year. The company included Sir T. Vansittart Bowater, Bart.

MR. NEWELL, remarked the chairman (Mr. George Lavington), had by his ability and geniality endeared himself to one and all. He was elected to the chair unanimously and at the end of his term of office the unanimous vote passed by colleagues was far more than a formal expression of thanks. They hoped he would be associated for many years with the Corporation.

MR. A. W. FOSTER, as representing the Papermakers' Association, has been elected a Fellow of the Royal Statistical Society.

MR. WALTER SCOTT, J.P., proprietor of the *Rockdale Observer* and *Heywood Advertiser*, last week celebrated his 70th birthday.

THE vicar of Hendon on June 28 received a guinea for preaching the annual sermon on the text "*Vita humana bulla est*" (human life as a bubble) to the Master and Wardens of the Stationers' Company. The sermon is the bequest of Richard Johnson, a member of the Company, who died in 1795, and on whose grave in the churchyard the text is inscribed.

DIVIDENDS AND REPORTS.

LOVELL AND CHRISTMAS. — Dividend on ordinary shares for six months ended June 30th, 1922, at the rate of 14 per cent. per annum, making 10 per cent. for the year; also bonus of 4 per cent. (against a 10 per cent. dividend only for the previous year).

NEW COMPANIES.

S. WEBSTER, LTD.—Capital £5,000; manufacturers of typewriters, carbon papers, ribbons and accessories and stationery of all kinds, etc., and to adopt agreements (a) with G. Little and (b) with H. I. B. Webster. Private company. Subscribers: R. W. Green and L. E. Dwelley. Registered office: Moor-gate Station-chambers, E.C.2.

EDGAR LONDON AND CO., LTD.—Capital £1,000; to take over the business of a paper merchant carried on by E. London at 5, Philip-lane, Wood-street, E.C., as "Edgar London and Co.," and to carry on the business of manufacturers of and dealers in paper, paper-board and book cloth, cardboard and other boxes and fancy goods, stationers, printers, etc. Private company. First directors: E. London and M. Bound. Registered office: 5, Philip-lane, Wood-street, E.C.2.

"BRISTOL ADVENTURER AND WEEKLY NEWS," LTD.—Capital £5,000; newspaper proprietors and publishers, stationers, advertising agents, etc. Private company. Subscribers: F. Gardiner and P. W. B. Tippetts. Registered office: 21, Orchard-street, St. Augustine's, Bristol.

WELLINGTON AND WARD, LTD.—Capital £200,000; to acquire the business carried on at Elstree, Herts, and elsewhere as Wellington and Ward, and to carry on the business of manufacturers of photographic plates, papers, films and chemicals, photographic apparatus and materials, etc. Private company. The managing directors are J. B. B. Wellington, H. W. Hall, H. H. Ward and C. S. Downing. Registered office: Shenley-road, Elstree, Herts.

C. GEO. KEMP, LTD.—Capital £300; manufacturing stationers, printers, lithographers, stereotypers, electrotypers, photographic printers, etc. Private company. First directors: H. E. Ayling and C. G. Kemp. Registered office: 31 and 33, Broad-street House, New Broad-street, E.C.2.

AMALGAMATED PRESS (1922), LTD.—Capital £3,800,000; to enter into and carry into effect, with or without modification, an agreement already drafted, to be made between the Amalgamated Press, Ltd., and Wm. Graham, of the one part, and this company of the other part. The following have consented to

act as directors: Sir Geo. A. Sutton, Bart., Arthur E. Linforth, Brig.-Gen. Wm. F. Mildren, Wm. H. Back, Ted Anderson, Harold J. Garrish, Leslie K. Clark and Wm. Blackwood. Registered office: Fleetway House, Farringdon-street, E.C.

BRANDIS DAVIS AGENCY, LTD.—Capital £3,000; to take over the business of an advertisers' agent carried on by G. B. Davis at Thanet House, 231, Strand, W.C., as the "Brandis Davis Agency." Private company. First directors: G. B. Davis, Mrs. R. B. Davis and R. R. R. Cooper. Registered office: Thanet House, 231, Strand, W.C.2.

WORTHING AND LITTLEHAMPTON GAZETTES, LTD.—Capital £12,500; to take over the business of newspaper proprietors, printers, book-binders and book and music sellers and stationers, carried on by C. Fibbens and F. Adsett, at 21, Chatsworth-road, and 35, Chapel-road, Worthing, and at 22, Beach-road, and 18 and 19, High-street, Littlehampton. Private company. First directors: C. Fibbens, F. Adsett and T. A. Durant. Registered office: 35, Chapel-road, Worthing.

THE ANGLO-NUMBERING MACHINES, LTD.—Capital £2,500; manufacturers of and dealers in numbering machines of all kinds, die sinkers, dating and other stamps and seals made in metal, rubber or other materials for printing, perforating or registering, counting and calculating machines and all accessories thereto, engravers, etc. Private company. First directors: J. M. Evans, B. B. Conrad and E. G. Nixon.

J. AND W. MITCHELL, LTD.—Capital £55,000; to take over as from midnight, December 31st, 1921, the business of paper stainers, and cardboard makers and paper embossers, as formerly carried on by J. and W. H. Mitchell at Bordesley Paper Works, Birmingham, as "J. and W. Mitchell." Private company. Subscribers: J. Mitchell and W. H. Mitchell. First directors: J. Mitchell, W. H. Mitchell, J. Miller, A. B. Davis and H. W. Burman. Registered office: Bordesley Paper Works, Coventry-road, Birmingham.

COMPANY MORTGAGES AND CHARGES.

Fresh Obligations registered pursuant to Section 93 of the Companies' (Consolidation) Act, 1908, and Satisfactions registered pursuant to Section 97 of the same Act. (The registration of Satisfactions is not compulsory).

HUTSON BROTHERS, LTD. (printers of pictorial post cards, publishers and stationers, etc., London).—Issue on June 7th, 1922, of £1,540 debentures, part of a series already registered.

EUROPEAN ART PUBLISHING SOCIETY, LTD.—Particulars of £650 and £1,000 first debentures, authorised June 22nd, 1922, charged on the company's undertaking and property, present and future, including uncalled capital; whole amount issued.

PHOENIX WORKS, LTD. (printers, etc.)—Mortgage dated June 20th, 1922, to secure £1,497, charged on 12, Vine-place, Sunderland. Holders: Leeds Permanent Benefit Building Society.

ELKIN MATHEWS, LTD. (booksellers and publishers, etc., Adelphi).—Debenture dated June 19th, 1922, to secure £2,000, charged on the company's property, present and future, including uncalled capital. Holder: A. W. Evans, 4a, Cork-street, Regent-street, W.1.

A. C. CURTIS, LTD. (booksellers, publishers, stationers, etc.).—Further charge on 33, High-street, Godalming, dated June 15th, 1922 (supplemental to mortgage dated May 15th, 1920), to secure further advances not exceeding £1,500. Holders: Lloyds Bank.

BROMLEY AND WEST KENT NEWSPAPER CO., LTD.—Particulars of not more than £1,500 debentures authorised May 22nd, 1922, charged on the company's property, present and future, including uncalled capital; present issue £1,400.

BANKRUPTCIES, etc.

Re DAVID DOMBROWSKI (trading as Davies, Lazarus and Co.), cardboard box manufacturer and printer, 261, Cambridge-road, E.—A sitting of the London Bankruptcy Court was held on June 28th, before Mr. Registrar Hope, for the public examination of this debtor, who was brought to the Court on a creditor's petition last April. The accounts show liabilities £7,154 and assets "claim against Davies, Lazarus and Co., Ltd., on liquidation, £2,736. Debtor said he commenced business in September, 1916, and in December, 1921, sold the business to Davies, Lazarus and Co., Ltd., which was then formed to acquire it. He was appointed managing director until the company went into compulsory liquidation last April, when his shares became valueless. The examination was concluded.

Re METROPOLITAN REVIEW, LTD.—Creditors and shareholders of the Metropolitan Review, Ltd., met and nominated a liquidator on Wednesday of last week. A statement of the company's affairs was submitted showing liabilities £36,292, and estimated assets £5,107. The official receiver reported that the company was formed in May of last year by certain of the then directors of the Pelman Institute, Ltd., for the purpose of publishing the *Metropolitan Review*.

From the London Gazette.

PARTNERSHIPS DISSOLVED.

F. Reading and A. W. Woodgate, printers and stationers, at 63a, Victoria-road, Surbiton, and 79, Clarence-street, Kingston-on-Thames, Surrey, under the style of Reading and Woodgate.—William Morrison Sever and John Sever, general printers, 40, King-street West, Manchester.

Cardboard Cartons.

An important decision concerning cardboard cartons was given recently in the King's Bench Division. At the same time it seems clear that manufacturers of these cartons will have to exercise care in regard to their size. The L.C.C. was appealing from orders of justices dismissing informations laid under Sections 25 and 29 of the Weights and Measures Act, 1878. Section 25 prohibits the use of "false and unjust" measures, and Section 29 provides that the measures used shall be "verified and stamped." The facts as stated by the magistrates were that on December 23rd, 1921, a purchaser went to a shop of the Premier Dairy Co. at Tufnell Park, and asked for half a pint cream. He said he had nothing to carry it in, and was told he could have a bottle if he would return it. He said he would have it in a carton. The attendant poured cream out of a quart vessel into the carton, and the purchaser paid 2s. being the market price of half a pint, and took it away. On examination the carton was found to contain 2 ozs. short of half a pint of cream, and it was found that if the carton had been filled to the brim there would have been six drachms short of half a pint. The defence to the prosecution was that the carton was not a measure, that it was not capable of being easily stamped, and that it was not used as a measure. The magistrates dismissed the informations, holding that the carton was not a measure, and was not used as such. The Court dismissed the two appeals. All the same there is a warning in the proceedings which the manufacturers should note.

THE more a man enjoys his work, the more he enjoys his leisure.

Notes and Comments.

THE reduced postal rates are beginning to create fresh advertising and greater use of the printed word; already the much-discussed seed house which secured a great mass of its printing from Germany has announced a new catalogue printed in England. For the moment the industrial world is without a serious dispute, and that is a condition essential to progress and recovery. Without undue optimism, there is an anticipatory spirit about, and we believe this to be a generator of orders. Stocktaking worries are over and shelves require replenishment. It is all to the good, therefore, for both the paper and print sides that the printing dispute has been substantially adjusted without a stoppage. What we want now is a good supply, and an ever increasing supply, of orders and work.

FROM July 1st the new Wiggins, Teape and Piries, Ltd., organisation operate from London headquarters, and all administrative routine will, we take it, be conducted at that end. A system of rebates comprising 4 per cent. on half-ton lots, 8 per cent. on ton orders and extra allowances for increased turnover has been framed to benefit the clientele and will operate from July 1st. All papers, whether of Wiggins, Teape or Piries make, count towards the tonnage and orders may be mixed to make the quantity. Evidently the new organisation is losing no time in getting to grips with its problems, and customers will greatly appreciate that one of the first evidences of this comes in the shape of a concession which is greatly to their benefit.

A HARDENING tendency has created a rather better demand for strawboards. The opinion is expressed that prices will continue to advance over the next few months, but this we are inclined to doubt, for there is a limit to what consumers will pay. There is also the very real possibility of English-made strawboards capturing the home market when a certain price stage is reached. As far as boxboards are concerned, it may at once be said that service such as that which is being given by the Thames Paper Co., Ltd., cannot be excelled, and there is no great need to look outside this country for boxboards or wood pulp boards. Several grades of the latter are being sampled extensively from Purfleet.

THE question raised and answered in the affirmative as to whether higher prices for paper would help trade seems to us worth a little deeper consideration. As we view it, the demand for paper becomes greater as paper becomes cheaper. The printing trade has lost a bulk of business because users have curtailed requirements and abandoned certain forms of paper usage. There would not have been the slight improvement we have experienced if the mills had not found it possible to cheapen paper prices. An artificial demand, largely speculative, develops with a hardening market; but when the apex is reached or reaction sets in there follows the inevitable slump. Then, again, foreign competition has to be seriously taken into account, and unless an advance in price was general the first effect would be to encourage foreign imports. Granted a reasonable margin of profit for makers and distributors, it appears to us that as paper becomes cheaper its consumption will increase.

THE question of paper standardisation is brought to the fore again by the recent announcement of State standardisation in Holland. Legal standards may go down all right in the Netherlands, but in England it is inconceivable that an Act of Parliament could be passed determining set standards of strength, stretch and other physical factors in

paper specifications. The ordinary obligations of commercial contract, customs and usage are well enough observed as between buyer and seller to obviate the necessity of threat and penalty. It may take a long time to obtain the small instalment of standardisation which is being pressed for by the paper users in this country, but the period of delay is being well spent in the total conversion of the opponents of standardisation. Agreement and appreciation are much better than force and standardisation; when it does come through these agencies will be workable and permanent.

ON January 1st last the new British Paper Trade Customs came into operation. They were revised and adopted by the papermakers, wholesale merchants, manufacturing stationers, envelope makers and paper bag manufacturers. Why the Master Printers' Federation were not concerned in the adoption of Customs which control the sale and manufacture of paper we do not know. Perhaps they were; but if so they should be named among the agreeing parties, which they are not. That, however, is not our point. Mainly we are concerned here with the first clause under sub-head "Machine-made Writings, Printings, etc.," which says that "A ream contains 500 sheets." That is definite enough, and is the considered verdict and decision of all the people who make and sell paper of that description. Why, then, is writing and printing paper not being made up and sold in reams of 500 sheets? With a few solitary exceptions, there has been no aim or effort to keep faith with the clause which specifies the content of a ream.

THE latest sample set from Messrs. John Dickinson and Co. is a folder demonstrating "Caldecott" covers, a range which includes the approved art tones under botanical titling. Thus we have lobelia, delphinium, lilac, gorse and, by way of an isolated departure, suede, which smacks of leather, but might easily be reduced to something very different in the agricultural vernacular. The folder is a good size, 8½ in. by 4 in., which fits the inside pocket. Printers and prospective users of "Caldecott" covers on booklets would do well to consider this size and shape for publicity productions; it is the coming fashion, and there is a psychological side to it as well as an artistic possibility.

Australian Paper Trade.

Imports.

During March, 1922, the following classes of paper were imported into the Commonwealth, the values for the corresponding month of last year in each instance being given in parenthesis:—

Cardboard and other paper board, £12,928 (£55,093); printings, £130,373 (£405,780); wrappings, £33,820 (£52,316); writing and typewriting paper, £22,480 (£88,547); other paper, £51,961 (£125,408); printed books, £63,571 (£79,634); all other stationery, £35,000 (£66,916).

During the first nine months of 1921-22 the values of the various classes of paper imported were:—

Cardboard and other paper board, £103,463 (£308,235); printings, £1,533,730 (£3,029,067); wrappings, £209,083 (£521,623); writing and typewriting paper, £247,866 (£812,819); other paper, £457,169 (£922,852); printed books, £708,195 (£863,398); all other stationery, £405,366 (£680,613).

Exports.

Paper exported from the Commonwealth during March last amounted in value to £3,824, compared with £6,432 last year, while stationery reached the value of £19,832, against £21,558. For the nine months (1921-22), paper exported stood at £38,813, against £66,148 in the corresponding period of the preceding year, and stationery £154,924, as contrasted with £166,341 the year before.

The "Anomalous" Overseer.

SIR.—The question raised in a letter to your journal, concerning the status of a printer's manager, is not by any means new, and it is upon which there remains considerable difference of opinion in the trade. The views of "H. M.," however, are so crudely and unkindly expressed, that I respectfully solicit the privilege and opportunity of a brief reply.

The P. M. and O. A. has been established nearly thirty years, and is a growing force that maintains a neutral attitude in trade disputes. We should welcome the consideration of any scheme accentuating the neutral position, our membership in Great Britain consisting of those who are attached to trade unions, and others who are not, with a fair proportion of the former. Your correspondent, "H. M.," suggests affiliation to a special section of the Federation. That would ensure superannuation and other benefits, with a mutual combined subscription by employer and manager, the amount named being 2s. 6d. each weekly. To this scheme it would be necessary to apply the test of financial stability, and to learn also the probable fate of derelict managers and overseers.

Our members are mainly promoted from the ranks of the workers, and we favour candidates for membership who are practical printers. Some of these remain overseers to the end of a working life; others often through adverse and unforeseen circumstances, fall back into the ranks. What of these? Would the Federation assist them in a practical way? A man holding a trade card would require assurance upon this point, and perhaps "H. M." can enlighten us. Elucidation would be welcome indeed.

But to the majority of managers and overseers the tone of your correspondent's letter will surely be repellent. There is too great an insistence upon the "master's man" and the description of an overseer as an "administrative unit"—possibly a poor relation of the "mighty atom"—is an equally offensive term. All those who work together fairly and honestly, are master's men in a general sense. The technical knowledge, organising ability and personality of an overseer are the things that really matter, and these are easily recognised and duly appreciated both by his employer and the men he controls. The statement that union membership indicates unfaithful service in an overseer is ungenerous, and nearly akin to a libel upon several members holding important positions in the trade, and upon their behalf I would entirely repudiate an unkind suggestion that should never have emanated from a fair-minded person.

I am, Sir,

Yours, etc.,

E. H. BERRYMAN,

Editor, *The Managing Printer.*

Malden, Surrey.

June 29th, 1922.

Postal Handicap to Business.

SIR.—The majority of orders, invoices, receipts, statements of account, etc., which are posted of necessity by business houses at the end of the day's work in halfpenny envelopes are held over by the Postal authorities for delivery in the afternoon of the following day.

Two alternatives are provided, either the communications at the halfpenny rate should be posted by 3.30 p.m., or a late fee stamp of halfpenny should be added after the hour named.

Few business houses close so early as this, and the imposition of this regulation proves that the responsible officials are entirely divorced from all knowledge of, interest in, and sympathy with commercial requirements.

Yours, etc.,

THE WINTERBOTTOM BOOK CLOTH CO., LTD.
 Geo. Bell, London manager.

THE general manager of a Hobart firm of merchants, exporters and importers is at present in England with the object of obtaining the representation of United Kingdom manufacturers, particularly makers of brown and printing papers and printing ink. (Reference No. 412/20/7/3031, High Commissioner of Australia, Australia House, Strand, London).

Printing Sports Association.

Annual Meeting of the Football Section.

A successful gathering of the Football Section of the Printing and Allied Trades Charity Sports' Association was held on Friday at the Cannon-street Hotel, Mr. W. R. Masters (the retiring president) being in the chair. A good attendance included Mr. C. R. Roud and Mr. W. Gordon Brew. The minutes of the previous annual meeting were read and confirmed, and the balance sheet, presented by the treasurer (Mr. A. Oddy) showed a balance of £25.

Mr. J. Gomer Berry, who had written to express his regret at being unable to be present, was elected president, Mr. V. Bowman chairman, Mr. G. H. Marks secretary, Mr. S. G. Eastman referee and hon. secretary, Mr. H. Walker minute and registration hon. secretary, and Mr. G. W. Milson results hon. secretary.

The rules were amended and the subscription rates increased.

On the motion of Mr. H. Ranger, seconded by Mr. H. F. Parker, a cordial vote of thanks was passed to Mr. Masters for the manner in which he had carried out the duties of president during the year.

Mr. Parker, in the course of his speech, said he was looking forward to a bumper success on the occasion of the annual sports day at Stamford Bridge on the 15th inst., as a result of which they hoped to establish a pension in the name of Mrs. Masters.

Mr. Masters, in reply, acknowledged the splendid support he had received generally, and mentioned the *esprit de corps* which existed both among employers and employed in the printing and allied industry. He looked to the future of the Section of the Association with optimism.

The whole meeting was full of encouragement for those who are at the back of the movement, and it was stated that more clubs were entering for next season's matches. The entries will enable the Section to run a league as well as a cup competition.

Market Prices of Paper.

The prices given below are based on current quotations for mill lots of not less than 3 cwt. All prices are strictly nett, one month's credit. For merchant's supplies and small lots extra allowance must be made.

Wiggins, Teape & Co. (1919) Ltd.

The directors in their third annual report regret that the results for 1921 are so meagre, but are glad to report a balance on the right side. The trade depression previously referred to became more acute as the year went on and in consequence the great fall in prices became accentuated. This affected not only the value of the stocks which the company held, but of certain raw materials which were contracted for delivery in 1921. A claim has been preferred under the Finance Act, 1921, in respect of the fall in stock values. The re-valuation of the stocks on hand at 31st Dec., 1920, on the basis of prices current at 31st August, 1921, for this purpose, showed a fall of £108,285.

The new photographic base paper mill was not completed until late in 1921, and it was not until early this year that production began on a commercial scale.

In spite of the trade depression, however, the number of orders received and the customers on the books have increased.

After providing for depreciation and directors remuneration, but subject to taxation, the balance of profits for the year is £31,207, to which is added the balance brought forward of £46,506, making a total of £77,713. From this has to be deducted interest on first mortgage debentures at 8 per cent. per annum and proportions of discount and premium for 1921, £27,788; and the dividend at the rate of 7 per cent. on cumulative preference shares to June 30th, £24,500, which leaves an available balance of £25,425. The 7 per cent. dividend on the cumulative preference shares absorbed £24,500, leaving a balance of £925 to be carried forward to 1922. It has not been deemed necessary to provide any sum for taxation as reserves are considered ample, and the directors anticipate, when the figures

have been settled with the Inland Revenue, that there will be a substantial surplus to be added to the amount carried forward.

The directors mention that they have acquired a controlling interest in Alex. Pirie and Sons, Ltd., and that Mr. F. D. Pirie and Commander W. B. Pirie, who were recently appointed additional directors, retire, but offer themselves for re-election.

Printing Crafts Guild.

The party on the 24th ultimo numbered sixty-two, and they journeyed in two motor coaches to the historic Lancashire hamlet of Whalley, being met at the Old Church by the Rector (Rev. John E. W. Wallis, M.A.), who discoursed on the ancient fabric, the chained books and other things of interest to the printingcrafts. The rev. gentleman specially pointed out the central pipe of the organ, it having been gilded more than 200 years ago. Its lustre was only a shade duller than the other pipes which had been re-gilded during recent years. Amongst those present who have dealings with bronze work, there arose the question: How long would the present-day gold retain a lustre equal to that of the central pipe?

The rector had prepared a short paper on "Inscriptions and their origin," but owing to the unpropitious weather it was decided that the rest of the programme be cancelled, and all return home one hour after tea. The home-coming of thirty miles through a persistent downpour of rain and hail, did not damp the spirits of the party, as they lightly passed the time with a continual flow of music.

By doing that which lies before you, you will have learned to do other duties also.

GERMAN book prices have recently shown big increases, this being due largely to increased cost of production. A Stuttgart publisher is reported as stating that since the beginning of the year net costs have gone up in such proportions as would not have been believed possible in January; to mention paper—what was worth 6 marks last fall is now worth 24 marks. A simple half-cloth binding has gone from 2 marks to 10 marks, 70; printing has increased tenfold; to-day one pays for a 16-page octavo signature, on a printing of 5,000, 677 marks instead of 27 marks, which was the pre-war price.

BECAUSE of prohibitive duties, paper bags cannot be profitably imported into Brazil says a U.S. Commerce report.

Paper Trade Golfing Society.

Successful First Annual Dinner.

The recently-formed Paper Trade Golfing Society had a good send off on Tuesday week, when the first annual dinner was held at the Connaught Rooms under the presidency of Mr. A. Dykes Spicer, the captain, whose original suggestion gave birth to the organisation. Over one hundred gentlemen sat down to dinner, representative of every section of the trades associated with the paper industry. Among those who supported the chairman at the top table were: Lord Riddell, Sir T. Vansittart Bowater, Bart., Sir Herbert Morgan, Sir Frederick Bowater, K.B.E., and Messrs. A. Baker, A. F. Blades, F. M. Carson, A. C. Cooke, Jas. W. Cooke, Bernard Darwin, F. W. Dobson, Henry Godfrey, Douglas Spicer and J. Wolstenholme.

Of a purely social character, the gathering enabled members and friends to meet one another under genial conditions, the reception which preceded the dinner affording ample opportunities for conversation. The dinner itself was a thoroughly enjoyable function, the speeches were appropriate to the occasion, and an agreeable musical programme filled up the intervals pleasantly.

Lord Riddell's Prognosis.

Following the toast of "The King," Lord Riddell gave the right tone to the speeches with one of his characteristic after-dinner utterances. He esteemed it a great honour to be allowed to propose the toast of "The Paper Trade Golfing Society" on the first occasion in its history. As a golfer, in which capacity he was speaking, he was delighted that the Society had been formed. As a newspaper proprietor, however, he regarded it with apprehension—(laughter)—though it would lead to co-operation and mutual good-will among the people engaged in the trade. Proceeding to make what the doctors called a prognosis, his lordship could quite see that under the auspices of the Society many matches would be played, with the result that not only would they give victory to one of the players, but would lead to a combination with a view to the destruction of the unfortunate newspaper proprietor. (Loud laughter.) Lord Riddell was not sure that he had put the matter as he would wish it to be put, and he told an excellent story to illustrate the pitfalls of impromptu oratory.

If he might say so, his lordship added more seriously, one of the pleasant features of modern commercial life were the golf societies which had sprung up so rapidly during the last few years and which performed most valuable functions. One met people at close quarters of whom they had only heard and of whom one had formed the worst possible opinions because one had not the pleasure of knowing them. (Hear, hear and laughter.)

Mr. Frank Lloyd.

Lord Riddell, expressing great regret that his dear friend, Mr. Frank Lloyd, was not present that evening, said as a news-print manufacturer, as a newspaper proprietor, or as a man, Mr. Frank Lloyd was hard to beat. He had presented the Society with a handsome challenge cup which was to be played for on the following day, and they were all obliged to Mr. Lloyd for his generosity.

Mr. Dykes Spicer, with whose name the toast was associated, thanked Lord Riddell for the encouragement he had given them. He associated himself with the regret expressed at the absence of Mr. Frank Lloyd, adding that they were extremely grateful to that gentleman for the gift of a cup. They hoped the Society would grow and become a means of linking closer together the various sections of the British paper trade.

The Interest in Golf.

Mr. Henry Godfrey, proposing the toast of "The Visitors," paid a tribute to the newspaper and the journalist for their part in developing the interest in golf. The Paper Trade Golfing Society would, he added, enable them not only to meet one another, but to "play the game" of business in a proper manner. (Hear, hear.)

Mr. Bernard Darwin, the well-known writer on golf, responded in an excellent vein of humour which pleased the company.

Sir Herbert Morgan was also in happy mood. Challenging some of Lord Riddell's facetious observations, he declared that all the papermakers hoped and prayed for was that Lord Riddell's circulation might be increased to more millions. He (the speaker) could not imagine any more valuable asset than paper, which had to be sold; and he was certain that the Paper Trade Golfing Society had been formed with some very definite idea of assisting in the circulation and distribution of paper.

Sir T. Vansittart Bowater, Bart., added to the toast list the "Health of the Chairman." He remarked that they had all appreciated the excellent way in which Mr. Dykes Spicer had conducted himself in the chair, and they were proud to have him as the captain of the club. (Applause.)

More Cup Competitions.

Mr. Dykes Spicer, in reply, announced that Lord Riddell had been kind enough to promise a cup, to be won outright in a knock-out competition during the year. Mr. G. R. Hall Caine, who was present, had promised another cup for a foursome competition, which would be subsequently arranged. The Chairman added that the Society hoped to play a series of team matches with other clubs, and they desired to get as many people as possible to take part in them.

During the evening the following entertained the company: Miss Helen Maris (mezzo-contralto), Mr. Ernest Bertram (baritone), Mr. Morland Hay (entertainer at the piano), and Mr. Bret Hayden (humorist).

First Meeting at Addington.

After holding their first general meeting and dinner at the Connaught Rooms on Tuesday last, the Paper Trade Golfing Society held their first golf meeting on Addington Course on Wednesday.

In the morning a Medal Round was played for the President's Cup—a very handsome silver challenge cup presented by the President, Mr. Frank Lloyd.

The best cards returned were as follows:—A. Dykes Spicer, 78 net; G. W. Shilcock, 78 net; Capt. C. R. Mullings, 80 net; P. B. Burn, 81 net; F. A. Skerratt, 81 net; E. Lewis Winn, 84 net; Major F. H. Bowater, 84 net; E. H. Raynham, 84 net; Brig.-Gen. T. M. S. Pitt, 85 net; W. Howard, 85 net; W. J. Whyte, 85 net; E. C. Lait, 85 net.

As Mr. Dykes Spicer and Mr. G. W. Shilcock tied for first place, arrangements have been made for them to play off a final round to decide who shall hold the Cup for the first year.

In the afternoon, 40 members took out cards in a Foursomes Competition against bogey, Mr. J. W. Cooke and Mr. P. B. Burn carrying off the honours for the North. Mr. A. Dykes Spicer and Mr. E. H. Raynham; Mr. G. Buchanan and Mr. F. A. Skerratt; and Mr. W. A. Houstoun and Mr. K. J. Chapman, tied for second place.

Everyone was glad that Mr. Frank Lloyd, the President, was able to be present, and amongst others who took an interest in the play were Mr. F. M. Carson and Mr. A. E. Bishop.

A very enjoyable day was spent by all concerned, and it was hoped that another golf meeting would be arranged at not too distant a date.

"PROCESS ENGRAVING: FORMULAS, EQUIPMENT AND METHODS OF WORKING," by Edward S. Pilsworth. The Macmillan Co. Price. 9s. net.

The number of handbooks to the process engraving section of the trade is not very extensive, and any practical addition to the literature dealing with photo-mechanical production, is welcome. The volume before us is from an American source, its author being Mr. Edward S. Pilsworth, a gentleman who has an extensive knowledge of the working of the various departments of a modern process house, and who has a facility for putting his teachings on paper in such a manner as to render them easily understandable by the average student. The book begins with an introduction briefly summarising the development of illustration from the original form of woodcut used in the days before the invention of movable types to the period when photography was utilised to produce clichés on metal and so inaugurated a new industry that completely revolutionised the whole art of illustration. The equipment of the modern process house is then dealt with in its various sections, commencing with the photographic department, and describing the cameras, lenses, prisms and other appliances necessary, with instructions for their use in the production of the process negative, and many useful hints are given that will be of great aid to the operator in this stage of making the reproduction. The advice as to the lighting of the "copy" and the use of the various line screens is most instructive, while the manipulations necessary in the dark room are described very fully, and the most up-to-date formulæ given. Considerable space is devoted to this section which is an extremely important one in the production of the finished block, and every aid is given to enable the operator to produce a perfect negative. Stripping, printing and etching are then described, and the necessary tools and appliances illustrated, the etching operations being well detailed, and useful formulæ stated for the various solutions. The routing and blocking equipment next comes in for description, and the modern machines and appliances that are used in this department of the art are dealt with. Some special instructions in selecting suitable mounting wood will be found of service, and the hints on shooting and trimming, and the use of the jig saw will aid in the production of perfectly mounted plates. The book deals with line and half-tone work, and the differences in detail between the two processes, and gives examples of finished illustrations by different methods, including combined line and half-tone blocks, and "high light half-tone." Mr. Pilsworth has given the trade a good handbook, and a useful addition to the process engravers' technical library, which, since before the War has had but little enlargement. It should be welcomed as giving both a history of the engraver's art and a thorough review of the processes employed to-day in the production of photo-mechanical illustrations. General readers will be interested in Mr. Pilsworth's original estimate of such masters of the art of illustration as Durer, and the practical printer or professional engraver will find of much value, as a source of reference, his thorough and accurate descriptions of modern methods as practised in the up-to-date engraving shop, whilst the lavish use of illustrations aids in the elucidation of the text.

New Inventions.

Photo-Lithographic Printing.

An invention patented by Mr. H. R. Eason relates to photographic printing apparatus for use *inter alia* in multiple printing on lithographic stones, of the type in which a movable carriage bears an auxiliary carriage which may be moved into any position opposite the sensitive surface to press the surface and the negative into contact, depending legs are supported from the auxiliary carriage which are adapted to be lowered to exert the pressure on the negative. The apparatus shown comprises a bench *a* with a slate bed *b* for the sensitized surface. A carriage *d* is mounted on rollers running on rails at the edges of the bed, and carries an auxiliary carriage *f* mounted on rollers supported on rails *e*, the two carriages moving in directions transverse to one another. The carriage *f*

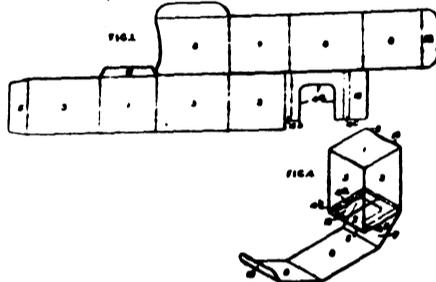

carries a separable spring connected housing *k*, which contains an inflatable vessel *l* and carries the legs *m*, which are first brought into contact with a cover glass over the negative by adjusting a screwed rod *h*, the pressure being then applied by inflating the vessel *l*. Fig. 6 shows a registering frame *q* which rests on the sensitized surface and is divided into compartments to contain the negatives by means of adjustable bars *q'* fitting into slots. Printing lamps *o* are mounted on the carriage *f*.

Folding Cardboard Boxes.

A folding or collapsible box for inverted gas mantles, as patented by Messrs. F. Hale and F. Walters, is made from a blank cut and scored as shown in Fig. 1, the box body 1, 2, 3 when joined up by the flap 5 forming a collapsible parallelogram containing the internal shelf 4 which is formed from an integral portion of the blank folded over inwards and secured by a flap 13 to the bottom 2 of the box before the body is joined up. The shelf is carried spaced from the bottom 2 by intermediate hinged members 4', 4' which are acted upon by the adjacent sides 3 of the body to fold and erect the shelf when the body is collapsed and

erected respectively. The box is closed by the parts 6-10, being wrapped around it and secured by the lip 10 inserted into the slit 14 between the back 6 and the lip 11 on the top 1. In a modification, the parts closing the

front are formed as an extension to one of the sides and flaps on the top and bottom prevent the back and front from being pressed into the interior.

Impregnating Paper and Board.

Improvements in or relating to the treatment of paper, cardboard and the like materials are the subject of an invention, for which a British patent has been granted, by Exportingieure fur Papier-und Zellstofftechnik G.m.b.H. The inventors have in mind the treatment of material used for rain-coats, cloaks, etc. It has been found that in sizing paper, new results are obtained, and particularly the strength of the paper when wet is increased considerably if it is allowed to remain in the sizing bath until it has absorbed the impregnating material to fill it completely and if the atmosphere of the bath is maintained at about 40 degs. C. According to this invention, the material treated is allowed to remain in the impregnating bath (animal size, gelatine, casein, varnishes and the like) until it has absorbed as much as it can hold, preferably, until it has assumed a dark shade.

Care has to be taken that the matter is uniformly wetted with the impregnating material, and, when treated in webs, these are reeled up in the impregnating bath, reeling being done in the size with supporting felt, parchment paper, wax cloth or the like to protect the material from strains. The material may be hardened by leading it directly into the hardening bath, after removing the surplus impregnating material, or the hardening material may be completed by painting, spraying, brushing, blowing or similarly and subsequently shaking, boiling or rolling so as to allow the hardening medium time to take effect.

ONE case of lead poisoning in the printing industry was reported in May, but no fatal accident was recorded in the paper, printing, etc., group of trades.

DIRECTORY.

The

TERNO Three Roller Improved Stop-Cylinder **PRESS**

CAN BE SEEN RUNNING IN LONDON BY APPOINTMENT.

Delivery ex Stock at Prices not Exceeding those Asked for Similar Second-Hand Machines.

Exceptionally strong construction, excellence of design and workmanship, adequacy of inking, coupled with speed and lightness of running make the "TERNO" equally suitable for running at high speed as for printing of the closest registering colour work at normal speed. Its many distinct mechanical advantages made it deservedly popular throughout the world. It is built in 7 sizes. The practical speed of the Double Crown Machine is 2,700 per hour.

Full Particulars from the Sole Agents for the British Isles:

WILLIAM J. LIGHT & CO., Ltd., 127, Fenchurch Street, London, E.C.3.

Tel. No.: 565 AVENUE.

Wire Stitching Machines for every purpose.

Thread Stitching and Knotting Machines for School Exercise Books and Calendar Work.

Thread Book Sewing Machines for Sewing Light Letterpress and Heavy Account Books.

Glueing Machines, End Sheet Pasting Machines and Folding Machines (Hand or Automatic Feed).

No. 33 Thread Book Sewing Machine.

THIS Machine is intended for sewing the heaviest Account Books, Letter Copying Books, Guard Books, etc., and is made in two sizes, one to take books up to 22 in., and the other up to 28 in. in length. According to size, one to six books may be sewn at one time and cut asunder afterwards, each separate book having kettle stitches at its ends and also between the tapes. Speed of Machine, according to size of work, is up to 35 Sections per minute.

For further particulars write or call at my Showrooms :

Paper Knowledge for Printers.

Some Important Answers to Questions Set at Commercial Paper Examination.

Considerable interest has been shown by the London printing and paper trade in the paper classes held at the Battersea Polytechnic and particularly in the questions set for the commercial paper examination. The following answers to the questions will no doubt be found useful by our readers:—

1. Size of double demy?
22½ in. by 35 in.
2. Size of oblong double medium?
18 in. by 46 in.
3. By what name is 16½ in. by 26½ in. known commercially?
Double foolscap.
4. By what name is 25 in. by 40 in. known commercially?
Double royal.
5. What is official post card size?
5½ in. by 3½ in.
6. What do you understand by H.P.?
Hot pressed finish of cartridges.
7. What do you understand by H.C.?
Held covered—insurance.
8. What do you understand by E. and O.E.?
Errors and omissions excepted.
9. What do you understand by M.G.?
Machine glazed.
10. What do you understand by C.I.F. or C.i.f.?
Costs, insurance and freight.
11. What do you understand by *sans recours*?
Without responsibility.
12. What do you understand by *petite vitesse*?
Slow goods train.
13. What do you understand by General Average?
General damage—insurance.
14. What do you understand by "bulk" as applied to paper?
Volume of air space in paper produced by the furnish of fibres, etc., and special treatment in manufacture.
15. What do you understand by "beating"?
The process of cutting, fraying and hydrating of the fibres in the "beaters" to produce properties of bulk, strength, pliability, finish, etc., to the sheet.
16. Give the two most usual sizes for stock strawboards.
25 in. by 30 in., 22 in. by 33 in.
17. Give the two most usual sizes for stock T.S. Cream Laid Banks.
18 in. by 23 in., 16½ in. by 21 in.
18. Give the two most usual sizes for stock loose-leaf ledgers.
Generally special sizes.
19. What properties and characteristics should music roll paper possess?
Smooth, strong, close texture, well-sized, non-stretch, capable of having holes punched out with a clean edge.
20. What properties and characteristics should offset litho paper possess?
Hard-sized, smooth, "eggshell" finish, good white, not too thin, non-stretch, non-fluffing, free from grit.
21. What stipulation would you make when ordering strawboards if regularity was required?
Make on Fourdrinier machine.
22. What commercial tests would you apply to ascertain whether a paper was "hand made"?
(a) Indent of watermark on underside of sheet.
(b) Caliper thicker at edges.
(c) T.S. harder at edges.
(d) "Hills and dales" when looking down sheet rolled up, which are not apparent when writing with the pen.
(e) Deckle edge on all four sides of complete sheet.
(f) Equal strength in both directions.
(g) Azures usually coloured with "Smalts" blue, which shows up in minute specks when treated with drop of machine oil.
(h) Mould wire if visible in watermark is square. Machine wires usually diamond shaped.
(i) If gelatine sizing scraped with knife and ink applied with pen interior of sheet somewhat waterleaf.
(j) If folded and creased hard with thumb nail several times and opened out, the crease will not obstruct the pen.
(k) "Handle" and peculiar flexibility.
- (f) Tendency to curl when suddenly exposed to damp atmosphere.
23. What commercial tests would you apply to ascertain whether a paper was "tubsized"?
(a) Machine oil penetrates slowly.
(b) "Sticky" to tongue.
(c) Scratch with knife—softer sized interior.
(d) Erasing qualities with rubber.
(e) Smell.
24. What commercial tests would you apply to ascertain whether a paper was cylinder mould made?
(a) Distinct machine direction of fibre.
(b) Two deckle edges in machine direction and dark mechanical line just inside the feather edge.
(c) Some similarity to hand-made but usually cloudy in "look through."
25. What commercial tests would you apply to ascertain whether a paper was suitable for map printing?
Test for stretch, sizing, strength; nature of furnish; even smooth finish, colour and cleanliness; resistance to varnish and gum.
26. What commercial tests would you apply to ascertain whether a paper was grease-proof wrapping?
Cigarette or lighted match test for "bubbling"; resistance to turpentine and grease; chewing test.
27. Discuss "stretch" in paper briefly and give two examples where a high degree of stretch is necessary.
Degree of stretch is not only dependent on the fibres used, but on their manipulation in the beaters and on the paper machine. Looseness of texture due to short beating, and over-hydration by long treatment, give high percentages of stretch, the former from lack of consolidation, and the latter on account of the gelatinising of the fibres, which facilitates the absorption of moisture. As fibres swell 10 to 15 times more in width than in length unequal strains are set up, which bring about "fibre movement" in paper; this is accentuated in machine made paper where the fibres to a large extent lie parallel. The "cross" direction having the lesser strength gives the greater stretch. Stretch may be temporary or permanent. Although stretch is a fault in printing papers a high degree of stretch is advantageous in wrappings, cable papers, etc.
28. Why should tinted linen strawboards discolour and what precautions would you take to avoid discoloration?
The linings of strawboards frequently discolour owing to the presence of lime in the strawboards from the boiling process. The

The Miehle

TRADE
MARK

EQUIPPED WITH FACE-UP PILE DELIVERY.

This delivery enables the printed sheets to be delivered directly on to a board ready for removal in bulk by truck without disturbing them. The piling of the sheets in this way gives the printed matter ample time to dry, and not only dispenses with the usual labour required to move the sheets from a delivery board every half-hour or so, but safeguards the work against spoilage through smudging of ink, etc.

 Impression!*

An unrivalled experience and technical knowledge enable Lorilleux & Bolton, Ltd., to produce Printing Inks of the first quality for the latest processes and with the greatest range of tints, colours, consistencies and drying properties.

Lorilleux & Bolton, Ltd., have an intimate knowledge of the requirements of printers, and make a feature of producing inks for special purposes, and they will be pleased to answer any enquiries and give expert advice if desired.

LORILLEUX & BOLTON TD

31-34, CURSITOR STREET,

addition of alum to the paste used will assist in avoiding discoloration.

29. How would you judge the following papers for quality?

(a) Azure laid E.S. writing.—By the evenness of look-through and colour of both sides, hard-sizing, erasing quality, strength and durability as shown by folding tests.

(b) Art paper for trichromatic printing.—Good clean even surface, stretch, colour (whether baryta coated) esparto body, moistened thumb test for "lifting" silver test for degree of coating.

(c) Cutlery tissue.—Acid test, colour, strength and furnish (freedom from mechanical wood).

(d) Antique book.—"Handle," whether pure esparto or otherwise, bulk, non-fluff, folding test for cohesion and durability, finish and colour.

30. Describe the difference between an "imitation art" and a super-calendered printing.

(a) Imitation art.—Large percentage of clay (about 28 per cent. to 38 per cent.) furnished in beaters to enable water which is sprayed into the web to be instantly absorbed before it passes the steam heated chilled iron-roll calenders (usually three stacks) at the end of the paper machine. Without the clay the paper would be blackened. The bulk is low and the esparto furnish frequently shows black shiny specks in the surface which are transparent in the "look-through" due to fibre bundles not cleared. The "water finish" is characteristic.

(b) Super-calendered Printing.—Somewhat better bulk than imitation art on account of less mineral loading (about 16 per cent. to 24 per cent.). It is machine-finished on the paper machine and afterwards damped, allowed to lie until the moisture has evenly permeated through the sheet and finally glazed on super-calenders, the rolls being alternately steam heated, chilled iron rolls and cotton or paper rolls of larger diameter. It is somewhat stronger in tear and has a somewhat crushed look through, and the absorption properties are less than imitation art.

31. What is the cause of "curling"?

Curling may arise from over-hydration, uneven length, faulty wet pressing, and sometimes small diameter press rolls; hard stock, which takes the curl of the reel, specially near the mandrel, and over-drying may also be the source. If a piece of the paper is damped on one side and has a predilection to curl, it will roll up with the axis in the cross direction overcoming the natural inclination to roll up in the machine direction.

32. What is the cause of "cockling"?

Cockling is usually due to over-hydration of hard stock, irregular length of fibre, cloudy texture, unequal wet pressing (dirty felts) slack or worn dry felts, irregular tensions and too hot cylinders. Maturing under controlled humidity conditions will to some extent minimise the fault.

33. Say briefly what you know of the process of lithography.

Lithography, introduced by Senefelder, is a planographic process of printing from a smooth, absorbent stone, the device being drawn or transferred from engraved plates with a grease preparation which has an affinity for the coloured inks which are made with a similar grease base. The stone when damped resists these stiff inks so that only the impression of the design is imparted to the paper when passed under the impression cylinder of the machine. The suction as the paper leaves the stone together with the moisture fed into the stone necessitates the use of a hard-sized non-stretch well consolidated sheet, particularly where 8 to 14 and more colours are used, as each colour has to be printed separately. This piling up of the pigment colours gives brilliancy procurable by no other process. Recent innovations have introduced zinc and aluminium plates to replace the stone which require still harder

sized papers to resist the increased moisture on the plates. A further improvement of lithography is the rubber offset process. In this case the design from the plate (which is fixed to a roll) is transferred by a rubber roll to the paper. This gives a fine definition not possible from stone direct, and as only a thin film of ink can be carried the delicacy of the tones is enhanced. The lithography, when examined under a glass, shows an irregular "bleeding" edge quite distinct from the lined edge of letterpress, but offset work shows a more regular edge.

34. Give the rule for the binding of books as regards fibre direction and explain reasons for same.

Fibre movement is important in book-binding and the fibre should lie parallel to binding, viz.:

(a) To enable the lines of type on both sides of sheet to be superposed in register—particularly in thin papers.

(b) To enable the leaves to open flat.

(c) To prevent the expansion of fibres when glueing in the case, throwing creases across the leaves.

(d) To obviate diagonal creases forming from the stitches (where the book is subjected to varying humidity conditions) as is the case when fibre runs parallel to type. For loose leaf and similar books the rule is reversed as the strength is required for throwing over the leaves. They require creasing or thinning close to the binding to enable them to lie flat.

35. A 320-page book is required to bulk $1\frac{1}{2}$ in. How many thousandths of an inch will a sheet register on the micrometer?

$$320 \text{ pages bulk } 1\frac{1}{2} \text{ in. or } \frac{1500 \text{ in.}}{1000}$$

$$320 = 160 \text{ sheets.}$$

$$1500 \div 160 = \frac{93 \text{ in.}}{1000} \text{ thickness of one sheet.}$$

36. A printer has an inquiry for 10,000 catalogues of 160 pages, demy 4to, for which he has 125 screen blocks for the inside and three colour blocks of 150 screen for the cover. Estimate suitable stocks, pricing the paper, and use suitable substances. Show calculations.

(a) 125 screen blocks, use imitation art.

(b) 150 screen three-colour blocks, use heavy white art.

(a) 160 pages = 80 leaves demy 4to = 20 sheets demy per book. 20 sheets \times 10,000 copies = 200,000 sheets \div 500 sheets per ream = 400 reams demy 30 lbs., 516's, at 3 $\frac{1}{2}$ d. per lb.

(b) 10,000 covers $\frac{1}{2}$ sheet demy = 5,000 sheets = 10 reams demy 36 lb., 516 sheets, at 6d. per lb.

37. Which way should a paper be fed into a printing machine, and why?

Paper should be fed into the printing machines the "cross" way of the sheet, i.e., with fibre running parallel to the rolls. Although the stretch is greater in the cross direction it is uniformly parallel. If fed the machine way the stretch takes a diagonal course to the back corners, which makes the register of further colours inaccurate. Thin papers with no lateral resistance will show creases in the middle of the back of the sheet.

38-41. By what process are samples A, B, C, D printed? Give reasons.

Sample A.—Collotype postcard; no screen; lack of definition in solids and general flatness. Printed on hard eggshell finished board. Examination with aid of magnifying glass.

Sample B.—Three-colour letterpress—distinct three-colour screens, red, blue and yellow on coated art. Solids show clear outline of ink squeezed to edge of type.

Sample C.—Rotary machine gravure; square screen on plate paper; rich solids of varying depth; definition less distinct than letterpress, but greater stereoscopic effect.

Sample D.—Offset litho; very fine definition of letter heading from engraved plate, showing "bleeding" edges and lack of depth in solids. Printed on hard T.S. bank paper.

The late Sir Leslie Ward, the famous caricaturist known as "Spy" left £397.

THE NATIONAL Association of Wholesale Stationers AND PAPER MERCHANTS.

National Cup Golf Competition.

As previously announced, the competition for the National Cup, kindly presented by Mr. J. W. Cooke (past president, 1921-22) is being played off by district sections, and the selection of a finalist in the southern section to meet the finalist in the north was decided by a medal round which took place at Addington on June 28th, Mr. A. Dykes Spicer being successful with a net score of 78.

The northern members are holding their eliminating competition in the near future, and the date of the final match between the north and the south will be announced shortly. It is hoped to be able to arrange for this to be played off on a neutral course in the north.

Paper Trade Golfing Society.

First General Meeting.

The first general meeting of the Paper Trade Golfing Society was held on Tuesday June 27th at the Connaught Rooms, preceding the dinner in the evening (reported in our last issue).

Mr. A. Dykes Spicer (Spicers, Ltd.), was in the chair, and those also present were:—Messrs. E. H. Raynham (Edward Lloyd, Ltd.), W. C. Powers (W. C. Powers), Charles R. Craig and J. Macnaughton (Robt. Craig and Sons, Ltd.), E. Charles Lait (O. Reich and Co.), J. L. White (A. M. Peebles and Son, Ltd.), Percy H. Jones (P. Jones—Twinlock, Ltd.), Reginald Hubble (B. J. Hall and Co., Ltd.), R. S. Mason (Saunders, Mason and Co.), T. T. Mackenzie (Thos. Owen and Co.), S. A. Harding (S. C. and P. Harding, Ltd.), F. W. Vickery (Vickers (1920), Ltd.), Capt. C. R. Mullings (Chas. Venables and Co., Ltd.), and K. G. Harvey Greenham (hon. secretary). A telegram was received from Mr. P. B. Burn regretting his inability to be present.

Mr. Dykes Spicer, in opening the meeting, said that the society had been formed with a view to bringing closer together the various sections of the British paper trade. With this end in view, about 700 firms (including papermakers, wholesale stationers, pulp merchants, manufacturing wholesale stationers and agents), had been circularised on no less than two occasions, and it was very satisfactory to be able to report that already 153 members had been enrolled, and he much hoped that the membership would be very considerably increased.

On the proposition of Mr. J. Macnaughton, seconded by Mr. W. C. Powers, it was unanimously resolved, "That the rules as submitted by the Formation Committee be approved."

The appointment of the office bearers, whose names were given in our last issue, was confirmed.

On the proposition of Mr. A. Dykes Spicer, seconded by Mr. E. H. Raynham, the following members were unanimously elected members of the committee, in accordance with Rule 3:—Major Frank H. Bowater, and Messrs. G. Buchanan, P. B. Burn, H. Goldstraw, B. J. Hall, S. A. Harding, E. C. Lait, T. A. Colclough Leete, C. Lennox Richmond, and Harrison Savory.

Five of these members will retire at the end of the present year, but they will be eligible for re-election. So that in the future, in accordance with Rule 5, since the members of the committee are elected for two years' service, five members, who will, however, be eligible for re-election, will retire at the end of each year, leaving five vacancies on the committee to be filled at each general meeting.

The Chairman said it was hoped to arrange one week-end, one mid-week, and one Saturday meeting in each year, and also matches against various societies; and it was hoped that from time to time some of these meetings could be arranged to take place in the North, or even possibly in Scotland.

On the proposition of Mr. Macnaughton, seconded by Mr. W. C. Powers, a hearty vote of thanks to the chairman was carried with acclamation.

"GOOD NEWS"
 FOR ENVELOPE MANUFACTURERS.

Just think for a moment— On the first day of the cheap post there was an increase in volume of letters of over 70%!!!

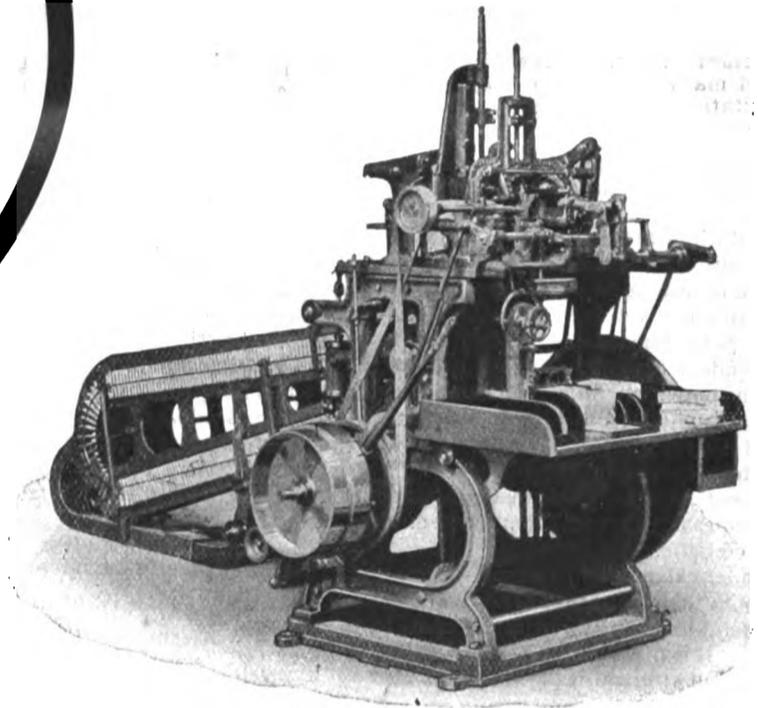

Somebody must supply that increased demand Let that somebody be YOU.

The matter is too important to shelve. Go into it NOW and send us your enquiries.

Trade Notes.

THE next meeting of the Joint Industrial Council for the printing industry will be held on the 19th inst. The meeting will be of special interest since the annual report will be presented and the officers for the ensuing year will be elected.

THE Council of the Federation of Master Printers is being convened for July 18th when many important questions will come forward for consideration, including the following legislation: Amendment of the Workmen's Compensation Act, the Merchandise Marks Act, and the subject of railway rates. The restrictions imposed upon the posting of printed matter and the need for continuing the agitation to secure a reduction for packages above 1 oz. will also come before the Council.

MEMBERS of the P. M. and O. A. on Tuesday evening visited the premises of the Lanston Monotype Corporation in Fetter-lane, E.C., and witnessed a demonstration of the Miller Craftsman Unit, the latest printing machine on the market. Tea and discussion followed at headquarters—the "Old Bell."

THE Direct Photo-Engraving Co. have an established reputation for the excellence of their productions. An interesting example is seen on a desk blotter and calendar which they have issued for the month of July. The blotter is decorated with an attractive photograph of Mme. Pavlova in two colours, black and orange, and is an excellent specimen of the work which the Direct Photo-Engraving Co. turn out.

THE *Eastleigh Weekly News* for July 7th, contains an interesting account of the installation of the Lanston monotype, which is to be used in the production of the paper. The installation was marked with fitting ceremony, to which the proprietors of the paper invited a large company representative of the religious, professional and commercial life of Eastleigh. A demonstration of the capabilities of the machine was made by representatives of the Lanston Monotype Co. in London, and appreciation was expressed of the clever mechanical devices possessed by the machine.

COVENTRY Master Printers' Association have presented a crown "Albion" press to the local Municipal School of Art for use in the printing classes. The machine has been accepted with great appreciation, as the only other in the School is a folio platen.

THE Divisional Court last week granted an application made *ex parte* by Mr. J. David Casswell for a *rule nisi* for attachment for contempt of Court against the Boswell Printing and Publishing Co., Ltd., of 2, Whitefriars-street, London, E.C., and General Prescott Decie. The application arose out of a comment in *The Patriot* on the murder of Sir Henry Wilson. The Court granted the rule, making it returnable for July 17th next.

THE National Society of Electrotypers and Stereotypers, on Saturday last, dedicated a war memorial bed in the Caxton Home, Limsfield, to the memory of their members who fell in the war. At the call of their president (Mr. H. McEntee), the general secretary (Mr. C. W. Warren), after a short address on the object of the memorial, unveiled the commemorative tablet placed over the bed. Mr. C. W. Bowerman, M.P., voiced the thanks of the Home Committee to the Society for associating their memorial with the Home, and the secretary (Mr. S. J. White) handed Mr. Warren an Honorary Life Certificate entitling him to nominate patients to occupy the bed.

In consequence of Lord Northcliffe's illness, the sale of *The Times* has not been completed, as was stated, says the *Daily Graphic*.

ON July 14th the *Cambridgeshire Times* celebrates its fiftieth year of continuous publication. The paper was first printed on a small handpress, but as its circulation increased it became necessary to use other means for its production, and a new Cossar press was started last year. At the present time it turns out a ten or twelve-page paper, printed from the reel, as against the small four-page sheet of 1872. The type-setting was, of course, all done by hand for years, until the invention of machinery for the purpose, when new linotypes were obtained, and have been used ever since.

THE *Tatler* came of age this week.

THE adjudicators of the Stationers Company and Printing Industry Examinations have issued their awards and we hope to print the list of successes next week. Close on 500 students sat for examination.

THERE are many indications of a substantial increase in the amount of "printed matter," in the shape of circulars and other business communications, passing through the post since the restricted halfpenny postage for such traffic was re-established. The present attitude of the Postmaster-General is one of opposition to fresh concessions being made.

MESSRS. JOHN WADDINGTON (LIMITED), theatrical and general printers, of Great Wilson-street, Leeds, have purchased a large block of premises in Wakefield-road, South Leeds, and will convert the building into a general printing works.

WILLS.—The late Mr. David Leith Pressly of York, for eighteen years managing editor of the *Yorkshire Herald*, formerly editor of the *Aberdeen Daily Journal* and the *Eastern Morning Gazette*, at Norwich, died April 11th, left £2,270. Mr. William Howard, Leeds, a superannuated member of the Leeds Typographical Association, £2,456. Sir John Scott, of the Walter Scott Publishing Co., Ltd., £582,165.

FREDK. ULLMER, LTD., have removed to more commodious premises at 29 to 31, Great Saffron-hill, London, E.C.1.

ONE of the curious results of the printers' strike in Berlin is the stoppage of the issue of fresh banknotes. The Government is reported to be negotiating with the strikers with a view to inducing them to print at least the quantity of paper money required by the Government for its immediate disbursements.

WITH the death of Mr. Edward Morton, which occurred at a London nursing home, a well-known and popular figure in the journalistic and dramatic world has disappeared.

THE eightieth anniversary of the Unitarian weekly newspaper the *Inquirer* was celebrated last week by a special issue.

THE annual sports of *The Times* Amateur Athletic Association were held on the ground of the Association, at Ravensbourne, on Saturday. F. G. Spackman, after winning the 100 yards handicap race with five yards start in 11½ secs., had an easy victory in the veterans' handicap over the same distance, from scratch. G. F. Bristow, who with 15 yards start, won the quarter-mile, also had a double success, taking the long jump at 18 ft. 4½ in. Among those present were Mr. and Mrs. John Walter, Mr. H. Wickham Steed, Mr. G. Murray, Brumwell, Mr. and Mrs. G. S. Freeman, Mr. W. Lints Smith, Sir Perry and Lady Robinson, Mr. Gerald Campbell, and Mr. R. E. Bune. The prizes were presented by Mrs. John Walter.

Necrology.

Mr. Ambrose Clarke.

Following a long and painful illness, Mr. Ambrose Clarke, late director of Messrs. Spicer Bros., Ltd., passed away at Worthing on July 8th in his 73rd year. The deceased gentleman had gone to the south coast for a change. Mr. Ambrose Clarke commenced his association with Spicer Bros. as long ago as 1868, and was associated with three generations of Spicers. In March, 1918, while still a director of the firm, the completion of fifty years' service was celebrated at New Bridge-street, Mr. Clarke being presented with a silver tea and coffee service and salver. The presentation was made by Mr. Augustin Spicer in the presence of Mr. H. G. Spicer and others who had long been associated with Mr. Clarke. Just two years later the deceased gentleman retired owing to reasons of health. The funeral was arranged for yesterday (Thursday) at Worthing.

Mr. Clement T. Mitchell.

The death has taken place at the age of 81 years of Mr. Clement T. Mitchell, J.P., of Clitheroe, who was the nominal head of Messrs. John Mitchell and Sons, wholesale paper merchants, of Manchester and Clitheroe. The deceased gentleman was for many years a member and for some time an alderman of the Clitheroe Town Council, and for his local services was elected a freeman of the borough.

The Newnes and Pearson PRINTING CO.

A warm tribute was paid to the services of the late Sir Arthur Pearson, the founder of C. Arthur Pearson, Ltd., by Lord Riddell, the chairman of the company, at the annual meeting of the shareholders held on the 5th inst. at the Connaught Rooms, Great Queen-street, W.C.

Referring to the Newnes and Pearson Printing Company, Lord Riddell said:—The company has practically completed the equipment of its works. There has been some delay owing to the trouble in the engineering world, but we hope that before long the works will be complete and we shall then be able to print the whole of the publications of this company at Exmoor-street. At the present time a large proportion of our publications are being printed by the Newnes and Pearson Printing Company. Although the works of that company have not been in full working order during the past twelve months, I am glad to tell you that the undertaking has made no inconsiderable profit. That profit has been sufficient to pay not only the interest on the debenture stock, but to provide a sum which would be adequate to pay a very substantial dividend on the share capital held by Messrs. Newnes and Messrs. Pearson in that company. I wish to take this opportunity of thanking Mr. Bathgate, the managing director, and Mr. Tonkin, the manager, for the admirable way in which they have managed the affairs of the Newnes and Pearson Printing Company. Only those who have had occasion to deal with such matters are aware of the serious difficulties which present themselves in establishing a great business of that kind.

A dividend was declared of 15 per cent. Miss G. Stuart Macrae, retiring director, was re-elected.

Fleetway Press Wayzgoose.

The annual outing of the staff of Fleetway Press took place on Saturday to Southend-on-Sea. The majority of the party undertook the journey by charabanc, and at one o'clock dinner was served in the ball-room at the Palace Hotel. Mr. W. R. Masters, who took the chair at the dinner, was supported by another director, Mr. Slade Allen, and was accompanied by Mrs. Masters and Master Roy Masters.

Proposing the first toast, Mr. Masters congratulated the committee and secretary on the social side of the firm's activities on the excellent work they had done and were doing.

The afternoon's programme consisted of a fruitless endeavour to reach Canvey Island by motor-boat—which was thwarted by the rough sea—and visits to the Kursaal.

Tea was served at the Palace Hotel at five o'clock.

The trippers, who had thoroughly enjoyed the day's proceedings, left for London at six o'clock amidst a heavy shower of rain.

From the London Gazette.

PARTNERSHIPS DISSOLVED.

H. Hartley, H. Empson, and H. Kerfoot, trading as Hartley, Empson and Kerfoot, at 185, Princess-street, Manchester, printers, stationers and bookbinders, so far as regards H. Kerfoot.

Printers' Managers and Overseers ASSOCIATION.

Annual Report Presented at the Parent Meeting in London Indicates Continued Growth of Membership and Influence.

The usual monthly meeting of the Parent Association of the Printers' Managers and Overseers Association was held on Tuesday, June 6th, at the "Old Bell," Holborn, with Mr. S. M. Bateman (the president) in the chair. There was a large attendance, and the proceedings, as usual, were of an interesting character.

Illness of Mr. J. C. Pugh.

The president announced that the absence of Mr. Pugh was due to a serious illness, which the members would regret. He had had to go into hospital, with the possibility of undergoing an operation. The members would wish him a speedy recovery. (Hear, hear.)

Mr. W. J. Styles (Lowe and Brydone, Victoria-road, Willesden, N.W.10, overseer--litho machine department), who had been duly nominated, was elected a member of the Association and was cordially welcomed by the president.

Mr. H. W. Jackson and Mr. J. French, the auditors, reported having examined the books and found everything in perfect order. Great credit was due to the secretaries for the manner in which the books were kept and for the facilities offered for an examination of every detail.

Annual Report.

The president then introduced the annual report, which was signed by himself and Mr. E. W. Whittle (the general secretary).

Covering the year ended April 30th, 1922, the report and accounts were again declared to be very satisfactory. They show a steady growth in membership and influence. While great care is exercised in the selection of suitable candidates, having regard to their status, the Council are pleased to report a number of applications at almost every meeting. Missionary effort among those managers and overseers who are outside the Association will be an ever-pressing need, and the Council are assured that members fully realise this fact and will lose no opportunity of increasing the numbers.

Under the heading of membership, it is stated that the numbers had increased during the past three years as follows:—1919-20, 1,221; 1920-21, 1,320; 1921-22, 1,346, a net gain of 26 being shown for the past year.

The balance of the general fund is £464 10s. 2d. as compared with £680 1s. 3d. at the close of the previous year, a decrease attributable on the one hand to the activities of the Association as evidenced by the number of delegate meetings and also to the heavy demand upon the Unemployed Fund. The printing trade has experienced a full share of the prevailing depression, and consequent unemployment among members has become a serious problem in the period under review. It will possibly also become a source of anxiety in the immediate future. The expenditure under this head is therefore considerable.

The mortality in the Association has not been excessive, the deaths recorded during the year numbering 18, at ages ranging from 38 to 81 years. The Council only deemed it necessary to call levies on six occasions, the remaining claims being met from the reserve, notwithstanding which, the credit of the fund is now £2,047 14s. 8d.

The Association's War Loan holding had been increased by a further purchase to the nominal value of £400. Under all the circumstances members have cause for gratification at the stability exhibited in the present times.

With regard to technical education, the report states: A distinct advance is made by the projected establishment of a well-equipped central printing school, and the Association has fallen into line with other trade organisations by promising financial aid to the school, for which the London County Council will be mainly responsible. The Association will thereby have a representative upon the governing body.

After several years' effort under adverse circumstances the Dublin Centre was disbanded at the end of July last. The Council express their appreciation of the untiring

exertions of Mr. Holley and his conferees to avert this end, but it was inevitable.

The report concludes: The present satisfactory condition of the Association is mainly the outcome of past effort and careful management. The Council are mindful of this important fact and the necessity for its continuous application. It is for the members, on their part, to lend the support of their presence and interest in the business and social life of the Association. With this attained in full, success will surely follow, and prosperity continue.

In view of the fact that no conference was being held this year, the report and balance-sheet had been sent round to the centres for their consideration, and replies were invariably of a very gratifying order, congratulations being expressed to all concerned in the preparation of the statements.

The president submitted each paragraph of the report separately, and each was adopted unanimously.

The Accounts.

In presenting the accounts, the president compared the unemployment payments with the receipts, only two centres receiving more than they had paid in. The expenditure on conferences was also referred to by Mr. Bateman, who thought the Association would have to be careful in holding such gatherings, especially as they were sometimes called together on matters which could easily have been settled otherwise. With regard to the Benevolent Fund, the president observed that no application coming before the council had ever been refused.

Mr. Freeman and Mr. Durston sought enlightenment on one or two points, and this Mr. Whittle was able to furnish satisfactorily.

Mr. Spring said it was always a pleasure to attend these meetings and to see the lively interest which the members took in the affairs of their Association. He thought they ought to express their satisfaction to the president and officers who had been labouring so well on their behalf, as indicated by the report and balance-sheet. Reference was made to Mr. Freeman's whole-hearted work on behalf of the Pensions Fund.

The vote of thanks, thus moved, was enthusiastically carried, and the president asked the secretary to reply.

Mr. Whittle, whose reception was of a markedly cordial character, referred to the striking advance which had been made by the Association since 1914. The total funds, for instance, had increased from £1,568 to £3,572 during that period. He thought they had all cause to be gratified at the strides which had been made, and if they continued in the same way in the future they would have nothing of which to be afraid. Alluding to the president's remark concerning the holding of conferences, Mr. Whittle agreed with Mr. Bateman, and added that they had to thank the Rules Revision Committee of 1913 for the necessity of holding so many conferences. He pointed out that London could not alter the rules otherwise than by a delegate meeting without the sanction of the centres.

The Manager and Trade Disputes.

The following resolution of Council was submitted in accordance with Rule 33, "That the provisions of Rule 24 do not apply in cases of trade disputes."

Mr. Whittle explained that this matter, which referred to unemployed benefit, had come forward in consequence of a communication from Glasgow, where the lithographers had been out owing to a wages dispute. The Council went fully into the question and came to the conclusion that the rule was never intended to be applied in the case of lock-outs or strikes, for the simple reason that the contributions would never stand such a strain. The resolution was now placed before that meeting for confirmation, so that there should be no misapprehension as to what would occur if the Association were affected by a lock-out or strike.

Mr. Freeman maintained that unemployment was provided for in the rules, and that if a member was locked out, he was unemployed. He regarded the resolution before the meeting as an alteration of rules, and neither the Council nor that meeting had power to alter them.

The president mentioned that this matter had come forward during the trade crisis of 1911, and it was then decided that the rule referred to should not apply to those who were out of employment on account of the strike.

Various speakers, including Mr. Hutchins, Mr. Blackwell and Mr. Burton, took an oppo-

site view from that of Mr. Freeman, and Mr. Whittle, who mentioned that Mr. Freeman's point of view had been put forward at the Council, pointed out that the motion before the meeting was simply a matter of interpretation.

The resolution was thereupon carried unanimously.

In the course of discussion as to the position of managers and overseers in the case of a lockout or strike, the president remarked that if, following a trade dispute, a member found himself unemployed, he would be entitled to come on to the funds of the Association.

Mr. Whittle added that in such a case a member must be able to undertake employment. He also mentioned that in times of lock-outs or strikes a member was at liberty to make a mutual arrangement with his employer.

Mr. Spring referred to the report of a statement that he had made at a recent meeting of the L.M.P.A. with reference to the position of managers and overseers. He wished to emphasise that he did not ask what was the custom of the trade with regard to managers and overseers, but definitely stated what the custom was, viz.; that they were entitled to three months and one month's notice on the termination of an engagement. He maintained that the custom of the trade must be carried out; and the question he put to the meeting was what in these circumstances was the position of managers and overseers if they were unfortunately obliged to come out during a dispute. In normal conditions every member of the Association was entitled and could demand his full term of notice. Of course, the working overseer, who was not now admitted to membership, was in a different position.

Mr. Whittle supplemented the observations of Mr. Spring and referred to the attitude of the trade unions towards the members of the Association. Mr. Spring had rendered the members a service in raising the question.

The Status of the Manager.

The general secretary referred to the letter which appeared in the *British and Colonial Printer and Stationer* of June 22nd by "H.M." under the heading "The Anomaly of the Printer's Manager and Overseer as a Trade Unionist," and he followed this up by reading Mr. Berryman's answer, which appeared in our last issue, the reply being received with applause.

Mr. Dawson raised a little diversion by asking if he had been rightly informed that his name had been mentioned at a recent Council meeting, with reference to some remarks he had made in that room. If so; the proper place to discuss these observations was in the room in which they had been made.

Mr. Gill and other speakers replied, and the president observed that the Council proceedings were strictly confidential.

Mr. Dawson added that apparently he had been wrongly informed and he would allow the matter to drop.

Mr. Whittle took up other points which Mr. Dawson had raised with reference to the election of committees. He urged that it was the right of the officers of the Association to be appointed to the committees in order that they might be able to properly carry out their functions. The general secretary also showed the great variety of questions which now came before the Association for consideration, particularly those regarding status and salary, and referred to the numerous letters he had received from members who had been able to improve their position by reason of the influence the Association was able to exert.

Mr. Berry pointed out that it was not the committees which ruled the Association, but the Council.

Mr. Hardie referred to the important position which the Association occupied, as indicated by the fact that he had served on two committees of the masters' organisation for two years, and the assistance of other members had been sought.

The discussion raised by Mr. Dawson then dropped and the meeting terminated.

The "Anomalous Position of the Overseer."

SIR,—I am sorry that Mr. Berryman considers my views on the position of the overseer in the printing trade to have been crudely expressed, because I tried to avoid anything which might give offence to either side. Even when I referred to the overseer as an administrative unit, I did so with the meaning that he is really a member of the administration in some senses, and unless one sets out to pick fault there is nothing wrong with the word unit.

Perhaps Mr. Berryman thinks I have an axe to grind and approaches me from the wrong angle. In fact, altogether, my critic is more concerned with searching for contention in phraseology than in pursuing the subject itself. I have no cut and dried plan, no detailed scheme and do not pretend or intend to have any.

There are three organisations representing, respectively, the men, the overseers and the masters (I don't like that word, Mr. Berryman, but I hope you will gloss over it); and as it is their duty to organise, it merely occurs to me to suggest. This journal comes to the notice of anyone interested in the allied trades, I take it, and if there is anything of a concrete nature in the suggestion that overseers should have a section affiliated to the Federation I think there is enough initiative in each of the organisations referred to to follow it up. So that when Mr. Berryman asks me to say whether the Federation would assist what he calls derelict members, I say I do not know what the Federation would do; but if the Federation framed a scheme, then we should all know.

The engineers find it possible to run an affiliated section for their overseers, and if it possible in that industry it may be in ours. It is certainly an anomaly that an overseer should rank with the administration in general matters and then suddenly find himself in quite another position where and when disputes or negotiations arise.

The question is: should the foreman, overseer or works manager automatically transfer to a special association, union or section which will retain for him the advantage he should enjoy from his position and which would more thoroughly safeguard his interests than the existing system? If the editor of the *Managing Printer* cares now to deal with the subject constructively or destructively, he may conceivably make a helpful contribution.

Yours, etc.,
H. M.

Trade Union Matters.

THE Executive Committee of the Typographical Association, in a circular letter to the branches, intimate that they are about to ask the members to sanction a 2s. 6d. levy per member weekly for eight weeks. The precise reason for the levy is not stated, but presumably it is to cover the expenses incurred in the recent wages negotiations.

THE half-yearly report of the Typographical Association shows a net loss of £7,405 on the six months' working. The general fund stands at £82,840, a decrease of £13,046, and the superannuation fund at £66,659, an increase of £5,640. The combined funds are £149,500, a decrease of £7,405, showing an average value per member of £4 16s. 1½d., as against £5 os. 2½d. in the previous reports. The principal disbursements were £59,135 for unemployment benefit, and superannuation accounted for £15,287. Fully employed members number 23,179, a decrease of 503; casually employed, 3,228; superannuated, 906; apprentices, 1,415; and honorary, 2,078, the total membership of 31,099 showing a decrease of 219 on the six months.

ACCORDING to the official organ of the L.S.C., the number of unemployed members at June 24th last was 1,041, compared with 1,169 in the corresponding week of last year, and only 50 at June, 1920.

THE part taken by Mr. Bowerman, M.P., in bringing to the notice of Sir P. Lloyd-Greame in the House of Commons the question of printing from Germany entering this country without an imprint has met with the warm approval of printing trade unionists generally.

A Cornwall Press Outing.

The annual outing arranged by the Cornwall Press Compositors' Chapel this year took the form of a motor-coach trip to Holmewood. Four large motor-coaches supplied by the London General Omnibus Co. pulled up at eleven o'clock on a recent Saturday outside the works in Paris Garden, Stamford-street, and quickly moved off fully laden. Leaving the extra-metropolitan area behind at Merton the party was conveyed through Ewell, across the Banstead Downs, and thence by Dorking to the appointed rendezvous—the "Holly and Laurel" at South Holmewood. Here, a substantial cold luncheon awaited the members of the party, whose appetites had been whetted by the bracing character of the weather experienced (it was far from summer like).

The meal over, Mr. G. C. Edwards (Father of the Chapel) proposed the toast of "The Firm," coupled with the name of Mr. J. Griffiths (the works manager), and paid a tribute to the excellent relations existing between the management and the men.

Mr. Griffiths replied in appropriate terms,

assuring those present that it would be the constant endeavour of the firm and himself to secure the happiness and comfort of the employees.

Mr. Griffiths, who was in the chair, was supported by Mr. S. Baker (deputy works manager), Mr. C. Smith (secretary to the company), the heads of most of the departments, and some members of the counting-house staff.

After luncheon, there was a cricket match between teams representing the composing-room and the office and reading departments. The former proved victorious.

Returning to the "Holly and Laurel" tea was served, followed by an enjoyable concert, Mr. J. Griffiths again presiding.

A somewhat different route was adopted for the return journey and altogether a delightful day was spent.

The committee consisted of Messrs. W. Allen, E. W. Berry, W. J. Desborough, A. Giles, D. Mitchenall, H. Maynard and A. White. The stewards (who worked well) were Messrs. G. A. Marlow, A. R. Parfitt, and H. Addison; while Messrs. G. C. Edwards (father of the chapel) and M. S. Fairance (clerk) kept a vigilant eye on the general arrangements.

Printers' Wages Problem.

THE wages question in the printing trade
has moved forward since our last issue, but
has by no means reached an entirely satisfac-
tory phase. A cloud has appeared upon the
horizon since the award of the Industrial
Court was made known, and there are some
pessimists who speak very gloomily of the
outlook. The award, however, is a very im-
portant announcement and the grounds for
making it are set forth without equivocation.
Evidently the members of the Court appre-
ciate the position of industry generally and
of the printing trade in particular, and although
the terms may not be quite what the T.A.
anticipated, if it is allowed to go forward it
should stabilise wages for some time ahead
and enable master printers to so adjust their
costs that they can secure some of that busi-
ness which they have been unable to obtain
by reason of the excessive cost of printing.
The first reduction under the award is due
this week. The position in London has not
been cleared up to any extent, and negotia-
tions which were re-opened with the L.S.C.
are to be continued. Negotiations are also
proceeding with other unions.

* * *

Paper Suppliers and the Printer.

THE relations of the paper supplier with the
printer are not always so free from criticism
as perhaps they might be. Recently there
have been complaints from master printers in
this country, and this fact gives added
interest to rapprochements which are taking
place among paper men and printers in
Philadelphia. Apparently the question of
the long price list is in abeyance pending
more definite news concerning the legality of
the proposal. But in other directions agree-
ment was reached for closer working. The
compromise plan adopted at a joint meeting
provides in substance that the fine paper dis-
tributors will sell printing papers only to the
converters and not to the ultimate consumer,
and that the printers in turn will look to the
paper distributors and not to the mills for
their supplies, and finally that the long list,

while it will not be adopted by the paper
distributors who are members of the Paper
Trade Association and thus are affiliated with
the National Paper Trade Association, will
be carried on by the Typothetæ only in an
educational and not in an aggressive way.
In order to ensure a continuance of co-
operative effort, a proposal was made that
paper men and printers should meet together
at least once a year in friendly conference,
and the suggestion was met with "vociferous
response."

Personal.

VISCOUNTESS BURNHAM, the president, was
in the chair at the annual dinner of the
Society of Women Journalists at the Lyceum
Club on Wednesday last week.

SUPPORTING her were Viscount Burnham,
Sir William Berry, Sir Frank and Lady
Newnes, Sir Harry Brittain, M.P., and Lady
Brittain, and a distinguished company of
litterateurs.

LADY BURNHAM acknowledged her election
to the presidency in an able speech.

MR. BONAR LAW, M.P., was the guest of the
Lobby journalists at a luncheon on Tuesday
at the Hotel Victoria.

MR. W. R. CUMMINS, the Muswell Hill
printer, has been again successful at prize-
winning at flower shows this year, having
won six first, four second, and four third
prizes.

MR. GEO. A. ISAACS has been appointed as
the representative of the National Society of
Operative Printers and Assistants on the
Board of Governors of the Central London
Printing School.

It is hoped that President Harding, who is
a printing craftsman, will open the second
Educational Graphic Arts Exposition at Bos-
ton, August 28th to September 12th, and an
effort will be made to have him set in type a
message of greeting to all visitors.

Lt.-Col. Truscott's Garden Party.

Lt.-Col. J. R. Truscott (President, London
Master Printers' Association) and Mrs. Trus-
cott entertained various members of the print-
ing craft, and their friends in the neighbour-
hood, at a garden party at their house,
"Amblecote," Cobham, Surrey, on Satur-
day last. In spite of the inclement weather,
about 150 people were present, and they were
entertained with music, tennis and garden
golf.

Among those present were Sir Richard
and Lady Redmayne, Sir Charles and Lady
McLeod, Sir George Wyatt Truscott, Bt.,
Sir G. Rowland Blades, Mr. and Mrs. H. D.
Truscott, Lt.-Col. and Mrs. E. Wallinger, Mr.
and Mrs. R. R. Bury, Mr. and Mrs. J. H.
Williams, Mr. and Mrs. R. A. Austen-Leigh,
Mr. and Mrs. J. J. Keliher, Mr. and Mrs. Miss
Griffith, Mr. and Mrs. Cahusac, Sir Cecil
Harrison, K.B.E., Mr. and Mrs. G. Eaton
Hart, Mr. and Mrs. W. H. Hazell, Mr. and
Mrs. A. Willmott, Mr. and Mrs. J. Brigenshaw,
Mr. A. Bonner, Mr. and Mrs. J. D. Wise, Mr.
and Mrs. G. W. Young and Mr. and Mrs. T. J.
Hunt.

Among letters of regret received were those
from Sir Thomas and Lady McAlpine, Sir
William and Lady Waterlow, Mr. and Mrs.
W. A. Clowes, Mr. and Mrs. A. F. Blades, Mr.
and Mrs. E. C. Austen-Leigh, and Sir Home-
wood and Lady Crawford.

THE Stationery Office have issued the re-
port of the Committee appointed to select
the best faces of type and modes of display
for Government printing (4s. net, post free
4s. 3d.) and "A Note on the Legibility of
Printed Matter," prepared for the information
of the Committee by Mr. L. A. Legros (1s. 6d.
net, 1s. 7d. post free).

Wages in the Printing Industry.

The Industrial Court Award for the Country and the Resumption of Negotiations in London.

Since our last issue the most important development in the wages question has been the announcement of the award of the Industrial Court, the terms of which are printed below. In this connection it is understood the Typographical Association are proposing to take a ballot of their members, although the view of the Master Printers' Federation is that the award must come into operation automatically. Accordingly the T.A. have been informed that the Federation on behalf of its members, having decided to submit this matter to the Industrial Court for settlement, is issuing instructions that the award of the Court should be given effect to. It will be noticed that the first reduction under the award takes place this week.

The Industrial Court Award.

Signed by Sir Wm. W. Mackenzie, Mr. J. McKie Bryce, and Mr. D. C. Cummings, the following are the terms of the Industrial Court award in *re* the Federation of Master Printers and the Newspaper Society and the Typographical Association:—

TERMS OF REFERENCE.—Should there be a reduction in the wages of the members of the Typographical Association? If so, what amount and how any such reduction should be divided and at what dates?

1. The difference was referred under the Industrial Courts Act, 1919, by the Minister of Labour to the Industrial Court for settlement and parties were heard in London on July 4th, 1922.

2. The workpeople concerned in the difference comprise male adults employed as compositors, linotype and monotype operators and machinemen in England and Wales (outside a circle whose radius is 15 miles from the General Post Office, London), and in Belfast.

3. In 1919 an agreement operating as from May 24th or thereabouts was concluded between the present parties, which as regards wages divided the towns and places covered into six grades, and laid down jobbing, weekly news, and bi-weekly news case rates for the several towns as follows:—Grade No. 1, 75s.; No. 2, 72s.; No. 3, 69s.; No. 4, 66s.; No. 5, 63s.; No. 6, 60s.

The rates are basic rates, and are subject to additions in respect of certain classes of work which will not be affected by the present decision.

When these rates came into force the cost of living index number published in the *Labour Gazette* was 110.

4. The rates were increased from time to time as the cost of living advanced, until, in November, 1920, with reference to a cost of living index number of 168, they stood at:—Grade No. 1, 97s. 6d.; No. 2, 94s. 6d.; No. 3, 91s. 6d.; No. 4, 88s. 6d.; No. 5, 85s. 6d.; No. 6, 82s. 6d.

5. By agreement between the parties the rates were reduced in October, 1921, by 5s. a week, and in January, 1922, by 2s. 6d. a week, and they now stand at:—Grade No. 1, 90s.; No. 2, 87s.; No. 3, 84s.; No. 4, 81s.; No. 5, 78s.; No. 6, 75s.

6. The pre-war rates of the men concerned were:—Grade No. 1, 38s. 3d.; No. 2, 36s. 4½d.; No. 3, 35s. 2½d.; No. 4, 33s.; No. 5, 30s. 10½d.; No. 6, 27s. 9d.

7. The increase of the present rates over the pre-war rates thus varies according to the grading of the towns from 51s. 9d. to 47s. 1½d. a week.

8. In February, 1919, by agreement between the parties a 48-hour week was instituted under which the hours of many employees were reduced without reduction of pay, other employees having already had a reduced week. By the same agreement payment was conceded for bank and national holidays, and all employees with 12 months' consecutive service prior to June 30th in any year became entitled to a week's annual holiday with pay.

9. It was submitted for the employers that a substantial reduction in present rates was justified by reference to the fall in the cost of living, comparison with the course of wages in other industries, and on account of the state of trade.

The last published cost of living index number is 80, and it was contended that, even allowing for an improvement in the pre-war

basic wage of about 4s. a week, a reduction of 19s. a week from present rates was warranted.

Evidence was submitted to show that on account of the present high costs orders for printing were being withheld or diverted abroad. The export of books and other printing matter to India, the Dominions and Colonies, and the United States of America was particularly affected. Many newspapers were being run at a loss, and commercial printing was being displaced by the increased, because cheaper, use of copying apparatus. Official statistics showed that more than 15,000 persons in the printing trade were unemployed on May 22nd, 1922, while further considerable numbers were on short time. Reference was made to an official statement (Parliamentary Debates, H.C. Vol. 155 Col. 1051), which showed that in June, 1922, in a number of important industries, including building, engineering and shipbuilding, the time rates of wages were lower by considerable sums than those in the printing industry.

10. The workpeople resisted a reduction of wages on the ground that the wages now paid are no more than adequate for a skilled trade in which apprenticeship is necessary. It was submitted that the increase in the cost of living was in fact greater than shown by the cost of living index number; and that, whether that submission was justified or not, the pre-war wages were unsatisfactory, and should not be taken as a basis. It was contended that the present condition of the industry was due to the general trade depression, and that a reduction of wages would have too small an effect on total costs to bring about any marked improvement. Figures were quoted to show the prosperous condition of many firms engaged in the industry. It was also stated that a number of firms engaged in newspaper printing had undertaken to continue present rates until the end of the year.

11. The Court are satisfied that in the printing industry there has been a great falling off of work, and although the evidence shows that some firms are prosperous, the industry as a whole is in an unsatisfactory condition. The shortage of work is no doubt due in part to the general industrial depression from which the country is suffering, and has been aggravated by stoppages of work, such as have occurred in the mining, engineering and shipbuilding industries.

But printing is essentially an industry in which the price at which the work can be done is of the first importance. In comparatively few directions is the demand for printing so insistent that it must be satisfied irrespective of the price charged. It appears to the Court, therefore, that it is in the best interests of all concerned that everything possible should be done to reduce costs and charges, and encourage the placing of orders. The marked reduction in the price of paper is important in this connection; but the object at which to aim appears clearly to be a due and proper reduction of each of the ingredients which go to make up the total cost.

The necessity of a reduction of costs implies in the present case the necessity of a reduction of wages. The rates of wages paid by an industry must be determined by the capacity of the industry to bear them; and the Court are clearly of the view that under existing conditions a reduction of the rates of the men now concerned is warranted.

12. The Court accordingly decide that the present rates of wages shall be reduced as follows:—By 3s. a week as from the beginning of the first pay week following July 11th, 1922; by a further 3s. as from the beginning of the first complete pay week in September, 1922; by a further 3s. as from the beginning of the first complete pay week in November, 1922; and by 3s. 6d. as from the beginning of the first complete pay week in January, 1923.

The Balloting Unions.

The results of the ballots which were taken by several unions have been received, and the following unions have voted in favour of accepting the proposal submitted to them:—The Amalgamated Society of Lithographic Printers; the Amalgamated Society of Litho-

graphic Artists; the Music Printers' Society; the National Union of Printing, Bookbinding, Machine Ruling and Paper Workers; the National Society of Operative Printers and Assistants (male and female members in general printing offices in the provinces and female members in London); the London Society of Machine Rulers; and the Society of Women employed in the Bookbinding and Printing Trades.

These proposals were as follows:—A reduction of 5s. per week in the rate of wages payable will become operative on and from the pay day in the week ending July 15th, 2s. 6d. on and from the pay day in the week ending October 7th, 2s. 6d. on and from the pay day in the week ending January 6th, and 2s. 6d. on and from the pay day in the week ending July 7th, 1923, with proportionate reductions to piece workers, male learners and binders' apprentices, and no further reduction in wages during 1923.

Reductions on the same dates shall be made to the women members of these societies amounting to 6s., in instalments of 2s. 6d., 1s. 6d., 1s. and 1s. respectively, with proportionate reductions to piece workers and female learners.

Arrangements are being made to revise the scales of wages payable to the male and female learners in the provinces.

The women members of all unions have accepted the reduction both in London and the provinces.

The male members of the N. S. O. P. and A. and the N. U. P. W. in London have rejected the terms; but arrangements have been made for a further conference with these unions. There is a special agreement affecting male members of the N. S. O. P. and A. employed in newspaper offices in the provinces that their wages bear a definite relation to the wages of T. A. members, and this will take effect accordingly.

In announcing the results just mentioned Mr. A. E. Goodwin, secretary of the Federation, observes: "It is gratifying to be able to report that the position has been reached and that the lengthy and difficult negotiations have been conducted with good will."

Other Negotiations.

In London negotiations have been resumed with the London Society of Compositors and the other unions operating exclusively in the metropolis. Conferences were held on Friday and Monday with the L. S. C. and a number of points were raised, but the conference was again adjourned until next Tuesday, following a delegate meeting which has been convened for Monday. Nothing so far has been settled, but definite progress is expected to be made next week.

Representatives of the Machine Minders were received by the L. M. P. A. on Tuesday, and interviews with the other unions were arranged for Wednesday.

German Printers Strike Ended

The printers' strike has ended, and work was to be resumed yesterday (Wednesday) in Germany. Under the new wages agreement male workers will get 300, female workers 250, and youths under 17 150 marks increase per week. There will be no pay for the days that the strike lasted.

City Printing Works Fire.

A destructive fire occurred early on Friday morning on the premises of Messrs. Hicks, Wilkinson and Sears, printers, Dorset Buildings, Dorset-street, London, E.C. It is believed to have originated on the second floor, and spread rapidly to the upper floors, wrecking two linotype machines, electric motors and a number of printing machines. The upper part of the building completely collapsed, but the general offices and warehouse were not so seriously affected, although considerable damage was done by water. The machinery in the basement escaped any serious damage. Stocks of paper, supplemented by a delivery of 250 reams on the previous day, were also little affected. The prompt action of the fire brigades in attendance practically confined the fire to Messrs. Hicks, Wilkinson and Sears' premises. The firm are making arrangements to meet all the requirements of their customers.

We understand that Sir John Ellerman, the great shipping magnate, who has large newspaper interests in London, is negotiating for the purchase of a southern paper mill.

BANKRUPTCIES, etc.

THE "SUNDAY SPORTSMAN," LTD., 367, Strand, W.C.—The creditors and shareholders of this company met under a compulsory winding-up order on July 4th at the Board of Trade offices, Carey-street, Lincoln's Inn, W.C. Mr. G. D. Pepys, official receiver, reported that the company was formed in January, 1921, with a nominal capital of £40,000, to acquire a weekly newspaper entitled the *Sunday Sportsman*, with which was also published the *Sunday Sportsman Special*. The *Sunday Sportsman* was started by the Harrington Press, Ltd., now in liquidation, and the company acquired it from the London United Press Co., Ltd. The failure was attributed to the coal strike of 1921, which led to the cancelling of many race meetings, whilst the company was also obliged to reduce its circulation because of the curtailment of the train services. The official receiver had sold the copyright and goodwill of the paper for £500. The proofs of debt aggregated £25,227 which included £16,550 claimed by the vendors for the unsatisfied portion of the purchase consideration, whilst the assets had realised £1,285 and the uncollected book debts were returned at £1,110. Mr. A. Willmott, C.A., was elected to the post of liquidator.

LEWIS MATHIAS AND Co., LTD., music printers and publishers, 9, Great Marlborough-street, W.—Accounts have been filed under the liquidation of this company, showing liabilities £6,763, assets valued at sufficient to yield a surplus of £223 after payment of all debts and a deficiency of £7,303 as regards shareholders. Mr. G. D. Pepys, official receiver and liquidator, reports that the company was formed in December, 1918, with a nominal capital of £10,000 and agreed to purchase the business which had been carried on at 9, Great Marlborough-street as Lewis Mathias and Co. for £6,236. In the opinion of the official receiver, the failure of the company is due to mismanagement and to the large salaries and expenses paid.

Printing, Bookbinding & Kindred TRADES OVERSEERS' ASSOCIATION.

Visit to a Paper Mill.

The annual outing of the Printing, Bookbinding and Kindred Trades Overseers' Association took place on Saturday, when a visit was made to the London Paper Mills, Dartford. The company, numbering fifty members and friends, left Cannon-street soon after one o'clock, being favoured with quite propitious weather. Among those who accompanied the party were:—Messrs. C. Atkins, A. J. Aves, G. A. Eden, G. J. Hellery, T. Hunt, W. T. Lingham, J. Lee, H. Milton and B. J. Sansom. Disappointment was felt at the unavoidable absence of both the president and secretary. On reaching Dartford the party was met at the station by Mr. A. C. Barnes, chief clerk of the mill, who conducted the members to the mill gates where they were greeted by the mill manager, Mr. Jas. Langan.

After an informal reception, Mr. Langan arranged for the visitors to be split up into groups of eight and entrusted guides to conduct each group over the different parts of the mill. The guides consisted of foremen and staffmen.

The London Paper Mills, which are under the control of Albert E. Reed and Co., Ltd., employ about 430 hands. The huge output attained by these mills is made possible by the introduction of up-to-date machinery and appliances, and were kept running especially for the Association's visit. Here the members were able to witness the manufacture of a very comprehensive variety of papers, which were being produced not only with great rapidity, but with perfect precision and finish. The machines were busy executing orders for Australia, Canada, Africa, Japan and China, and the visitors had the rare opportunity of witnessing paper being made for *The Times*, the *Daily Mirror*, *Daily Graphic*, *Nash's Magazine*, *Answers*, etc.

At West Mill.

At the West Mill, after passing huge quantities of mechanical and sulphite wood pulp stacked in bales, the party was conducted to the boiler-room. Here was seen a number of boilers, one of which had recently been converted for oil fuel, and a massive engine, registering 300 h.p., which was operated by a 150 h.p. motor. The visitors were next shown the disintegration of the raw material and the operations of the agitator chest made by Messrs. Charles Walmsley and Co., Ltd. and the beating of the pulp which was being carried out by a number of Bentley and Jackson's beating engines. A demonstration was also given of the application of colours to the pulp, with the object of securing the correct tints on the papers according to their special requirements. These processes having been completed the pulp was next run into a rotating Wandel strainer (made by the Watford Engineering Co.) ready to be converted into paper.

The Machine House.

Continuing their tour of inspection the party was next shown the gigantic Walmsley papermaking machine which has recently been installed and which is giving every satisfaction to the management. With regard to this machine the visitors were amazed at the very smooth manner in which the leviathan was running. Interesting explanations of the intricate process were given as the pulp travelled along the wire until, after submitting to various treatment, it reached the drying cylinders, finally to be wound as finished paper on to the reels at the end of the machine. Great interest was evinced at the rapid removal of the completed reel—weighing one ton and a quarter—and at the equal speed with which a new core was placed into position, all carried out while the machine was operating at full speed.

East Mill.

At the East Mill, where the visitors were next conducted, very special interest was taken in the machinery in the boiler-house, where the boilers—all heated by oil fuel—attained a pressure of 80 lbs. per square inch and registered a temperature of 260 degs. Fah. Next was seen the mill's 500 h.p. motor and the 1,200 h.p. engine, the fly-wheel of which weighs 36 tons. In this mill are in-

stalled four large papermaking machines, all of which, however, are somewhat smaller than that in the West Mill. Coming from such well-known papermaking engineers as Bertrams Limited, Bentley and Jackson, Jas. Milne, and Chas. Walmsley, all were working at full capacity, and the visitors examined the manifold operations of the massive machinery with absorbing interest and attention.

The final floor to be inspected was the packing and cutting room, where a mammoth Victory Guillotine by Jas. Salmon was at work.

Votes of Thanks.

The party then adjourned to the Shaftesbury Hotel, Hyth-street, where an excellent knife and fork tea was served, Mr. Langan, Mr. Barnes, and several of the gentlemen who had acted as guides being also present.

After tea Mr. Milton (vice-president of the Association), in proposing a vote of thanks to Mr. Langan, Mr. Barnes and the guides, tendered hearty thanks for the opportunity given them that afternoon. They had enjoyed themselves immensely, and had been greatly impressed with all they had seen at the mill. He wished the mill management all success in the future.

The vote of thanks was cordially seconded by Mr. G. A. Eden.

Mr. Langan, in reply, said he was glad to have had the opportunity of entertaining the members of the Association, and to have given them the privilege of seeing some of the work done at the mill.

Mr. Barnes also endorsed the sentiments expressed by Mr. Langan.

The remainder of the evening at the disposal of the trippers was occupied in an impromptu concert, to which the following contributed: Messrs. A. G. Aves, G. A. Eden, T. Hunt, H. Hunt, and A. C. Ware. The concert was brought to a close by the singing of Auld Lang Syne.

In the hour to spare before catching the train for home the opportunity was taken of looking round the old town of Dartford, so reminiscent of early papermaking days.

The stewards, Messrs. H. Milton, Eden and B. J. Sansom, were responsible for the arranging of what proved in every sense to be a very instructive and enjoyable outing.

Monthly Meeting.

There was a large muster of members at the usual monthly meeting of the Association held on Tuesday of last week at St. Bride Institute, Bride-lane, E.C.4, the president, Mr. A. W. Hunt occupying the chair. After the transaction of some brief routine business, Mr. A. J. Daines delighted his hearers with another of his erudite discourses, entitled "How to Read."

The minutes being disposed of, several items of correspondence were dealt with. Among these were letters from members inquiring about vacancies and also a notification of an opening to be filled.

New Members.

The following candidates were then elected to membership:—Mr. W. J. Miles (overseer-binding department), Messrs. Tinling and Co., Prescott, Lancs; Mr. T. J. Reindorp (photo-engraving department), Amalgamated Press, Lavington-street.

On behalf of the Association the president extended to the new members a warm welcome.

Mr. F. C. Peacock, who so well champions the cause of bookbinders' charities, made an appeal on behalf of the Bookbinders' Cottage Homes. Apart from the annual donation which the Association so generously granted, he hoped for further assistance individually from the members.

Mr. Daines' address was of considerable literary merit, and elicited from the members hearty appreciation. After dealing with the diversity of opinion that exists as to how books should be read, he quickly passed over such authors as Charles Garvice and Philip Oppenheim and dealt more extensively with Charles Dickens, Oscar Wilde, Elinor Glyn, John Galsworthy, Jack London and others. The varying characteristics and philosophy expounded by the different authors were described in a fascinating manner.

At the close of the address an interesting discussion took place, contributed to by the following: Messrs. W. Robinson, A. S. Long, C. Atkins, G. A. Rutherford, J. Lee, and the president.

A cordial vote of thanks was passed to Mr. Daines, on the motion of the chairman, seconded by Mr. A. G. Aves,

Wiggins Teape and Alex. Pirie (SALES), LTD.

This private company has been registered with a nominal capital of £10,000, in £1 shares. The objects are: to carry on the business of wholesale, export and manufacturing stationers, general merchants, agents, booksellers, publishers, proprietors of newspapers, periodicals and other copyrights, literary and artistic printers, lithographers, engravers, die-sinkers, bookbinders, account book manufacturers, machine rulers, numerical printers, papermakers, manufacturers of envelopes and all forms of covers for use in transmission of articles by post or otherwise, manufacturers of millboard, cardboard, railway tickets and all articles made from pulp, dealers in parchment, vellum and all articles and materials used in any of the above businesses, or for general, literary, photographic or artistic purposes, etc.

The first directors are: P. Wood Holden, A. E. Parke, F. L. T. Barlow, T. L. Parke, W. G. Hay, L. W. Farrow, J. Horsburgh and J. P. Hepburn, directors of Wiggins Teape and Co. (1919); F. D. Pirie, W. B. Pirie and R. G. Ritson, directors of Alex. Pirie and Sons, Ltd.

Geo. C. Brightling & Co. (1922), Ltd.

This company—a reconstruction of the old company of Geo. C. Brightling and Co., Ltd.—has recently been registered, and will continue business as heretofore at Ormond House, 63, Queen Victoria-street, London, E.C.4. Mr. Geo. C. Brightling will still maintain his association in the capacity of chairman, but under the new arrangement the more active control of the business will be in the hands of Mr. John Goodey and Mr. P. T. Collier, as joint managing directors. Both gentlemen named are well-known and highly respected in the trade. Mr. Goodey, for instance, having been with the firm for 28 years and Mr. Collier for 18 years, and it may safely be assumed that in their hands the high reputation achieved in the past will be worthily maintained. The firm of Messrs. Geo. C. Brightling and Co., Ltd., handle a wide variety of papers and act as agents for a number of important British mills.

James Wrigley & Son, Ltd.

We have definite information that Bridge Hall Mills, Bury, has changed hands. Established over one hundred years ago by Mr. Jas. Wrigley, the business was conducted by the descendants of the founder until the end of 1920 when it was then acquired by a firm of London paper merchants and remained in their hands until recently, when it was purchased by Bolton gentlemen. The mill is again in local hands and it is the intention of the purchaser to maintain to the full the Wrigley traditions and to place upon the market their world-famed specialties in fine papers, viz.: Cheques, banks, writings, printings, antiques, super-calendered papers, etc. The company is not now working in association with any other concern.

Boothwood Paper Mills, Ltd.

This private company has been registered with a capital of £30,000, in £1 shares (10,000 7 per cent. cumulative preference and 20,000 ordinary), to acquire the business of a paper manufacturer, carried on by J. Lockett, at Boothwood, in Rushworth, Halifax, as the "Boothwood Paper Mill Co." The first directors are: J. Lockett, H. A. Stukins, J. Pickford, J. Walton and W. Pearce. Registered office: Boothwood Paper Mill.

An employee for 50 years of Messrs. James R. Crompton and Bros., Ltd., Elton Paper Mills, Bury, Mr. John Moore has passed away at the age of 80 years. Four employees of the firm, Messrs. E. Sandiford, J. Dootson, A. Bell and H. Hoyle, acted as bearers at the funeral, and the wreaths included one from the directors,

The Art of Salesmanship.

Some Vigorous Suggestions.

Although the selling of paper is undertaken with great keenness, it may be that there are improvements which can well be undertaken in the methods adopted. At all events, Mr. Harry R. Wellman, who is a "professor of marketing," spoke very directly to the Salesmen's Association of the Paper Industry in New York.

To-day we find production possibilities estimated at being between 30 per cent. and 40 per cent. higher than our known market can consume he says. Moreover, we find that nearly all the production economies that can be made, have been made and that the costs of administration and finance have been reduced to an irreducible minimum under present conditions. In all lines, in fact, production says to sale, "we've made all the savings we can, make a few savings yourself."

This condition is indeed, general. On every side we are seeing new methods used, new studies made, to decrease the present cost of sales. Almost every middleman is considered a parasite by the public at large. With the pressure of public opinion added to the more pressing need of profits, do not blame your bosses for putting on real pressure to reduce sales expense. The sales department is faced with doing the job or, having it done for them. Paper must be sold, and at a profit. The mills must be kept running. From the point of view of production, of finance and of administration, the mill owners have done their best to decrease expense. Now it is your turn.

It seems a large order, but the situation has its bright side. Of all the distribution businesses of to-day, paper is the most archaic. Therefore, the improvement will be easier to make and the results will be more quickly apparent in savings. While other businesses have improved their sales methods, the general paper business has done very little. If one mill dared attempt new methods, all the other mills laughed them to scorn. And so you have kept on putting the most modern machinery into the plants, and used the most antiquated and wornout methods in the selling field. The old jobber-merchant, printer machine, has creaked for a long time. As long as it ran at all, however, you made no improvements other than adding "oil" occasionally. Until Mr. Volstead entered the field as a competitor, you purchased many of your carload orders with champagne suppers instead of with salesmanship.

Why has this condition been allowed to continue in the paper business after it had been abandoned in other lines? Principally, I think, because most of you honestly believed that the paper business was "different" from other businesses. This would be a normal answer as it reflects the same state of mind that other businesses had to go through before they found the right answer. But in finding the right answer, it will help tremendously if you will recognise the fact now that the paper business is not different, that it depends upon the same economic conditions and that it can be merchandised the same as any other commodity.

In the last two years, I have been permitted to study the paper business from the inside out. I have interviewed printers—and viewed the remains of wonderful portfolios designed to help the printer collect new business, but now passively collecting dust; I have interviewed merchants—and found paper piled on their shelves that they did not know they owned and of which their salesman had neither price nor sample. I have talked with salesmen who had excellent selling ideas, but who did not dare

attempt to merchandise their lines with the merchant, for fear the merchant's salesman would get sore!

This state of mind results in waste selling effort on the part of the mill and the agent; it results in duplication of effort by both sales forces and occasionally, by the addition of still further field forces uplifting the printer; it results in slow turnover for the mill and for the jobber, with resulting loss of sales profits and an added interest charge for storage. The point is, all of these wastes are represented in the selling price of the paper when it reaches the market. Loaded with these costs, the price is too high, the final consumer won't purchase and another mill goes to the wall or is absorbed into some new combination to reduce overhead and selling expense. You don't have to take the economist's theory for this. The present combinations furnish fairly practical examples.

The remedy, like most worthwhile remedies, is simple and is based on sound, economic facts. Moreover, other lines of business have done the experimenting necessary, so that the paper business can start with facts rather than theories. The remedy is standardisation in the merchandise itself, standardisation in the methods and trade-channels used in selling, and a constant study of changing conditions to permit immediate changes in method and product, to meet these conditions.

Taking up these proposed changes in order, much has been done toward the standardisation of product. Much still remains to be done, however. Grades, colours, sizes and cutting dimensions, are still subject to improvement. In addition, I dare to think we may see standardisation as between rag and sulphite bond. Each of the changes that have been made, however, have encountered serious objection from the trades in general.

Only a little while ago, salesmen were speaking tolerantly about competitors who manufactured papers in the "twilight zone." How many of you to-day are not offering these same twilight zone papers, paper made at a price to meet competition. Do you realise what you are doing when you holler for these extra numbers to meet competition? You are simply lowering the standards of the entire paper business and putting an added cost on your own mill. When other mills stop making a line, be a little more hesitant about asking your mill to jump into this field. Remember that the introduction of a new brand and price by any of you simply lowers the general effici-

ency of the paper market and lowers the average price level.

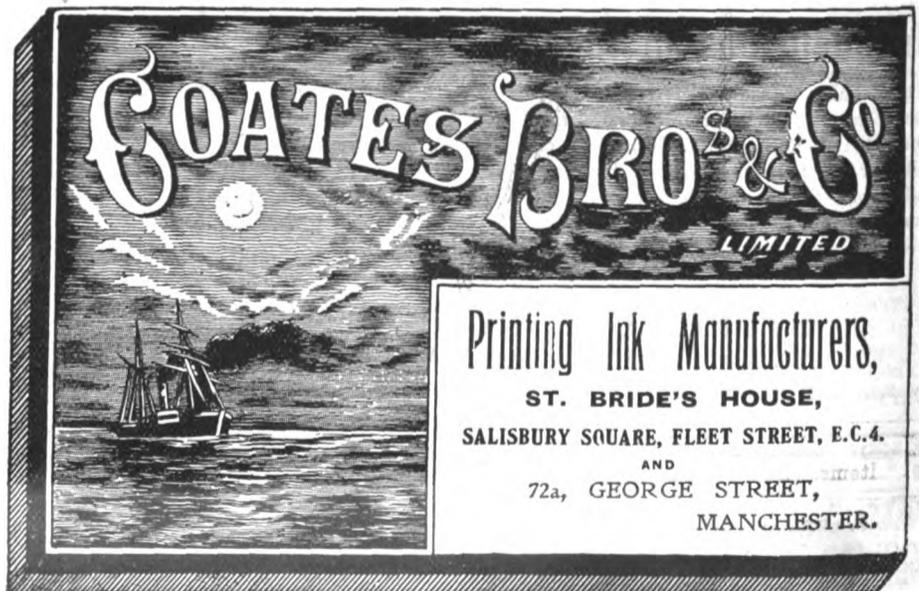

Taking up the second suggested remedy, let us go into the merchant situation a little more in detail. In the paper business as in other businesses, there are just three types of jobbers: (1) the real jobber-merchant who gives full co-operation and service for the limited lines he carries and for which he receives pay. (2) the semi-jobber who splits up his line, his time, his co-operation and his sales effort, performing semi-service for the mill for which he is overpaid, and (3) the worthless jobber who buys and stocks anything and performs no intelligent service, even for himself.

The crux of the jobber situation is just this; there are too many useless and semi-useless jobbers. Make them good jobbers or drop them. The mills are not in the hands of the jobbers. Jobber selection is still possible, jobber elimination still desirable. The jobber and the mill must have mutual interests that will reduce the cost of selling. Whether this is worked out by a combination of mills selecting certain jobbers, by mutual stock ownership, jobber and mill, or by any other means, is not important. Selling co-operation, however, must be secured if wastes are to be stopped and profits again appear.

And here is where salesmanship comes in 100 per cent. strong. Selling the paper itself is incidental. Selling confidence in yourself, in your product, in your mill and its policies, is the task before you. While I am a very strong believer in the use of scientific methods in selling, I have never lost sight of the fact that a large proportion of the world's business is still done on confidence. Confidence that your work is good. Confidence that your merchandising ideas are sound. Confidence in your house.

Just as a starter, think up some new uses for paper to replace the loss in blanks, direct-by-mail and other printed effort. Every new idea affects the paper business. Quit reading statistics on how rotten business is, re-sell yourself to the paper business or get out of it. Seriously, I firmly believe this is your opportunity to put the selling of paper on an intelligent, profitable footing.

COLOUR ROTAGRAVURE.—Another forward step in illustrated journalism has been taken in America, the *Chicago Tribune* having produced for the first time a twelve-page rotogravure section with four pages in three colours and black, the remaining pages in brown and green ink.

New Inventions.

An Oscillating Platen.

Mr. E. T. Waters has patented an invention which relates to a printing machine comprising a platen mounted to oscillate about a fixed axis and having a curved surface adapted to make rolling contact with an oscillating bed, the curved platen oscillates about a centre located between its curved surface and the centre of curvature thereof and co-operates with a bed having a continuous to and-fro movement towards the platen compounded with an oscillating movement in a direction tangential to the surface of the platen, so that the platen and bed are in rolling contact only during the latter part of the approach of the bed towards the platen and the early part of its motion therefrom, the amplitude of the oscillation of the platen and of the tangential motion of the bed being only a fraction of the length of sheet printed.

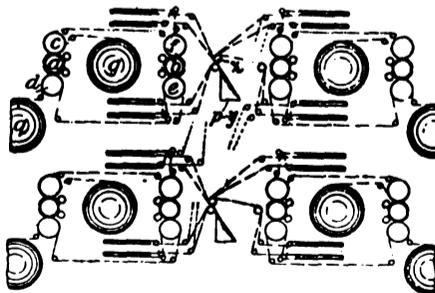

As shown, the curved platen 28 is carried on a rocker 23 mounted on a rocker shaft 22, which is oscillated by means of crank arms 25 having rollers 26 engaging face cams 27 on the driving wheels 20 on the main shaft 21. The bed 50 is rocked towards and away from the platen by means of the crank pins 61 and side arms 60 connected to the reduced eccentric ends of the back shaft 59 extending through the rearward portion of the bed. The legs 49 of the bed are connected by a rising and falling fulcrum shaft 48 carried by arms 47 rigid with a shaft 46, to which is secured an arm 52 having a roller 57 at its end running in contact with a cam 24 on the shaft 21. The weight of the bed is counterbalanced by a spring 56 acting through a rod 53 connected to an arm 51 keyed to the shaft 46, and a buffer-cylinder 88 is provided to counteract the momentum of the bed on its downward movement. For throwing off the impression, the back shaft 59 is provided with a crank 75 connected by a link 76 to one arm of a bell crank 77, the other arm of which is slotted to receive a roller 79 on a quadrant 80 pivoted on a shaft 81 adapted to be rocked by an arm 82 connected by a link 83 to the lower end of the throw off lever 84. The platen 28 is connected to its rocker 23 by means of four yielding adjusting screws of the construction shown in Fig. 10. Each screw has a square part 29 passing through the rocker and a collar 32 engaged by a spring 31, the compression of which is adjusted to the printing pressure required by the nut 30. The threaded part 33 engages a sleeve 35 which has an external thread of different pitch and screws into a threaded socket in the platen, so that by turning the sleeve 35 the platen is raised or lowered relatively to the rocker. By this means excessive pressure between the bearers 70 on the bed and the platen bearers 37 is prevented by yielding of the platen in case the normal printing pressure should be exceeded.

Rotary Newspaper Machines.

A rotary newspaper machine for printing duplicate copies from webs of a multiple

width comprises combinations of perfecting sets, each set consisting of two multi-width printing cylinders with each of which coat several impression cylinders, the arrangement being such that each wide web after printing is slit into two or more webs which are associated together before passing to a folding device which folds them longitudinally. The machine comprises four perfecting sets each comprising a pair of printing cylinders as *a, b* and coating impression cylinders *c, d, e, f*. The printing cylinders are of a length equal to four times the breadth of the newspaper to be printed, so that each cylinder prints eight pages per revolution on two webs which are supplied from rolls *g, g*. These webs are perfected by the printing cylinder *b* with which coats two impression cylinders *e, f*, so that in all two sixteen page products are obtained from each perfecting set. The webs after being

perfected are cut by rotary slitters, passed over turning bars arranged at an angle of 45 degrees to the original direction of the web, and which bring the two webs of each wide web together and the associated webs are passed to folders *p, y*, of which there are four sets in pairs which are in axial alinement. As shown, the lower pair of folders are arranged vertically below the upper pair, the folders being symmetrical with the printing sets but not in the lines of run of the original webs. The webs can be associated so that a paper of thirty-two pages is associated on each folder, there being four papers of thirty-two pages in all; or so that two papers of

sixty-four pages are produced, or with two papers of combinations from thirty-four to sixty-four pages. Before passing to the folders the webs pass over rollers *z* of double the width of the slit webs, so that two sets of webs can pass over each roller. In a modified form, the invention is applied to a machine in which the web printed on is six pages wide, and two perfecting sets of this width are arranged end-on and the folders are arranged between the printing sets. Such a machine has a capacity per revolution of four papers of twenty-four pages, or two papers of forty-eight or lower number of pages. The inventor is Mr. H. Goldschmidt.

Type Faces and Modes of Display.

Select Committee's Recommendations for Adoption in Government Printing.

Some useful and practical observations are contained in the report of the Committee appointed to select the best faces of type and modes of display for Government printing. The report is published by the Stationery Office, price 4s. net (post free 4s. 3d.), together with "a note on the legibility of printed matter," prepared for the information of the Committee by Mr. Lucien A. Legros, O.B.E., M.Inst.C.E., joint author (with Mr. John C. Grant) of "Typographical Printing Surfaces," the price of the note being 1s. 6d. net (post free 1s. 7d.).

With regard to the report, in addition to the comments and recommendations, there is a schedule of suitable type faces, specimens of covers of official publications as at present displayed and as reset according to the correct principles applicable to the composition of such pages, and plates showing designs for Royal Arms. There are also plates showing the proper imposition of pages of various dimensions and matter.

Criticism of Government Printing.

The Committee observe early in their report that the general standard of Government printing has not always been as high as it should be. "The covers and title-pages of Blue Books, for instance, have been generally marred by imperfect display and arrangement, and the letterpress by such defects as the use of type of unsuitable size and character. It must, however, be added that considerable improvement has recently been effected."

The Committee have not, they state, attempted an ideal piece of printing. Accepting the normal Stationery Office specifications with one exception, they have sought by a careful selection and arrangement of the type to suggest a standard below which no Government publication, produced even under the most rigid conditions as to paper and material, need notably fall.

"The Committee are aware," the report continues, "that in view of the large amount of printing involved it is especially necessary to have regard to the cost of production. At the same time, good printing is, within limits, by no means inconsistent with economy. To set work in type of good design costs no more than to set it in type of poor design; and in any case there is no reason why the price of any Government publication issued for sale upon a commercial basis should not be so calculated as to cover the full cost of production."

"There can be little doubt that a well-printed book is not only more legible, but also more saleable than a book that is ill-printed; and on general grounds Government printing in a country which can claim so many of the great printers of the past ought to be as good as possible consistently with economy. The Government should set

the highest standard practicable in its own productions and so help to improve public taste. This should be the natural corollary of the policy it has advisedly adopted in aiding and maintaining schools of arts and crafts throughout the country, and in establishing the Victoria and Albert Museum at South Kensington where printing and bookbinding are among the crafts represented.

"In this connection it will not be out of place to refer to the great influence exercised in the closing years of the last century by some of the State printing presses on the Continent. . . . The Government is in a position to exercise a great influence for good upon the printing craft, partly by achieving a high standard in its own work and partly by requiring the same high standard in work put out to contract.

Some Important Principles.

"As a guide to the principles to be followed in the selection of type faces, it may be said, in quite general terms, that the letters should be as simple in form as possible. They should be broad in the face rather than compressed, and should avoid both undue thickening and thinning of the serifs and strokes, or of reducing the whites between them. The faces should be so proportioned that leading between the lines should not be necessary for legibility."

The Committee invited the leading type-founders and manufacturers of type-composing machines to submit specimens, a number of which are reproduced in the report. Most of the types selected belong either to the old face or old style, but several specimens of the modern face have been included.

In monographs, catalogues, and other publications of a special nature, the face may have to be varied to suit the publication, and the Committee have selected a number of founts which might be used for these purposes. It is realised that many of these require a paper of better quality than can be expected in Government printing in these days of great financial stringency, if their legible qualities are to be completely realised. Nevertheless, the Committee permit themselves to look forward to a time when the public resources have increased and suitable paper is once again obtainable at a reasonable price. In the case of public notices, where visibility at a distance is essential, it is especially necessary, says the Committee, that the type selected should be broad in the face, and that extra-condensed faces should be avoided.

In view of the extent to which figures now enter into human activities, it is remarkable how little attention has been given by users of figures in this country to the question of their legibility when printed, the Committee add. But in certain founts not only are the 3 and 5, and 6 and 8, less different from one

another than they might be, but there is also the objection that in these founts the tails of the 6 and 9 are easily damaged, with the result that either may be mistaken for 0.

The Committee's Recommendations.

The Committee's general summary of recommendations is as follows:—

(a) Types in which the contrast between the thick and thin stroke is exaggerated, or in which the face is unduly compressed, should not be used in Government printing.

(b) The question of the best figures for different kinds of tables should be included in the reference to the Medical Research Council, and the Consultative Committee on Official Statistics should also be asked to assist.

(c) As an interim measure, and pending the result of the inquiry suggested, table or tabular matter for statistical purposes should be set in carefully chosen modern or modernised old style figures; further, in body sizes up to 8-point, recourse should be had wherever possible to figures cast on the two-thick-space set.

(d) There should be adequate white space between each line of figures; and when rows of figures arranged in columns are to be read across the page, a white line should be left at every fifth row.

(e) It is particularly necessary in the case of table and tabular matter that special care should be given to the printing, to the suitability of paper and ink, and to the condition of the type face.

(f) In ordinary bookwork the figures should be those belonging to the particular fount used.

(g) For covers and title-pages the type should be as far as possible of one fount and of the same family as the letterpress; the arrangement of the page should be as simple as may be. While the sizes of type used should be as few as possible, it is essential that they should vary with the importance of the information to be conveyed. Extra-condensed types should be avoided.

(h) The Royal Arms appearing on the cover of the report should be adopted for the covers of Government publications of this format (foolscap folio) on which it is necessary that the Royal Arms appear.

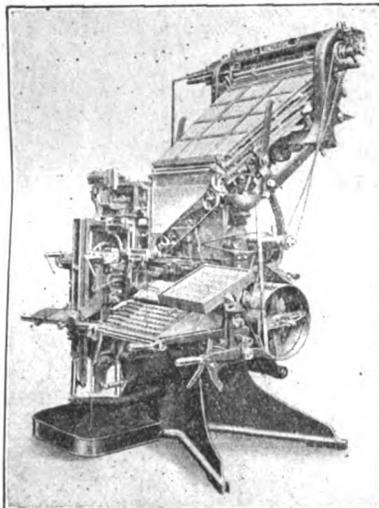

(i) For smaller covers and title-pages the reproductions shown (in other illustrations) are recommended.

(j) If a design is to be reduced to less than two-thirds linear of its size, it should always be considered whether the details ought not first to be redrawn to suit the reduction contemplated.

(k) In Government printing the work should be so imposed and trimmed that the margins on each pair of facing pages are graduated as shown approximately in the specimen pages reproduced. Care should

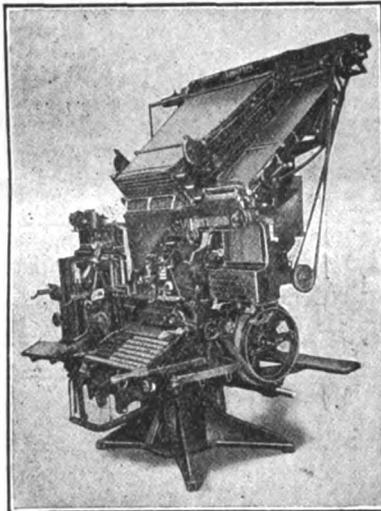

SOME

Modern Linotype Composing Machines

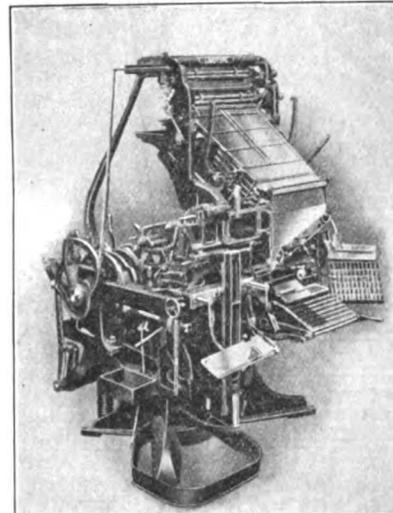

Three-Magazine Linotype.

Capacity, 540 characters. Matrices from more than one magazine cannot be used in one line, but its single distributor is common to all three magazines as required at the will of the operator. Can be installed equipped with one magazine, and additional equipments added as required. Range of bodies and faces 5 to 14 point; line measures up to 30 pica ems. Can also be equipped for head-line work. The ease and rapidity with which the operator changes from one body to another has made it a very popular model.

Three-Magazine Linotype with Auxiliary.

Sets faces from 5 to 42 point on bodies from 5 to 36 point in measures from 4 to 30 ems. The 118 keys (90 standard and 28 auxiliary) provide 596 characters. The auxiliary magazine gives additional time-saving flexibility in the composition of display cap, lines, special characters for book and job work, two-line letters, etc. Matrices from the auxiliary magazine may be assembled continuously or mixed in the same line with those from any one of the standard magazines.

Four-Magazine Two-Distributor Linotype.

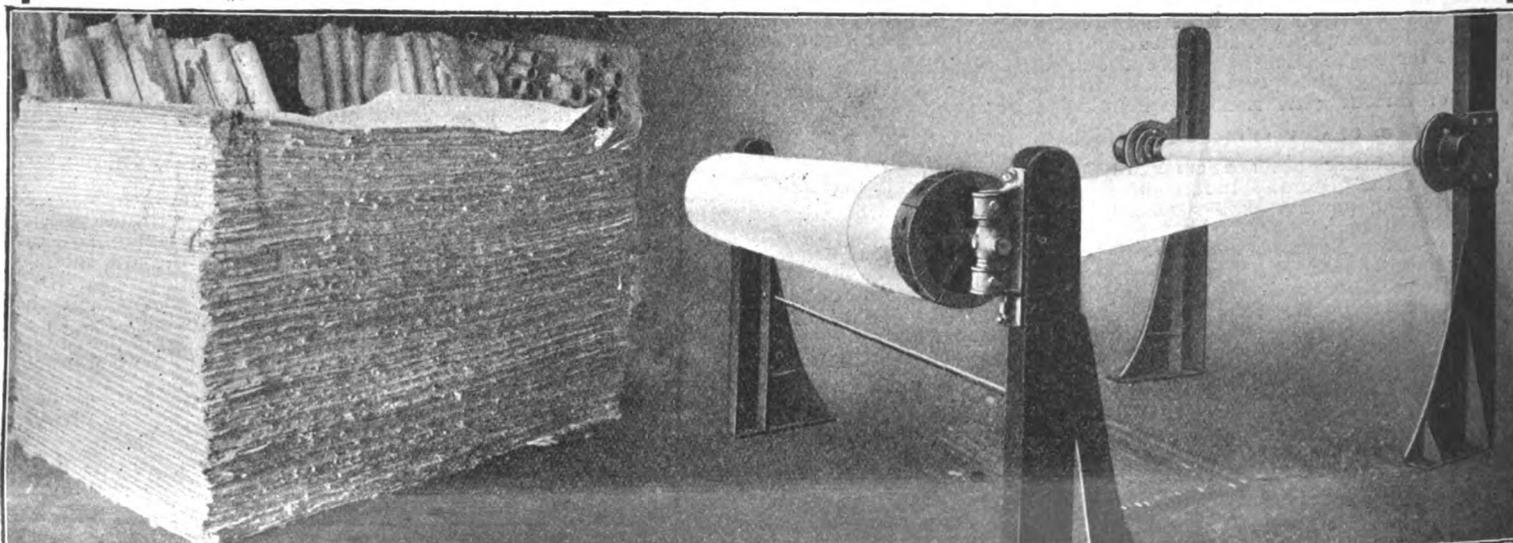

Equipped with four magazines, which with the two distributors can be used as three double units; that is to say, the first and second, second and third, or third and fourth magazines can be used together for the composition of one line. This arrangement gives the printer three distinct ranges of type face combinations in roman, italic, small caps, and display faces without loss of speed. Casts lines up to 30 or 36 pica ems, in bodies from 5 to 36 point. Can be supplied with two magazines only if so required.

Full Particulars from

LINOTYPE AND MACHINERY LIMITED, 9 KINGSWAY, LONDON.

LOVE'S PAPER RECOVERY MACHINE.

Patented (No. 144485) by Joseph Love.

THIS Machine has been invented for the purpose of speedily recovering the small quantities of paper left on centres or spools which are thrown out from Printing Machines, etc. (commonly known as "Reel Ends"), so that it may be cut into suitable sizes by the Guillotine.

CHIEF ADVANTAGES :

- | | |
|---|--|
| <p>1.—No spindles, bars, or cones are required, the reels being kept in position by a patent spring device thus saving time and labour in loading and unloading.</p> <p>2.—It occupies a space of only six feet on the run, and is quite noiseless.</p> <p>3.—The power required is such a small amount that it can be driven from any existing shafting.</p> | <p>4.—Centres of any kind or width can be worked on the machine.</p> <p>5.—It can be run at the high speed of 500 feet per minute, and will recover approximately 3 tons of paper per day.</p> <p>6.—It can be constructed to suit all requirements in the off-cut trade, and is equally valuable to Printers or in Paper Mills.</p> |
|---|--|

MACHINES SUPPLIED FROM STOCK.

MITCHELL BROS., *Engineers,* Myrtle Road Works, Brentwood, ESSEX

also be taken to maintain correct register between the facing pages of any two sections of a book.

(l) The existing instructions issued to contractors for Government printing in regard to the dimensions of the appearing matter and of the sizes of type to be used should be modified by stipulating for rather larger type and a slightly different measure. These changes should be introduced forthwith in publications issued for sale on a commercial basis.

(m) The rule which is often used to separate the double columns in reports of Parliamentary debates, minutes of evidence, and similar publications should be omitted and the columns separated simply by a white interspace, the width of the white to vary with the size of the page and the measure of the columns.

(n) The length of the columns in the case of reports of Parliamentary debates and minutes of evidence should, when the financial situation is less exigent, be shortened by two lines each; and, if and when a shorter method of recording evidence is introduced, the size of the type at present used should be increased.

(o) The Medical Research Council should be approached with a view to the inception of an inquiry on physiological and psychological lines into such questions as legibility and the optical properties of paper and ink with reference to eye-strain.

It should be added that the report is signed by Messrs. C. W. Bowerman (chairman), H. Frank Heath, Walter M. Fletcher, N. G. Scorgie, H. A. Kennedy, L. A. Legros, Joseph Thorp, and Geo. W. Jones.

News-Print Combine.

Suggested Scheme for Scandinavian Mills in U.S.A.

Scandinavian newspapers have been devoting considerable space to a proposal which is said to have been made by the manager of the Canadian Export Paper Co. of New York, by which the sales business for the United States of the news-print produced by Scandinavia will be transferred to the company mentioned.

The *Norges Handelstidende* states that from inquiries made it learns that most of the Norwegian mills are amenable to the scheme, and it is assumed that the Finnish mills will also associate themselves with it. The idea is to get the same prices as the American mills get for their output of news-print. At present the competition between the mills in the Scandinavian countries is considered to be unfortunate and the opinion now is to control sales through one channel.

The United States consumption of news-print at present amounts to from 3,000,000 to 4,000,000 tons per annum; Canada produces about 1,000,000 tons, but the Scandinavian countries only turn out about 350,000 tons annually.

The *Gothenburg Handelstidning*, dealing with the same question, states that the proposal is to combine the sale in the United States of the news-print of the paper mills in Sweden, Norway and Finland. The proposal is to form a sales company in the United States which would undertake the sale and distribution of the paper, and practically all the mills in Scandinavia, the newspaper says, have joined the scheme, although on condition that Mr. Steel succeeds in establishing the projected sales company.

While confirming the general outlines of the scheme, *Svensk Handelstidning* asserts that the inclusion of the Finnish mills is not definite, and some of the large Swedish mills which produce news-print are also standing aloof. It is not improbable, the newspaper says, that German paper exporters to the United States may also participate in the combination.

The newspaper proceeds to state that the proposed combination does not imply the elimination of competition between the Scandinavian mills among themselves nor any common basis of prices. But one of the most important results would be the cessation of the very great rivalry which has prevailed for every possible order between the agents of the Scandinavian mills in the United States.

THE extended activities of the new premises of the Testing House and Laboratory of the Manchester Chamber of Commerce in the Royal Exchange-buildings, Manchester, will include works upon paper, wood pulp and type metal.

Prominent South-Western Printer.

Mr. Frederick Steel.

The subject of the accompanying illustration—Mr. Frederick Steel, chairman of the printing firm of Frederick Steel and Co., of Stroud, Gloucestershire—has long been an indefatigable worker on behalf of the Federation of Master Printers in the south-western counties. He has already served a long term in his present office as president of the South-western Alliance of Master Printers, and he

Edinburgh Printing Classes.

Exhibition and Prize Distribution.

Excellent work is being done by the day continuation classes in connection with the printing and kindred trades conducted at the Heriot-Watt College, Edinburgh School of Art, and Milton House, Edinburgh, and an exhibition of the work done was opened recently by the Lord Provost. There were examples of the work of compositors, lithographers, stereotypers and electrotypers,

Mr. Frederick Steel.

was previously president of the Gloucestershire Master Printers' Association, whilst he has also been since 1916 a member of the Federation Council. The labour these offices have entailed has of course been considerable, and Mr. Steel's continuance in these activities proves him a worthy member of that large band of employing printers who, throughout the length and breadth of the country, are in unostentatious fashion doing valuable work for their Federation and for the general good of the craft.
